CONTENTS

VOLUME 1

1. ELECTRON CORRELATION IN PHOTO-ABSORPTION AND ELECTRON SCATTERING

Page

1.01 Electron correlations in photoabsorption for beryllium isoelectronic sequence.
V. Radojević, Dj. Zivanović, N.A. Cherepkov and D. Rakovic 2

1.02 Electron impact excitation of $O(3P-3s3S^{\circ})$
R.J.W. Henry 3

1.03 Electron scattering resonances and threshold effects near $3^{3,1}S$ states of He.
R.K. Nesbet 4

1.04 Modification of the method of polarized orbitals for electron-alkali scattering : calculation of e-Li.
A.K. Bhatia, A. Temkin, A. Silver 6

2. HEAVY PARTICLE COLLISIONS. DIABATIC CORRELATIONS

2.01 On diabatic Mo correlations rules.
V.M. Lavrov 10

2.02 Diabatic correlation diagrams for quasimolecular collision processes.
V.K. Nikulin and N.A. Guschina 12

2.03 Experimental investigation of 2s-vacancy production in 0.3-300 keV Ne°/Ne^{+}-Ne collisions.
T. Andersen, E. Bøving, P. Hedegaard and J. Østgaard Olsen 14

2.04 On the formation of 2s holes in Ne^{+}-Ne collisions.
N. Gruen and R. Albat 16

2.05 Ionization and inelastic energy loss measurements of large angle 0.4 to 1.0 MeV Kr^{+}-Xe collisions.
Q.C. Kessel and A.A. Antar 18

2.06 Production of inner-shell vacancies in slow ion-atom collisions for projectiles $Z \geqslant 10$.
R.J. Fortner, P.H. Woerlee, Th.P. Hoogkamer and F.W. Saris 20

3. REACTIVE AND DISSOCIATIVE COLLISIONS (LOW-ENERGIES)

3.01 Collision-induced dissociation of H_2^+ by He at eV energies. Crossed-beam and trajectory studies
L. Zülicke, U. Havemann, F. Schneider, Ch. Zuhrt, V. Pacák and Z. Herman 24

3.02 Reconciliation of crossed-beam results on the hydrogen exchange reaction.
K.T. Tang and J.R. Grover 26

3.03 Ba + HCl → BaCl + H. Energy dependence of the BaCl product population distribution.
A. Schultz and A. Siegel 27

3.04 Collision induced dissociation : quantum mechanical probabilities for collinear $H + H_2 \rightarrow H + H + H$.
K.C. Kulander 29

3.05 Reactive scattering of atomic oxygen.
P.N. Clough, G.M. O'Neill and J. Geddes 30

3.06 Classical S-matrix study of tunneling hydrogen atom reactions with hydrocarbons.
M.Ya. Ovchinnikova 31

3.07 Luminescent reactions between calcium atoms in metastable states and hydrogen chloride.
U. Brinkmann and H. Telle 33

3.08 Mass-spectrometric investigation of very fast reactions of fluorine atoms with radicals.
V.L. Tal'Rose, N.I. Butkovskaya, M.N. Larichev, I.O. Leipunskii and I.I. Morozov 34

3.09 Two-channel dissociation $H_2 + H = H + H + H$.
V.I. Osherov and V.G. Ushakov 36

4. HEAVY PARTICLE COLLISIONS. INNER SHELL COULOMB IONIZATION

4.01 Pb-K-shell ionization in α decay and α backscattering. I. Experiment.
M. Lund, E. Lægsgaard, J.U. Andersen and L. Kocbach 40

4.02 Pb-K-shell ionization in α decay and α backscattering. II. Theory.
L. Kocbach, J.U. Andersen, E. Lægsgaard and M. Lund 42

4.03 Polarization of X rays from light ion-atom collisions.
L. Kocbach and K. Taulbjerg 44

4.04 A semiclassical coulomb collision model for alignment of the 2p shell with one vacancy.
E. Merzbacher and J. Wu 46

4.05 Capture of inner-shell electrons by 0.2 to 2.0 MeV protons.
M. Rødbro, E.H. Pedersen and J.R. MacDonald 48

4.06 Double K-shell ionization of light elements by hydrogen and helium ion impact.
K. Kawatsura, K. Ozawa, F. Fujimoto and M. Terasawa 50

4.07 A semiclassical approximation in inelastic ion-atom collisions.
K. Taulbjerg 52

4.08 K-shell ionization probability for the free-fall atomic model.
M. Gryzinski and J. Kunc 54

4.09 Calculations of the cross sections of two-electron removal from inner shells of atoms by protons.
A.K. Kaminsky, S.V. Lovtsov and M.I. Popova 56

4.10 Coulomb deflection effects on K-vacancy production by protons and alpha particles
R. Anholt 58

4.11 Coulomb deflection and wavefunction dependency in proton-induced L-shell ionization
P.A. Amundsen and O. Aashamar 60
4.12 L-subshell ionization of heavy atoms by proton impact.
A.G. de Pinho, C.V. Barros Leite and N.V. de Castro Faria 62
4.13 Cross sections for the Mα, Mβ and Mγ X-ray production in Pt and Pb as a function of the proton energy.
V.P. Petukhov, E.A. Romanovsky, I.M. Kruglova, V.S. Nikolaev and V.A. Sergeev 64
4.14 K-shell ionization of atoms by relativistic protons.
B.L. Moiseiwitsch, P.H. Norrington and D.M. Davidović 66
4.15 The ionization of relativistic K-electrons by light ion impact in the MeV energy range.
H. Tawara, M. Kamiya, K. Ishii, K. Sera and S. Morita 68
4.16 Directional anisotropy of secondary electron bremsstrahlung induced by proton bombardment of thin solid target.
K. Ishii, M. Kamiya, K. Sera, S. Morita and H. Tawara 70
4.17 Electron relativistic effects in the K-shell ionization of Z=50-83 atoms by 9-155 MeV alpha particles.
M. Dost, S. Hoppenau, J. Kising, S. Röhl and W.A. Schönfeldt 72
4.18 Relative K-shell X-ray production cross sections for Cu and Ag for 150 to 800 keV proton and He^+ bombardement.
M. Geretschläger and O. Benka 74
4.19 Ionization probability at zero impact parameter of 7 MeV protons on molybdenum, tin and gold.
S. Röhl, S. Hoppenau and M. Dost 76
4.20 Inner shell electron ejection in the alpha decay of ^{210}Po.
J. Law 78

5. HEAVY PARTICLE COLLISIONS :THERMAL ENERGIES - ELASTIC SCATTERING

5.01 Total cross sections at subthermal energies.
J.G. Skofronick, R.S. Grace and D.L. Johnson 80
5.02 Absolute total collision cross sections for the scattering of metastable helium and neon atoms from rare gas atoms and diatomic molecules
S.F.W. Harper and A.C.H. Smith 82
5.03 Cs^+-Kr and Cs^+-Xe interaction potentials.
I.R. Gatland, E.W. McDaniel, H.W. Ellis, M.G. Thackston, F.L. Eisele and W.M. Pope 83
5.04 Glory undulations in the total cross sections and small angle differential cross section for Ar-Kr.
H.C.W. Beijerinck, P.M.A. Van Der Kam, D.Bol, W. Thijssen and N.F. Verster 84
5.05 Absolute total elastic cross sections for collisions of Ne with Ar, Kr and Xe.
B. Brunetti, E. Luzzatti, F. Pirani and F. Vecchiocattivi 86
5.06 Resonance structure in the low velocity scattering of H atoms from C_2H_4
Lev.Y. Rusin and J.P. Toennies 88

6. PHOTODISSOCIATION

6.01 Threshold photofragment spectroscopy of $O_2^+(a^4\Pi_u)$.
M. Tadjeddine, B.A. Huber, R. Abouaf, P.C. Cosby and J.T. Moseley 92

6.02 Experimental and computational study of rotation effects in molecular ion photodissociation.
C. Pernot, J.B. Ozenne, M. Panczel and J. Durup 94

6.03 Photodissociation of energy selected ions by threshold photoelectron-photoion coincidences.
P.M. Guyon, T. Baer, L.F.A. Ferreira, I. Nenner, A. Tabche-Fouhaile, R. Botter, and T.R. Govers 96

6.04 H^+ production in the photoionization of H_2, CH_4 and H_2O.
R. Browning, S. Strathdee and R. Cunningham 98

6.05 Ion-pair formation in Cs_2 by two-photon absorption.
M.J.M. Beerlage, M. Klewer and M.J. Van der Wiel 100

6.06 High-resolution photodissociation study in H_2 from 850 Å to 750 Å
M. Glass-Maujean, P.M. Guyon and J. Breton 102

6.07 Photoexcitation spectra for autoionization and predissociation of Rydberg terms of NO in the energy range from 15.9 to 22.0 eV
H. Schmoranzer and R. Zietz 104

6.08 Photofragment spectroscopy and potential curves of Ar_2^+
J.T. Moseley, R.P. Saxon, B.A. Huber, P.C. Cosby, R. Abouaf and M. Tadjeddine 106

6.09 Photofragmentation of isosceles H_3^+
K.C. Kulander and C. Bottcher 108

6.10 Photoionization of N_2O : mechanisms of dissociative ionization.
J. Berkowitz and J.H.D. Eland 110

6.11 Photodissociation of O_3^- and its hydrates.
P.C. Cosby, G.P. Smith, J.H. Ling, J.R. Peterson and J.T. Moseley 111

6.12 Photon interactions involving NO_2^-, NO_3^- and their hydrates.
P.C. Cosby, G.P. Smith, J.R. Peterson and J.T. Moseley 113

6.13 Collisional deexcitation and photodetachment of excited NO_2^-.
B.A. Huber, P.C. Cosby, J.R. Peterson and J.T. Moseley 115

6.14 Configuration interaction in the spectrum of singly ionized Xenon.
Th.M. El-Sherbini 117

7. ELECTRON-MOLECULE COLLISIONS : EXPERIMENT

7.01 Isotope effects in molecular scattering by electrons.
E.S. Chang and S.F. Wong 120

7.02 Resonant electron scattering from vibrationally excited N_2.
S.F. Wong, J.A. Michejda and A. Stamatovic 122

7.03 Resonances in hydrogen halides.
D. Mathur and J.B. Hasted 124

7.04 Feshbach resonances in electron scattering from NO.
F. Gresteau, R.I. Hall, J. Mazeau and D. Vichon 126

7.05 Cross sections for electron impact excitation of the electronic states of N_2.
D.C. Cartwright, S. Trajmar and A. Chutjian 128

7.06 Differential and integral cross sections for excitations in O_2 by electron collision.
K. Wakiya, T. Takayanagi and H. Suzuki 130

8. RESONANCES IN ELECTRON MOLECULE COLLISIONS

8.01 Resonant angular distributions : application to e-CO.
E.S. Chang 134

8.02 Threshold resonances in polar molecules : HBr.
K. Rohr 136

8.03 Vibrational excitation of molecules under resonant electron scattering.
G.V. Golubkov, F.I. Dalidchik and G.K. Ivanov 138

8.04 The 3.75 eV resonance in $e^- + H_2$ processes.
B.D. Buckley 140

8.05 Electron impact excitation of high vibrational levels of the N_2 ground state through valence state shape resonances.
F. Gresteau, R.I. Hall, J. Mazeau and D. Vichon 142

8.06 N_2^- resonance at 2 eV as energy standard in low energy electron scattering experiments.
K. Rohr 144

8.07 On the resonant electron impact excitation of CO_2 in the 4 eV region
I. Čadež, F. Gresteau, M. Tronc and R.I. Hall 146

8.08 Electron impact excitation of high vibrational levels of the NO and O_2 ground states through dissociating negative-ion states.
F. Gresteau, R.I. Hall, J. Mazeau and D. Vichon 148

8.09 The NO^- $^3\Sigma^-$ and $^1\Delta$ resonances : theoretical analysis of electron scattering data.
D. Teillet-Billy and F. Fiquet-Fayard 150

8.10 Electron-molecule resonances in a multiple-scattering theory.
K.J. Lagattuta 151

9. COLLISIONS OF VERY HEAVY IONS AND ATOMS POSITRON EMISSION ?

9.01 Ionization, X-rays and positron production in Pb-Pb and U-U collisions
W. Betz, W. Greiner, G. Heiligenthal, J. Kirsch, B. Müller, J. Reinhardt and G. Soff 154

9.02 X-Ray emission in heavy ion-atom collisions : K-ionization cross sections.
H.H. Behncke, P. Armbruster, F. Folkmann, J.R. McDonald and P.H. Mokler 156

9.03 X-Ray emission in heavy ion-atom collisions : critical impact parameter for target K ionization.
H.H. Behncke, P. Armbruster, F. Folkmann, S. Hagmann and P.H. Mokler 158

9.04 Doppler shift measurement of differential K-vacancy production cross sections in heavy collision systems.
J.S. Greenberg, H. Bokemeyer, H. Emling, E. Grosse, D. Schwalm and H.J. Wollersheim 160

9.05 Positron production in superheavy ion-atom collision systems.
H. Backe, E. Berdermann, H. Bokemeyer, J.S. Greenberg, E. Kankeleit, P. Kienle, Ch. Kozhuharov, L. Handschug, Y. Nakayama, L. Richter, H. Stettmeier, F. Weik, R. Willwater 162

9.06 The influence of retardation effects in very heavy ion collisions.
D. Kolb, W.D. Sepp, B. Fricke, T. Morović and F. Wille 164

10. COLLISIONS OF ATOMS IN RYDBERG STATES (LOW ENERGIES)

10.01 On the theory of collisions of atoms in Rydberg states with neutral particles.
A. Omont 166

10.02 Collision between a high Rydberg ion and a neutral molecule.
M. Matsuzawa 168

10.03 Effects of state changing collisions in studies of collisional ionization of Xenon high Rydberg atoms.
R.F. Stebbings, F.G. Kellert, G.F. Hildebrandt, G.W. Foltz, K.A. Smith and F.B. Dunning 170

10.04 Collisional ionization of Xe(nf) atoms by electron attaching targets.
F.B. Dunning, G.F. Hildebrandt, F.G. Kellert, G.W. Foltz, K.A. Smith and R.F. Stebbings 172

10.05 Collisional depopulation of Rydberg P states of Rubidium at thermal energies.
F. Gounand, P.R. Fournier and J. Berlande 174

10.06 Ionization of long-lived highly excited atoms by collision with benzene and some other molecules.
H. Hiraishi and K. Kuchitsu 176

10.07 Asymptotic approach to stark effect for atomic hydrogen
R.J. Damburg and V.V. Kolosov 178

10.08 Perturbation of degenerated atomic states upon collision with neutral particles.
G.K. Ivanov 180

11. AUGER AND X-RAY SPECTROSCOPY OF MULTIPLE INNER SHELL VACANCIES

11.01 Two-electron-one-photon transitions in ions with two $L_{2,3}$-vacancies.
V.V. Afrosimov, Yu.S. Gordeev, V.M. Dukelsky, A.N. Zinoviev and A.P. Shergin 182

11.02 KK-LLL three-electron Auger transitions.
V.V. Afrosimov, A.P. Ahmedov, Yu.S. Gordeev, A.N. Zinoviev and A.P. Shergin 184

11.03 Auger-process in atomic collisions.
E.S. Parilis 186

11.04 Coulomb explosion seen from Auger lines in heavy ion bombardement of C,N and O containing molecules.
R. Mann, F. Folkmann, R. Petersen, Gy. Szabo and K.O. Groeneveld 188

11.05 Bonding effect in X-ray spectra induced by 84 MeV N^{4+} ions.
M. Uda, K. Maeda, Y. Awaya, M. Kobayashi, Y. Sasa, H. Kumagai and T. Tonuma 190

11.06 The ratio between K_{α}^{h} and $K_{\alpha\alpha}$ intensities in heavy-ion atom collision experiments.
J.E. Hansen and M. Gavrila 192

11.07 The radiative decay of excited states of atomic systems with two K-shell vacancies.
U.I. Safronova and V.S. Senashenko 194

11.08 Charge dependence of double K-vacancy states in collisions of S^{n+} (n=5,8,10,12,13,14) on Ar at 1 MeV/amu.
R. Schule, W. Lichtenberg, D. Liesen, J.R. McDonald, G. Nolte, H. Schmidt-Böcking, R. Schuch, I. Tserruya and J. Volpp 196

11.09 The dependence of multiple inner-shell ionization on the projectile energies and on target elements by nitrogen-ion bombardment at the energy above 4 MeV/amu.
Y. Awaya, T. Katou, H. Kumagai, T. Tonuma, Y. Tendow, K. Izumo, T. Takahashi, A. Hashizume, M. Okano and T. Hamada 198
11.10 Mean fluorescence yields of carbon-K following 100-500 keV C^+ and Ne^+ impact on CH_4
D. Schneider, N. Stolterfoht, D.L. Matthews, F. Hopkins 200
11.11 Fluorescence yield decrease for inner vacancies produced in close atomic collisions.
V.V. Afrosimov, Yu.S. Gordeev, A.N. Zinoviev, G.G. Meskhi and A.P. Shergin 202
11.12 Refined *ab initio* relativistic electron binding-energy and Auger transition-energy calculations.
M.H. Chen, B. Crasemann, M. Aoyagi and H. Mark 204
11.13 X-ray and Auger transition probabilities to the 2p state of multiply ionized sulfur and chlorine.
B. Crasemann and M.H. Chen 206
11.14 Super coster-kronig and coster-kronig transitions of Zn and Xe.
D. Hausamann, B. Breuckmann and W. Mehlhorn 208
11.15 Auger-electron spectra ejected in the Ar $L_{2,3}$ MM and the Xe $N_{4,5}OO$ processes by electron impact.
A. Nakashio, C. Hirota, T. Takayanagi, H. Suzuki and K. Wakiya 210
11.16 Spectroscopic examination of the Argon $L_{2,3}$-Auger spectrum following excitation by light projectiles.
D. Ridder, N. Stolterfoht and G. Wüstefeld 212
11.17 Auger decay of Li-like Ne induced by 200 MeV Xe^{31+} impact.
N. Stolterfoht, D. Schneider, R. Mann and F. Folkmann 214
11.18 Interpretation of Auger-electron spectra.
F.P. Larkins 216

12. METASTABLE-MOLECULE SCATTERING AND FINE STRUCTURE TRANSITIONS

12.01 Dependence of quenching cross sections (Na*(3p) + MOL) on the atomic polarisation.
I.V. Hertel, H. Hofmann, W. Reiland and K.A. Rost 218
12.02 Differential cross section for the electronically inelastic process $K(4^2S) + N_2(\nu=o) \rightarrow K(4^2P) + N_2(\nu')$ near threshold.
H.J. Loesch and M. Brieger 220
12.03 Differential cross section and coherence effects for excitation of K in collisions with N_2 and CO.
V. Kempter, E. Clemens, P.J. Martin and L. Zehnle 222
12.04 Velocity dependence of fine structure changing cross sections.
W.D. Phillips, C.L. Glaser and D. Kleppner 224
12.05 Angular distribution of fine structure changing collisions of excited Na.
W.D. Phillips, J.L. Kinsey, D.E. Pritchard, J.A. Serri and K.R. Way 226
12.06 Model potential calculations of alkali rare-gas interaction.
P. Valiron, R. Gayet, R. McCarroll, F. Masnou-Seeuws and M. Philippe 228
12.07 Model potential calculations for alkalis scattered by inert gases.
A.R. Malvern and G. Peach 230
12.08 E-V-R energy transfer spectroscopy for quenching of laser excited Na-atoms by simple molecules.
I.V. Hertel, H. Hofmann and K.A. Rost 232
12.09 Dissociative fragmentation processes in the reactions of metastable $He(2^3S)$ with NO_2, COS, H_2O, H_2S, and HCN.
A.J. Yencha and K.T. Wu 234

12.10 Quenching of metastable iodine atoms in collisions with iodine molecules and electrons.
N.P. Penkin, Yu.A. Tolmachev and V.A. Kartazayev 236
12.11 Resonances in de-excitation of Argon metastables by H_2 molecules.
Z.W. Šternberg and B. Gržeta 238
12.12 Golden rule partitioning of vibronic energy : excitation transfer in collisions of metastable rare gas atoms with nitrogen.
J. Krenos and J. Bel Bruno 240
12.13 Spin relaxation of optically pumped cesium through collisional modification of the hyperfine interaction
F.A. Franz, R. Boggy and T.R. Marshall 242
12.14 The eigenphase formulation of fine-structure transition cross sections
R.H.G. Reid 244
12.15 Relaxation of sodium atoms in the 4D level by collision with noble gases preliminary results.
F. Biraben, K. Beroff, B. Cagnac, E. Giacobino and G. Grynberg 246
12.16 Depolarization of the 5p $^2P_{1/2}$ state of rubidium induced by collision with helium or xenon : a test of the molecular potential $A^2\Pi_{1/2}$.
B. Brouillaud and R. Gayet 248
12.17 Excitation transfer in thermal collisions of Na(4^2D) and ground state rare gas atoms.
J. Pascale 250
12.18 Study of the NaAr system : emission spectra and cross sections for fine-structure transitions in Na-Ar collisions.
R.P. Saxon, R.E. Olson and B. Liu 252
12.19 Nuclear spin relaxation in potassium dimers.
W. Kamke and M. Elbel 254
12.20 Excitation of the CII $2p^2P_{1/2} - {}^2P_{3/2}$ transition in thermal energy collisions with H_2.
D.R. Flower and J.M. Launay 256
12.21 Fine structure excitation of ground state C^+ ions, C and O atoms by atomic hydrogen impact.
J.M. Launay and E. Roueff 257
12.22 Collision models of intra-multiplet transitions at thermal energies.
A. Riera, V. Lopez, P. Wahnon, C. Harel and R. McCarroll 258
12.23 Probing Na-Na* resonant collisions mechanisms with strong magnetic fields.
J.C. Gay and W.B. Schneider 260
12.24 Collisional fine structure mixing in BaCl.
S.A. Edelstein, B.E. Perry and T.F. Gallagher 262

13. HIGH ENERGY ION-ATOM COLLISIONS. I. EXCITATION

13.01 Preparation of a fast beam of ions or atoms in well defined highly excited short-lived states
H. Schmoranzer and D. Schulze-Hagenest 266
13.02 Effect of an excited state population in the primary beam on the ionization cross section of Ba^+ in Ar at 250 KeV.
G. Meunier, M.L. Gaillard, H. Winter and F. Beguin 267
13.03 Excitation processes in the collisions of He^+(1s) and H(1s).
K.L. Bell and A.E. Kingston 269
13.04 Relative level excitation in ion-atom collisions as a function of the orbital angular momentum quantum number.
B. Andresen and E. Veje 270
13.05 Studies of outer-shell excitations in the Li^+, Na^+-He, Ne collisions.
B. Andresen and E. Veje 272

13.06 The cascade influence on the polarization of atomic line radiation induced by ion impact excitation.
M. Eckhardt, D. Hasselkamp and K.H. Schartner 274
13.07 Excitation and destruction of metastable helium-like ions in various gases.
Ya.A. Teplova, I.S. Dmitriev, I.A. Nevostrueva and Yu. A. Fainberg 276
13.08 Projectile-dependent 3s vacancy production in rare gas collisions involving Ar : 8-30 keV.
W.W. Smith, D.A. Gilbert and C.W. Peterson 278
13.09 Total cross sections for collisions between atomic particles at high relative speeds.
M. Inokuti 280
13.10 Variational approach to electron excitation in slow ion-atom collisions
M. Kleber and J. Zwiegel 282
13.11 Collision induced production of $H^*(2p)$ and $H^*(2s)$ from H_2 by fast ions
D. Hasselkamp, A. Scharmann and K.H. Schartner 284
13.12 Energy transfer in He-N_2 and H-N_2 collisions at 100-1000 eV.
G.H. Bearman, H.H. Harris and J.J. Leventhal 286
13.13 Excitation of the Werner band system of H_2 by fast ions.
D. Hasselkamp, A. Scharmann and K.H. Schartner 288
13.14 Deactivation of N_2^+ $A^2\Pi_u$ at KeV energies.
J.R. Sheridan, T. Merlo and J. Enzweiler 290

14. ELECTRON SCATTERING BY METAL VAPORS

14.01 Electron-atom momentum transfer cross-section for Cs (0.03 to 1.5 eV) from the electron thermal conductivity.
B. Stefanov 292
14.02 Scattering of electrons by Cs-atoms at low energies.
W. Gehenn and E. Reichert 294
14.03 Differential cross sections for the electron excitation of the resonant states in sodium and potassium.
S.J. Buckman and P.J.O. Teubner 296
14.04 Electron resonance scattering at mercury.
E. Reichert, K. Albert, C. Christian, T. Heindorff and S. Schoen 298

15. PENNING IONIZATION

15.01 Velocity dependence of the Penning and associative ionization cross sections of H atoms by $He(2^3S)$ and $He(2^1S)$ atoms.
J. Fort, J.J. Laucagne, A. Pesnelle and G. Watel 302
15.02 Penning ionization of Ar by optically-allowed excited He.
M. Kohmoto and T. Watanabe 304
15.03 Penning ionization studies with state-selected metastable neon atoms
H. Hotop and A. Zastrow 306
15.04 Penning ionization electron spectroscopy of HF, HCl, HBr and HI using $He^*(2^3S)$ metastable atoms.
C.E. Brion and P. Crowley 308
15.05 Penning ionization of H_2 by $He(2^1S)$: calculation of energy surface, width and cross sections.
A.P. Hickman, A.D. Isaacson and W.H. Miller 309

15.06 The effect of initial vibrational energy on chemi-ionization of H_2 by $He(2^3S)$ and $He(2^1S)$.
J.S. Cohen and R.K. Preston 310
15.07 Penning and associative ionization in the Ar^*-Na system.
R.H. Neynaber and G.D. Magnuson 312
15.08 Velocity dependence of the Penning and rearrangement ionization cross sections of H_2 molecules by $He(2^3S)$ and $He(2^1S)$ atoms.
J. Fort, T. Bolzinger, D. Corno and T. Ebding 314
15.09 Ionic states in chemionization process.
E.A. Andreev and B.M. Smirnov 316
15.10 Determination of the elementary processes constants by examination of electron energy distribution function in helium afterglow.
N.B. Kolokolov, R.I. Lyagushenko and P.M. Pramatarov 318
15.11 The rate constants for the excitation of the $B^2\Sigma_u^+$ state of N_2^+ in Penning ionization of N_2 with He $(2^{1,3}S, 2^{1,3}P)$.
N.P. Penkin, A.Z. Devdariani, U.Z. Ionih and A.V. Samson 320

16. MECHANISMS OF K-SHELL IONIZATION (Z > 10)

16.01 Measurement of direct and 2p-vacancy transfer contributions to k-shell ionization cross sections.
I.V. Mitchell, W.N. Lennard, J.S. Forster and F.W. Saris 324
16.02 Impact-parameter dependent inner-shell vacancy production in 0.7 to 2.7 MeV/amu $^{58}_{28}Ni$ collisions with $_{25}Mn$, $_{50}Sn$ and $_{82}Pb$.
B.M. Johnson, K.W. Jones, W. Brandt, F.C. Jundt, G. Guillaume and T.H. Kruse 326
16.03 K-vacancy production by Ne and Ar beams with energies from 0.7 to 8 MeV
K.W. Jones, F.C. Jundt, G. Guillaume and P. Fintz 328
16.04 K-shell ionization probability in energetic nearly symmetric heavy-ion collisions.
R. Schuch, J. Volpp, I. Tserruya, K.E. Stiebing, R. Schulé, H. Schmidt-Böcking and G. Gaukler 330
16.05 Production mechanisms for characteristic and non-characteristic X-rays in heavy ion collisions.
P. Vincent and J.S. Greenberg 332
16.06 Characteristic K X-ray production in Ni + Ni, Ni + Nb, Ge + Ge and Nb + Nb collisions.
P. Vincent and J.S. Greenberg 334
16.07 K-shell vacancy creation in collisions of F ions and target atoms from Z=5 to 57.
J. Stähler, B. Knaf and G. Presser 336
16.08 Inner-shell ionization in symmetric ion-atom collisions at MeV energies
G. Presser, B. Knaf, E. Scherer and J. Stähler 338
16.09 High velocity symmetric and non symmetric collisions with 200 MeV Fe ions - influence of target thickness.
J.P. Rozet, A. Chetioui, J.P. Briand and C. Stephan 340
16.10 Zero thickness cross sections for K X-rays and REC produced in collisions of Cl ions with thin Cu targets.
J.A. Tanis, J.M. Feagin, S.M. Shafroth and D. Schneider 342
16.11 Multiple-collision 2pσ-vacancy production in heavy-ion collisions with solid targets.
W.E. Meyerhof, R. Anholt and T.K. Saylor 344
16.12 2pσ-vacancy sharing in heavy-ion collisions.
W.E. Meyerhof, R. Anholt and T.K. Saylor 346

17. FREE-FREE TRANSITIONS AND LASER INDUCED COLLISION PROCESSES

17.01 Free-free transitions of an electron in the presence of an atomic system.
K.L. Bell, P.G. Burke, A.E. Kingston and K.A. Berrington 348

17.02 Measurement of free-free processes in e^--Ar scattering.
D. Andrick and L. Langhans 350

17.03 Laser-collision induced transitions.
J. Light and A. Szöke 352

17.04 Radiative control of collision-free and collisional processes of atoms and molecules.
A.M.F. Lau and C.K. Rhodes 354

17.05 Single and multiphoton transitions during atomic and molecular collision in laser fields.
A.M.F. Lau 356

17.06 New avoided crossing and new transition channels in atomic and molecular gases induced by nonresonant laser fields.
A.M.F. Lau and C.K. Rhodes 358

17.07 Stimulated radiative Penning ionization in alkali vapors.
S. Geltman 359

18. e-2e PROCESSES

18.01 Absolute doubly differential cross sections for ejection of secondary electrons from helium by electron impact.
N. Oda and F. Nishimura 362

18.02 The noncoplanar symmetric (e,2e) reaction on atoms.
E. Weigold, A.J. Dixon, I.E. McCarthy and C.J. Noble 364

18.03 Factorized distorted wave approximation for the (e, 2e) reaction on atoms : coplanar symmetric.
E. Weigold, I. Fuss, I.E. McCarthy and C.J. Noble 366

18.04 Mapping of molecular orbitals in CO_2 and SF_6 obtained by (e, 2e) technique.
G. Stefani, R. Camilloni, A. Giardini-Guidoni, R. Tiribelli and D. Vinciguerra 368

18.05 On the study of the double Fourier transforms of the electron wave functions for atoms, molecules, and solids using the (γ, 2e) and (e, 3e) processes at high energies.
V.G. Neudatchin, Yu.F. Smirnov, A.V. Pavlitchenkov and V.G. Levin 370

18.06 Secondary electron cross sections for electron impact on helium, hydrogen and neon.
R.D. DuBois and M.E. Rudd 372

18.07 Triple differential cross-sections for the ionization of helium by electron impact.
J. Smith, B.H. Bransden, C.J. Noble and K.H. Winters 373

18.08 Differential cross sections for electron impact ionization of helium and argon.
E.C. Beaty, K.H. Hesselbacher, S.P. Hong and J.H. Moore 374

18.09 An investigation on the interaction mechanism in (e, 2e) experiments.
A. Giardini-Guidoni, R. Camilloni and G. Stefani 376

18.10 Momentum distributions of bonding electrons in molecules by electron knockout experiments.
M.A. Coplan, E.D. Brooks III and J.H. Moore 378

18.11 Measurement of molecular orbital momentum distributions and binding energies for H_2O, PH_3 and H_2S by the binary (e,2e) method.
C.E. Brion, S.T. Hood, A. Hamnett and J. Cook 380
18.12 Electron ionization spectroscopy of acetylene : momentum distributions of the valence orbitals.
A.J. Dixon, I.E. McCarthy, E. Weigold and G.R.J. Williams 382
18.13 Electron ionization spectroscopy of ethylene : orbital assignement of correlated states.
A.J. Dixon, S.T. Hood and E. Weigold 384
18.14 Differential cross sections for 35 KeV electrons elastically scattered from NH_3.
A. Lahmam Bennani, A. Duguet and H.F. Wellenstein 385
18.15 The compton defect : double differential inelastic cross section of KeV electrons from helium and molecular hydrogen.
A.D. Barlas, W. Rueckner and H.F. Wellenstein 386

19. INTERMEDIATE AND HIGH ENERGY ELECTRON SCATTERING BY H AND He ATOMS

19.01 Exchange amplitudes and forward dispersion relations for electron-atom scattering.
F.W. Byron Jr. and C.J. Joachain 390
19.02 Total cross-sections in electron (positron)-helium scattering.
F.W. Byron Jr. 391
19.03 Total cross sections for electron scattering.
H.J. Blaauw, F.J. De Heer, R.W. Wagenaar and D.H. Barends 392
19.04 Elastic, excitation, ionization and total cross sections for electron helium scattering.
K. Jost and R. Möllenkamp 394
19.05 Electron-helium absolute total scattering cross sections from 1 eV to 200 eV by a new time-of-flight method.
R.E. Kennerly and R.A. Bonham 396
19.06 An interpretation of electron hydrogen excitation in terms of intermediate classical atomic states.
M.J. Roberts 397
19.07 A modified Glauber method for electron-atom scattering : e^--H elastic scattering with the consideration of Glauber exchange.
T.T. Gien 398
19.08 Effect of exchange in electron excitation to the 2s state of atomic hydrogen in the Glauber approximation.
G.A. Khayrallah 400
19.09 Elastic scattering of electrons from atomic helium in the eikonal approximation.
D. Basu and A.C. Roy 402
19.10 Electron-impact excitation of the 2p state of atomic hydrogen in the distorted-wave approximation-angular correlation parameters.
W. Neil Shelton, R.V. Calhoun and D.H. Madison 404
19.11 The cross sections for 1s-2p excitation by electron impact.
Sung Dahm Oh, J. Macek and E. Kelsey 406
19.12 The coulomb-projected Born approximation with variable charge.
J.A. Schaub and A.D. Stauffer 407
19.13 nlm-n'l'm' Glauber transition amplitudes in charged particle hydrogen atom collisions.
S. Kumar and M.K. Srivastava 408
19.14 e-H exchange scattering in modified Born approximation.
M.K. Srivastava and M. Lal 410

19.15 The excitation of atomic hydrogen and helium by fast electrons
C.J. Joachain and K.H. Winters 412
19.16 Distorted-wave approximations for electron-atom excitation.
K.H. Winters 414
19.17 Second born approximation in electron-atom scattering.
V.I. Ochkur and L.A. Burkova 416
19.18 Relativistic calculations of atom excitation cross sections by electrons.
A.D. Gurchumeliya and U.I. Safronova 418
19.19 Accurate absolute doubly differential cross-sections for 0.7 eV to 600 eV electrons ejected at 90° from He and Ar by 2 keV electron impact.
R.E. Kennerly and R.A. Bonham 420
19.20 The differential cross sections of the helium atom ionization by electron impact.
V.S. Senashenko and S.I. Strakhova 422
19.21 Differential cross-sections and angular correlation parameters for the electron impact excitation of the n=2 and n=3 singlet levels of helium.
K.H. Winters, M.R. Issa and B.H. Bransden 424

20. INTERMEDIATE AND HIGH ENERGY ELECTRON SCATTERING BY ATOMS OTHER THAN H AND He ATOMS

20.01 Elastic scattering of electrons by argon atoms.
S.P. Khare and A. Kumar Jr. 426
20.02 The excitation of the discrete states of the heavy inert atoms by electrons in the Glauber model.
V.N. Mileev, V.I. Safin and S.I. Strakhova 428
20.03 Electron impact excitation cross sections for Kr at 15, 30, 50 and 100 eV.
S.K. Srivastava, S. Trajmar and D.C. Cartwright 430
20.04 Inelastic differential cross sections for electron-impact excitation of argon.
A. Chutjian and D.C. Cartwright 432
20.05 Differential cross sections for elastic electron scattering from sodium.
P.J.O. Teubner, S.J. Buckman and C.J. Noble 433
20.06 Angular distributions for elastic electron scattering from potassium in the intermediate energy range.
P.J.O. Teubner and S.J. Buckman 434
20.07 The electron impact excitation of alkali atoms.
R. Vanderpoorten and K.H. Winters 435
20.08 Excitation of sodium and potassium by electron impact.
H.G.P. Lins de Barros and H.S. Brandi 436
20.09 Resonant excitation of lithium by electron impact in the Glauber approximation.
H.G.P. Lins de Barros and J. D'Albuquerque e Castro 438
20.10 Resonant excitation of lithium by electron impact.
H.G.P. Lins de Barros and H.S. Brandi 440
20.11 Experimental and theoretical study of electron impact excitation of Cu.
S. Trajmar, W. Williams, S.K. Srivastava and N.W. Winter 442
20.12 Absolute experimental differential cross sections for elastic large angle scattering of 40 keV electrons from C, Al and Au.
H. Schmoranzer and H. Grabe 444
20.13 Integrals of the squared form factor over the momentum transfer.
M. Matsuzawa, S. Mitsuoka and M. Inokuti 446

21. HEAVY PARTICLE COLLISIONS INVOLVING METASTABLE ATOMS (MEDIUM AND LOW ENERGIES)

21.01 Electron transfer in H^{*}-He^{++} collisions.
S. Szucs, F. Brouillard, M. Burniaux, A. Jognaux and T. Govers 450

21.02 Electron capture from highly excited atoms by slow doubly charged ions.
A. Salin 452

21.03 Collisional de-excitation of 5-26 keV metastable hydrogen atoms.
J. Geddes, J.D.A. McKee and H.B. Gilbody 454

21.04 Formation of He metastable in He^{+}-alkali collisions.
J. Pommier, Vu Ngoc Tuan and M. Barat 456

21.05 Inelastic collisions of metastable He^{*} on He at impact energies between 1000 and 1400 eV.
R. Morgenstern, E. Schade and M. Trainer 458

21.06 Ion pair production in H(1s) + H(2s) collisions.
W.Claeys, F. Brouillard and G. Van Wassenhove 460

21.07 Electron loss for collisions of fast H(2s) and H(1s) in rare gases and H_2
F. Roussel, P. Pradel and G. Spiess 462

21.08 Electron capture for collisions of fast H(2s) and H(1s) in rare gases and H_2.
P. Pradel, F. Roussel and G. Spiess 464

21.09 He(2^3S) deexcitation in collisions with He(1^1S).
T.M. Miller 466

21.10 Metastable-state analysis of a noble-gas ion beam through neutralization -reionization double-collision translational spectroscopy.
M. Durup and G. Parlant 468

21.11 Cross sections for quenching of H(2s) by collisions with Ar.
R.E. Olson and B. Liu 470

22. ELECTRON MOLECULE COLLISION THEORY

22.01 A discrete basis set approach to electron-molecule scattering.
V. McKoy, A. Fliflet and D. Levin 474

22.02 Rotational excitation of polar molecules : delimiting the range of Born approximation.
C.W. Clark and U. Fano 475

22.03 Scattering of electrons by N_2 molecules.
M.A. Crees and D.L. Moores 476

22.04 Theory of low-energy electron-molecule collisions : a comparison of electron-CO_2 and electron-N_2 elastic and rotational-excitation cross sections.
M.A. Morrison, L.A. Collins and N.F. Lane 478

22.05 Scattering of electrons by LiF.
L.A. Collins and D.W. Norcross 480

22.06 Scaling of electron-dipole inelastic collision cross sections.
F.T. Smith and D. Mukherjee 482

22.07 A Bessel function representation for semiclassical perturbation scattering.
F.T. Smith and W.H. Miller 484

22.08 Characteristics of continuum and bound states of the electron-dipole system.
C.W. Clark 486

22.09 Optical potential calculation of e^--H_2 rotational excitation.
E. Ficocelli Varracchio 487
22.10 Electron-molecule scattering calculations including polarization and correlation.
U. Kaldor and A. Klonover 488
22.11 Population of the vibrational levels of the ground state of nitrogen by low energy electron scattering.
J.E. Potter, N.C. Steph, P.H. Dwivedi and D.E. Golden 490
22.12 Semiclassical perturbation scattering theory : momentum transfer in electron-dipole collisions.
A.P. Hickman and F.T. Smith 492
22.13 Recent applications of the R-matrix method to problems in low-energy electron-diatomic-molecule scattering.
B.I. Schneider, M.A. Morrison and P.J. Hay 494
22.14 Rotational excitations in e + H_2 scattering at intermediate energies.
B.H. Choi, R.T. Poe and J.C. Sun 495
22.15 A new-R-matrix method for electron molecule collisions.
P.G. Burke, I. MacKey, I. Shimamura and Vo Ky Lan 496
22.16 Scattering of charged particles by OH at thermal energies in HI regions
N. Tran Minh, L. Sinfailam, N. Feautrier, M. Cornille and H. Van Regemorter 498
22.17 Electron-quadrupole interactions.
K.D. Jordan 500
22.18 Electron-molecule scattering at middle energies using different local exchange potentials 502
P. Baille and J.W. Darewych

23. COHERENCE EFFECTS AND SPIN POLARIZATION

23.01 Low-energy elastic scattering of polatized electrons by polarized hydrogen atoms.
M.J. Alguard, V.W. Hughes, M.S. Lubell and P.F. Wainwright 506
23.02 Can electron elastically scattered from neon be fully polarized ?
C.B. Lucas, K.J. Kollath and J. Kessler 508
23.03 Coherence effects in electron-hydrogen scattering.
E. Fitchard, K. Blum and H. Kleinpoppen 510
23.04 Coherence parameters and vector polarization in the ^3P excitation of helium.
I. McGregor, K. Blum and H. Kleinpoppen 511
23.05 Orientation in the electron scattering by laser excited Na(3^2P) atoms
H.W. Hermann, I.V. Hertel, W. Reiland and A. Stamatovic 512
23.06 Total electron scattering cross sections by excited sodium atoms.
B. Jaduszliwer, R. Dang, N.D. Bhaskar and B. Bederson 514
23.07 Polarization of atoms by collision.
M. Kohmoto and U. Fano 516
23.08 The hyperfine interaction in electron impact radiation of mercury.
I. McGregor, A. Zaidi and H. Kleinpoppen 517
23.09 Near threshold polarization and excitation function of heavy rare gas atoms.
S.H. Al-Shamma and H. Kleinpoppen 518
23.10 Polarization effects in inelastic exchange scattering.
V.D. Ob'edkov 520
23.11 Electron-photon angular correlations and threshold polarisation in electron-molecule scattering.
H. Jakubowicz and K. Blum 522

24. ELECTRON CAPTURE BY MULTICHARGED IONS

24.01 Electron transfer between multicharged ions and atomic hydrogen.
R.A. Phaneuf, F.W. Meyer, R.H. McKnight and D.H. Crandall 524

24.02 Photon emission by impact of Ne^{z+} (z=1,2,3,4) on He (20-1000 keV)
H. Winter, E. Bloemen and F.J. De Heer 526

24.03 The processes of electron capture from noble gas atoms to different states of multiply charged argon ions.
V.V. Afrosimov, A.A. Basalaev, G.A. Leiko and M.N. Panov 528

24.04 A systematic study of multiple electron capture by highly charged ions in single ion-atom encounters.
E. Salzborn and A. Müller 530

24.05 Population of excited ionic states in charge transfer collisions.
A. Müller, W. Seim and E. Salzborn 532

24.06 Influence of rotational coupling on electron capture in C^{+6}-H(1s) collisions.
A. Salop, R.E. Olson and A. Salin 534

24.07 Charge exchange in collisions of highly ionized ions and atoms.
C. Harel and A. Salin 536

24.08 Theoretical charge-exchange total cross sections for B^{+3} + He and C^{+4} + He collisions.
E.J. Shipsey, J.C. Browne and R.E. Olson 538

24.09 Charge exchange of multiply charged ions in slow collisions with atoms.
T.P. Grozdanov and R.K. Janev 540

24.10 Electron capture and loss cross sections for multicharged iron and argon ions in argon and molecular hydrogen.
K.H. Berkner, W.G. Graham, R.V. Pyle, A.S. Schlachter and J.W. Stearns 542

24.11 Excitation, ionization, and charge exchange cross sections and equilibrium charge states of highly charged ions in a neutral gas.
K. Omidvar and D.W. Rule 544

24.12 Electron capture process from H by O^{8+}.
H. Ryufuku and T. Watanabe 546

24.13 Angular distributions of characteristic X-rays emitted in 21 MeV Ne → Ar collisions.
R. Brenn and W. Salm 548

25. METASTABLE ATOM SCATTERING (LOW ENERGIES)

25.01 Optical model and close-coupling analysis of $He^*(2^1S)$ + Ne differential elastic scattering.
P.E. Siska and T. Fukuyama 552

25.02 Velocity dependence of $O(^3S)$ production in collisions between metastable oxygen atoms and various gas targets.
G. Nowak, W.L. Borst and J. Fricke 554

25.03 Excitation transfer in thermal collisions between atomic hydrogen isotopes.
C. Harel, R. McCarroll and R.D. Piacentini 556

25.04 Molecular beam study of the HeNe-laser pumping transition.
P. Œsterlin, H. Haberland and K. Schmidt 558

25.05 Theoretical study of molecular oxygen : collisions of $O(^1S)$ with $O(^1S)$.
R.P. Saxon and B. Liu 560

25.06 Model of excitation energy transfer between He I N=5 levels in inelastic collisions of excited atoms with normal.
Yu.A. Tolmachev, S.A. Bagaev, O.V. Oguinetz and V.B. Smirnov 562

25.07 Destruction rates of metastable helium atoms and molecules in collisions with argon atoms.
L.C. Pitchford and R. Deloche 564

26. PREDISSOCIATION AND DISSOCIATION BY ELECTRON IMPACT.

26.01 Velocity distribution of H(2s) resulting from the electron impact dissociation of H_2.
A.U. Hazi 566
26.02 Production of fast hydrogen atoms of discrete energies by predissociation of molecular hydrogen.
M. Vogler and B. Meierjohann 568
26.03 Relative lifetimes of five quasi-bound states of HeH^+.
J. Brouard, G. Comtet, H. Frohlich and P.G. Fournier 570
26.04 Doppler profile measurements of Balmer-α by electron impact on simple molecules.
K. Ito, N. Oda, N. Kouchi, Y. Hatano and T. Tsuboi 572
26.05 Dissociative excitation of H_2 and D_2 by electrons.
G.R. Möhlmann, F.J. De Heer and J. Los 574
26.06 Metastable fragmentation patterns of CF_2Cl_2 and $CFCl_3$ following electron impact.
G. Allcock and J.W. McConkey 576
26.07 Dissociative autoionization of H_2.
K. Köllmann 577
26.08 Kinetic energy distributions of excited H and D atoms produced by electron impact on H_2O and D_2O molecules.
G.N. Polyakova, A.I. Ranyuk, V.F. Erko and O.S. Pavlichenko 578
26.09 Energy spectra of excited atoms produced by electron impact dissociation of H_2 and D2 molecules.
G.N. Polyakova, A.I. Ranyuk, V.E. Erko and O.S. Pavlichenko 580
26.10 Calculation of emission cross-sections on the dissociative excitation of H_2O by electron-impact.
T. Fujita, T. Iwai, K. Ogura, S. Watanabe and Y. Watanabe 582
26.11 Excitation cross sections for the H-states 3s, 3p, 3d after the dissociative excitation of some H-containing molecules after e^- impact.
H.J. Hartfuss and A. Schmillen 584
26.12 Excitation of O_2 and N_2 by electron impact in the extreme vacuum ultraviolet.
J.E. Mentall and H.D. Morgan 586
26.13 The dissociative excitation of halogen substituted methane by electron impact.
V.T. Koppe, N.P. Danilevskii, N.A. Hovanskii and A.G. Koval' 588
26.14 $CN(B^2\Sigma-X^2\Sigma)$ emission spectra from cyanides produced in collision with electrons, metastable atoms and photons.
T. Kondow and K. Kuchitsu 590
26.15 Partial and total electron impact ionization cross sections of NH_3
T.D. Märk, F. Egger and M. Cheret 592
26.16 Partial and total electron impact ionization cross sections of PH_3.
T.D. Märk and F. Egger 594
26.17 The metastable decomposition of methane.
J.P. Flamme, H. Wankenne, R. Locht, J. Momigny, P.J.C.M. NOWAK, J. LOS. 596
26.18 Limits and possibilities of translational spectroscopy.
G. Comtet, J. Brouard and P.G. Fournier 598
26.19 Experimental cross sections for the production of O_3^+, O_2^+ and O^+ from ozone by low energy electron bombardment.
M.W. Siegel 600

27. THEORETICAL METHODS AND ELECTRON ATOM COLLISIONS

27.01 Proposed experimental test of wave packet reduction and the uncertainty principle.
E.E. Fitchard 602

27.02 Chebyshev expansions for atomic scattering wave functions.
V.B. Sheorey 604

27.03 Inverse perturbation analysis ; potential curves from term values and phase shifts.
J.T. Broad and J. Hinze 606

27.04 The semi-analytical JWKB phase shift in elastic scattering.
N. Tran Minh, Cao Xuan and J. Picart 607

27.05 Elastic electron-atom collisions in electric field in eikonal approximation.
C. Foglia 608

27.06 A graphical approach to the spin-orbit interaction.
Keh-Ning Huang and A.F. Starace 609

27.07 The low energy scattering of electrons from atomic helium using the R-matrix method.
K.A. Berrington, T.F. O'Malley and A.L. Sinfailam 610

27.08 An R-matrix method leading to continuous logarithmic derivatives.
I. Shimamura 612

27.09 Computation of electron resonances in atoms using the complex coordinate method.
B.R. Junker and C.L. Huang 614

27.10 Effective potentials for electron-atom scattering below inelastic thresholds.
L. Steenman-Clark and M.J. Seaton 616

27.11 Theoretical studies of resonant states of three-electron atoms.
J.N. Bardsley 618

28. DISSOCIATIVE RECOMBINATION OF ELECTRONS

28.01 Dissociative recombination cross sections for NH_4^+.
R.D. DuBois, J.B. Jeffries and G.H. Dunn 620

28.02 The dissociative recombination of electron and complex ion.
B.M. Smirnov 622

28.03 The dissociative recombination of CH^+ ions.
A. Giusti-Suzor, H. Lefebvre-Brion and E. Roueff 624

29. ION BEAM - SOLID INTERACTIONS

29.01 Comparison of vicinage effects in ion cluster penetration in gases and in condensed matter.
G. Basbas and R.H. Ritchie 626

29.02 Measurement of the screening of swift charged particles in solids through cluster Coulomb explosion.
R. Laubert, W. Brandt and F.K. Chen 628

29.03 Electron capture to K vacancies in chlorine ions (≈1.5 MeV/AMU) relation to emergent charge states.
S. Datz, C.D. Moak, P.F. Dittner, J. Gomez del Campo, P.D. Miller and J.A. Biggerstaff 630

29.04 High resolution studies of extensive Ne L-shell excitation by energetic heavy ion impact.
C.R. Vane, I.A. Sellin, F. Chen, S.B. Elston, J.P. Forester, P.M. Griffin, K.O. Groeneveld, R. Laubert, D.J. Pegg, R.S. Peterson, R.S. Thoe and J.J. Wright 632

29.05 Recoil ion spectroscopy in the X UV - soft X-ray region following heavy ion impact on thin gas targets.
I.A. Sellin, S.B. Elston, J.P. Forester, P.M. Griffin, D.J. Pegg, R.S. Peterson, R.S. Thoe, C.R. Vane, J.J. Wright and K.O. Groenveld 634

30. COMPUTER USE

30.01 Method of numerical solution of close-coupling scattering equations.
S.J. Sramek 638

30.02 Numerical computation of off-shell Coulomb scattering amplitudes.
S.J. Sramek 640

30.03 Least-squares deconvolution method for spectroscopic data.
H.C. Hayden and R.S. Thoe 642

30.04 A predictor-corrector form of Numerov integration for coupled equations.
W.E. Baylis 644
