Contents

CHAPTER 1	MATHEMATICAL AND PHYSICAL SCIENCES	1
1.1	Introduction	1
1.2	Mathematical Science	1
1.3	Physical Science	4
1.4	Exercises	5
CHAPTER 2	GRAVITY	8
2.1	Introduction	8
2.2	A Simple Experiment	8
2.3	Velocity	10
2.4	Acceleration	12
2.5	Further Experiments	13
2.6	A Mathematical Model	13
2.7	Still Further Experiments	18
2.8	Exercises	19
CHAPTER 3	THEORETICAL PHYSICS AS A MATHEMATICAL SCIENCE	21
3.1	Introduction	21
3.2	Basic Mathematical Concepts	21
3.3	Basic Physical Concepts	27
3.4	Remarks	31
3.5	Exercises	31
CHAPTER 4	THE PENDULUM AND OTHER OSCILLATORS	36
4.1	Introduction	36
4.2	A Theoretical Pendulum	36
4.3	The Harmonic Oscillator	40
4.4	Harmonic Motion	44
4.5	Remarks	48
4.6	Exercises	48
CHAPTER 5	WAVES	50
5.1	Introduction	50
5.2	The Discrete String	50
5.3	Examples	53
5.4	Exercises	57
CHAPTER 6	VECTORS	59
6.1	Introduction	59
6.2	Two-Dimensional Vectors	59
6.3	Three-Dimensional Vectors	61
6.4	Exercises	66

CHAPTER 7 GRAVITATION 69
7.1 Introduction 69
7.2 The $1/r^2$ Law 69
7.3 Gravitation 71
7.4 Basic Planar Concepts 73
7.5 Planetary Motion and Discrete Gravitation 75
7.6 Newton's Method of Iteration 77
7.7 An Orbit Example 82
7.8 Gravity Revisited 84
7.9 Attraction and Repulsion 87
7.10 Remarks 89
7.11 Exercises 89
CHAPTER 8 THE THREE-BODY PROBLEM 92
8.1 Introduction 92
8.2 The Equations of Motion 92
8.3 Conservation of Energy 94
8.4 Solution of the Discrete Three-Body Problem 95
8.5 The Oscillatory Nature of Planetary Perihelion Motion 97
8.6 Center of Gravity 101
8.7 Conservation of Linear Momentum 103
8.8 Conservation of Angular Momentum 103
8.9 Exercises 107
CHAPTER 9 THE n-BODY PROBLEM 109
9.1 Introduction 109
9.2 Discrete n-Body Interaction 109
9.3 The Solid State Building Block 110
9.4 Flow of Heat in a Bar 112
9.5 Oscillation of an Elastic Bar 114
9.6 Exercises 117
CHAPTER 10 DISCRETE FLUID MODELS 118
10.1 Introduction 118
10.2 Laminar and Turbulent Flows 118
10.3 Shock Waves 123
10.4 Exercises 127
CHAPTER 11 SPINNING TOPS AND SKATERS 129
11.1 Introduction 129
11.2 The Spinning Top 129
11.3 Angular Velocity 130
11.4 The Spinning Skater 132
11.5 Exercises 136
CHAPTER 12 THE GALILEAN PRINCIPLE OF RELATIVITY 138
12.1 Introduction 138
12.2 The Galilean Principle 138
12.3 Remarks 140
12.4 Exercises 140
APPENDIX A FORTRAN PROGRAM FOR THE HARMONIC OSCILLATOR EXAMPLE OF SECTION 4.4 142
APPENDIX B FORTRAN PROGRAM FOR THE WAVE INTERACTION EXAMPLE OF SECTION 5.3 143
APPENDIX C FORTRAN PROGRAM FOR THE ORBIT CALCULATION OF SECTION 7.7 145
APPENDIX D FORTRAN PROGRAM FOR THREE-BODY PROBLEM OF SECTION 8.2 147
APPENDIX E FORTRAN PROGRAM FOR GENERAL n-BODY INTERACTION 151
ANSWERS TO SELECTED EXERCISES 157
REFERENCES AND SOURCES FOR FURTHER READING 165
INDEX 167
