CONTENTS

Preface vii
Contents ix

1. *R. Haag (Hamburg)*
   Concepts in quantum field theory 1
2. *G.A. Baker, Jr. (California) and A.S. Wightman (Princeton)*
   Trying to violate the coupling constant bounds in ϕ^4_ν quantum field theory 15
3. *J.R. Klauder (Bell Labs.)*
   Measure and support in functional integration 31
4. *T.W.B. Kibble and K.S. Stelle (London)*
   Gauge theories of gravity and supergravity 57
5. *R. Jackiw (MIT)*
   Geometry and symmetry breaking in the Liouville theory 83
6. *K. Nishijima (Tokyo)*
   Color confinement based on BRS algebra 99
7. *Y. Takahashi (Alberta)*
   The Fierz identities 121
8. *Y. Ohnuki (Nagoya) and S. Kamefuchi (Tsukuba)*
   Representations of Majorana fields with zero mode and Klein transformations 133
9. *H. Matsumoto (Alberta)*
   Thermo field dynamics and its development 171
10. *M. Suzuki (Tokyo)*
    Quantum fluctuation, thermo field dynamics and quantum Monte Carlo methods 203
11. *M. Tachiki (Tohoku)*
    Field theoretical approach to solid state physics 243
12. *F. Mancini and M. Marinaro (Salerno)*
    Quantum electrodynamics in solids 269
13. *H. Ezawa (Gakushuin)*
    Thermo field dynamics of heat conduction 305
14. *E.C.G. Sudarshan (MATSCIENCE)*
    Three perspectives on light 325
15. *M. Wadati (Tokyo)*
    Soliton: past, present and future 349

16. *E.R. Caianiello (Salerno)*
From neuronic equations to spin systems 369
17. *H. Sato (Kyoto)*
From quantum creation to galaxy formation 391
