

CONTENTS

I. INTRODUCTION	11
1. GENERAL	11
2. ITER OBJECTIVES	11
3. ITER CONFIGURATION	12
II. SUMMARY.....	19
1. VACUUM VESSEL	20
2. ATTACHING LOCKS FOR THE IN-VESSEL COMPONENTS	20
3. PLASMA PASSIVE AND ACTIVE STABILIZERS	22
3.1 Passive stabilizing loops	22
3.2 Fast active control coil	23
4. CRYOSTAT	24
5. MACHINE GRAVITY SUPPORTS	25
6. LONG-TERM R&D PLAN	25
6.1 Introduction	25
6.2 Summary	26
III. CONTAINMENT STRUCTURES BASIC CONFIGURATION AND FUNCTIONS	31
1. BASIC CONFIGURATION	31
2. FUNCTIONS OF THE MAIN SUBSYSTEMS	32
2.1 Vacuum vessel functions and components	32
2.2 Functions of the blanket attaching locks	33
2.3 Functions of the passive and active plasma stabilizers ...	35
2.4 Cryostat functions/components	36
2.5 Functions of the machine gravity supports	37
IV. DESIGN REQUIREMENTS	39
1. REQUIREMENTS FOR THE MACHINE INITIAL ASSEMBLY, REPAIR, AND REASSEMBLY	39
2. VACUUM VESSEL REQUIREMENTS	41
2.1 Vacuum vessel general design requirements	41
2.2 Vacuum vessel resistive element requirements	42
2.3 Vacuum vessel electrically insulated structural connections	43
2.4 Requirements for vacuum vessel ports	43

3. REQUIREMENTS FOR THE BLANKET ATTACHING LOCKS	45	2.5 Mechanical bolting connectors	141
4. REQUIREMENTS FOR THE PASSIVE LOOPS DESIGN INTEGRATION	48	2.6 Toroidal belt connector	146
5. REQUIREMENTS FOR THE FAST ACTIVE COILS DESIGN INTEGRATION	49	3. PASSIVE STABILIZING STRUCTURE	152
6. CRYOSTAT DESIGN REQUIREMENTS	52	3.1 Twin loops general design description	152
6.1 Cryostat general requirements	52	3.2 Electro-insulating breaks and current joint positions for twin loops	153
6.2 Cryostat vessel design requirements	52	3.3 Technological problems of the passive loops design	155
6.3 Refrigerated radiation shield requirements	52	4. ACTIVE COILS CANDIDATE DESIGN DESCRIPTION ..	156
7. REQUIREMENTS FOR MACHINE GRAVITY SUPPORTS.....	53	4.1 Conductor for active coil	156
V. CRITICAL DESIGN ISSUES	57	4.2 Electrical connections	158
1. VACUUM VESSEL CRITICAL ISSUES	57	4.3 Active coil design evolution	158
1.1 Vacuum vessel R&D issues	57	5. CRYOSTAT DESIGN DESCRIPTION	174
1.2 Vacuum vessel design-requirements conflicts	57	5.1 Cryostat vessel design	174
2. BLANKET ATTACHING LOCKS CRITICAL DESIGN ISSUES	59	5.2 Refrigerated radiation shield design	185
2.1 R&D issues	59	6. MACHINE GRAVITY SUPPORT DESIGN DESCRIPTION	188
2.2 Design requirements conflicts	60	6.1 Magnet system gravity supports	189
3. PASSIVE STABILIZER CRITICAL ISSUES	61	6.2 Vacuum vessel gravity supports	193
4. FAST ACTIVE CONTROL COILS CRITICAL ISSUES ...	61	6.3 Floor and foundations	194
5. CRYOSTAT DESIGN CRITICAL ISSUES	62	VII. CONCLUSIONS AND FUTURE NEEDS	195
6. MACHINE GRAVITY SUPPORT CRITICAL ISSUES	62	1. VACUUM VESSEL	195
VI. CONTAINMENT STRUCTURES DESIGN DESCRIPTION ...	63	2. ATTACHING LOCKS	195
1. VACUUM VESSEL DESIGN DESCRIPTION	63	3. PASSIVE LOOPS AND ACTIVE COILS	196
1.1 Reference vacuum vessel approach	63	4. CRYOSTAT	197
1.2 Resistive elements	70	5. MACHINE GRAVITY SUPPORTS	197
1.3 Electrical insulating breaks	74	6. ASSEMBLY AND REPAIR	198
1.4 Vacuum vessel stress analysis	78	ANNEX R&D PLAN SHORT DESCRIPTION	199
1.5 Vacuum vessel cooling system	85	1. VACUUM VESSEL FEASIBILITY	199
1.6 Vacuum vessel assembly joints	90	2. ATTACHING LOCKS AND SUPPORTS	203
1.7 Design description of main ports	93	3. PLASMA STABILIZING ELEMENTS	204
1.8 Alternate vacuum vessel	107	4. CRYOSTAT ELEMENTS	205
2. BLANKET ATTACHING LOCKS	120	5. FULL SCALE MOCK-UP MANUFACTURING	207
2.1 General approach	121	6. FULL SCALE MOCK-UP TEST	208
2.2 Bolt-to-bolt welded connectors	122	7. ELECTROMAGNETICS SUB-SIZE MODEL	211
2.3 Hydraulic connectors	129		
2.4 Liquid metal connector	137
