

C O N T E N T S

Introduction	1
Summary	2

S u r v e y A r t i c l e s

On System Studies for Controlled Nuclear Reactors (W. Köppendörfer)	19
<u>Contributions</u> : Open Reactor Systems (H. de Kluiver)	47
Radiation Hazard of Fusion Reactors (J. Darvas)	53
Blanket Problems (J. Darvas)	59
Radiation Damage in Components of a Fusion Reactor (H. Conrads)	99
<u>Contributions</u> : A Note on Meson Factories as Intense Neutron Sources for Fusion Reactor Technology Studies (H. Knoepfel)	119
Interface Plasma-Vacuum Wall and Fuel Problems (H. Vernickel)	131
<u>Contributions</u> : The Interface Plasma Wall (B. Brandt, G.K. Verboom, and F.C. Schüller)	143
The Fuel Cycle of C.T. Reactor Driven by Diffusion (B. Brandt, G.K. Verboom, and F.C. Schüller)	147
The Injection of Neutral Particles in Thermonuclear Reactor (F.P.G. Valckx, and C. Leloup)	153

Cluster Injection (M. Fois)	161
Electrotechnical Aspects and Components (A. Knobloch)	175
<u>Contributions</u> : The Role of the Laser in a Thermonuclear Reactor (J.L. Bobin and C. Leloup)	221
R.F. Heating and Ignition of the Reactor (T. Consoli)	229
Pulsed, Explosive-Driven Current Generators (H. Knoep- fel)	245
Lasers and the Production of Thermonuclear Plasmas (R. Sigel)	255
Engineering Design of Magnet Systems of Stabilization Techniques (R. Hancox)	265

A p p e n d i x

A list of Nuclear Data Requests for Fusion Reactor Technology (M. Neve de Mevergnies and A. Paulsen)	277
