CONTENTS

I	General Problems	11
II	Plasma Theory	32
III	Plasma Properties. Energy Balance and Transfer	75
IV	Stability and Confinement of Plasma	104
V	Plasma Compression and Acceleration	136
VI	Plasma Heating. High-Energy Injection	151
VII	Plasma Containment and Diffusion Problems	170
VIII	Plasma Oscillation. Plasma Waves. Plasma Radiation	182
IX	Interaction of Particles and Beams of Particles with Plasma	229
X	Interaction of Particles, Beams and Plasma with Electric and Magnetic Fields	255
XI	Interaction of Hydromagnetic and Electromagnetic Waves with Plasma	272
XII	Magnetohydrodynamics	295
XIII	Shock Waves. Hydromagnetic Waves	326
XIV	Pinch	344
XV	Gas Discharge	365
XVI	Cusped Geometries. Mirror Machines	411
XVII	Description of Special Devices	426
XVIII	Experimental Techniques. Diagnostics and Apparatus	466
XIX	Other Experiments and Problems	513
XX	Bibliographies	545
	List of Conferences	548
	List of Journals	549
	Author Index	551
