

## CONTENTS

I. INTRODUCTION .....	9
II. SUMMARY .....	11
III. DESIGN BASIS .....	17
1. GENERAL REQUIREMENTS .....	17
1.1 Geometry .....	17
1.2 Coil currents .....	18
1.3 Operating cycles .....	18
1.4 Radiation exposure .....	18
2. DESIGN CRITERIA .....	19
2.1 Quench protection .....	19
2.2 Stability and AC losses .....	20
2.3 Mechanical allowables .....	20
3. DESIGN PHILOSOPHY .....	22
4. DATABASE ..	24
IV. SUBSYSTEM DESIGN AND ANALYSIS .....	33
1. CONDUCTOR DESIGN .....	33
2. TF COIL AND STRUCTURE DESIGN .....	41
2.1 Introduction .....	41
2.2 Winding pack .....	41
2.3 Cases ... ..	45
2.4 Winding pack - case interaction .....	45
2.5 Support structures .....	49
2.6 Manufacturing and assembly .....	49
3. TF STRUCTURAL ANALYSIS .....	58
3.1 Normal conditions .....	58
3.2 Cooldown conditions .....	69
3.3 Fault conditions .....	69
4. PF COIL AND STRUCTURE DESIGN .....	78
4.1 Layout .....	78
4.2 Structural support .....	83
4.3 Windings .....	89
5. PF STRUCTURAL PERFORMANCE .....	98
6. FATIGUE ASSESSMENT OF STRUCTURES .....	108

7.	AC LOSS PERFORMANCE .....	114
7.1	Windings .....	114
7.2	Structures .....	123
7.3	Divertor sweeping and control .....	127
7.4	Disruptions .....	133
8.	THERMOHYDRAULIC PERFORMANCE .....	133
8.1	Normal operation .....	133
8.2	Quench analysis .....	145
8.3	Cool-down conditions .....	151
9.	STABILITY .....	156
10.	CRYOGENIC SYSTEM .....	161
10.1	Design requirements .....	161
10.2	Heat load summaries .....	161
10.3	Cryoplant design .....	163
10.4	Piping arrangement .....	167
10.5	System performance .....	170
10.6	R&D .....	170
10.7	Summary .....	171
11.	POWER SUPPLY SYSTEMS .....	173
11.1	Introduction .....	173
11.2	TF power and protection systems .....	173
11.3	PF power and protection systems .....	176
11.4	Utility requirements and preliminary layout .....	184
12.	COIL SERVICES .....	186
12.1	General layout .....	186
12.2	Cryogenic lines & connections .....	188
12.3	Current feeders .....	192
12.4	Diagnostics .....	192
13.	CONCLUSIONS AND RECOMMENDATIONS .....	193
13.1	Overall suitability of the design .....	193
13.2	Feasibility issues and requirements for R and D .....	194
13.3	Modifications recommended for improved liability or safety .....	194
