CONTENTS

| General Procedure for Obtaining the Equations | ofC | aharar | ·+1·/ | | | |
|---|--------|---------|-------|------------|--|--|
| Interacting Waves | ore | onerei | itiy | 70 | | |
| Processes of Interest for Laser Eusion | • | • | • | /0 | | |
| Nonlinear Behaviour of Three wave Interaction | · | • | • | 00 | | |
| Nonlinear Benaviour of Inree-wave Interaction | | | | | | |
| Nodulation and Filamentation Instabilities | | | | | | |
| Stationary Solutions | · | ٠ | · | 9/ | | |
| Stationary Solutions | • | • | • | 100 | | |
| References | • | • | • | 100 | | |
| 6. Ouasi-Potential and Ponderomotive Force | | | | 102 | | |
| One-dimensional Equilibria | | | | 106 | | |
| Explanation of the Physical Mechanism of the Os | cillat | ting Ty | vo- | | | |
| Stream Instability | | | | 110 | | |
| The Nonlinear Schrodinger Equation (N.L.S.) | | | | 114 | | |
| A Solution of the N.L.S. | | | | 115 | | |
| References | • | • | • | 119 | | |
| | • | • | • | 117 | | |
| 7. Absorption of Laser Light and Plasma Radiation | | | | 120 | | |
| Emission and Absorption | • | • | • | 120 | | |
| Energy Density and Power Flux | • | • | • | 121 | | |
| Emission and Absorption Coefficients | • | • | • | 121 | | |
| Black Body Radiation | • | • | • | 124 | | |
| The Absorption Coefficient | · | • | · | 125 | | |
| Absorption in the Inhomogeneous Plasma | | | | | | |
| Wave Rehaviour in an Inhomogeneous Plasma | | | | | | |
| Nonlinear Absorption | • | · | • | 129 | | |
| Microwave Simulations | • | • | · | 130 | | |
| Spontaneous Concretion of Magnetic Fields | • | • | · | 140 | | |
| Potoronoos | • | • | · | 142 | | |
| References | • | • | • | 144 | | |
| 8 Transmission of Laser Power to the Target | | | | 145 | | |
| References | · | • | • | 163 | | |
| | • | • | • | 105 | | |
| 9. Shock Wayes and Implosions | | | | 164 | | |
| Shock Fitting | • | • | • | 171 | | |
| Conservation Equations and Shock Relations | · | • | • | 175 | | |
| Shock Sequences | • | • | • | 182 | | |
| Reflection of a Plane Shock | • | • | • | 182 | | |
| The Hugoniot Curve | • | • | • | 103 | | |
| Detonation and Deflagration | · | • | • | 104 104 | | |
| Deconation and Denagration | • | • | • | 190 | | |

CONTENTS

ix

| Similarity Solutions. | • | • | • | | | | 188 |
|----------------------------------|-----------|---------|---------|--------|-------|-----|-----|
| Guderley's Implosion Prob | olem . | | • | • | • | • | 191 |
| Lagrangian Treatment of l | Homoger | neous | Isentre | opic (| Compi | es- | |
| sion | • | | • | | • | • | 197 |
| Treatment of the Dynamic | s of Cha | racteri | istics | | | | 201 |
| Isentropic Compression of | Thin Sh | ells | | | | • | 204 |
| References | | | | | | | 207 |
| | | | | | | | |
| 10. Stability | | | • | | • | | 208 |
| The Rayleigh–Taylor Insta | ability | | | | | | 210 |
| The Bénard Instability . | | | | | | • | 217 |
| References | | | | | | • | 223 |
| | | | | | | | |
| 11. Plasma at High Density, Pres | ssure and | Temp | eratur | е. | | • | 224 |
| Thermodynamic Propertie | s. | • . | | | | | 226 |
| The Degenerate Electron (| Gas . | | | | | • | 235 |
| Non-uniform Electron Ga | s. | | | | | • | 237 |
| References | | • | | | | | 247 |
| | | | | | | | |
| 12. Computer Codes | | | | | | | 249 |
| The Physics of the Medusa | a Code | | • | | | | 251 |
| Results from Simulation C | Codes . | | | | | | 261 |
| References | • | | | | | | 266 |
| | | | | | | | |
| 13. Results from Experiments | | | • | • | | | 267 |
| Temperature Determination | on by X-I | Ray C | amera | s. | | | 268 |
| Ion Spectra | | • | | | | | 273 |
| Absorption . | | • | • | | | | 276 |
| Profile Steepening | | | | | • | | 278 |
| Epilogue | | | | | | • | 282 |
| References . | | • | • | | | | 283 |
| | | | | | | | |
| Index | | | | | | | 285 |
