

## CONTENTS

I. INTRODUCTION .....	9
II. SUMMARY OF POLOIDAL FIELD SYSTEM .....	11
III. FUNCTION OF POLOIDAL FIELD SYSTEM .....	19
IV. POLOIDAL FIELD SUB-SYSTEMS .....	21
1. PLASMA CONFIGURATIONS AND OPERATION .....	21
1.1 Function .....	21
1.2 Design requirements .....	21
1.3 Critical design issues .....	22
1.4 Design descriptions and supporting analyses .....	23
1.5 Conclusions and future needs .....	51
2. SUPERCONDUCTING POLOIDAL COILS SYSTEM .....	56
2.1 Function .....	56
2.2 Design requirements .....	56
2.3 Critical design issues .....	63
2.4 Design description and supporting analyses .....	64
2.5 Conclusion and future needs .....	75
3. PASSIVE AND ACTIVE STABILIZER .....	77
3.1 Function .....	77
3.2 Design requirements .....	79
3.3 Critical design issues .....	83
3.4 Design description and supporting analyses .....	85
3.5 Conclusion and future needs .....	97
4. PLASMA CONTROL .....	100
4.1 Function .....	100
4.2 Design requirements .....	100
4.3 Critical design issues .....	104
4.4 Design description and supporting analyses .....	110
5. SEPARATRIX SWEEP AND ERGODIZATION .....	114
5.1 Function .....	114
5.2 Design requirements .....	115
5.3 Critical design issues .....	115
5.4 Design description and supporting analyses .....	115
5.5 Conclusion and future needs .....	121
6. POLOIDAL FIELD POWER SUPPLY SYSTEM .....	122
6.1 Function .....	122
6.2 Design requirements .....	123
6.3 Design description and supporting analysis .....	123

7.	DISRUPTIONS .....	133
7.1	Function .....	133
7.2	Analysis .....	133
8.	DISRUPTION LOADS .....	150
8.1	Introduction .....	150
8.2	Design requirements .....	150
8.3	Structural components .....	151
8.4	Poloidal coils system .....	171
8.5	Effects on toroidal field system .....	174
8.6	Benchmark test .....	175
8.7	Critical design issues .....	178
9.	PLASMA BREAKDOWN AND START-UP .....	180
9.1	Function .....	180
9.2	Design requirements .....	180
9.3	Critical design issues .....	181
9.4	Design description and supporting analyses .....	182
9.5	Conclusion and future needs .....	187
10.	ELECTRICAL CONNECTION AND INSULATION .....	187
10.1	Function .....	187
10.2	Design requirements .....	187
10.3	Design description .....	188
11.	MAGNETIC FIELD AND ITS SHIELD AROUND THE TORUS .....	195
11.1	Function .....	195
11.2	Design requirements .....	195
11.3	Critical design issues .....	195
11.4	Database and supporting analyses .....	195
