Editor's Statement . . . . . xv

Section Editor's Foreword . . . . . xvii

Preface . . . . . xix

**Chapter 0. Introduction** . . . . . 1

0.1. Generalities . . . . . 1
0.2. Description of the Thermodynamic Formalism . . . . . 3
0.3. Summary of Contents . . . . . 9

**Chapter 1. Theory of Gibbs States** . . . . . 11

1.1. Configuration Space . . . . . 11
1.2. Interactions . . . . . 12
1.3. Gibbs Ensembles and Thermodynamic Limit . . . . . 13
1.4. Proposition . . . . . 14
1.5. Gibbs States . . . . . 14
1.6. Thermodynamic Limit of Gibbs Ensembles . . . . . 15
1.7. Boundary Terms . . . . . 16
1.8. Theorem . . . . . 18
1.9. Theorem . . . . . 18
1.10. Algebra at Infinity . . . . . 19
1.11. Theorem (Characterization of Pure Gibbs States) . . . . 20
1.12. The Operators $\mathfrak{M}_\Lambda$ . . . . . 21
1.13. Theorem (Characterization of Unique Gibbs States) . . 21
1.14. Remark . . . . . 22
Notes . . . . . 23
Exercises . . . . . 23

**Chapter 2. Gibbs States: Complements** . . . . . 25

2.1. Morphisms of Lattice Systems . . . . . 25
2.2. Example . . . . . 26
2.3. The Interaction $F^*\Phi$ . . . . . 26
2.4. Lemma . . . . . 27
2.5. Proposition . . . . . 27

2.6. Remarks . . . . . 28
2.7. Systems of Conditional Probabilities . . . . . 29
2.8. Properties of Gibbs States . . . . . 30
2.9. Remark . . . . . 31
Notes . . . . . 31
Exercises . . . . . 32

**Chapter 3. Translation Invariance. Theory of Equilibrium States . . 35**

3.1. Translation Invariance . . . . . 35
3.2. The Function $A_\Phi$ . . . . . 36
3.3. Partition Functions . . . . . 37
3.4. Theorem . . . . . 38
3.5. Invariant States . . . . . 41
3.6. Proposition . . . . . 42
3.7. Theorem . . . . . 42
3.8. Entropy . . . . . 44
3.9. Infinite Limit in the Sense of van Hove . . . . . 45
3.10. Theorem . . . . . 46
3.11. Lemma . . . . . 47
3.12. Theorem . . . . . 48
3.13. Corollary . . . . . 50
3.14. Corollary . . . . . 51
3.15. Physical Interpretation . . . . . 51
3.16. Theorem . . . . . 52
3.17. Corollary . . . . . 52
3.18. Approximation of Invariant States by Equilibrium States . . . . . 52
3.19. Lemma . . . . . 53
3.20. Theorem . . . . . 54
3.21. Coexistence of Phases . . . . . 55
Notes . . . . . 57
Exercises . . . . . 57

**Chapter 4. Connection between Gibbs States and Equilibrium States . . . . . 59**

4.1. Generalities . . . . . 59
4.2. Theorem . . . . . 60
4.3. Physical Interpretation . . . . . 61
4.4. Proposition . . . . . 61
4.5. Remark . . . . . 62
4.6. Strict Convexity of the Pressure . . . . . 63
4.7. Proposition . . . . . 63
4.8. $\mathbf{Z}^\nu$-Lattice Systems and $\mathbf{Z}^\nu$-Morphisms . . . . . 64

4.9. Proposition . . . . . 64
4.10. Corollary . . . . . 65
4.11. Remark . . . . . 66
4.12. Proposition . . . . . 66
4.13. Restriction of $\mathbf{Z}^\nu$ to a Subgroup $G$ . . . . . 66
4.14. Proposition . . . . . 67
4.15. Undecidability and Non-periodicity . . . . . 68
Notes . . . . . 68
Exercises . . . . . 69

**Chapter 5. One-Dimensional Systems** . . . . . 71

5.1. Lemma . . . . . 72
5.2. Theorem . . . . . 73
5.3. Theorem . . . . . 73
5.4. Lemma . . . . . 74
5.5. Proof of Theorems 5.2 and 5.3 . . . . . 75
5.6. Corollaries to Theorems 5.2 and 5.3 . . . . . 78
5.7. Theorem . . . . . 78
5.8. Mixing $\mathbf{Z}$-Lattice Systems . . . . . 80
5.9. Lemma . . . . . 80
5.10. Theorem . . . . . 82
5.11. The Transfer Matrix and the Operator $\mathfrak{L}$ . . . . . 82
5.12. The Function $\psi_>$ . . . . . 83
5.13. Proposition . . . . . 84
5.14. The Operator $\mathfrak{S}$ . . . . . 84
5.15. Lemma . . . . . 85
5.16. Proposition . . . . . 85
5.17. Remark . . . . . 86
5.18. Exponentially Decreasing Interactions . . . . . 86
5.19. The Space $\mathfrak{F}^\theta$ and Related Spaces . . . . . 87
5.20. Proposition . . . . . 87
5.21. Theorem . . . . . 88
5.22. Remarks . . . . . 89
5.23. Lemma . . . . . 89
5.24. Proposition . . . . . 90
5.25. Remark . . . . . 91
5.26. Theorem . . . . . 91
5.27. Corollary . . . . . 92
5.28. Zeta Functions . . . . . 92
5.29. Theorem . . . . . 93
5.30. Remark . . . . . 95
Notes . . . . . 95
Exercises . . . . . 96

**Chapter 6. Extension of the Thermodynamic Formalism** . . . . . 105

6.1. Generalities . . . . . 105
6.2. Expansiveness . . . . . 106
6.3. Covers . . . . . 106
6.4. Entropy . . . . . 107
6.5. Proposition . . . . . 107
6.6. Pressure . . . . . 108
6.7. Other Definitions of the Pressure . . . . . 109
6.8. Properties of the Pressure . . . . . 111
6.9. The Action $\tau^a$ . . . . . 111
6.10. Lemma . . . . . 112
6.11. Lemma . . . . . 112
6.12. Theorem (Variational Principle) . . . . . 113
6.13. Equilibrium States . . . . . 115
6.14. Theorem . . . . . 115
6.15. Remark . . . . . 116
6.16. Commuting Continuous Maps . . . . . 117
6.17. Extension to a $\mathbf{Z}^\nu$-Action . . . . . 117
6.18. Results for $\mathbf{Z}^\nu_>$-Actions . . . . . 118
6.19. Remark . . . . . 119
6.20. Topological Entropy . . . . . 119
6.21. Relative Pressure . . . . . 120
6.22. Theorem . . . . . 121
6.23. Corollary . . . . . 121
Notes . . . . . 122
Exercises . . . . . 122

**Chapter 7. Statistical Mechanics on Smale Spaces** . . . . . 125

7.1. Smale Spaces . . . . . 125
7.2. Example . . . . . 127
7.3. Properties of Smale Spaces . . . . . 127
7.4. Smale's "Spectral Decomposition" . . . . . 129
7.5. Markov Partitions and Symbolic Dynamics . . . . . 129
7.6. Theorem . . . . . 130
7.7. Hölder Continuous Functions . . . . . 130
7.8. Pressure and Equilibrium States . . . . . 131
7.9. Theorem . . . . . 132
7.10. Corollary . . . . . 132
7.11. Remark . . . . . 133
7.12. Corollary . . . . . 133
7.13. Corollary . . . . . 134
7.14. Equilibrium States for $A$ Not Hölder Continuous . . . 135

7.15. Conjugate Points and Conjugating Homeomorphisms . 136
7.16. Proposition . . . . . 137
7.17. Theorem . . . . . 137
7.18. Gibbs States . . . . . 138
7.19. Periodic Points . . . . . 138
7.20. Theorem . . . . . 139
7.21. Study of Periodic Points by Symbolic Dynamics . . . . 140
7.22. Proposition . . . . . 140
7.23. Zeta Functions . . . . . 140
7.24. Theorem . . . . . 142
7.25. Corollary . . . . . 143
7.26. Expanding Maps . . . . . 143
7.27. Remarks . . . . . 145
7.28. Results for Expanding Maps . . . . . 145
7.29. Markov Partitions . . . . . 146
7.30. Theorem . . . . . 146
7.31. Applications . . . . . 147
Notes . . . . . 149
Exercises . . . . . 149

**Appendix A.1. Miscellaneous Definitions and Results** . . . . . 153

A.1.1. Order . . . . . 153
A.1.2. Residual Sets . . . . . 153
A.1.3. Upper Semi-continuity . . . . . 154
A.1.4. Subadditivity . . . . . 154

**Appendix A.2. Topological Dynamics** . . . . . 155

**Appendix A.3. Convexity** . . . . . 157

A.3.1. Generalities . . . . . 157
A.3.2. Hahn–Banach Theorem . . . . . 157
A.3.3. Separation Theorems . . . . . 158
A.3.4. Convex Compact Sets . . . . . 158
A.3.5. Extremal Points . . . . . 158
A.3.6. Tangent Functionals to Convex Functions . . . . . 159
A.3.7. Multiplicity of Tangent Functionals . . . . . 159

**Appendix A.4. Measures and Abstract Dynamical Systems** . . . . . 161

A.4.1. Measures on Compact Sets . . . . . 161
A.4.2. Abstract Measure Theory . . . . . 162
A.4.3. Abstract Dynamical Systems . . . . . 162
A.4.4. Bernoulli Shifts . . . . . 163

A.4.5. Partitions . . . . . 163
A.4.6. Isomorphism Theorems . . . . . 164

**Appendix A.5. Integral Representations on Convex Compact Sets** . . . 165

A.5.1. Resultant of a Measure . . . . . 165
A.5.2. Maximal Measures . . . . . 166
A.5.3. Uniqueness Problem . . . . . 166
A.5.4. Maximal Measures and Extremal Points . . . . . 166
A.5.5. Simplexes of Measures . . . . . 167
A.5.6. $\mathbf{Z}^{\nu}$-Invariant Measures . . . . . 167

**Appendix B. Open Problems** . . . . . 169

B.1. Systems of Conditional Probabilities (Chapter 2) . . . 169
B.2. Theory of Phase Transitions (Chapter 3) . . . . . 169
B.3. Abstract Measure-Theory Viewpoint (Chapter 4) . . . 169
B.4. A Theorem of Dobrushin (Chapter 5) . . . . . 170
B.5. Definition of the Pressure (Chapter 6) . . . . . 170
B.6. Shub's Entropy Conjecture (Chapter 6) . . . . . 170
B.7. The Condition (SS3) (Chapter 7) . . . . . 170
B.8. Gibbs States on Smale Spaces (Chapter 7) . . . . . 170
B.9. Cohomological Interpretation . . . . . 170
B.10. Smale Flows (Chapter 7 and Appendix C) . . . . . 170

**Appendix C Flows** . . . . . 171

C.1. Thermodynamic Formalism or a Metrizable Compact Set . . . . . 171
C.2. Special Flows . . . . . 172
C.3. Special Flow over a Smale Space . . . . . 172
C.4. Problems . . . . . 173
References . . . . . 175
Index . . . . . 181
