

# CONTENTS

## Session I: Fast Switching

The Simultaneous Switching of Many Parallel Trigatrons Without Decoupling Leads F. J. Friedrich and E. Hintz.....	3
Comparative Evaluation of Size A Metal Anode Ignitrons G. P. Boicourt, M. J. Hollen, and E. L. Kemp.....	8
Evaluation of Coaxial Cable Performance at High Voltages: An Interim Report G. P. Boicourt.....	13
Mercury-Jet Switch D. R. Branum and G. G. North.....	20
Explosively-Actuated High-Voltage Switch for Astron Fast-Pulse System Leslie F. Peterson and James H. Cooper.....	26
A Replacement Thyatron for the Astron Accelerator James H. Cooper.....	28

## Session II: Magnetics

The Quasi Force-Free Magnetic Field System of Magnetic Trap Stability Experiment Mark II, M.T.S.E. II G. Francis, D. L. Smart, and R. D. Medford.....	35
Force - A Computer Program for Calculating Magnetic Forces Developed in Electromagnets Carl D. Henning.....	53
Programmed Mechanical Design of Air-Core Solenoids Constructed from Hollow Conductor Arthur R. Harvey.....	69
Design and Construction of a Cusp Magnetic Field Device for Plasma Containment Charles C. Gallagher, Lewis S. Combes, and Morton A. Levin.....	72
Ribbon Coils for High Current Densities J. N. Luton, Jr.....	77

Manufacturing Techniques Used in Fabrication of Helical, Semi-Toroidal Electrical Windings Jack B. Joyce.....	83
Turn-To-Turn Voltage Test Methods Used for Electrical Insulation of Magnet Coils C. W. Bushnell and H. G. Johnson.....	95
The Role of Ferromagnetic Materials in the Design of Magnetic Fields Used in Plasma Physics Research Kenneth E. Wakefield.....	103
Iron-Core Minimum "B" Magnet W. Halchin and I. Alexeff.....	106

### Session III: Superconductivity

Experiments with Large Superconducting Solenoids Clyde Taylor.....	113
Field Dependence of the Rate of Decay of Persistent Currents in an Nb-25% Zr Superconducting Solenoid J. File.....	116
Superconducting Coils for Baseball-Type Minimum-B Fields Clyde Taylor.....	120
On the Stability of Superconducting Magnets W. F. Gauster.....	123

### Session IV: Power Supplies

Development of the Astron Fast-Pulsing System Kenneth A. Saunders.....	129
Protection Circuitry for the Astron Fast Pulser Milton D. Johnson.....	136
Current Regulated dc Supplies with High Efficiency and Low Cost J. W. Robinson.....	141
Magnetic Mirror Field Control in the Astron Experiment D. O. Kippenhan.....	146
An Engineering Study of Special Terminations for a Delay Line Power Supply Leroy G. Huggins and Milton Pelovitz.....	153

Analog Computer Study of Current Rise Time Improvements for 2X Capacitor Bank D. J. Edson.....	156
Modular Design 300-kW dc Power Supply System Glen D. Polzin and G. Gordon North.....	162
Digital Computer Representation for the Parallel Operation of Large dc Generators in a Multiple-Loop Feedback Control System Henry M. Chandler, Jr.....	167
C. W. Microwave Systems for Electron-Cyclotron Heating Experiments H. O. Eason, Jr.....	168

### Session V: Complete System

The Engineering Aspects of the Scyllac Proposal E. L. Kemp.....	179
Astron Mechanical Engineering Design Effort Charles A. Hurley.....	189
Mechanical Design of a Baseball Coil and Plasma-Trapping Chamber Robert E. Bathgate and William S. Neef, Jr.....	193
Operation of the Homopolar Gun II Coil System Klaus Halbach and Donald B. Hopkins.....	200
Engineering Developments in the Chalice Experiment George J. Yevick, Geza von Voros, Robin Harvey, Sergio Martellucci, Adnan Waly, Henry Opat, and Harry Nyland.....	209

### Session VI: Pulsed Coils

On the Calculation, Construction and Measurement of Pulsed Magnetic Fields for Chalice R. Harvey, G. Yevick, and G. von Voros.....	221
A Pulsed Coil System for Guiding and Injecting Plasma into the General Atomic Toroidal Octopole Arthur A. Schupp, Jr., Tihiro Ohkawa, and Masaji Yoshikawa.....	229
Design Curves for Electromagnetic Field Diffusion into Conductors Under Pulsed Discharge Conditions R. D. Medford and D. Griffiths.....	235
Decoupling Transformer for High Energy Pulse Shaping K. Aaland and O. Zucker.....	247

High Voltage Insulation at Low Radio Frequency Nils J. Oman.....	257
---	-----

## Session VII: Superconducting Coils Systems

Superconducting Magnet Systems Charles Laverick.....	261
---	-----

## Session VIII: Electronics and Diagnostics

A Method for Introducing Energy Spread in Injection Machines Randall S. Edwards and Herman Postma.....	285
The Alice Machine Tape-Recorder Data Acquisition System A. F. Waugh and C. J. Maxwell.....	292
Use of the Multichannel Tape Recorder as an Engineering Tool Ellis D. Simon.....	298
Lock-In Amplifier Used in Atomic Cross-Section Measurements Louis W. Ducote.....	303
Fast Reliable Floating Light-Pulser and Light-Trigger Geza von Voros and Henry Opat.....	315
Engineering Problems in the Production and Use of Intense dc Ion Beams R. C. Davis, R. R. Hall, G. G. Kelley, O. B. Morgan, and R. F. Stratton.....	325
Evaluation of Arc Damage to Power Triode Grid Wires G. Bronner, J. G. Murray, and J. P. Sorrentino.....	332
Detection of Energetic Neutral Particles J. A. Ray and C. F. Barnett.....	346
A Cryogenically Cooled, Scanning Energy Spectrometer J. S. Culver.....	347

## Session IX: Mechanical Engineering and Special Materials

Mechanical Design and Methods for Constructing Plasma Probes O. D. Matlock.....	355
Selection of a Getter Material and Mode of Operation James N. Doggett and George E. Vogtlin.....	359

Electrical Properties of Dielectric Liquids in a Radiation Field Don S. Slack.....	363
Liquid Helium Cryopumps for a Large Plasma Research Machine Balwant S. Denhoy.....	367
Investigations of Material Failures in DCX-1 Liner W. J. Leonard.....	373
Astron Alignment System Eugene T. Bradley.....	380

### Session X: Safety in CTR

Notes on Panel Discussion H. C. Hoy.....	387
---	-----

### Concluding Remarks

Concluding Remarks W. F. Westendorp.....	391
---	-----

### Participants

Attendees and Authors.....	393
----------------------------	-----

### Conference Banquet

The Increasing Role of Engineering Schools in Modern Technology C. H. Weaver, Dean of Engineering, University of Tennessee.....	(not printed)
