

CONTENTS

Preface *v*

chapter 1. A PHYSICAL INTRODUCTION TO THE STARS 1

- 1-1. Luminosity* 3
- 1-2. Stellar Temperatures* 14
- 1-3. Mass* 39
- 1-4. Radius* 40
- 1-5. Energetics* 41
- 1-6. The Hertzsprung-Russell Diagram* 46
- 1-7. Stellar Populations* 51
- 1-8. Stellar Evolution* 62
- 1-9. Nucleosynthesis* 69

chapter 2. THERMODYNAMIC STATE OF THE STELLAR INTERIOR 77

- 2-1. Mechanical Pressure of a Perfect Gas* 79
- 2-2. Quasistatic Changes of State* 112
- 2-3. The Ionized Real Gas* 139
- 2-4. Polytropes* 155

chapter 3.	ENERGY TRANSPORT IN THE STELLAR INTERIOR	
	166	
	3-1. <i>Energy Balance</i>	167
	3-2. <i>Radiative Transfer</i>	170
	3-3. <i>Opacity of Stellar Matter</i>	185
	3-4. <i>Conduction</i>	232
	3-5. <i>Convective Instability of the Temperature Gradient</i>	252
	3-6. <i>Neutrino Emission</i>	259
chapter 4.	THERMONUCLEAR REACTION RATES	283
	4-1. <i>Kinematics and Energetics</i>	284
	4-2. <i>Cross Section and Reaction Rate</i>	288
	4-3. <i>Nonresonant Reaction Rates</i>	296
	4-4. <i>Nuclear States</i>	309
	4-5. <i>Penetration Factors</i>	333
	4-6. <i>Maximum Cross Section and Resonant Reactions</i>	342
	4-7. <i>Resonant Reaction Rates in Stars</i>	348
	4-8. <i>Electron Shielding</i>	357
chapter 5.	MAJOR NUCLEAR BURNING STAGES IN STELLAR EVOLUTION	362
	5-1. <i>The Proton-Proton Reaction</i>	366
	5-2. <i>PPI Chain</i>	369
	5-3. <i>PPII and PPIII Chains</i>	378
	5-4. <i>The CNO Bi-cycle</i>	390
	5-5. <i>Helium Burning</i>	411
	5-6. <i>Advanced Burning Stages</i>	430
	5-7. <i>Photodisintegration</i>	433
chapter 6.	CALCULATION OF STELLAR STRUCTURE	436
	6-1. <i>Boundary Conditions</i>	438
	6-2. <i>M as the Independent Variable</i>	442
	6-3. <i>Composition Changes</i>	444
	6-4. <i>Numerical Techniques</i>	446
	6-5. <i>Contraction to the Main Sequence</i>	462
	6-6. <i>The Main Sequence</i>	470
	6-7. <i>Advanced Stellar Evolution</i>	484
	6-8. <i>Rotation</i>	497
	6-9. <i>Mass Loss</i>	501
	6-10. <i>Pulsation</i>	504

chapter 7.	SYNTHESIS OF THE HEAVY ELEMENTS	516
7-1.	<i>Photodisintegration Rearrangement and Silicon Burning</i>	517
7-2.	<i>Nuclear Statistical Equilibrium and the e Process</i>	533
7-3.	<i>Nucleosynthesis of Heavy Elements by Neutron Capture</i>	546
<i>Index</i>		607
