<b>1 Introduction (J. BORTFELDT, B. KRAMER)</b>	1-	1
1.1 Historical remarks	1-	1
1.1.1 First roots of measures	1-	1
1.1.2 First stage of metrology	1-	1
1.1.3 The “International Metreconvention”	1-	2
1.2 The international system of units	1-	4
1.3 Economical and industrial importance	1-	4
1.4 The fundamental constants	1-	4
1.5 Relations between fundamental constants and units	1-	4
1.6 Scientific importance	1-	5
1.7 International organizations and state institutes	1-	5
1.8 Physical quantities, dimensions, units, numerical values	1-	9
1.9 Mathematical treatment of measuring uncertainties	1-	13
1.9.1 Definition of uncertainties	1-	13
1.9.2 Mathematical formulation	1-	14
1.9.3 Expectation values, variances, covariances and correlation matrix	1-	15
1.9.4 Error propagation	1-	15
1.9.5 Adjustment of output data	1-	16
1.9.6 Confidence region	1-	16
1.10 Symbols and abbreviations	1-	17
1.11 References for 1	1-	24
<b>2 Units and their realization</b>	2-	1
2.1 The system of physical and chemical units and nomenclature (P. DRATH)	2-	1
2.1.1 Base units	2-	1
2.1.2 SI derived units	2-	1
2.1.3 Printing of symbols and numbers	2-	3
2.1.4 Decimal multiples and submultiples of SI units	2-	4
2.1.5 Legal units outside the international system	2-	4
2.1.6 Other units	2-	5
2.1.7 British and U.S. units	2-	6
2.1.8 Symbols für chemical elements and nuclides	2-	9
2.1.9 References for 2.1	2-	10
2.2 Realization of the SI units	2-	11
2.2.1 The second (H. DE BOER)	2-	11
2.2.1.1 Units of time and frequency	2-	11
2.2.1.1.1 The atomic definition of the second (SI second)	2-	11
2.2.1.1.2 Astronomical definitions of the second	2-	11
2.2.1.2 Time scales	2-	12
2.2.1.2.1 The universal time scale	2-	12
2.2.1.2.2 Atomic time scales	2-	14
2.2.1.2.3 The modified Julian date	2-	15
2.2.1.2.4 Time scale notations	2-	15
2.2.1.3 Standard frequency generators and clocks	2-	16
2.2.1.3.1 Properties of frequency generators and clocks	2-	16
2.2.1.3.2 Measures for the uncertainty and instability of time and frequency standards	2-	17
2.2.1.3.3 Quartz crystal frequency standards	2-	20

2.2.1.3.4	Atomic frequency standards . . . . .	2– 20
2.2.1.3.4.1	Caesium atomic clocks . . . . .	2– 21
2.2.1.3.4.2	Hydrogen (H) frequency standard . . . . .	2– 24
2.2.1.3.4.3	Rubidium frequency standards . . . . .	2– 25
2.2.1.3.4.4	Future prospects . . . . .	2– 27
2.2.1.4	Transfer of time and frequency . . . . .	2– 27
2.2.1.4.1	Time transfer by clock transport . . . . .	2– 28
2.2.1.4.2	Principle of time transfer and comparisons of time and frequency by means of radio techniques . . . . .	2– 28
2.2.1.4.2.1	Time transfer . . . . .	2– 28
2.2.1.4.2.2	Time comparisons . . . . .	2– 28
2.2.1.4.2.3	Frequency comparison . . . . .	2– 28
2.2.1.4.3	Transfer by high frequency (HF) emissions . . . . .	2– 28
2.2.1.4.4	Transfer by low frequency (LF) emissions . . . . .	2– 29
2.2.1.4.5	Transfer by very low frequency (VLF) emissions . . . . .	2– 29
2.2.1.4.6	Transfer by television (TV) signals . . . . .	2– 29
2.2.1.4.7	Transfer by LORAN-C signals . . . . .	2– 29
2.2.1.4.8	Time transfer by satellite . . . . .	2– 30
2.2.1.4.9	Time transfer by GPS (global positioning system) . . . . .	2– 31
2.2.1.4.10	Time transfer by GLONASS (global navigation satellite system) . . . . .	2– 31
2.2.1.5	References for 2.2.1 . . . . .	2– 31
2.2.2	The metre (F. BAYER-HELMs) . . . . .	2– 34
2.2.2.1	Definition . . . . .	2– 34
2.2.2.1.1	SI-definition 1983 . . . . .	2– 34
2.2.2.1.2	Consequences of the 1983 definition . . . . .	2– 34
2.2.2.1.3	The word “light” and the dispersion of $c_0$ . . . . .	2– 34
2.2.2.1.4	Physical constant. Variation of $c_0$ with time? . . . . .	2– 35
2.2.2.1.5	Reference conditions . . . . .	2– 35
2.2.2.2	Realization . . . . .	2– 36
2.2.2.2.1	Former definitions and their realizations . . . . .	2– 36
2.2.2.2.2	Realization of the present definition . . . . .	2– 37
2.2.2.2.2.1	General recommendations . . . . .	2– 37
2.2.2.2.2.2	Direct realization. Realization of a nonmaterial distance . . . . .	2– 37
2.2.2.2.2.3	Realization of wavelengths and frequencies . . . . .	2– 37
2.2.2.2.2.4	Realization of material lengths. Traceability of industrial measurements . . . . .	2– 40
2.2.2.3	Dissemination and maintenance . . . . .	2– 40
2.2.2.3.1	Interferential wavelength comparisons . . . . .	2– 40
2.2.2.3.2	Wavelength standards in air . . . . .	2– 42
2.2.2.3.3	Historical wavelength scales . . . . .	2– 42
2.2.2.4	References for 2.2.2 . . . . .	2– 44
2.2.3	The kilogram (M. KOCHSIEK) . . . . .	2– 46
2.2.3.1	Definition and realization . . . . .	2– 46
2.2.3.2	Dissemination and maintenance . . . . .	2– 48
2.2.3.3	Methods of measurement . . . . .	2– 53
2.2.3.4	Uncertainties . . . . .	2– 55
2.2.3.5	References for 2.2.3 . . . . .	2– 59
2.2.4	The ampere (H. BACHMAIR) . . . . .	2– 60
2.2.4.1	Definition . . . . .	2– 60
2.2.4.2	Realization . . . . .	2– 60
2.2.4.2.1	Direct measuring methods . . . . .	2– 60
2.2.4.2.2	Indirect measuring methods . . . . .	2– 66
2.2.4.3	Reproduction, maintenance and dissemination . . . . .	2– 67
2.2.4.4	References for 2.2.4 . . . . .	2– 68
2.2.5	The kelvin . . . . .	2– 69
2.2.5.1	Thermodynamic temperature (W. BLANKE) . . . . .	2– 69
2.2.5.1.1	Introduction . . . . .	2– 69
2.2.5.1.2	Unit of temperature . . . . .	2– 69
2.2.5.1.3	Determination of thermodynamic temperatures . . . . .	2– 70

2.2.5.1.3.1 Gas thermometer . . . . .	2- 70
2.2.5.1.3.2 Acoustic thermometer . . . . .	2- 72
2.2.5.1.3.3 Noise thermometer . . . . .	2- 73
2.2.5.2 The “International Temperature Scale of 1990” (ITS-90) (W. BLANKE) . . . . .	2- 73
2.2.5.2.1 Introduction . . . . .	2- 73
2.2.5.2.2 The defining fixed points . . . . .	2- 76
2.2.5.2.3 Interpolating instruments of ITS-90. . . . .	2- 76
2.2.5.3 Temperatures below 273 K (W. BLANKE) . . . . .	2- 76
2.2.5.3.1 Definition of ITS-90 in the range below 273 K . . . . .	2- 76
2.2.5.3.2 Measuring methods for the realization of the defining fixed points below 273.16 K . . . . .	2- 78
2.2.5.3.3 ITS-90 interpolating instruments from 3.0 K . . . . . 273.16 K . . . . .	2- 82
2.2.5.4 Temperatures above 273 K (H.J. JUNG). . . . .	2- 82
2.2.5.4.1 General principle of ITS-90 in the range above 273 K . . . . .	2- 83
2.2.5.4.2 The thermodynamic basis of the ITS-90 . . . . .	2- 84
2.2.5.4.2.1 Temperatures between 0 °C and 630 °C . . . . .	2- 85
2.2.5.4.2.2 Temperatures above 630 °C . . . . .	2- 90
2.2.5.4.3 Definition of ITS-90 in the range above 273 K . . . . .	2- 91
2.2.5.4.4 Differences between the International Temperature Scale of 1990 and the International Practical Temperature Scale of 1968 . . . . .	2- 93
2.2.5.4.5 Standard thermometers and their calibration in terms of ITS-90. . . . .	2- 95
2.2.5.4.5.1 Platinum resistance thermometer . . . . .	2- 95
2.2.5.4.5.2 Spectral radiation thermometers . . . . .	2- 97
2.2.5.5 Thermometry below 1 K (G. SCHUSTER) . . . . .	2- 98
2.2.5.5.1 Introduction . . . . .	2- 98
2.2.5.5.2 Noise thermometry . . . . .	2- 99
2.2.5.5.3 Magnetic thermometry . . . . .	2- 99
2.2.5.5.3.1 Nuclear orientation . . . . .	2- 99
2.2.5.5.3.2 Nuclear magnetic resonance . . . . .	2-100
2.2.5.5.3.3 Paramagnetic susceptibility . . . . .	2-100
2.2.5.5.4 Low temperature standards . . . . .	2-100
2.2.5.5.4.1 Superconductive fixed points . . . . .	2-100
2.2.5.5.4.2 <sup>3</sup> He melting pressure . . . . .	2-100
2.2.5.5.5 Resistance thermometry . . . . .	2-101
2.2.5.5.6 Uncertainties . . . . .	2-101
2.2.5.6 References for 2.2.5 . . . . .	2-102
2.2.6 The mole (P. DRATH) . . . . .	2-105
2.2.6.1 Definition . . . . .	2-105
2.2.6.2 Measuring methods . . . . .	2-105
2.2.6.3 Dissemination and maintenance . . . . .	2-106
2.2.6.4 References for 2.2.6 . . . . .	2-106
2.2.7 The candela (G. SAUTER) . . . . .	2-107
2.2.7.1 General remarks . . . . .	2-107
2.2.7.2 Definition . . . . .	2-114
2.2.7.3 Realization . . . . .	2-115
2.2.7.4 Uncertainty . . . . .	2-116
2.2.7.5 References for 2.2.7 . . . . .	2-118
2.3 Derived SI units . . . . .	2-119
2.3.1 Mechanics and thermodynamics . . . . .	2-119
2.3.1.1 Areas (R. MANN) . . . . .	2-119
2.3.1.1.1 Measuring principle . . . . .	2-119
2.3.1.1.2 Measuring machines . . . . .	2-119
2.3.1.1.3 Uncertainties . . . . .	2-121
2.3.1.1.4 References for 2.3.1.1 . . . . .	2-121
2.3.1.2 Volumes (M. ZANDER) . . . . .	2-121
2.3.1.2.1 Definition . . . . .	2-121
2.3.1.2.2 Measuring methods . . . . .	2-121
2.3.1.2.2.1 Liquids . . . . .	2-121
2.3.1.2.2.2 Solids . . . . .	2-124

2.3.1.2.2.3 Gases . . . . .	2-124
2.3.1.2.3 Volume measures . . . . .	2-125
2.3.1.2.4 References for 2.3.1.2 . . . . .	2-128
2.3.1.3 Angles (D. ULLRICH) . . . . .	2-129
2.3.1.3.1 Definition . . . . .	2-129
2.3.1.3.2 Realization . . . . .	2-129
2.3.1.3.3 Measuring methods . . . . .	2-130
2.3.1.3.3.1 Reference systems . . . . .	2-131
2.3.1.3.3.2 Transfer systems . . . . .	2-134
2.3.1.3.3.3 Measuring strategies . . . . .	2-135
2.3.1.3.4 Uncertainties of measurement . . . . .	2-135
2.3.1.3.5 References for 2.3.1.3 . . . . .	2-136
2.3.1.4 Density (M. GLÄSER) . . . . .	2-136
2.3.1.4.1 Definitions . . . . .	2-136
2.3.1.4.2 Measuring methods . . . . .	2-137
2.3.1.4.2.1 Solids . . . . .	2-138
2.3.1.4.2.2 Liquids . . . . .	2-139
2.3.1.4.2.3 Gases . . . . .	2-139
2.3.1.4.3 Dissemination and maintenance . . . . .	2-140
2.3.1.4.4 Uncertainties . . . . .	2-142
2.3.1.4.5 References for 2.3.1.4 . . . . .	2-142
2.3.1.5 Force (M. PETERS) . . . . .	2-143
2.3.1.5.1 Definition . . . . .	2-143
2.3.1.5.2 Realization . . . . .	2-143
2.3.1.5.3 Measuring methods . . . . .	2-144
2.3.1.5.4 International realization of forces . . . . .	2-148
2.3.1.5.5 Limits of uncertainty . . . . .	2-150
2.3.1.5.6 References for 2.3.1.5 . . . . .	2-150
2.3.1.6 Low pressure (vacuum) (W. JITSCHIN) . . . . .	2-151
2.3.1.6.1 Definitions . . . . .	2-151
2.3.1.6.2 Vacuum techniques . . . . .	2-154
2.3.1.6.3 Primary pressure standards . . . . .	2-154
2.3.1.6.4 Dissemination by secondary standards . . . . .	2-159
2.3.1.6.5 International intercomparisons . . . . .	2-160
2.3.1.6.6 References for 2.3.1.6 . . . . .	2-163
2.3.1.7 Medium pressure (up to 2 GPa) (J. JÄGER) . . . . .	2-165
2.3.1.7.1 Definitions . . . . .	2-165
2.3.1.7.2 Measuring methods . . . . .	2-165
2.3.1.7.2.1 Fundamental instruments for the measurement of gas pressures up to 1 MPa . . . . .	2-165
2.3.1.7.2.2 Pressure balances for the 1 MPa to 1 GPa range of measurement . . . . .	2-168
2.3.1.7.2.3 Manganin resistance sensors as extrapolating secondary standards . . . . .	2-171
2.3.1.7.3 Dissemination and maintenance . . . . .	2-172
2.3.1.7.3.1 Pressure balance intercomparison measurements . . . . .	2-172
2.3.1.7.3.2 Results of international pressure comparison measurements . . . . .	2-173
2.3.1.7.4 Uncertainties . . . . .	2-174
2.3.1.7.5 References for 2.3.1.7 . . . . .	2-176
2.3.1.8 High pressure (above 2 GPa) (W.B. HOLZAPFEL) . . . . .	2-177
2.3.1.8.1 General remarks . . . . .	2-177
2.3.1.8.2 Primary pressure measurements . . . . .	2-177
2.3.1.8.2.1 Piston-cylinder devices . . . . .	2-177
2.3.1.8.2.2 Compressibility and volume measurements . . . . .	2-178
2.3.1.8.2.3 Shock wave measurements . . . . .	2-178
2.3.1.8.3 Secondary pressure measurements . . . . .	2-179
2.3.1.8.3.1 Reference points . . . . .	2-179
2.3.1.8.3.2 The lead manometer . . . . .	2-180
2.3.1.8.3.3 EOS and X-ray diffraction . . . . .	2-180

2.3.1.8.3.4	The ruby luminescence gauge . . . . .	2-182
2.3.1.8.4	Current developments . . . . .	2-183
2.3.1.8.5	References for 2.3.1.8 . . . . .	2-184
2.3.1.9	Mass flow (L. NARJES) . . . . .	2-185
2.3.1.9.1	Definition . . . . .	2-185
2.3.1.9.2	Measuring methods . . . . .	2-186
2.3.1.9.3	Dissemination and maintenance . . . . .	2-190
2.3.1.9.4	Uncertainties . . . . .	2-191
2.3.1.9.5	References for 2.3.1.9 . . . . .	2-192
2.3.1.10	Heat, internal energy, enthalpy, and specific heat (U. HAMMERSCHMIDT) . . . . .	2-192
2.3.1.10.1	Definitions . . . . .	2-192
2.3.1.10.2	Measuring methods in calorimetry . . . . .	2-193
2.3.1.10.3	Instruments . . . . .	2-197
2.3.1.10.4	Determination of the thermal effect of solids and liquids . . . . .	2-198
2.3.1.10.5	Determination of the thermal effect of liquids and gases . . . . .	2-202
2.3.1.10.6	References of 2.3.1.10 . . . . .	2-203
2.3.1.11	Thermal transport (U. HAMMERSCHMIDT) . . . . .	2-204
2.3.1.11.1	Definitions . . . . .	2-204
2.3.1.11.2	Measuring methods . . . . .	2-206
2.3.1.11.3	Instruments . . . . .	2-207

2.3.3.2	Polarization (H. AHLERS, J. SIEVERT) . . . . .	2-288
2.3.3.2.1	Definition . . . . .	2-288
2.3.3.2.2	Measuring methods . . . . .	2-288
2.3.3.2.3	References for 2.3.3.2 . . . . .	2-293
2.3.3.3	Inductance (R. HANKE) . . . . .	2-294
2.3.3.3.1	Definition . . . . .	2-294
2.3.3.3.2	Realization . . . . .	2-296
2.3.3.3.3	The measurement of inductance and the <i>Q</i> factor . . . . .	2-297
2.3.3.3.4	Uncertainties . . . . .	2-301
2.3.3.3.5	References for 2.3.3.3 . . . . .	2-301
2.3.4	Ionizing radiation . . . . .	2-302
2.3.4.1	Radioactivity (K. DEBERTIN) . . . . .	2-302
2.3.4.1.1	General remarks . . . . .	2-302
2.3.4.1.2	Definition and unit of activity . . . . .	2-302
2.3.4.1.3	Absolute activity measurements . . . . .	2-302
2.3.4.1.4	Activity standards . . . . .	2-306
2.3.4.1.5	Relative activity measurements . . . . .	2-306
2.3.4.1.6	References for 2.3.4.1 . . . . .	2-307
2.3.4.2	Absorbed dose (K. HOHLFELD) . . . . .	2-308
2.3.4.2.1	Definition and application . . . . .	2-308
2.3.4.2.2	Principles of measurement . . . . .	2-308
2.3.4.2.3	Measuring methods and standards . . . . .	2-309
2.3.4.2.3.1	The ionization method . . . . .	2-309
2.3.4.2.3.2	Chemical method of absorbed dose measurement . . . . .	2-310
2.3.4.2.3.3	The graphite absorbed dose calorimetry . . . . .	2-311
2.3.4.2.3.4	The water absorbed dose calorimetry . . . . .	2-314
2.3.4.2.4	References for 2.3.4.2 . . . . .	2-316
2.3.4.3	Kerma (K. HOHLFELD) . . . . .	2-317
2.3.4.3.1	Definition and application . . . . .	2-317
2.3.4.3.2	Principles of measurement . . . . .	2-318
2.3.4.3.3	Measuring methods and standards . . . . .	2-318
2.3.4.3.4	Uncertainties and intercomparison of air kerma standards . . . . .	2-321
2.3.4.3.5	References for 2.3.4.3 . . . . .	2-323
2.3.4.4	Dose equivalent (K. HOHLFELD) . . . . .	2-324
2.3.4.4.1	Relative biological effectiveness and quality factor . . . . .	2-324
2.3.4.4.2	Definition and application of dose equivalent . . . . .	2-325
2.3.4.4.3	Operational dose equivalent quantities . . . . .	2-327
2.3.4.4.4	Standards and determination of dose equivalent . . . . .	2-327
2.3.4.4.5	Uncertainty in the determination of dose equivalent . . . . .	2-328

2.3.4.4.6 References for 2.3.4.4 . . . . .	2-329
2.3.5 Sound (H.-O. FINKE) . . . . .	2-330
2.3.5.1 Sound fields, quantities and levels . . . . .	2-330
2.3.5.1.1 Characterization . . . . .	2-330
2.3.5.1.2 Specification of sound fields . . . . .	2-331
2.3.5.2 The speed of sound (in gas) . . . . .	2-331
2.3.5.3 Sound pressure . . . . .	2-334
2.3.5.3.1 Measuring of sound pressure in couplers . . . . .	2-334
2.3.5.3.2 Measuring of sound pressure in free sound fields . . . . .	2-337
2.3.5.3.3 Diffuse field calibration . . . . .	2-338
2.3.5.4 Particle velocity . . . . .	2-340
2.3.5.4.1 Velocity microphone . . . . .	2-340
2.3.5.4.2 Two pressure microphones . . . . .	2-340
2.3.5.5 Sound intensity . . . . .	2-341
2.3.5.6 Sound power . . . . .	2-343
2.3.5.6.1 Free field measurements . . . . .	2-343
2.3.5.6.2 Diffuse field measurements . . . . .	2-344
2.3.5.6.3 Measurements by means of a reference sound source . . . . .	2-345
2.3.5.7 Noise measurements . . . . .	2-345
2.3.5.7.1 Sound level meters . . . . .	2-345
2.3.5.7.2 Rating methods . . . . .	2-345
2.3.5.8 References for 2.3.5 . . . . .	2-347
2.3.6 Optical radiation . . . . .	2-348
2.3.6.1 Radiometry (K. MÖSTL) . . . . .	2-348
2.3.6.1.1 Definitions . . . . .	2-348
2.3.6.1.2 Measuring methods . . . . .	2-351
2.3.6.1.3 Standard detectors . . . . .	2-354
2.3.6.1.4 Standard sources . . . . .	2-357
2.3.6.1.5 Dissemination and maintenance . . . . .	2-361
2.3.6.1.6 References for 2.3.6.1 . . . . .	2-362
2.3.6.2 Photometry (G. SAUTER) . . . . .	2-363
2.3.6.2.1 The lux, unit of illuminance . . . . .	2-365
2.3.6.2.2 The lumen, unit of luminous flux . . . . .	2-367
2.3.6.2.3 The SI unit cd m <sup>-2</sup> , unit of luminance . . . . .	2-371
2.3.6.2.4 The distribution temperature . . . . .	2-372
2.3.6.2.5 References for 2.3.6.2 . . . . .	2-373
2.3.6.3 Colorimetry (W. ERB, M. KRYSZEK) . . . . .	2-374
2.3.6.3.1 Optical radiation . . . . .	2-374
2.3.6.3.2 Weighting of optical radiation . . . . .	2-379
2.3.6.3.3 Weighting functions of the human eye . . . . .	2-380
2.3.6.3.4 CIE colorimetric system . . . . .	2-383
2.3.6.3.5 Colour differences . . . . .	2-388
2.3.6.3.6 References for 2.3.6.3 . . . . .	2-389
