

CONTENTS, INVITED AND CONTRIBUTED PAPERS

A. VACUUM SCIENCES AND TECHNIQUE.

I. Theoretical Studies :	
Production of High Vacuum by Molecular Shields in Hypersonic Flow. W. Wuest.....	2
Research on the Movement Rules of the Rare Gas Molecules in Ultra High Vacuum. Da Dou An, Zhou Kun Lin and Jiang Wahn Shuhn.....	7
Theoretical Investigation of the Effect of the Pump Contour on Diffusion Pumping Speed G. Toth and E. Balazs.....	11
Radiation Enhanced Permeation of Hydrogen Through Austenitic Steel Tubes R. Dobrozemsky, G. Schwarzinger and Chr. Stratowa..	15
II. Economic Studies of Processes :	
Contributions of and Challenges to Vacuum Technology in Integrated Circuit Fabrication. J. L. Vossen.....	21
Using Mechanical Vacuum Pumps for L.P., CVD, Plasma-Etching, and Reactive Ion Etching. P. Duval.....	26
Increased Life and Reliability of Rotary Vane Pumps by Using Process Fitting Accessories for Pumping Agressive Gases. H.P. Berges, H. Jasper and H.P. Weber.....	30
Using Roots Pumps in Microelectronic Production Facilities L.P., CVD, Plasma-Etching. P. Duval.....	34
Industrial Vacuum and Energy. P. Marchal.....	38
Vane-Type Pump with Fresh Oil Lubrication and 100°C-Technic Saves Energie and Avoids Pollution. K. H. Mirgel.....	49

Liquid Ring Vacuum Pumps. L. Paugam.....	53
La Compression Mecanique de Vapeur d'Eau et les Economies d'Energie. Ph de Montigny.....	58
Energy Saving in Industrial Vacuum by the Use of Liquid Ring Machines. C. Mathy.....	62
A Combined Microbalance and Gas Chromatograph System for Sorption Studies on Getter Materials. M. Borghi and G. Andreoletti.....	66
In Situ Measurement of Dusts Laid on a Substrate During Pump-Down Process. Y. Masuda, S. Komiya and C. Hayashi.....	70
Flushing Process as Compared to High Vacuum Pumping in Sputtering Plants. M. Grundner and J. Kieser.....	74
Combining Cryogenic and Roots Pumps G. Gorinas and C. Saulgeot.....	78
An Investigation of the Characteristics of Different Sorbents for Trapping Oil Molecules. B. X. Liu and Z. J. Yang.....	82
Recent Work on Bakeable Flange Pairs of Dissimilar Metals. W. Unterlerchner, J. Delfosse, D. Jenson.....	86
Vacuum- Tweezers, a Manipulator for Handling Small Objects in UHV. A. Breth and R. Dobrozemsky.....	90
Analysis of Hot-Extracted Gases from Glasses by a Dynamic Method. A. Breth, R. Dobrozemsky and E. Papanikolau.....	94
Device for the Prehension by Means of Suction Cups. M. Gabillet.....	98
III. Nuclear Energy and Research: The Vacuum System of Ganil. G. Rommel.....	105

Calculation Model and Design Principles of the Demonstration Tokamak-Reactor Vacuum System. I.V. Mazul, G.L. Saksagansky, D.V. Serebrennikov.....	110
Isabelle Vacuum Systems. H. J. Halama.....	115
The Ultra High Vacuum System for Bessy The Berlin Electron Storage Ring for Synchrotron Radiation. H. Pingel and L. Schulz.....	119
Vacuum System for the Accumulation of Antiprotons. D.Blechsmidt, J.C.Brunet, J.C.Godot, E.Jones, A.Poncet, H.Schuhbäck, P.Strubin, T.Wikberg.....	123
First Operation Experience with the 2.3 Km Long UHV System of the Electron Storage Ring Petra. Chr.Falland, H.Hartwig, J.Kouptsidis, R.Kueppershaus, G.Schumann, M.Schwartz, H.P.Wedekind.....	126
Methods to Obtain Ultra High Vacuum ($\ll 10^{-9}$ Torr) with a Diffusion Pump Which a Waterbaffle is Integrated. G.P.A. Frijlink and J. Verhoeven.....	130
Cryostats for the Production and Acceleration of Deuterium Pellets for Use in Nuclear Fusion Plants. H.J. Forth, F.J. Otte, M. Gessinger.....	132
Ultra High Vacuum Fast Opening Valve. G. Bonizzoni, S. Cirant.....	136
Ceramic Vacuum Chambers for the SNS Pulsed Neutron Source. J.R.J. Bennett, R.J. Elsey and A.J. Dossett.....	139
Operational Experiences with Getter Ion Pumps Used in a Large Proton Synchrotron Accelerator. H. Henning.....	143
A High Field Integrated Sputter Ion Pump for Bessy the Berlin Electron Storage Ring for Synchrotron Radiation. H. Pingel and L. Schulz.....	147
Vacuum System for the Test Accumulation Ring for Numatron Project (Tarn) H. Tsujikawa, K. Chida, T. Mizobuchi, A. Miyahara....	151

The Vacuum System for a 30 MV Tandem Van De Graaff. B.S. Halliday and A.E. Groome.....	155
Linear Sputter-Ion Pump for Integration in High Magnetic Fields. D.Blechsmidt, J.P.Bojon, G.Chapman, D.Jenson, B.Monnier, H.Nordström.....	159
Studies of Ion Pumps for Operation in the Low Magnetic Bending Field of a Large Electron Storage Ring J. M. Laurent.....	164
Propagation of Atmospheric Pressure Fronts in Long Vacuum Tubes. J. Delfosse.....	168
A Rapid UHV Protective Gate Valve. J. Delfosse.....	172
Design of the Vacuum System for Tristan e^+e^- Storage Accelerator H.Ishimaru, K.Narushima, H.Nakanishi,G.Horikoshi.....	176
The Vacuum System of the U-400 Heavy Ion Isochronous Cyclotron. G.G. Gulbekian, A.I. Ivanenko, I.V. Kolesov.....	180
Influence of Vacuum Conditions on Spark Discharge in Elements of Cyclotron Electronic Deflector. A.A.Glazov, V.A.Kochkin, D.L.Novikov, N.G.Shakun, Y.Hosin.....	184
IV. Vacuum Measurements.	
Long System Stability of Various Reference Gauges Over a Three Years Period. G. Messer.....	191
Research on the Measurements of Ultra High Vacuum Li Wang-Kui, Qin Ju-Mei, Zhang Qi-Znan, Ding Li-Hua..	195
Improved Helmer Gauge for Measuring Pressures Down to 10^{-12} Pascal. C. Benvenuti, M. Hauer.....	199
Ionization Gauge as an Inert System. H. Gentsch, G. Messer.....	203

An Approach to the Non-Linearity of Ionization Gauge at the Upper Limit of Measured Pressure. Y.K. Kuo.....	207
Utilization of a Simple Cylindrical Ion Trap as a Low Cost Spectrometer or Analyzer Element in an He-Leak-Detector. A. Galiouna Nassiopoulos and P.A. Möller.....	211
Modern Analysis of Process Gas by Means of a Microprocessor Controlled Quadrupol Mass Spectrometer. G. Koopmann.....	215
Molecular Drag on Freely Rotating Balls and Vanes. G. Comsa, J.K. Fremerey, B. Lindenau.....	218
The German Vacuum Gauge Calibration Service (DKD) Authorized by PTB for the Pressure Range of 1000 to 10^{-9} mbar and for he Calibrated Leaks. G. Reich.....	222
A Compact System for the Calibration of Medium and High Vacuum Gauges. Ch. J. Kündig and H. Mennega.....	226
Mode C Operation of Three-Grid Modulated B-A Gauge. T. Kanaji and T. Urano.....	230
Sensitivity Dependence on Collector Surface Properties in Ion Gauges. H. U. Becker and G. Messer.....	234
Electron Densities in the Penning Discharge. D.L. Swingler.....	238
A New Generation of Quadrupole Mass Spectrometers for Vacuum Process Analysis. H.P. Egly, H.P. Eppler and G. Rettinghaus.....	242
Contamination Measurements With Mass Spectrometer. S. Bohatka, I. Berecz and G. Langer.....	243
A Small Magnetic Mass Spectrometer With High Extraction Efficiency. S.J. Pang, Y.G. Yu, B.F. Yin, Y.Z. Cui, H.L. Gao.....	247
Medical Mass Spectrometers I. Berecz, S. Bohatka, G. Langer.....	251

Calibration of Vacuum Gauges at Pressures Below 10 ⁻⁹ mbar With a Molecular Beam Method. G. Grosse and G. Messer.....	255
Intercomparison of the National Low Pressure Standards in the LNE et PTB G. Messer, L. Rubet.....	259
V. Recent Advances In Equipements :	
On the Cryopump Operation in the Wide Pressure Range. V.B. Yuferov, Y. V. Kholod, V. F. Lymar.....	265
A New Development of Refrigerators of High Operational Reliability for Use in Cryopumps. R. Frank, H.J. Forth, R. Heisig, H.H. Klein.....	269
Performance of Closed-Cycle Cryogenic Refrigerator Pump. M. Benini, P. Morbidi.....	275
Gas Friction Heating of Turbomolecular Pump Rotors. G.E. Osterstrom and T. Knecht.....	279
New Series of Air-Cooled Turbomolecular Pumps for Industry and Research to Be Mounted in Any Position. Dr. H.H. Henning, G. Knorr	283
The Pumping Effect of Friction and Inertia Forces. E. Moll.....	287
Precise Evaluation of Getter Pump Characteristics Based on Correct Sticking Coefficient's Values. G.I. Grigorov, K.K. Tzatzov and I.N. Martev.....	291
Pumping Mechanism for H ₂ and Cathode Material in a Sputter Ion Pump. Lan Zeng-Rui, Lu Ming.....	295
The Multipactor Ion Pump for Ultra High Vacuum. S. Ono and K. Yokoo.....	299
Realization of a Vacuum Gas Supply System for Operation in the First Spac-Lab Mission. R. Frank.....	303
Performance of a Cryo-Surface with a Honeycomb Like Structure as a Cryopump. G. Horikoshi, K. Narushima and M. Kobayashi.....	308

Une Pompe Cryogenique 20.0001s ⁻¹ P. Pignet, P. Robin; G. Rommel.....	312
Measuring Pumping Speed, Condensate Thickness and Condensate Stability in a Large Cryopump. P. Buttner.....	316
Principes and Criteria of the Optimization of Surface Action Pumps in Structure and Geometry. G.L.Saksagansky.....	320
Theoretical Determination of Optimum Ionizing Charac- teristics for a Radial Electrostatic Field Pump. M.L. Feidt and D. Paulmier.....	323
The New Generation of Binion Ion-Getter Pumps, a Reliable and Simple Tool for Oil Free Production of Low Pressures. G.I. Grigorov, K.K.Tzatzov, I.N.Martev, N.I.Donkov, L.Drajeva.....	327
Distributed Sputter Ion Pump and Titanium Getter Pump Combination. H. Ishimaru, H. Nakanishi, G. Horikoshi.....	331
Ultrahigh Vacuum Evaporation Getter Pumps With Plasma-Deposited Sorbing Films. L.S. Gurevich, I.V. Kudinov, V.V. Nazarov. G.L.Saksagansky, A.G.Sorokin, S.S.Turchenko, Y.I.Shpolyansky.....	334
VI. Quality Control and Leak Detection :	
The Contribution of Vacuum Techniques to Quality Assurance. M. Le Pavec, G. Bazante and L. Rossi.....	341
Calibration of Standard Leaks for Helium Detectors. L. Rubet.....	349
New Techniques and Methods Used for the Control of Tightness for the Eurodif Factories. L. Tronel, H. Chalon, J. Marcellin.....	352
Experiences With Fully Automatic He-Leak Testing Plants Used in Large Scale Series Production. J. G. Lentges.....	357

Microprocessor Controlled Vacuum Leak Test Plant for in Line Production Leak Testing. A.E. Holme, R.L. Shulver.....	360
Developments of Helium-Leak-Detection-Techniques for UHV-Systems of Large Accelerators and Storage Rings. Chr. Falland.....	364
Vacuum System Design for Mass Spectrometer Leak Detectors. M.H. Hablanian.....	368
Monte Carlo Calculations for Free Molecule and Near- Free Molecule Flow Through Axial Symmetric Tubes. L. Füstöss.....	372
Gas Flow Through Ducts in the Whole Pressure Range. J. Kieser and M. Grundner.....	376
Calculating Parameters of Complex Vacuum Tubing Systems. H. Hamacher.....	380

B. VACUUM METALLURGY.

I. Outgassing.

Electron Bombardment and Plasma Conditioning of Copper Surfaces R.S. Vaughan-Watkins and E.M. Williams.....	387
The Outgassing of Polymers at Ambient Temperature, Measurement and Theory. Gao Ben-Hui, Xue Da-Tong, Zhang Jing-Qin.....	391
Langmuir Probe Studies and Ion Energy Distribution in Pure Argon, and Pure Hydrogen Discharges Used for Cleaning Stainless Steel Ultrahigh Vacuum Chambers. A.G.Mathewson, A. Grillot, S.Hazeltine, K.Lee Li, A.Foakes, H.Störi.....	395
Outgassing Properties of Stainless Steel, Copper and AlMg ₃ During Pretreatment and Application. G. Grosse, G. Messer.....	399
Thermal Outgassing Properties of Smooth and Rough Inconel 600 Surfaces F. Reiter and J. Camposilvan.....	403

Control of Outgassing by Different Pretreatments. P. Vijendran and Smt. Jayalakshmi Santhanam.....	407
 II. New Vacuum Technologies:	
Metallurgical Aspects Relating to the Adoption of High Vacuum Furnaces With Pressurized Gas Quenching for Hardening of High Speed Steels. A.Bavaro, L.Caporali, G.Tonini, S.Orlandini.....	413
High Efficiency Heat Shielding, Theory and Performance for Space and Terrestrial Applications. P. Flecher, J. Kieser.....	417
Vacuum Metallurgy in the Preparation and Purification of Hafnium and Niobium. I.G.Sharma, J.C.Sehra, D.K.Bose, C.K.Gupta.....	421
 III. Correlation Between Surface Properties and Chemical Composition.	
Tribology and Surface Analysis. T.F.J. Quinn.....	427
Tribological Studies of Wear Surfaces Using the Combined ISS/SIMS Technique. E.N. Haeussler.....	435
Materials and Lubrication for Gear and Bearing Surfaces in UHV R.E. Kirby, G.J. Collet, E.L. Garwin.....	437
Interfacial Characterization of Copper Slip Ring-Wire Brush Contacts B. Singh and R.W. Vook.....	441
Characterization of the Chemical Treatment Effects On Titanium and Titanium Alloy Surfaces. A.A. Roche, J.S. Solomon.....	445
An Auger Analysis of the Surface Passivation Layers on Timplate. A.P. Grande and J.S. Johannessen.....	449
Spectroscopic Studies of Electrochemically Grown Oxide Films. W. Pliet h.....	453

Electronic and Optical Structure of Thin Passive Films on Titanium Electrodes. U. Stimming.....	457
ESCA Studies of the Corrosion Inhibitors on the Surfaces of Aluminium and Iron. L.P. Kazansky, I.L. Rozenfeld.....	460
On the Interaction Processes of Metaldithiophosphates With Metallic Surfaces. K. Meyer, K. Homann and H. Berndt.....	463
The Physical Basis of Wettability in Metallic Systems C. Lea	467
A Mössbauer Study of Surface Treatment and Wear of Steel. J.Bustad, T.Ericsson, W.Karner and R.Wäppling.....	471
Surface Wettability Studied by Surface Analysis. H. Montes, A. Gauthier, C. Blanc, J. Brissot.....	475
Behavior of a Ternary Alloy Fe-Mo-S In Dry Friction Conditions - AES Analysis. H. Montes, Ó. Kerbage.....	479
Self Lubricating Friction Material By High Rate Sputtering. A. Gaucher, J.P. Terrat, A. Marquet.....	482
A Study on the Surface Properties of TiO ₂ Pigments. F.Garbassi, E.Mello Ceresa, M.Visca.....	486
Surface Characterization of Porous Aluminas S.J. Wilson, M.H. Stacey.....	490
The Characterization of Passivation Films on Lithium Anodes. J.R.Hoenigman, R.G.Keil, T.N.Wittberg, J.A.Peters...	494
The Influence of Electrochemical Coatings on Catalytic Properties of Metal Surfaces. L.A. Vaiman, T.D. Radjabov,.....	498
Grain Boundary Diffusion and Segregation in B.C.C. and F.C.C. Solid Solutions. P. Gas, J. Bernardini.....	501

IV. Segregation and Surface Reactivity:	
The Role of Surface Phenomena in the Interactions of Reactive Metals With Gases.	
G. Hörz.....	507
Influence of Surface-Segregated Oxygen or Nitrogen On the Decomposition of Saturated and Unsaturated Hydrocarbons on Tantalum and α -Hafnium.	
G. Hörz, H. Vetter and H. Kanbach.....	518
Oxidation Kinetics of High Purity Titanium, Influence of a Monolayer of Chemisorbed Sulfur.	
J.P.Gspann, S.Bouquet, J.Le Hericy, J.P.Langeron.....	522
High Temperature Oxidation of Some Copper Alloys Studies by AES.	
P.E. Nilsson-Jatko, S.E. Karlsson.....	527
Limiting Kinetics in the Rate of Growth of Tungsten Oxide.	
J. Lepage, D.F. Paulmier.....	531
Monitoring of Deposition Rates of Multi-Component During Molecular Beam Epitaxial Growth of Si On SI(100) Using Atomic Absorption Spectroscopy.	
S. Shimizu, H.Yoshikawa, M.Kiriya and S.Komiya.....	534
The New Generation of Semi-Continuous Metallizing Plants For Roll of Plastic Films and Paper.	
G.Tonini, F.Grazzini.....	538
Closed Loop Multi Source Evaporation Rate Control With a Quadrupole Mass Spectrometer in an Ultra High Vacuum System.	
W.K. Hubert, U. Wegmann, K. Wellerdieck.....	542
A Magnetically Enhanced Sputter Source for Semi- Conductor Metallizations,	
T. Lawrence, Jr Lamont	546
Reproducible Production of AL/CU/SI-Metallizations by Simultaneous Evaporation With Three Electron Beam Source.	
F. Hegner.....	550

Behaviour of Niobium and Tantalum at High Temperatures In Low-Pressure Oxygen-Containing Atmospheres. K. Schulze and H. Jehn.....	554
Gravimetric Studies on the Behaviour of Platinum Metals and Refractory Carbides in Low-Pressure Oxygen Atmospheres. H. Jehn, S.G. Kang, E. Fromm.....	558
The Dissolution of Native Oxide Films on Titanium for Pyrotechnic Applications. T.N. Wittberg, W.E. Moddeman.....	562
RHEED-AES Investigations of the (001) $\text{Ni}_{1-X}\text{Co}_X\text{O}_H$ Hydrogen Reduction. L.C. Dufour, A. Jouini, P. Bracconi and N. Floquet...	566
