

## CONTENTS

I. INTRODUCTION .....	1
II. EXECUTIVE SUMMARY .....	3
1. INTRODUCTION .....	3
2. CONCEPT DESCRIPTION .....	3
3. OPERATION AND RESEARCH PROGRAMME .....	7
4. DESIGN BASIS AND READINESS TO PROCEED .....	9
5. PRELIMINARY COST AND SCHEDULE .....	10
6. ITER REACTOR RELEVANCE .....	10
III. THE ITER DEVICE AND FACILITY .....	11
1. INTRODUCTION .....	11
2. ITER DESIGN BASIS .....	11
3. THE ITER TOKAMAK DEVICE, AUXILIARY SYSTEMS AND FACILITY: AN OVERVIEW .....	12
3.1. Tokamak device .....	13
3.2. Auxiliary systems .....	14
3.3. Facility and maintenance .....	15
4. ITER TOKAMAK DEVICE CONCEPT AND LAYOUT .....	16
5. ITER SYSTEM DESCRIPTIONS .....	20
5.1. Magnet systems .....	20
5.1.1. Toroidal field coils .....	22
5.1.2. Poloidal field coils .....	25
5.1.3. Cryogenic systems .....	27
5.2. Containment structures .....	28
5.2.1. Vacuum vessel .....	28
5.2.2. Cryostat vessel .....	28
5.2.3. Weight supports .....	30
5.3. First wall .....	30
5.3.1. FW design requirements .....	31
5.3.2. FW design and integration with blanket/shield modules .....	31
5.3.3. FW armor .....	33
5.4. Divertor plate .....	36
5.4.1. Divertor design and materials .....	36
5.4.2. Divertor performance and lifetime issues .....	37
5.4.3. Other design considerations .....	40
5.5. Blanket/shield system .....	41

5.5.1. Blanket modules .....	41	3.4. Ancillary system requirements .....	75
5.5.2. Shielding .....	43	3.5. Shielding, tritium recovery, and safety guidelines .....	78
5.6. Maintenance equipment and design requirements .....	44	V. PHYSICS AND ENGINEERING BASIS .....	79
5.6.1. Design requirements for maintenance .....	44	1. PHYSICS BASIS .....	79
5.6.2. Equipment .....	45	1.1. Physics .....	79
5.7. Current drive and heating .....	47	1.1.1. Physics guidelines for ITER .....	80
5.7.1. Concept description .....	47	1.2. Physics status .....	84
5.7.2. Alternate concept descriptions .....	50	1.2.1. Plasma performance .....	84
5.8. Fuel cycle system .....	51	1.2.1.1. Energy confinement .....	84
5.8.1. Scope and primary requirements .....	51	1.2.1.2. Operational limits .....	86
5.8.2. System design .....	51	1.2.1.3. Alpha particle physics .....	87
5.8.3. Tritium inventories in ITER .....	54	1.2.2. Plasma wall interactions .....	88
6. BALANCE OF PLANT .....	55	1.2.3. Disruptions .....	90
6.1. Cooling system .....	55	1.2.4. Auxiliary systems .....	91
6.2. Electrical distribution system .....	55	1.2.4.1. Current drive and heating .....	91
6.3. Fluid supply and discharge system .....	56	1.2.4.2. Plasma shaping and control .....	92
6.4. Reactor building and hot cell .....	57	1.2.4.3. Plasma diagnostics .....	93
7. SAFETY AND ENVIRONMENTAL IMPACT .....	57	1.3. Physics R&D for ITER .....	93
7.1. Radiological dose limits .....	57	2. ENGINEERING BASIS .....	95
7.2. Safety analysis .....	58	2.1. Introduction .....	95
8. SITE REQUIREMENTS .....	59	2.2. Magnets .....	96
8.1. Electrical power .....	59	2.3. First wall .....	97
8.2. Cooling .....	59	2.4. Divertor plates .....	98
8.3. Land .....	59	2.5. Blanket and shield .....	99
8.4. Transportation .....	59	2.6. Remote maintenance .....	101
8.5. Other .....	59	2.7. Current drive and heating .....	102
IV. OPERATION AND RESEARCH PROGRAMME .....	61	2.8. Fuel cycle .....	104
1. INTRODUCTION .....	61	VI. PRELIMINARY COST AND SCHEDULE .....	107
2. PHYSICS PROGRAMME .....	61	1. PRELIMINARY COST .....	107
2.1. Research programme .....	61	2. SCHEDULE .....	107
2.1.1. Zero activation stage .....	61	VII. ITER DESIGN PARAMETERS .....	111
2.1.2. Low activation stage .....	63	VIII. ITER REACTOR RELEVANCE .....	117
2.1.3. High activation stage .....	63	CONTRIBUTORS .....	119
2.1.4. Technology Phase physics studies .....	64		
2.2. Plasma operation range and operational scenarios .....	64		
2.2.1. Plasma operation range in D/T Physics Phase .....	64		
2.2.2. Plasma operation scenario for D/T physics stage .....	65		
2.2.3. Plasma operation range and scenario in the Technology Phase .....	71		
3. TESTING PROGRAMME .....	72		
3.1. Physics Phase .....	73		
3.2. Technology Phase .....	73		
3.3. Maintenance and handling requirements .....	75
