

CONTENTS

PREFACE	ix
The publications of A. John Coleman	xiii
A Tribute to A. John Coleman - The "Tame" Mathematician	1
P.O. Löwdin	
Reduced Density Matrices: 1929-1989	5
A.J. Coleman	
Some Aspects on the Development of the Theory of Reduced Density Matrices and the Representability Problem	21
P.O. Löwdin	
Representability Conditions	51
Robert Erdahl	
On the Diagonal N-Representability Problem	77
M.M. Mestechkin	
Fermion N-Representability Conditions Generated by a Decomposition of the 1-Particle Identity Operator onto Mutually Orthogonal Projection Operators	89
Hubert Grudzinski	
The Unitarily Invariant Decomposition of Hermitian Operators ...	115
Zong-Hao Zeng and Chia-Chung Sun	
Building Up N-Electron States with Symplectic Symmetry	141
Z.H. Zeng, C.C. Sun and A.J. Coleman	
Time Dependent Antisymmetrized Geminal Power Theory Using a Coherent State Formulation	167
E. Deumens, B. Weiner and Y. Ohrn	
Griffiths Inequalities for Fermion Systems	193
J.K. Percus	
Entropy of Reduced Density Matrices	213
Mary Beth Ruskai	
A Lower Bound to the Ground State Energy of a Boson System With Fermion Source	231
M. Rosina, B. Golli and R. M. Erdahl	

Reduced Density Operators, Their Related von Neumann Density Operators, Close Cousins of Thesé, and Their Physical Interpretation	249
Everett G. Larson	
Theory and Practice of the Spin-Adapted Reduced Hamiltonians (SRH)	275
C. Valdemoro	
Variational Principle with Built-In Pure State N-Representability Conditions. The N-Electron Case	289
Eduardo V. Ludena	
Wigner Distributions as Representations of the Density Matrix ..	305
Leon Cohen	
Inter-Relationships Between Various Representations of One-Matrices and Related Densities: A Road Map and an Example	327
Ajit J. Thakkar, Anthony C. Tanner and Vedene H. Smith, Jr.	
Current Problems in Density Functional Theory	339
E. Zaremba	
The Interface Between Reduced Density Matrices and Density Functional Theory	359
John E. Harriman	
The Physics Underlying the Langreth-Mehl Scheme for Non-Uniform Systems	375
David C. Langreth	
Understanding Energy Differences in Density Functional Theory ..	391
S.H. Vosko and Jolanta B. Lagowski	
Density Functional Calculations of Molecular Bond Energies	443
A.D. Becke	
Non-Local Effects on Atomic and Molecular Correlation Energies Studied with a Gradient-Corrected Density Functional	457
A. Savin, H. Preuss and H. Stoll	
An Evaluation of Local Electron Correlation Corrections and Non-Local Exchange Corrections to the Hartree-Fock-Slater Method from Calculations on Bond Energies and Electronic Spectra of Molecular Systems	467
Vincenzo Tschinke and Tom Ziegler	
Correlation Energy Functionals of One-Matrices and Hartree-Fock Densities	479
Mel Levy	

Some Remarks on Scaling Relations in Density Functional Theory	499
Weitao Yang	
Deduction of Semiempirical MO Methods from Density Functional Theory	507
Einar Lindholm and Stig Lundqvist	
Charge and Spin Densities in Molecular Solids: Local Density Functional Calculations Versus Experiment	517
Pierre J. Becker	
A Functional of the Two-Particle Density Matrix for the Approximate Calculation of the Electronic Correlation Energy ...	545
Renato Colle and Oriano Salvetti	
Extracules, Intracules, Correlation Holes, Potentials, Coefficients and All That	553
Ajit J. Thakkar	
The Exact Schrödinger Equation for the Electron Density	583
Geoffrey Hunter	
Adiabatic Separation, Broken Symmetries and Geometry Optimization	597
Osvaldo Goscinski and Vladimiro Mujica	
Asymptotic Results for Density Matrices and Electron Density in Atoms and Nearly Spherical Molecules	613
N.H. March and R. Pucci	
An Algorithm for Calculating Isoelectronic Changes in Energies, Densities, and One-Matrices	629
Jean E. Osburn and Mel Levy	
Atoms and Ions in the Limit of Large Nuclear Charge	643
José L. Gázquez, Marcelo Galván, Elba Ortiz and Alberto Vela	
Improved Thomas-Fermi Theory for Atoms	663
Swapan K. Ghosh and Robert G. Parr	
A Bond Energy from Quantum Mechanics	677
R.F.W. Bader and K.B. Wiberg	
Measured Electron Densities and Band Structure Calculations	693
John Avery and Peter Sommer-Larsen	
X-ray Orthonormal Orbital Model for Crystallography	707
L.J. Massa	
Index	717
