

Table of Contents

Status and Perspectives of Controlled Thermonuclear Fusion: A European View H. Bruhns	1
Role of Atomic and Plasma-Material Interaction Physics in Controlled Fusion Research and Development R.K. Janev	27
Atomic Physics Aspects of Controlled Thermonuclear Fusion H.W. Drawin	45
Atomic and Molecular Data Exploitation for Spectroscopic Diagnostics of Fusion Plasmas H.P. Summers, M. von Hellermann	87
X-Ray Spectra of Heliumlike Krypton as a Potential Ion Temperature Diagnostic for the International Thermonuclear Experimental Reactor (ITER) M. Bitter, H. Hsuan, K.W. Hill, R. Hulse, M. Zarnstorff, P. Beiersdorfer	119
Active Beam Spectroscopy at JET M.G. von Hellermann, H.P. Summers	135
Modeling of Impurity Transport in the Core Plasma R.A. Hulse	165
Particle Recycling and Control in Long Pulse Tokamaks M. Chatelier	191
Diagnostics of Edge Plasmas by Optical Methods A. Pospieszczyk	213
Neutral Gas Transport in Fusion Devices: Atomic and Surface Data Aspects D. Reiter	243
Atomic Physics Data Needs for the Next Generation Fusion Experiments D. Post	267
Atomic Data Needs for Edge Plasma Cooling and Particle Exhaust in a Next Step Device M.F.A. Harrison	285

Plasma-Material Interaction Data Needs for Impurity Control in Next Step Devices M. Shimada, S. Tsuji, N. Hosogane, H. Ninomiya	319
Atomic Data Needs for Inertial Confinement Fusion C. Deutsch	327
Atomic Spectroscopic Databases W.L. Wiese	355
Establishment and Status of Atomic and Molecular Collisional Databases for Fusion Plasma Applications R.A. Phaneuf, R.K. Janev	371
Impurity Generation Processes in Particle-Surface Interaction: Data Status and Needs J. Roth	381
Modeling of Erosion and Redeposition Processes J.N. Brooks	403
A Review of Materials Erosion and Redeposition Research at UCLA for the Development of Plasma-Facing Components in ITER Y. Hirooka, R.W. Conn	429
Thermo-Hydrodynamic Coupling with Coolants M. Akiba, R.D. Watson	455
Author Index	481
Subject Index	483
