

CONTENTS

MHD numerical simulation of clouds and jets in star-forming regions TAKAHIRO KUDOH and SHANTANU BASU	779
Dominant roles of pressure tensors in collisionless magnetic reconnection without a guide field A. ISHIZAWA and R. HORIUCHI	787
The formation of high-density core plasma in non-spherical implosion using high-resolution two-dimensional integrated implosion code H. NAGATOMO, T. JOHZAKI, A. SUNAHARA and K. MIMA	791
Powerful terahertz emission from laser wakefields in plasmas for diagnostics Z.-M. SHENG, J. ZHENG, H.-C. WU, J. ZHANG and K. MIMA	795
Multi-scale modeling of hydrogen isotope transport in porous graphite M. WARRIER, R. SCHNEIDER, E. SALONEN and K. NORDLUND	799
Molecular dynamics simulation of collisions between hydrogen and graphite ATSUSHI ITO and HIROAKI NAKAMURA	805
Finite size effects on charging in dusty plasmas K. MATYASH and R. SCHNEIDER	809
Path integral Monte Carlo calculations of dense hydrogen and helium thermodynamics P. R. LEVASHOV, V. S. FILINOV, M. BONITZ and V. E. FORTOV	813
Simulations of Alfvén eigenmodes with an extended Ohm’s law YASUSHI TODO	817
Zonal flow and GAM dynamics and associated transport characteristics in reversed shear tokamaks NAOAKI MIYATO, YASUAKI KISHIMOTO and JIQUAN LI	821
Collisionless damping of geodesic acoustic modes H. SUGAMA and T.-H. WATANABE	825
SPECTOR3D: a resistive magnetohydrodynamic stability code for stellarators B. F. McMILLAN and R. G. STORER	829
Nonlinear filtering in compact high-order schemes H. C. YEE and B. SJÖGREEN	833
A glassless stereoscopic visualization system for a 3DMHD real-time Earth’s magnetosphere simulator MITSUE DEN, TAKUHITO KUWABARA, TOMOYA OGAWA, TAKASHI TANAKA, IGOR GONCHARENKO and HIROYOSHI AMO	837
MovieMaker: a parallel movie-making software for large-scale simulations H. UEHARA, S. KAWAHARA, N. OHNO, M. FURUICHI, F. ARAKI and A. KAGEYAMA	841
Parallel implementation of a three-dimensional electrostatic PIC–MCC method using an unstructured tetrahedral mesh J.-S. WU and K.-H. HSU	845

Particle simulations of the nonlinear electron dynamics in the classical Pierce diode MARTIN KOČAN, S. KUHN, D. TSKHAKAYA and J. D. SKALNÝ	851
Particle-in-cell guiding center models of ion velocity space shell instabilities J.-N. LEBOEUF, M. ASHOUR-ABDALLA, J.-M. BOSQUED, N. CORNILLEAU-WEHRLIN, D. SCHRIVER and V. SOTNIKOV	857
The sidebands instability MAGDI SHOUCRI	861
Dynamics of two-sign point vortices in positive and negative temperature states YUICHI YATSUYANAGI, YASUHIRO KIYAMOTO, HIROYUKI TOMITA, MITSUSADA M. SANO, TAKESHI YOSHIDA and TOSHIKAZU EBISUZAKI	865
The phenomena occurring by the coupling between an electron solitary wave and an ion wave in a beam-plasma system ICHIRO MORI and TOSHIFUMI MORIMOTO	869
Ponderomotive effects in an electromagnetic accelerator Y. N. TOLMACHEV, WONTAEK PARK, V. N. VOLYNETS, V. G. PASHKOVSKY and JINWOO YOO	873
Numerical simulation of a magneto plasma sail by using three-dimensional hybrid code YOSHIHIRO KAJIMURA, DAISUKE SHINOHARA, KENJI NODA and HIDEKI NAKASHIMA	877
Simulation of edge-localized modes in a spherical tokamak: effects of ion diamagnetic drift R. KHAN, N. MIZUGUCHI and T. HAYASHI	883
Theory and simulations of relativistic particle motions in a magnetosonic shock wave SHUNSUKE USAMI and Y. OHSAWA	887
Hybrid simulation of neutral beam injection into a field-reversed configuration T. TAKAHASHI, Y. YAMADA, Y. KONDOH, M. GOTO, T. OKADA, Y. HIRANO, T. ASAI, T. TAKAHASHI and Y. TOMITA	891
Multi-ion-species effects on low-frequency electromagnetic fluctuations and energy transport MIEKO TOIDA and YUKIHARU OHSAWA	895
Equilibrium through self-organization and a stability condition derived from generalized self-organization theory KONDOH YOSHIOMI, TAKAHASHI TOSHIKI and JAMES W. VAN DAM	901
Slow cyclotron instability due to surface modulation of an annular beam KAZUO OGURA, HOSHIYUKI YAMAZAKI, YUTAKA KIUCHI and MD. RUHUL AMIN	905

Numerical study of azimuthally symmetric Dubin mode excited in non-neutral plasma trapped in a harmonic potential JUN AOKI, Y. KIWAJIMOTO, Y. SOGA and Y. KAWAI	975	Hydrodynamic efficiency of ablation by a pulsed ion beam for propulsion applications CHAINARONG BUTTAPENG, MASARU YAZAWA and NOBUHIRO HARADA	909
Simulation study of the Solar flare onset mechanism and the self-organization in the Solar coronal plasma K. KUSANO, N. NISHIKAWA, S. INOUE, T. MAESHIRO and T. SAKURAI	979	Numerical examination of the operation modes of a weakly relativistic oversized backward wave oscillator HOSHIYUKI YAMAZAKI, HIROKAZU TAKAGI, HIDEKAZU TANAKA and KAZUO OGURA	915
Electron acceleration in a plasma filled rectangular waveguide under obliquely applied magnetic field SANDEEP KUMAR and HITENDRA K. MALIK	983	Simulation studies of positron acceleration by a shock wave YUKI HARU OHSAWA, K. KATO and H. HASEGAWA	919
Low-frequency instabilities locally enhanced by parallel flow velocity shears in magnetized plasmas T. KANEKO, H. SAITO, S. ISHIGURO and R. HATAKEYAMA	989	Three-dimensional particle-in-cell simulations of energetic electron generation and self-generated magnetic field with high-intensity laser pulses in overdense plasmas T. OKADA, K. OGAWA and M. SUGIE	925
Particle modeling of radiofrequency discharges of SF ₆ LIZHU TONG and KENICHI NANBU	993	Three-dimensional particle simulation on structure formation and plasma instabilities in collisionless driven reconnection H. OHTANI, R. HORIUCHI and A. ISHIZAWA	929
Instability of a high-frequency wave in irradiated and streaming dusty plasmas M. K. ISLAM and Y. NAKASHIMA	997	Parametric study of the resonant scattering process by narrow band whistler mode waves driven by temperature anisotropy YUTO KATOH and YOSHIHARU OMURA	935
Dependence of a self-assembled amphiphile structure on the interaction between hydrophilic groups HIROAKI NAKAMURA and YUICHI TAMURA	1001	Particle acceleration by a large-amplitude wave associated with an ion beam in a magnetized plasma HIROKI HASEGAWA, SELJI ISHIGURO and MASAO OKAMOTO	941
Self-consistent Monte Carlo simulation of particle motion and photon transport in the Argon positive column V. ZHAKHOVSKII and K. NISHIHARA	1005	MHD PIC connection model in a magnetosphere–ionosphere coupling system T. SUGIYAMA, K. KUSANO, S. HIROSE and A. KAGEYAMA	945
Molecular dynamics simulation of self-organization in amphiphilic solution SUSUMU FUJIWARA, MASATO HASHIMOTO and TAKASHI ITOH	1011	Loading experimental velocity distributions into particle-in-cell simulations of space and fusion plasmas D. SCHRIEVER, J.-N. LEBOEUF, M. ASHOUR-ABDALLA, M. EL-ALAOU, J.-M. BOSQUED and V. SOTNIKOV	949
Charging of a spherical dust particle on a plasma-facing wall YUKIHIRO TOMITA, R. SMIRNOV, T. TAKIZUKA and D. TSKHAKAYA	1015	Towards cross-hierarchy simulation of collisionless driven reconnection in an open system R. HORIUCHI, H. OHTANI and A. ISHIZAWA	953
FDTD modeling of a polarization near-field scanning optical microscope K. SAWADA, M. SAKAI, Y. KOHASHI, T. SAIKI and H. NAKAMURA	1019	Simulation of resistive drift wave turbulence in a linear device NAOHIRO KASUYA, MASATOSHI YAGI and KIMITAKA ITOH	957
Iterative numerical method for the inclusion of radiation trapping into a collisional-radiative model KELJI SAWADA	1025	Plasma instabilities and anomalous resistivity in the current sheet T. MORITAKA, R. HORIUCHI, H. OHTANI and A. ISHIZAWA	961
Molecular dynamic simulation of the microscopic properties and electrical conductivity of a dense semiclassical plasma T. S. RAMAZANOV, G. N. NIGMETOVA, G. RÖPKE and R. REDMER	1031	Numerical analysis on the contribution of the singular perturbation by the Hall term to the spectrum of MHD turbulence using a shell model DAN HORI, MASARU FURUKAWA, SHUICHI OHSAKI, RYUSUKE NUMATA and ZENSHO YOSHIDA	965
Atomic model construction of protein complexes from electron micrographs and visualization of their 3D structure using a virtual reality system KAZUHIRO NODA, MIHO NAKAMURA, RYOKO NISHIDA, YUKARI YONEDA, YOKO YAMAGUCHI, YUICHI TAMURA, HIROAKI NAKAMURA and TAKUO YASUNAGA	1037	A paradigm of kinetic simulation including atomic and relaxation processes: a sudden event in a lightning process Y. KISHIMOTO and T. MASAKI	971
Adaptive finite elements for a set of second-order ODEs JAKUB URBAN and JOSEF PREINHAELTER	1041		

3D Monte Carlo modelling of edge plasmas in fusion experiments ALEXEY M. RUNOV, S. V. KASHLOV, R. SCHNEIDER and D. REITER	1109	First- and second-order accurate implicit difference schemes for the numerical resolution of the generalized Charney–Obukhov and Hasegawa–Mima equations T. KALADZE, J. ROGAVA, L. TSAMALASHVILI and M. TSIKLARI	1045
Hybrid simulation of z-pinch in support of wire array implosion experiments at the Nevada Terawatt Facility V. SOTNIKOV, V. V. IVANOV, T. E. COWAN, J. N. LEBOEUF, B. V. OLIVER, C. COVERDALE, B. JONES, C. DEENEY, T. A. MEHLHORN, P. D. LePELL, P. HELLINGER and P. TRÁVNÍČEK	1113	Solution of a nonlinear system by the adaptively deaccelerated Newton method: application to shielding current analysis in HTS SOICHIRO IKUNO and ATSUSHI KAMITANI	1049
Multi-scale approach to the solution of nonlinear MHD evolution of heliotron plasma KATSUJI ICHIGUCHI and BENJAMIN A. CARRERAS	1117	Numerical simulation of an electromagnetic field by parallelized 3D AIBO-FDTD TOSHIHIRO HANAWA and SOICHIRO IKUNO	1053
Monte Carlo simulation of neutral transport in the non-axisymmetric region of the GAMMA 10 anchor-cell Y. NAKASHIMA, Y. HIGASHIZONO, M. SHOJI, S. KOBAYASHI, Y. KUBOTA, M. YOSHIKAWA, T. KOBAYASHI, M. K. ISLAM and T. CHO	1123	Comparison of numerical interpolation schemes for one-dimensional electrostatic Vlasov code TAKAYUKI UMEDA, MAHA ASHOUR-ABDALLA and DAVID SCHRIVER	1057
Analysis of an aspect ratio effect on the stability of external MHD modes in tokamaks with the Newcomb equation NOBUYUKI AIBA, SHINJI TOKUDA and TOMOKO ISHIZAWA	1127	Numerical simulation of inductive measurement of critical current density in HTS: high-performance method for solving shielding current equations A. KAMITANI, S. IKUNO and H. NAKAMURA	1061
A numerical model for radiofrequency heating of sloshing ions in a mirror trap VLADIMIR E. MOISEENKO and OLOV ÅGREN	1133	Collaborative virtual reality space for analyzing numerical simulation results YUICHI TAMURA, A. KAGEYAMA, H. NAKAMURA, N. MIZUGUCHI and T. SATO	1065
Numerical simulation of the Vlasov–Maxwell system for the nonlinear Berk–Breizman phenomenology E. POHN, M. SHOUCRI and G. KAMELANDER	1139	Virtual reality visualization by CAVE with VFIVE and VTK N. OHNO, A. KAGEYAMA and K. KUSANO	1069
Plasma turbulence in complex magnetic field structures ALEXANDER KENDL	1145	Novel approaches for avoiding accuracy degradation of inner-point formula in the vicinity of the boundary A. SAITOH, H. NAKAMURA and A. KAMITANI	1073
Roles of the double tearing mode on the formation of a current hole TAKASHI TUDA, G. KURITA and T. FUJITA	1149	Plasma particle simulations using a special-purpose computer system for gravitational N -body problems HIBINO SHINYA, MIZUNO YASUNORI, INUZUKA HIROSHI, CAO YONGGAO, LIU YAN and YAZAWA KENICHI	1077
The ISLAND module for computing magnetic island widths in tokamaks F. D. HALPERN, G. BATEMAN, A. H. KRITZ and A. Y. PANKIN	1153	Meshless structural analyses of complex shape models using implicit surface representations KYOKO HASEGAWA, SUSUMU NAKATA and SATOSHI TANAKA	1081
Motion of the ablation cloud in torus plasmas RYUICHI ISHIZAKI, N. NAKAJIMA, M. OKAMOTO and P. B. PARKS	1159	Parallelization of SPEC OMP benchmark programs with HPF and evaluation of their performances HITOSHI SAKAGAMI and HIROYUKI MORII	1087
Development of magnetohydrodynamic simulation code using the constrained interpolation profile method MATSUMOTO YUTAKA	1163	Exact nonlinear solution for the Hall–Alfvén wave in partially ionized plasmas V. KRISHAN, M. FURUKAWA and S. M. MAHAJAN	1091
Stepped pressure profile equilibria in cylindrical plasmas via partial Taylor relaxation M. J. HOLE, S. R. HUDSON and R. L. DEWAR	1167	Vortical, toroidal and compressible motions in 3D MHD simulations of LHD H. MIURA, N. NAKAJIMA, T. HAYASHI and M. OKAMOTO	1095
Large-scale structures and turbulence saturation in gyrofluid ETG simulations JIQUAN LI, Y. KISHIMOTO, N. MIYATO, T. MATSUMOTO, and J. Q. DONG	1173	Nonlinear 3D MHD code NFTC for simulations of plasma instabilities A. M. POPOV	1101
		Three-dimensional transport of neutral particles in the CHS edge region H. MATSUURA, S. IGUCHI, M. SHOJI and S. OKAMURA	1105

Critical gradients for short wavelength ion temperature gradient instability in toroidal plasmas ZHE GAO, H. SANUKI, K. ITOH and J. Q. DONG	1249	Finite temperature effect on knock-on ion production and neutron energy spectrum in deuteron–triton fusion plasma M. NAKAMURA and Y. NAKAO	1179
Studies of hot electrons and protons generated from micro droplet plasmas irradiated by ultrashort laser pulses JUN ZHENG, ZHENG-MING SHENG, XIAO-YU PENG and JIE ZHANG	1253	Statistical characteristics of turbulent plasmas dominated by zonal flows TARO MATSUMOTO, Y. KISHIMOTO, N. MIYATO and J. Q. LI	1183
Ion vortices in ion phase space in intense laser interaction with subcritical plasma BAIWEN LI, S. ISHIGURO, M. M. SKORIC, M. SONG and T. SATO	1257	Simulation study on losses of neutral beam-injected energetic ions via collisional ripple transport in the low aspect ratio helical system CHS M. ISOBE, D. A. SPONG, A. SHIMIZU, K. TOI, H. MATSUSHITA, K. NAGAOKA, M. NISHIURA, K. MATSUOKA, S. OKAMURA and S. MURAKAMI	1189
Modelling of the Ni-like and Co-like line emission from Ni-like Silver X-ray laser media E. KACAR, A. DEMIR and G. J. TALLENTS	1263	Effect of nuclear elastic scattering on plasma heating characteristics in deuteron triton thermonuclear plasmas HIDEAKI MATSUURA and YASUYUKI NAKAO	1193
Preplasma effects on the emission directions of energetic electrons in relativistic laser–solid interactions Y. Y. MA, Z. M. SHENG, Y. T. LI, J. ZHANG, X. H. YUAN, M. H. XU, Z. Y. ZHENG, W. W. CHANG, M. CHEN and J. ZHENG	1269	Diamagnetic equilibrium of spherical torus obtained in a two-fluid model with flow T. KANKI and M. NAGATA	1197
Two-dimensional particle-in-cell simulation of energetic proton generation by an intense ultrashort laser pulse T. OKADA, Y. MIKADO and K. OKUBO	1273	Analytical formula of the thermal conductivity due to given coexisting electrostatic and magnetic fluctuations NAKAJIMA NORIYOSHI	1201
Subfemtosecond electron bunch generation by a tightly focused laser pulse S. MASUDA, K. NAKAJIMA, M. KANDŌ, H. KOTAKI, K. KOYAMA, E. MIURA, S. KATO, M. ADACHI and T. WATANABE	1277	Developments on reflectometry simulations for fusion plasmas: application to ITER position reflectometers FILIPE DA SILVA, STÉPHANE HEURAUX and MARIA MANSO	1205
Characterization of preformed plasmas using a multi-dimensional hydrodynamic simulation code in the study of high-intensity laser–plasma interactions AKITO SAGISAKA, TAKAYUKI UTSUMI, HIROYUKI DAIDO, KOICHI OGURA, SATOSHI ORIMO, MAMIKO NISHIUCHI, YUKIO HAYASHI, MICHIAKI MORI, AKIFUMI YOGO, MASATAKA KADO, ATSUSHI FUKUMI, ZHONG LI, SHU NAKAMURA, AKIRA NODA, YUJI OISHI, TAKUYA NAYUKI, TAKASHI FUJII, KOSHICHI NEMOTO, SERGEI V. BULANOV, TIMUR ZH. ESIRKEPOV, ALEXANDER S. PIROZHKOV, DAISUKE WAKABAYASHI, TOSHIMASA MORITA and MITSURU YAMAGIWA	1281	On the computation of tokamak equilibria with negative core toroidal current PAULO RODRIGUES and JOÃO P. S. BIZARRO	1209
Particle-in-cell simulations of high-energy electron production by intense laser pulses in underdense plasmas S. KATO, E. MIURA, M. TANIMOTO, S. MASUDA, M. ADACHI, T. WATANABE and K. KOYAMA	1285	Full-torus MHD equilibrium study of a low-shear helical-axis heliotron YASUHIRO SUZUKI, NORIYOSHI NAKAJIMA, YUJI NAKAMURA and TAKAYA HAYASHI	1215
Ionization dynamics in high-power laser–matter interaction T. MASAOKI and Y. KISHIMOTO	1291	Energy transfer among coupled oscillators representing a ballooning mode in a toroidally rotating tokamak M. FURUKAWA, D. SAKATA, Z. YOSHIDA and S. TOKUDA	1219
Collisional particle simulation of ion acoustic instability R. D. SYDORA, F. DETERING, W. ROZMUS, Y. YU, BYCHENKOV, A. BRANTOV and C. E. CAPJACK	1295	Nonlinear three-dimensional simulations of resistive wall modes M. SATO and N. NAKAJIMA	1223
Vlasov simulations of trapping and inhomogeneity in Raman scattering D. J. STROZZI, M. M. SHOUCRI, A. BERS, E. A. WILLIAMS and A. B. LANGDON	1299	Edge plasma simulations for a stellarator system with the two-dimensional transport code UEDGE A. TAKAYAMA, A. YU, PIGAROV, S. I. K. RASHENINNIKOV, Y. TOMITA, S. ISHIGURO and T. D. ROGNLIEN	1229
		Three-dimensional particle-in-cell simulation of scrape-off-layer plasmas SEIJI ISHIGURO and HIROKI HASEGAWA	1233
		Quantum chaos analysis of the ideal interchange spectrum in a stellarator R. L. DEWAR, C. NÜHRENBERG and T. TATSUNO	1239
		Magnetic island evolution in rotating plasmas YASUTOMO ISHII, M. AZUMI and A. I. SMOLYAKOV	1243

Electromagnetic radiation at the electron plasma wave frequency by an intense laser pulse interacting with low-density plasmas LONG LI, BAIWEN LI, S. ISHIGURO and M. SONG	1303
Interaction of electromagnetic solitons in relativistic plasmas ANA MANCIC, LJUPCO HADZIEVSKI and MILOŠ M. SKORIĆ	1309
Nonlinear Thomson scattering with strong radiation damping JAMES KOGA, TIMUR ZH. ESIRKEPOV and SERGEI V. BULANOV	1315
