

CONTENTS

| | |
|---|----|
| 1. FUNDAMENTAL VARIATIONAL PRINCIPLE IN THERMAL CONDUCTION | |
| 1. Introduction | 1 |
| 2. Variational principle for isotropic thermal conductivity | 3 |
| 3. Generalized coordinates | 6 |
| 4. Lagrangian equations and minimum dissipation | 8 |
| 5. Anisotropic thermal conductivity | 11 |
| 6. Heat sources | 14 |
| 7. Numerical example | 16 |
| 2. GENERAL THEORY OF LINEAR SYSTEMS | 21 |
| 1. Introduction | 22 |
| 2. Boundary dissipation function | 24 |
| 3. Linear Lagrangian equations | 27 |
| 4. Thermal relaxation modes | 30 |
| 5. Orthogonality and normal coordinates | 36 |
| 6. Quasi-steady flow | 38 |
| 7. Illustrative example—weak solutions | 38 |
| 3. OPERATIONAL FORMULATION | 42 |
| 1. Introduction | 43 |
| 2. Thermal admittance | 46 |
| 3. Thermal impedance | 49 |
| 4. Fourier and Laplace transforms | 51 |
| 5. Operational rules | 54 |
| 6. Operator-variational principle | 56 |
| 7. Interconnection principle | 59 |
| 8. Continuous spectrum | |
| 4. ASSOCIATED FIELDS | 63 |
| 1. Introduction | 64 |
| 2. Ignorable coordinates and associated fields | 68 |
| 3. Minimum dissipation principle for associated fields | 70 |
| 4. Alternative formulation for associated fields | 74 |
| 5. Relation to Green's function | 77 |
| 6. Associated fields and normal coordinates | 81 |
| 7. Example of associated fields | |

| | |
|---|-----|
| 5. NON-LINEAR SYSTEMS | |
| 1. Introduction | 85 |
| 2. Thermal potential of non-linear systems | 86 |
| 3. Variational principle | 86 |
| 4. Associated fields for non-linear systems | 89 |
| 5. Melting boundaries and radiation | 92 |
| 6. Heating and cooling of a wall with non-linear properties | 96 |
| 6. CONVECTIVE HEAT TRANSFER | |
| 1. Introduction | 99 |
| 2. Trailing function | 100 |
| 3. Lagrangian equations for conduction with boundary convection | 104 |
| 4. Associated fields for convective heat transfer | 106 |
| 5. Unified equations for fluid-solid systems with convection | 111 |
| 7. BOUNDARY-LAYER HEAT TRANSFER | |
| 1. Introduction | 117 |
| 2. Conduction analogy | 118 |
| 3. Variational evaluation of the trailing function | 120 |
| 4. General variational procedures | 124 |
| 5. Laminar boundary layer | 130 |
| 6. Turbulent boundary layer | 134 |
| 7. Applications | 139 |
| 8. COMPLEMENTARY PRINCIPLES | |
| 1. Introduction | 143 |
| 2. Conduction in linear systems | 144 |
| 3. Operational principles | 151 |
| 4. Conduction in non-linear systems | 154 |
| 5. Convective systems | 156 |
| APPENDIX. RELATED SUBJECTS | |
| 1. Introduction | 161 |
| 2. Mass transport | 162 |
| 3. Irreversible thermodynamics | 165 |
| 4. Generalized coordinates and functional analysis | 173 |
