International steering committee xxi
Local steering committee xxi
Local organizing committee xxii
Session organizers xxxiii
Sponsors xxxiii
Exhibitors xxiv
List of ISEM-symposium participants xxv

MICRO- AND PIEZOELECTRIC ACTUATORS

W. MENZ
Microactuators in LIGA technique 1

M. ESASHI
Integrated fluid control systems on a silicon wafer 5

S. OKAMOTO and T. MORI
An application of giant magnetostrictive material to clutch with the quick response 9

K. UCHINO
Photostrictive actuators 13

C.S. CHOU, J.W. YANG, Y.C. HWANG and H.J. YANG
Analysis on vibratory piezoelectric beam gyroscope 19

Z.W. JIANG, S. SAKUMA, S. CHONAN and J. TANI
Control ability of a flexible robot arm driven by piezoelectric bimorph cells 23

H. INAGAKI, T. KITAYAMA, K. ISHIYAMA and A. SAITO
Development of a piezoelectric linear actuator for a scanning tunneling microscope 27

M. AOYAGI, Y. TOMIKAWA, K. ADACHI and T. TAKANO
Characteristics and vibrational behaviors of a rod type ultrasonic motor using longitudinal and torsional vibrations 31

T. KOSAWADA, K. SUZUKI and Y. TOMIKAWA
A card sending linear ultrasonic motor using multi-beam piezoelectric vibrators 35

H. ISHIKAWA, S. OKUMA and Y. UCHIKAWA
Vibration analysis of ultrasonic motors using an SEM 39

Y.Z. LIU, S. SUDO, J. TANI, T. TAKAGI and S. CHONAN
Galloping control of a cantilever beam by using a piezoelectric actuator 43

A.S. AVETISYAN
Static nonlinear effects in electromagnetoelasticity 47

MAGNETIC FLUIDS AND MELTED STEEL

S. ASAI
Recent progress of electromagnetic processing of materials 51

S. TANIGUCHI and A. KIKUCHI
Local flow control of liquid iron in a high-frequency induction furnace 55

Y. YOSHIDA, H. HASHIZUME, K. MIYA, S. SATO and T. NASADA
Numerical simulation of molten metal flow with free surface under A.C. magnetic field 59

S. OSHIMA, R. YAMANE, K. TAKATANI, A. ONISHI and M. KAWAMOTO
Magnetic shape-control of a falling liquid metal jet 63

Y. KISHIDA and K. TAKEDA
Transition of temperature fluctuation in Bénard convection under a horizontal D.C. magnetic field 67

T. TANAKA, K. KURITA and A. KURODA
Mathematical model of cold crucible process in metallurgy 71

V. FIRETEANU, I. VIRCOLACU, V. MUNTEANU and V. GIURGEA
Electromagnetic stirring in traveling field 75

K. BESSHO, S. YAMADA, M. NAKANO and K. NAKAMOTO
Characteristics of a new flux concentration type electromagnetic pump for fast breeder reactor 79

R.E. ROSENSWEIG and J. POPPLEWELL
Influence of concentration on field-induced phase transition in magnetic fluids 83

S. KAMIYAMA, T. KAMIYA and H. IZU
Effect of magnetic fields on gas-liquid two-phase pipe flow of magnetic fluid 87

E. BLUMS and A. IRBITIS
The effect of HGMS on the particle size distribution in magnetic colloids 91

V.V. GOGOSOV, G.S. NIKOLSKIY, S.N. TSURIKOV, A.A. USANOV and A.N. VINOGRADOV
The temperature and time variations of properties of magnetic fluids. Ultrasonic methods of investigation 95

Y. IDO and T. TANAHASHI
Constitutive equations of micropolar viscoelastic magnetic fluids 99

H. KIKURA, T. SAWADA and T. TANAHASHI
Transportation of a magnetic fluid by rotating magnetic field 103

V.M. KOROVIN and Yu.L. RAIKHER
Application of magnetic fluids in the ultrasonic non-destructive testing 107

V.G. BASHTOVOI, V.A. CHERNOBAI and Yu.P. YARMOLCHICK
Heat transfer control in magnetofluid emulsion 111

V.G. BASHTOVOI, M.S. KRAKOV and A.S. KORDELJUK
Electromagnetic forces effect on heat transfer through magnetofluid coating 115

N. RUDRAIAH, G.N. SEKHAR and S. KAMIYAMA
Thermo-haline convection in magnetic fluids 119

T. FUJITA, I.J. LIN and M. MAMIYA
Viscosity change of dielectric fluid dispersing barium titanate by applying electric field 123

M. FENG, Z.S. WANG and H.S. CHANG
On sealing and lubricating behavior of a practical bearing lubricated with ferrofluid 127

S. SUDO, H. HASHIMOTO and K. KATAGIRI
Cavity formation with magnetic drop impacts 131

K. SHIMADA, T. OYAMA, H. NISHIYAMA and S. KAMIYAMA
Oscillatory flow of magnetic fluid in a vertical pipe in a transverse and longitudinal magnetic field 135

N. UMEHARA, K. KATO and H. NAKANO
Magnetic fluid grinding of ceramic rollers 139

N. UMEHARA, K. KATO and I. KANAGAWA
Magnetic fluid grinding of ceramic flat surfaces 143

Z. PERADZYNSKI
Nonlinear wave-wave interaction.
Application to MHD and magnetic fluids 147

J.-C. BACRI, R. PERZYNSKI, D. SALIN, J. SERVAIS,
J. GAGNEPAIN-BEYNEIX and R. VERHILLE
Magnetic fluid accelerometer 151

MAGNETIC BEARINGS

P.E. ALLAIRE, R.R. HUMPHRIS and D.W. LEWIS
The father of magnetic bearings: Professor Jesse W. Beams 155

F. MATSUMURA
Recent trends on theory and development of magnetic bearings 159

J.L. NIKOLAJSEN and A.B. PALAZZOLO
Electromagnetic force application in rotordynamic research 163

H.B. ZHANG, J. TANI, Y. OKADA and T. TAKAGI
Vibration control of a partially liquid-filled rotor by using
magnetic bearings 167

Y. OKADA, H. HASHITANI, H. ZHANG and J. TANI
Electromagnets as velocity sensors and vibration control actuators 171

A. CHARARA, B. CARON and G. LEMARQUAND
Modelling and noninteractive control of an active
magnetic bearing 175

B. NAGAI and Y. OKADA
Modal control of flexible rotor by digital magnetic bearings 179

K. NONAMI and H. YAMAGUCHI
Robust control of magnetic bearing systems by means of
sliding mode control 183

NONDESTRUCTIVE TESTING USING ELECTROMAGNETIC PHENOMENA

N. IDA
Electromagnetic field modeling for nondestructive testing of composite materials 187

B. MARUSZEWSKI
An inverse magnetoelastic method in nondestructive testing 191

K.M. GAWRYLCZYK, M. GRAMZ, S. GRATKOWSKI, R. SIKORA and M. ZIOLKOWSKI
Recent developments of eddy current analysis in NDT equipment 195

T. YAMADA
Basic study of an electromagnetic thickness sensor 199

Y.S. SUN, J.T. SI, D.F. LIU and L.Z. TU
Computer animated presentation visualizing the phenomena in remote field eddy current non-destructive testing 203

M.J. CHEN and Y.S. SUN
A finite element prediction of possible application of pulse excitation in remote field eddy current nondestructive inspection devices 207

N.N. ROGACHEVA
Piezoceramic gages of dynamic strains 211

Y. SHINDO, T. SUZUKI and H. HOSHIKAWA
Study on remote field eddy current testing for ferromagnetic double wall tubes 215

Y. YAMADA, H. HASHIZUME, K. MIYA, K. MORIMOTO, K. SAKATA and N. SHIMIZU
Numerical and experimental analysis of eddy current testing based on T-method 219

ADVANCED COMPUTATIONAL ELECTROMAGNETIC PHENOMENA

C.R.I. EMSON and C.W. TROWBRIDGE
Electromagnetic field computation from DC to daylight 223

T. NAKATA and K. FUJIWARA
Presents status of 3-D numerical analysis of magnetic fields 227

A. HAZNADAR and Z. STIH
Computation of electric and magnetic fields and forces in design of power apparatus 231

M. ENOKIZONO and S. NAGATA
Magnetic field analysis by boundary element method taking speed electromotive force into account 235

M. ENOKIZONO, T. TODAKA and S. HASAMA
Thermal and magnetic field analysis of high frequency induction heating 239

M. ENOKIZONO
Numerical simulation of induction motor by finite element method 243

H. TAKEDA and A. KUROMIYA
Application of electromagnetic analysis to fuel injector designing 247

S.R.H. HOOLE
Inverse solution of the array antenna problem 251

M. KANAMORI and Y. ISHIHARA
Shape optimization of magnetic pole on an electromagnetic damper 255

Y. KAWASE, Y. MURAKAMI and Y. OHDACHI
Optimum design of automotive solenoid valve using dynamic analysis of finite element method 259

K. IWAI, K. SASSA and S. ASAI
Theoretical analysis of the magnetic field of a cold crucible 263

M.R.R. HOOLE and S.R.H. HOOLE
The Hessian in inverse problem optimization in electromagnetic field computation 267

Y. ICHII, Y. ISHIHARA, T. TODAKA, K. HIRATA and Y. KAGAMI
A study of the force on the magnetic pole 271

H. IGARASHI and T. HONMA
An analysis of MHD equilibria in straight stellarators using finite element method 275

A. KIMURA, T. MATUZAKA and Y. KAGAWA
Finite element calculation of electromagnetic force based on permeance concept 279

T. TOKUMASU, H. MATSUMOTO, M. ARATA and Y. KOBAYASHI
Analysis of electromagnetic crushing force on superconducting generator warm damper 283

A. KRAWCZYK and A. GMITRZAK
Electromagnetic forces due to eddy currents 287

S. HEMMI
Nodal forces due to the Maxwell's stress tensors in the FEM analysis 291

A. OHBA and Y. NOJIMA
Fictitious thin air element in computing force of mutually stuck ferromagnetic materials 295

Y. NOSE, T. KABASHIMA and T. SUMIMOTO
Force calculation in 3-D magnetic field 299

H. SASAMOTO, K. TAHARA and M. SHIZUKA
Finite element analysis of electromagnetic forces on a magnet switch for a co-axial type starter motor 303

W. CHEN, G.S.ZHANG and Y.S. SUN
An efficient algorithm to perfect the $\bar{A}^*$-ψ formulation for eddy current field problems 307

L.R. TURNER and L. KETTUNEN
A volume integral formulation for magnetostatics with nonlinear materials 311

S.R.H. HOOLE and S. SUKUMAR
Terminal boundary impedances for short and long slots in finite element electromagnetic field computation 315

MAGNETIC LEVITATION AND APPLICATION OF SUPERCONDUCTIVITY

T. SHIMOGO and Y. OSHINOYA
Electromagnetic levitation of elastic plates 319

K. YOSHIDA, H. MUTA and N. TESHIMA
Underwater linear motor car 323

H. TAMURA and T. MASUNAGA
On the chaotic motion of magnetically levitated body 327

C.S. CHOU and J.L. LIAUNG
Levitation forces in superconducting $YBa_2Cu_3O_{7-x}$ ceramics 331

T. KITAMURA and M. KOMORI
Superconductive actuator design 335

M. KOMORI and T. KITAMURA
A superconducting levitational mechanism using alternating magnetic pole pattern 339

T. HASEBE, S. YASUHARA and M. ISHIHARA
Magnetic levitation in the cylindrical superconductor 343

R. TAKAHATA, H. UEYAMA and T. YOTSUYA
Load carrying capacity of superconducting magnetic bearings 347

T. SAKAMOTO and A.R. EASTHAM
Static stability of the split-guideway electrodynamic levitation system 351

K. NANBU, Y. SHOJI, I. WARABIOKA, S. IGARASHI, T. YOKOI and J. TANI
Linear drive of an aluminum capsule falling in an evacuated tube 355

K. OGUCHI, Y. TOMIGASHI and K. OKADA
Stability and robust control of a digitally-controlled single axis magnetic suspension device using a DC chopper 359

II.H. PARK, B.T. LEE and S.Y. HAHN
Pole shape design of levitation magnet for restoring force improvement 363

A. MORAN and M. NAGAI
Performance sensitivity of optimally controlled active secondary suspension applied to repulsive Maglev vehicles 367

T. ONUKI, K. YAGI, S. WAKAO and B.II. KWON
Calculation of electromagnetic forces in magnetic levitation system by 3-D magnetic field analysis 371

E. TADA
Propulsive analysis for high efficient superconducting EMT-powered ships 375

H. OHSAKI, H. DEGUCHI and E. MASADA
Dynamic behavior analysis of the superconducting magnets for an EDS-LSM Maglev 379

A. PANAITESCU
Linear induction motor for high speed trains 383

Y.H. CHO, P.S. SHIN and Y.J. KIM
A 2-D finite element analysis of single-sided LIM using current and magnetic vector potential 387

T. SAITOH, H. MIKAMI and E. DANCER
Study on electromagnetic force in a superconducting magnetically levitated vehicle by a 2-D finite element method 391

T. KOBAYASHI, M. SHIBATA, N. MAKI and T. SAITOH
Study of electromagnetic force on superconducting magnets of the magnetically levitated train 395

ELECTROMAGNETIC MATERIALS AND WAVE PROPAGATION

G.A. MAUGIN
Pseudomomentum and computation of material forces in electromagnetic materials 399

C.S. MURANAKA, K. OHMORI, Y. HAYASHI and K.I. ARAI
Large magnetostrictive transducer 403

R. KOTOWSKI
Polarization effects around the acoustic axes in piezoelectrics 407

T.S. VASHAKMADZE
Some mathematical problems of magnetopiezoelasticity 411

E. INFELD, G. ROWLANDS and T. LENKOWSKA-CZERWIŃSKA
On introducing dynamics into the theory of nucleation of coherent structures 415

Cz. RYMARZ
Ferroelectric oriented layered media subject to electromagnetic fields 421

H. SAOTOME, S. HAYANO, A. MIYAZAKI and Y. SAITO
A representation of magnetization characteristics for computational magnetodynamics 425

K. MAJORKOWSKA-KNAP, T. MURA and J. LENZ
Novel features of electromechanical surface waves within a nonlocal theory 429

G.R. LIU and J. TANI
Surface waves in functionally gradient piezoelectric material plates 433

B. HONEIN, A.M.B. BRAGA, P. BARBONE and G. HERRMANN
Wave propagation in piezoelectric layered media 437

K.B. KAZARIAN and R.A. KAZARIAN
Dynamics of the elastic multi layered sheet with a superconductive electrical current 441

ELECTROMAGNETOMECHANICAL INTERACTION

Y. TANAKA
A calculating method of the deflection and eddy current of conductors in a time varying electro-magnetic field 445

T. TAKAGI, S. MATSUDA, J. TANI and M. SAIGO
Dynamic behavior analysis of a thin plate under moving magnetic field considering a coupling between magnetic field and vibration 449

M. NEMOTO, Y. KAWAMOTO, K. INOUE, K. IOKI,
M. HASHIMOTO, M. TSUCHIMOTO and K. MIYA
Experimental study on impulsive electromagnetic buckling of cylindrical shells 453

J. TANI, Q. ZHU, T. TAKAGI and K. OHTOMO
Experiments on chaotic motions of a magnetoelastically buckled beam 457

Y. SHINDO and Y. ATOBE
Electromagnetic twisting of a through crack in a conducting plate of finite width 461

A. BOSSAVIT
On local computation of the force field in deformable bodies 465

D. GAFKA
Linearized equations for SAW in stressed media. Force sensor 469

VARIOUS PROBLEMS OF ELECTROMAGNETIC FORCES

J.P. NOWACKI and Z. PRĘTCZYŃSKI
Dynamics of dislocations in ferroelectric crystals 473

M. MAHESWARAN, P.R.P. HOOLE, S. SUKUMAR and S.R.H. HOOLE
Electric space charge damage to modern aircraft and helicopters 477

M.A.L. ABDUL HALEEM, S. SUKUMAR, P.R.P. HOOLE and S.R.H. HOOLE
High frequency lightning-like electromagnetic pulses and plane metallic surfaces: experimental results 481

K. SETO and K. SAWATARI
Active dynamic absorber with electromagnetic force and its vibration control effect 485

S. YAMASHITA and K. SETO
Vibration and noise control using dual dynamic absorbers with magnetic damping 489

V.Z. PARTON
Mechanical, electric and magnetic fields in bodies with cuts 493

S. OIKAWA, N. KAYUKAWA and T. ENOTO
Generalized Ohm's law for turbulent plasmas 499

S. UENO, K. TAZUME, S. IWAKI and M. IWASAKA
Simulation of magnetic curtain produced by magnetic fields 503

T. SKOCZKOWSKI
Mathematical model of induction heating of pipes under nonsinusoidal supplying voltage 507

Y. HOSHI and H. YOSHIDA
Mini-railgun: a particle accelerator by electrically heated gas and plasma pressure 511

N. TOMIMORI, K. TANAKA, M. SUTO, K. MATSUBARA and T. KONNO
Electromagnetic noise reduction for induction motors 515

K. TSURUMOTO and S. KIKUCHI
The design and performance characteristics of a new magnetic bevel gear using permanent magnet 519

I. AOKI and T. HIGUCHI
Quick stopping system of high-speed movement by electromagnetic force and its applications 523

ANNEX:
G.A. Maugin
Contribution to the history of meetings on electromagnetics in materials 527

Author index 529
