

TABLE OF CONTENTS

SYSTEMS ENGINEERING

(Presented Tuesday Morning, November 18, 1975; Poster Session)

On the Optimization of Q_{eff} for the Experimental Power Reactor D. F. Vaslow, B. McHarg, Jr., and W. Toffolo, General Atomic Company, USA	26
Shield Design Alternatives for the Noncircular Experimental Power Reactor T. J. Woods, General Atomic Company, USA	32
Power Conversion System Considerations for a Fusion Experimental Power Reactor P. H. Sager, Jr. and D. W. Graumann, General Atomic Company, USA	38
Driving Requirements for the Ohmic Heating and Equilibrium Coils of a Tokamak Experimental Power Reactor, J. N. Brooks and W. M. Stacey, Jr., Argonne National Laboratory, USA	43
Energy Balance and Efficiency of Power Stations with a Pulsed Tokamak Reactor J. Darvas, S. Förster, and B. Sack, Institut für Reaktorentwicklung, Jülich, Germany; P. A. Davenport and J. T. D. Mitchell, Culham Laboratory, England; and A. Knobloch, Max-Planck-Institut für Plasmaphysik, Germany	48
Test Facility for the Development of 150-keV, Multi-Megawatt Neutral Beam Systems J. M. Haughian, W. R. Baker, L. A. Biagi, and D. B. Hopkins, Lawrence Berkeley Laboratory, USA	53
Some Technical Constraints on Possible Tokamak Machines from Next Generation to Reactor Size, A. Knobloch, Max-Planck-Institut für Plasmaphysik, Germany	58
Analysis of the Long Term Potential of the U.S. Magnetically Confinement Fusion Programs, S. P. Nichols, The University of Texas, USA	67
Fusion Reactors - A Remote Possibility J. N. Doggett, Lawrence Livermore Laboratory, USA	71
Mechanical Design, Materials Selection, Fabrication and Assembly of Ultraclean, High Gain, Nd: Glass Disk Laser Amplifiers, Wm. D. Fountain, K. Ker, P. Holl, D. Bupp, and W. S. Neef, Jr., Lawrence Livermore Laboratory, USA	75
Concentric Heat Pipe Cavity for E-Beam Excited Lasers F. Haller and M. M. Hessel, National Bureau of Standards; W. Neef, W. Lai, and H. Lohr, Lawrence Livermore Laboratory, USA	79
Compound Ellipsoidal Focusing System for Fusion Lasers S. S. Glaros and A. J. Glass, Lawrence Livermore Laboratory, USA	84
Electronics System for the LLL Negative Ion Test Stand D. R. Branum and L. M. Kampinen, Lawrence Livermore Laboratory, USA	90
Argus Target Chamber F. Rienecker, Jr., and S. S. Glaros, Lawrence Livermore Laboratory, USA; and M. Koberiecki, EG&G, USA	93

SUPERCONDUCTORS

(Presented Tuesday Morning, November 18, 1975; Session Chaired by
M. Lubell, Oak Ridge National Laboratory, USA)

An Experiment to Measure the Effects of Biaxial Stress on the Critical Current of NbTi Superconductors, K. J. Froelich, Oak Ridge National Laboratory, USA	98
Tests on Multifilamentary Nb ₃ Sn Superconductors J. P. Zbasnik, R. R. Vandervoort, C. E. Taylor, D. E. Ping, and R. G. Hirzel, Lawrence Livermore Laboratory, USA	101
Explosive Joints in Nb-Ti/Cu Composite Superconductors D. N. Cornish, J. Zbasnik, Lawrence Livermore Laboratory, USA; and H. E. Pattee, Battelle Columbus Laboratories, USA	106
Cryogenically Stable Conductors for Toroidal Fusion Reactor Magnets M. A. Hilal and R. W. Boom, University of Wisconsin, USA	111
Summary of Existing Superconducting Magnet Experience and its Relevance to the Safety of Fusion Magnet, S. Y. Hsieh, J. Allinger, G. Danby, J. Keane, J. Powell, and A. Prodell, Brookhaven National Laboratory, USA	116
Superconducting Magnets: Where Did We Go Wrong D. B. Montgomery, Massachusetts Institute of Technology, USA	122
Reliability of Pool Cooling for Tokamak Fusion Reactor Magnets R. L. Willig and M. A. Hilal, University of Wisconsin, USA	128
Effect of Operating Temperature, Heat Load and Magnetic Field on the Economics of Toroidal Magnets for Fusion Reactors, Z. J. J. Stekly and W. F. B. PUNCHARD, Magnetic Corporation of America, USA	133
Structural Safety Features for Superconducting Magnets J. Lehner, M. Reich, J. Powell, P. Bezler, D. Gardner, W. Yu, and T. Y. Chang, Brookhaven National Laboratory, USA	137
Transient Poloidal Field Effects in Twisted Multifilamentary Superconductor for Toroidal Field Windings of Tokamaks, S. S. Shen and J. R. Miller, Oak Ridge National Laboratory, USA	145
Parallel Field Losses in Twisted Multifilament Superconductors W. J. Carr, Jr., Westinghouse Research Laboratories, USA	152
Losses in Twisted Multifilament Superconductors in Simulated Poloidal (Parallel) Fields, M. S. Walker and G. R. Wagner, Westinghouse Research Laboratories, USA; and S. S. Shen, Oak Ridge National Laboratory, USA	156

BEAMS AND SOURCES

(Presented Tuesday Morning, November 18, 1975; Session Chaired by
A. Colleraine, General Atomic Company, USA)

Ionization, Charge Exchange, and Secondary Electron Emission in the Extractor of an LBL/LLL Neutral Beam Source, J. H. Fink and C. E. McDowell, Lawrence Livermore Laboratory, USA	161
Power Requirements of Duopigatron Ion Sources for Neutral Beam Injectors R. E. Wright and G. Schilling, Oak Ridge National Laboratory, USA	167
Extraction Systems for Neutral Beam Heating of P1T and Doublet III Tokamaks H. H. Haselton, D. E. Schechter, G. Schilling, L. D. Stewart and W. L. Stirling, Oak Ridge National Laboratory, USA	169
The Effect of Radiation Blistering on Voltage Holding G. H. Miley, University of Illinois, USA; and R. W. Moir, Lawrence Livermore Laboratory, USA	172
Toroidal Electron Beam Energy Storage for Controlled Fusion W. Clark, P. Korn, A. Mondelli, and N. Rostoker, Maxwell Laboratories, USA	178
Performance Analysis of In-Line Direct Converters for Neutral Beam Sources D. J. Bender, W. L. Barr, and R. W. Moir, Lawrence Livermore Laboratory, USA	184
A Test Facility for the Development of 150 keV/50 A Neutral Beam Injectors for Use on TFTR, G. Schilling, J. S. Culver, J. Kim, M. H. Kunselman, P. B. Thompson, and W. L. Wright, Oak Ridge National Laboratory, USA	191
Design Considerations of Calorimeter-Target for High Power Neutral Beam Injectors J. Kim, R. C. Davis, H. H. Haselton, and C. C. Queen, Oak Ridge National Laboratory, USA	194
Cryopumping Techniques and Design for Neutral Beam Injection Systems W. K. Dagenhart, J. S. Culver, H. H. Haselton, R. L. Johnson, G. Schilling, and W. L. Stirling, Oak Ridge National Laboratory, USA; M. R. Busby, Tennessee State University, USA; and S. A. Stern, Syracuse University, USA	198
Cryocondensation Pumping of Thick Films of Hydrogen and Deuterium H. J. Halama and J. A. Bamberger, Brookhaven National Laboratory, USA	202
Designing the TFTR Neutral Beam Line Control System Software to Aid the Engineer V. Elischer, S. Fehr, V. Jacobson, and K. Wiley, Lawrence Berkeley Laboratory, USA	207
Computer Assisted Operation of Neutral Beam Injectors R. Metzinger and D. Keene, Charles Stark Draper Laboratory, Inc., USA	212

MAGNET AND COIL ENGINEERING - ORNL

(Presented Tuesday Afternoon, November 18, 1975; Poster Session)

Eccentric Coil Test Facility (ECTF) P. B. Burn, P. L. Walstrom, W. C. Anderson, and E. F. Marguerat, Oak Ridge National Laboratory, USA	218
The Design of the Metastable Eccentric Coil Test J. N. Luton and J. K. Ballou, Oak Ridge National Laboratory, USA	225
Optimization of the ECT Background Coil J. K. Ballou and J. N. Luton, Oak Ridge National Laboratory, USA	232
Toroidal Simulation Magnet Tests P. L. Walstrom, Oak Ridge National Laboratory, USA; and T. C. Domm, Union Carbide Corporation, USA	236
Finite Element Stress Analysis of High Field Solenoids J. E. Akin and W. H. Gray, Oak Ridge National Laboratory, USA	240
Stress Analysis of Non-Homogeneous, Transversely Isotropic Superconducting Solenoids, N. E. Johnson, W. H. Gray, and R. A. Weed, Oak Ridge National Laboratory, USA	243
Electromechanical Analyses of Toroidal Field Systems W. D. Cain, Oak Ridge National Laboratory, USA	248
Photoelastic and Analytical Investigation of Stress in Toroidal Magnetic Field Coils, H. Pih and W. H. Gray, Oak Ridge National Laboratory, USA	251
Preparation and Extrusion of Multifilamentary NbTi Conductor Billets W. A. Fietz, R. E. McDonald, and J. R. Miller, Oak Ridge National Laboratory, USA	256
Theoretical and Experimental Determination of Mechanical Properties of Superconducting Coil Composites, C. T. Sun, Iowa State University, USA; and W. H. Gray, Oak Ridge National Laboratory, USA	261
Propagation of Normal Zones in Composite Superconductors L. Dresner, J. R. Miller and G. W. Donaldson, Oak Ridge National Laboratory, USA	266
Thermal Aspects of a Superconducting Coil for Fusion Reactor H. T. Yeh, Oak Ridge National Laboratory, USA	271
Superconducting Coil Protection E. L. Woods, Oak Ridge National Laboratory, USA	277
Large Superconducting Coil Fabrication Development R. L. Brown, E. L. Allred, W. C. Anderson, P. B. Burn, R. I. Deaderick, G. M. Henderson, and E. F. Marguerat, Oak Ridge National Laboratory, USA	282

ENERGY STORAGE

(Presented Tuesday Afternoon, November 18, 1975; Session Chaired by
M. D. Hagler, Texas Tech University, USA)

Inductive Storage for Experimental Reactors P. H. Miller, Jr., General Atomic Company, USA	286
Superconductive Energy Storage for Tokamak Fusion Reactors J. W. Lue, H. A. Peterson, and R. W. Boom, University of Wisconsin, USA	291
Dynamic Constraints on Inductive Energy Storage K. H. Schmitter, Max-Planck-Institut für Plasmaphysik, Germany	296
An Inductive Energy Storage System Based on a Self-Excited Homopolar Generator A. E. Robson, R. E. Lanham, W. H. Lupton, T. J. O'Connell, P. J. Turchi, and W. L. Warnick, Naval Research Laboratory, USA	298
The Design of Homopolar Motor-Generators for Pulsed Power Applications W. F. Weldon, M. D. Driga, H. G. Rylander, and H. H. Woodson, University of Texas at Austin, USA	303
Pulsar - A Field Compression Generator for Pulsed Power M. Cowan, W. K. Tucker, D. L. Wesenberg, and E. C. Cnare, Sandia Laboratories, USA	308
Pulsar - The Experimental Program E. C. Cnare, D. L. Wesenberg, M. Cowan, and W. K. Tucker, Sandia Laboratories, USA	312
Storage and Transfer of Energy for Pulsed-Power Applications S. A. Nasar, University of Kentucky, USA; and H. H. Woodson, University of Texas at Austin, USA	316
A Rotating Capacitor System for the Tokamak Experimental Power Reactor R. L. Kustom, J. H. Norem, and R. B. Wehrle, Argonne National Laboratory, USA	322
Energy Storage and Power Conditioning System for the Shiva Laser G. R. Allen, W. L. Gagnon, P. R. Rupert, and J. B. Trenholme, Lawrence Livermore Laboratory, USA	325
Fast Rise Time One Megajoule Capacitor Bank D. Markins, Maxwell Laboratories, Inc., USA; and W. L. Baker, R. E. Reinovsky, and J. G. Clark, Air Force Weapons Laboratory, Kirkland Air Force Base, USA	330
The Diagnosis of Underdrying in Paper Castor Oil Capacitors G. P. Boicourt, Los Alamos Scientific Laboratory, USA	336
Some Properties of Castor Oil Affecting Its Performance as a Capacitor Impregnant and Their Significance to Future Impregnant Research, G. P. Boicourt, Los Alamos Scientific Laboratory, USA	343

SYSTEMS ENGINEERING - MAGNETIC CONFINEMENT DEVICES

(Presented Tuesday Afternoon, November 18, 1975; Session Chaired by
P. R. Haubenreich, Oak Ridge National Laboratory, USA)

2XIIB Status R. H. Bulmer, M. O. Calderon, S. M. Hibbs, and T. A. Kozman, Lawrence Livermore Laboratory, USA	349
Preliminary Conceptual Engineering Design Considerations for the MX Machine R. H. Bulmer, M. O. Calderon, S. M. Hibbs, and T. A. Kozman, Lawrence Livermore Laboratory, USA	354
The Engineering of the "Divertor Injection Tokamak Experiment" (DITE) K. M. Plummer, D. V. Bayes, D. Bell, J. Burt, F. Galloway, B. C. Sanders, D. E. Skelton, and G. L. Varley, Culham Laboratory, England	361
Engineering Features of ISX D. C. Lousteau, T. C. Jernigan, and R. O. Hussung, Union Carbide Corporation, USA; and M. J. Schaffer, General Atomic Company, USA	366
Project Engineering Aspects of the Impurity Study Experiment N. W. Durfee, Oak Ridge National Laboratory, USA	370
The Mechanical Structure of the Joint European Torus (JET), and Provisions for Assembly and Remote Handling, T. Raimondi, M. Huguet, and L. Sonnerup, Culham Laboratory, England	373
The Design of ASDEX Tokamak R. Allgeyer, E. Broser, H. Frey, G. Haas, G. Herppich, O. Jandl, M. Keilhacker, M. Kornherr, H. Niedermeyer, W. Poschenrieder, H. Preis, H. Rapp, F. Schneider, G. Siller, F. Wagner, H. Wedler, and F. Wesner, Max-Planck-Institut für Plasmaphysik, Germany	378
Some Design Aspects of a Large Reverse Field Pinch Experiment T. E. James, H. A. B. Bodin, and S. Skellett, Culham Laboratory, England	383
Scylla IV-P Linear Theta Pinch, A Design and Construction Overlook A. G. Bailey and M. D. Machalek, Los Alamos Scientific Laboratory, USA	387
Engineering Prototypes for Theta-Pinch Devices L. D. Hansborough, C. F. Hammer, K. W. Hanks, T. E. McDonald, and W. Nunnally, Los Alamos Scientific Laboratory, USA	391
System Design of the Los Alamos Scientific Laboratory's Staged Theta Pinch C. F. Hammer, K. S. Thomas, W. H. Borkenhagen, R. S. Dike, J. J. Banta, R. F. Gribble, and R. K. Linford, Los Alamos Scientific Laboratory, USA	397
Adaptation of a Linear Theta-Pinch for a FERF R. J. Burke, Argonne National Laboratory, USA	400

PLASMA AND ENERGY SOURCES - ENERGY STORAGE AND SUPPLY

(Presented Wednesday Morning, November 19, 1975; Poster Session)

Laser Startup Optics for Baseball II and Future Mirror Machines A. M. Frank, A. K. Chargin, and N. J. Brown, Lawrence Livermore Laboratory, USA	405
Vibrational, Thermal, and Alignment Considerations of the Laser System for Baseball II-T, S. R. Thomas, Jr., A. Chargin, B. Denhoy, and B. Johnston, Lawrence Livermore Laboratory, USA	413
Frozen Ammonia Micropellet Generator for Baseball II-T B. S. Denhoy, Lawrence Livermore Laboratory, USA	417
Summa Hot-Ion Plasma Heating Research at NASA Lewis Research Center J. J. Reinmann, R. W. Patch, M. R. Lauver, G. W. Englert, and A. Snyder, NASA Lewis Research Center, USA	423
An Intense Negative Hydrogen Ion Source for Neutral Injection into Tokamaks K. Prelec and Th. Sluyters, Brookhaven National Laboratory, USA	430
Design Considerations and Data for Gas-Insulated High Voltage Structures D. B. Hopkins, Lawrence Berkeley Laboratory, USA	435
Saturable Reactor-Controlled Power Supply System for TCT/TFTR Neutral Beam Sources W. R. Baker and D. B. Hopkins, Lawrence Berkeley Laboratory, USA; and W. L. Dexter, R. W. Kuenning, and B. H. Smith, Lawrence Livermore Laboratory, USA	440
The Power Supply for the LBL 40 keV Neutral Beam Source W. R. Baker, M. L. Fitzgerald, and V. J. Honey, Lawrence Berkeley Laboratory, USA	445
A High Voltage, High Current Pulsed Energy Source Having dI/dt 's of 2×10^{12} A/s L. C. Burkhardt, R. S. Dike, J. N. DiMarco, R. A. Haarman, and A. E. Schofield, Los Alamos Scientific Laboratory, USA	450
Investigations on Fast Switching Superconductive/Normal Conductive Current Breakers (Cryotrons), M. Pillsticker, Max-Planck-Institut für Plasmaphysik, Germany	453
Toroidal and Ohmic Heating Power Supplies for Doublet III R. W. Callis, H. J. Varga, and J. C. Wesley, General Atomic Company, USA	458
The Doublet III Power and Energy Storage System H. J. Varga, R. W. Callis, and E. L. Hubbard, General Atomic Company, USA	461
A 120 kA Pulsed DC Power System with Computerized Thyristor Triggering S. W. Mosko and D. D. Bates, Oak Ridge National Laboratory, USA; and R. R. Bigelow, E. K. Cottongim, and E. W. Pipes, Union Carbide Corporation, USA; and K. Sueker, Robicon Corporation, USA	465

COIL DESIGN I - PLT AND PDX

(Presented Wednesday Morning, November 19, 1975; Session Chaired by
J. B. Joyce, Princeton Plasma Physics Laboratory, USA)

Center Column Design of the PLT J. Citrolo and J. Frankenberg, Princeton Plasma Physics Laboratory, USA	470
Stress Analysis of PLT Coil J. Frankenberg, Princeton Plasma Physics Laboratory, USA; and R. Smith, Westinghouse Astronuclear Laboratory, USA	474
Silver Brazing Methods for Joining the OH and SF Field Coil Turns for the PLT Machine, M. W. G. Bahr, P. J. Heitzenroeder, Jr., and H. G. Johnson, Princeton Plasma Physics Laboratory, USA	480
A Test Facility for PLT TF Coils J. Hearney, J. File, and S. Dreskin, Princeton Plasma Physics Laboratory, USA	484
PLT Toroidal Field Coil Power Tests R. Marino, J. Citrolo, and J. Frankenburg, Princeton Plasma Physics Laboratory, USA	489
Assembly of the PLT Device R. Marino, Princeton Plasma Physics Laboratory	493
The Toroidal Field Coils for the PDX Machine C. W. Bushnell, Princeton Plasma Physics Laboratory, USA	496
PDX Toroidal Field Coils Stress Analysis Z. D. Nikodem, Princeton Plasma Physics Laboratory, USA; and R. A. Smith, Westinghouse Electric Corporation, USA	499
Ripple in the PDX Toroidal-Field Coil System S. A. Dreskin, Princeton Plasma Physics Laboratory, USA	505
PDX Mechanical and Coil Supports D. Knutson, J. Willard and J. Bialek, Princeton Plasma Physics Laboratory, USA; and F. S. Malick, Westinhouse Electric Corporation Research Laboratories, USA	508
PDX Machine Poloidal Field Coils P. J. Heitzenroeder, Jr. and F. Dahlgren, Princeton Plasma Physics Laboratory, USA	512
The Magnetic Design of the PDX Poloidal Coil System D. I. Brown and U. R. Christensen, Princeton Plasma Physics Laboratory, USA	515
The Design and Fabrication of the PDX Poloidal Field Solenoid Utilizing Fiberglass Reinforced Epoxy, K. S. C. Young, Princeton Plasma Physics Laboratory, USA	519

TOKAMAK REACTORS

(Presented Wednesday Morning, November 19, 1975; Session Chaired by
R. G. Mills, Princeton Plasma Physics Laboratory, USA)

A Tokamak Experimental Power Reactor W. M. Stacey, Jr., V. A. Maroni, J. R. Purcell, M. A. Abdou, P. J. Bertoncini, J. N. Brooks, J. B. Darby, Jr., K. Evans, Jr., J. A. Fasolo, R. L. Kustom, J. S. Moenich, J. S. Patten, D. L. Smith, H. C. Stevens, and S. T. Wang, Argonne National Laboratory, USA	524
A Primary Energy Conversion System for the Tokamak Experimental Power Reactor J. S. Patten, M. A. Abdou, D. L. Smith, H. C. Stevens, and V. A. Maroni, Argonne National Laboratory, USA	529
Oak Ridge EPR Reference Design M. Roberts, Oak Ridge National Laboratory, USA	534
Physics and Engineering Aspects of the Oak Ridge Experimental Power Reactor D. G. McAlees, Exxon Nuclear Company, USA; and E. S. Bettis, T. H. Huxford, F. B. Marcus, R. T. Santoro, H. L. Watts, Oak Ridge National Laboratory, USA	539
Scoping Studies of Tritium Handling in a Tokamak Experimental Power Reactor R. Cherdack, Burns and Roe Company, USA; and J. S. Watson, S. D. Clinton, and P. W. Fisher, Oak Ridge National Laboratory, USA	544
Review of the General Atomic Experimental Fusion Power Reactor Initial Conceptual Design, C. C. Baker, P. H. Sager, Jr., and C. R. Harder, General Atomic Company, USA	552
Apparent Difficulties Associated with High Magnetic Field Large Tokamak Power Reactor Designs, R. W. Boom, R. W. Conn, and J. W. Lue, University of Wisconsin, USA	556
MHD Equilibrium Properties of Tokamak Fusion Reactor Designs H. E. Dalhed, University of Wisconsin, USA; and A. M. M. Todd and S. L. Gralnick, Princeton Plasma Physics Laboratory, USA	561
Fusion Power Plant Simulations - A Progress Report J. M. Cook, J. S. Patten, and W. E. Amend, Argonne National Laboratory, USA	565
The Implications of High Efficiency Power Cycles for Fusion Reactor Design J. R. Powell, J. Usher, and F. J. Salzano, Brookhaven National Laboratory, USA	570
A Survey of Driven Tokamaks in EPR and Commercial Reactor Applications J. L. Usher and J. R. Powell, Brookhaven National Laboratory, USA	577
The Stability and Control of a D-T Fueled Fusion Reactor R. J. Omega and A. Carver, Virginia Polytechnic Institute and State University, USA	580
Conceptual Design of a Divertor for a Tokamak Experimental Power Reactor A. V. Georgievsky, Physical Technical Institute, USSR; L. G. Saksagansky, D. V. Efremov Institute for Electro-physical Equipment, USSR; A. M. Stephanovsky, I. V. Kurchatov Institute of Atomic Energy, USSR; and S. L. Gralnick, D. L. Jassby, D. M. Meade and F. H. Tenney, Princeton Plasma Physics Laboratory, USA	583

MAGNETIC AND COIL ENGINEERING

(Presented Wednesday Afternoon, November 19, 1975; Poster Session)

Cryostabilized Single-Phase Helium Cooled Cabled Conductors for Large High Field Superconducting Magnets, M. O. Hoenig, Y. Iwasa, D. B. Montgomery, and A. Bejan, Massachusetts Institute of Technology, USA	586
Superconductor Joining Methods for Large CTR Magnets P. M. Rackov and C. D. Henning, Intermagnetics General Corporation, USA	593
The Potential of Multifilamentary Nb ₃ Sn for Application to CTR Magnets C. H. Rosner, A. Petrovich, B. A. Zeitlin, and C. D. Henning, Intermagnetics General Corporation, USA	597
The Design and Operation of a Cryomagnetic System for Faraday Rotators Used in High Power Laser Induced Fusion Research, R. A. Ackermann, R. L. Rhodenizer, C. O. Ward, G. R. Morrow, and R. E. Wilcox, Intermagnetics General Corporation, USA	601
Electrical Insulation for Large Multiaxis Superconducting Magnets A. R. Harvey and J. A. Rinde, Lawrence Livermore Laboratory, USA	606
Results of Experiments with a Superconductive Prototype Coil for a Toroidal Magnet, M. Pillsticker and P. Krüger, Max-Planck-Institut für Plasmaphysik, Germany	610
Design of Doublet III E. L. Hubbard, J. R. Gilleland, T. H. Jensen, A. A. Schupp, and J. C. Wesley, General Atomic Company, USA	615
Stress Analysis of Doublet III Toroidal Coil E. E. Reis, C. M. Charman, R. L. Feuerbacher, F. A. Puhn, and J. C. Wesley, General Atomic Company, USA	618
Design of Demountable Joint for Doublet III Toroidal Field Coil F. A. Puhn, R. W. Callis, J. D. Jones, E. E. Reis, and J. C. Wesley, General Atomic Company, USA	623
Selection of Materials and Joining Processes for the Doublet III Toroidal Field Coil, J. D. Jones and F. A. Puhn, General Atomic Company, USA	627
Electrical Insulation Problems Related to the Doublet III Coils L. H. Franklin, General Atomic Company, USA	631
Doublet III Anti-Torque Structure L. G. Davis and F. A. Puhn, General Atomic Company, USA; and H. S. Gordon, Brobeck and Associates, USA	635
The Determination of Winding Stresses in a Toroidal Field Coil Magnet of Optimum Shape, J. A. Mayhall, Lockheed Missiles and Space Company, Inc., USA	638

SWITCHES AND HIGH VOLTAGE SUPPLIES

(Presented Wednesday Afternoon, November 19, 1975; Session Chaired by
T. E. James, Culham Laboratory, England)

Circuit Breaker for Ohmic-Heating Systems J. Salge, U. Braunsberger, and U. Schwarz, Hochspannungsinstitut Technische Universität Braunschweig, Germany	643
Power Crowbar System Coupled by a Current Transformer with Very Low Leakage Inductance, S. Kitagawa and K. Hirano, Nagoya University, Japan	647
Vacuum Interrupters as Off-Switches in Inductive Energy Storage Systems T. Mukutmoni and H. H. Woodson, University of Texas at Austin, USA	651
A 10-kA, 30-kV Liquid-Metal Plasma Valve Switch for Inductive Energy Storage W. O. Eckhardt and G. A. Hofmann, Hughes Research Laboratories, USA	656
HVDC Interrupter Experiments for Large Magnetic Energy Transfer and Storage (METIS) Systems, C. E. Swannack, R. A. Haarman, J. D. G. Lindsay, and D. M. Weldon, Los Alamos Scientific Laboratory, USA	662
The Use of the Hall Effect in a Corbino Disc as a Circuit Breaker E. K. Inall, Science Applications, Inc., USA; and A. E. Robson and P. J. Turchi, Naval Research Laboratory, USA	666
10 kA Low Resistance Superconducting Switch J. D. G. Lindsay and D. J. Blevins, Los Alamos Scientific Laboratory, USA	669
High Current Making Switch P. Wildi, University of Texas at Austin, USA	673
Multichannel Spark-Gap Technology for Staged Theta-Pinch Machines W. H. Borkenhagen, R. F. Gribble, L. D. Hansborough, R. K. Linford, J. G. Melton, and W. C. Nunnally, Los Alamos Scientific Laboratory, USA	676
High Voltage Wide Range Marx Generator Design and Construction J. E. Thompson, Northrup Research and Technology Center, USA	680
Modulators for High Power Neutral Beam Systems N. S. Ponte and G. Schilling, Oak Ridge National Laboratory, USA	683
High Power Modulator/Regulators for Neutral Beam Sources J. Q. Lawson and A. Deitz, Princeton Plasma Physics Laboratory, USA	685

SYSTEMS ENGINEERING

(Presented Wednesday Afternoon, November 19, 1975; Session Chaired by
K. Schmitter, Max-Planck-Institut für Plasmaphysik, Germany)

Baseball II-T, A New Target Plasma Startup Experiment A. Chargin, B. Denhoy, A. Frank, and S. Thomas, Lawrence Livermore Laboratory, USA	690
Project Planning and Project Management of Baseball II-T T. A. Kozman and A. K. Chargin, Lawrence Livermore Laboratory, USA	694
Mechanical Design for Neutral Beam Injection L. C. Pittenger, Lawrence Livermore Laboratory, USA	700
The Final Installation and Testing of the Feedback Power Amplifier for the Scyllac Feedback Experiment, K. J. Kutac, R. W. Kewish, Jr., R. F. Gribble, A. S. Rawcliffe, G. Miller, E. L. Kemp, and R. R. Bartsch, Los Alamos Scientific Laboratory, USA	705
Scyllac Equipment Reliability Analysis W. D. Gutscher and K. J. Johnson, Los Alamos Scientific Laboratory, USA	711
A Low-Noise Control Valve R. S. Christie, Princeton Plasma Physics Laboratory, USA	714
A Tokamak Control Simulator T. N. Edelbaum, S. Serben, and R. E. Var, Charles Stark Draper Laboratory, USA	718
A Neon Refrigerator for Cooling Magnetic Systems B. P. Batrakov and V. A. Kravchenko, The Kharkov Physical-Technical Institute, USSR	722
High Stability Space Frame for a Large Fusion Laser C. A. Hurley and J. O. Myall, Lawrence Livermore Laboratory, USA	724
Dynamic Modeling of a Hydrogen Generating System Using Fusion Reactor Exhaust Plasma Interconnected to a Fuel Cell, K. Denno, New Jersey Institute of Technology, USA	728
Laser Fusion Target Chamber Design W. C. O'Neal, Lawrence Livermore Laboratory, USA	733

COIL DESIGN II

(Presented Thursday Morning, November 20, 1975; Session Chaired by
K. E. Wakefield, Princeton Plasma Physics Laboratory, USA)

The Design of the Toroidal and Poloidal Field Coils for TFTR P. Bonanos, H. G. Johnson, K. E. Wakefield, Princeton Plasma Physics Laboratory, USA; and J. French, Westinghouse Fusion Power Systems, USA	738
Thermal Design and Analysis of the Toroidal Field Coil for TFTR J. W. H. Chi and E. A. DeZubay, Westinghouse Electric Corporation, USA	743
Computer Calculations of Interactions between the Coil Systems and Plasma of the TFTR, W. Brenner, G. Gibson, and E. Twinski, Westinghouse Electric Corporation, USA	751
Analysis of the Equilibrium Field Coil and Ohmic Heating Field Coil Assembly for the Tokamak Fusion Test Reactor, S. Chattopadhyay, Westinghouse Electric Corporation, USA	755
Design of Poloidal Field Windings for the TFTR D. K. Davies, A. J. Federowicz, and J. H. McWhirter, Westinghouse Electric Corporation, USA	759
The Proposed Poloidal Field System and Power Supply Circuits for the Joint European Torus (JET), P. D. Dikopoulos, J. Last, D. L. Smart, and A. Van Wees, Culham Laboratory, England	764
Full-Size Vacuum Vessel and Helical Winding for the W VII Stellarator G. Duesing, K. Freudenberger, J. Kolos, B. Streibl, and G. Wulff, Max-Planck- Institut für Plasmaphysik, Germany	768
ISX Toroidal Field Coil Design and Analysis R. O. Hussung, D. C. Lousteau, Union Carbide Corporation, USA; and N. E. Johnson and R. A. Weed, Mechanics Research, Inc., USA	773
The Toroidal and Poloidal Magnetic Field Coils of the ASDEX Tokamak R. Allgeyer, E. Broser, M. Keilhacker, M. Kornherr, H. Niedermeyer, H. Preis, H. Wedler, and F. Wesner, Max-Planck-Institut für Plasmaphysik, Germany	777
Construction of a Tokamak Torus with Magnetic Limiter and Resonant Helical Windings R. Allgeyer, J. Gernhardt, S. Schraub and A. Wasner, Max-Planck-Institut für Plasmaphysik, Germany	781
Auxiliary Control of the Magnetic Field System of the Fusion Reactor Divertor K. Demko, New Jersey Institute of Technology, USA	784
Behaviour of Copper Contacts at High Direct Currents B. Glesen, D. GÖring, W. Kohlhaas, and C. Stickelmann, Institut für Plasmaphysik der Kernforschungsanlage, Germany; and U. Schwarz and H. Winkler, Institut für Hochspannungstechnik der Technischen Universität Branunschweig, Germany	788
1.1-Meter Bore, 8-Tesla Test Facility R. Nelson, D. Cornish, J. Zbasnik, S. Sackett, and C. Taylor, Lawrence Livermore Laboratory, USA	792

VACUUM ENGINEERING

(Presented Thursday Morning, November 20, 1975; Session Chaired by
T. Batzer, Lawrence Livermore Laboratory, USA)

The 2XIIB Vacuum Vessel: A Unique Design S. M. Hibbs and M. O. Calderon, Lawrence Livermore Laboratory, USA	797
2XIIB Getter Material Problems G. E. Vogtlin, Lawrence Livermore Laboratory, USA	802
Beam-Line Cryopump T. J. Duffy and L. D. Odon, Lawrence Livermore Laboratory, USA	805
Vacuum System for the Livermore Intense Neutron Source C. L. Hanson, Lawrence Livermore Laboratory, USA	808
First Wall Coatings J. E. Simpkins, Oak Ridge National Laboratory, USA	811
Fabrication of a 40 Inch Diameter Ceramic to Metal Seal for PLT G. Lewin and D. Mullaney, Princeton Plasma Physics Laboratory, USA	814
PDX Vacuum Vessel Stress Analysis Z. D. Nikodem, Princeton Plasma Physics Laboratory, USA	817
Fabrication of the PDX Vacuum Vessel J. B. Joyce and D. H. Mullaney, Princeton Plasma Physics Laboratory, USA	820
Pulsed Gas Load Pumping of Hydrogen by Vapor Deposited Titanium Films G. D. Martin, Princeton Plasma Physics Laboratory, USA	823
The Vacuum System for the Tokamak Fusion Test Reactor (TFTR) W. J. Lange, D. Green, and D. A. Sink, Westinghouse Electric Corporation, USA	829
The Multispecies Transient Simulator and Its Application to TFTR Neutral Beam Injector A. L. Lee, H. G. Jones, F. C. Wang, Lockheed Missiles and Space Company, Inc., USA; and R. L. Johnson, Hollifield National Laboratory, USA	833
Vacuum for a Tokamak Experimental Fusion Power Reactor J. S. Moenich, J. A. Fasolo, and H. C. Stevens, Argonne National Laboratory, USA	837
Analysis of the Steady-State Operation of Vacuum Systems for Fusion Machines T. R. Roose, M. A. Hoffman, and G. A. Carlson, Lawrence Livermore Laboratory, USA	842

PLASMA HEATING

(Presented Thursday Morning, November 20, 1975; Session Chaired by
F. R. Scott, Electric Power Research Institute, USA)

Beam Heating Requirements for a Tokamak Experimental Power Reactor P. J. Bertocini, J. N. Brooks, J. A. Fasolo, and W. M. Stacey, Jr., Argonne National Laboratory, USA	849
Conceptual Design of a Neutral-Beam Injection System for the TFTR K. W. Ehlers, K. H. Berkner, W. S. Cooper, E. B. Hooper, R. V. Pyle, and J. W. Stearns, Lawrence Berkeley and Livermore Laboratories, USA	855
Mechanical Engineering Problems in the TFTR Neutral Beam System D. D. Cannon, E. H. Bryant, R. L. Johnson, J. Kim, C. C. Queen, and G. Schilling, Union Carbide Corporation, USA	860
PLT and Doublet III Neutral Beam Injection Systems H. H. Haselton, W. K. Dagenhart, D. E. Schechter, L. D. Stewart, and W. L. Stirling, Oak Ridge National Laboratory, USA	865
Neutral Beam Injection in 2XIIB S. M. Hibbs, Lawrence Livermore Laboratory, USA	868
Computer Control and Monitoring of Neutral Beam Injectors on the 2XIIB CTR Experiment at LLL, G. G. Pollock, Lawrence Livermore Laboratory, USA	873
Computer Simulation of a Staging System for a Theta-Pinch Reactor P. G. Crnkovich, T. A. Coultas, and R. J. Burke, Argonne National Laboratory, USA	876
Implosion Heating in the Scyllac Fusion Test Reactor R. K. Linford, W. C. Munnally, K. I. Thomassen, Los Alamos Scientific Laboratory, USA	880
Radio Frequency Plasma Heating in Large Tokamak Systems near the Lower Hybrid Resonance, A. Deitz and W. M. Hooke, Princeton Plasma Physics Laboratory, USA	885
A Power and Phase Monitoring System for the Lower Hybrid Phased Array Heating System on ATC Machine, B. W. Reed, Princeton Plasma Physics Laboratory, USA	888
A 200 kW, 800 MHz Transmitter System for Lower Hybrid Heating A. Deitz, Princeton Plasma Physics Laboratory, USA	893
Pellet Trajectory Correction A. Bogdanoff, Lawrence Livermore Laboratory, USA	897
Plasma Heating and Fusion Burns Using Compression Clamping of Super Thermal Ions G. H. Miley, D. Driemeyer, and G. Gerdin, University of Illinois, USA	900
The Development of Neutral Injection to the Megawatt Power Level E. Thompson, J. R. Coupland, D. P. Hammond, and A. J. Holmes, Culham Laboratory, England; and D. Dirmikis, University of Sheffield, England	907

STRESS AND MAGNETIC FIELD ANALYSIS

(Presented Thursday Afternoon, November 20, 1975; Session Chaired by
R. W. Derby, Oak Ridge National Laboratory, USA)

Bending-Free Shapes for Toroidal Magnet Field Coils with Concentrated Symmetric Reactions, C. T. Welch, Lockheed Missiles & Space Company, Inc., USA	910
Analytical Solution of the Toroidal Constant Tension Solenoid S. L. Gralnick and F. H. Tenney, Princeton Plasma Physics Laboratory, USA	914
Analytic Expressions for Magnetic Forces on Sectored Toroidal Coils R. W. Moses, Jr. and W. C. Young, University of Wisconsin, USA	917
Magnetic Field from Arbitrarily Shaped Flat Coils with Filamentary, Ribbon, and Rectangular Cross Sections, D. Weissenburger and U. R. Christensen, Princeton Plasma Physics Laboratory, USA	922
Application of Finite Element Method to Electro-Magneto-Mechanical Dynamics of Superconducting Magnet Coil and Vacuum Vessel, K. Miya, S. An, and Y. Ando, University of Tokyo, Japan; and M. Ohta and Y. Suzuki, Japan Atomic Energy Research Institute, Japan	927
Calculation of Electromagnetic Fields and Forces in Coil Systems of Arbitrary Geometry, S. J. Sackett, Lawrence Livermore Laboratory, USA	935
Magneto-Elastic Stability of Toroidal Magnet Designs for Proposed Fusion Reactors, C. Swanson and F. C. Moon, Cornell University, USA	940
Mechanical Stresses in the Toroidal Field Coil of a Large Scale Experimental Tokamak, M. Yamamoto, S. Ito, and Y. Sawada, Tokyo Shibaura Electric Co., Ltd., Japan; and M. Ohkubo and M. Ohta, Japan Atomic Energy Research Institute, Japan	942
Analyses of Laminated Beams for Use in Coil Design J. Bialek, Princeton Plasma Physics Laboratory, USA	950
Stress Analysis of the V-Shaped Toroidal Field Coil on TFTR R. Smith, Westinghouse Electric Corporation, USA	955
Analysis of Induction Phenomena in Thermonuclear Experiments W. E. Deeds and C. V. Dodd, Oak Ridge National Laboratory, USA	961
A Computer Code for Generating a Magnetic Field Free Region in an Ohmic Heating Coil System, M. Pelovitz, Princeton Plasma Physics Laboratory, USA	964

FUSION REACTORS

(Presented Thursday Afternoon, November 20, 1975; Session Chaired by
H. K. Forsen, Exxon Nuclear Co., Inc., USA)

Cost Estimation for a Theta-Pinch Reactor T. A. Coultas, J. M. Cook, P. Crnkovich, and P. Dauzvardis, Argonne National Laboratory, USA	969
Simulation Study of Theta Pinch First Wall A. Pant and L. M. Lidsky, Massachusetts Institute of Technology, USA	974
Conceptual Fusion Reactor Designs Based on the Laser Heated Solenoid L. C. Steinhauer, Mathematical Sciences Northwest, Inc., USA	979
Conceptual Design of Imploding Liner Fusion Reactors P. J. Turchi and A. E. Robson, Naval Research Laboratory, USA	983
Injection Power Requirements for a Twin-Beam Mirror Fusion Device G. H. Miley and R. L. Miller, University of Illinois, USA	988
Charge-Exchange First Wall Loading in Beam-Driven Mirror Devices R. L. Miller and G. H. Miley, University of Illinois, USA	994
Comparison of the Leading Candidate Combinations of Blanket Materials, Thermodynamic Cycles, and Tritium Systems for Full Scale Fusion Power Plants A. P. Fraas, Oak Ridge National Laboratory, USA	1001
The Effects of the D-T Fusion Neutron Energy Spectrum on High Energy Reaction Rates, T. A. Parish, J. W. Davidson, and E. L. Draper, Jr., University of Texas, USA	1008
Advanced Fusion Fuels J. R. McNally, Jr., Oak Ridge National Laboratory, USA	1012
Combination First Wall and Parabolic Lithium Mirror for a Laser Driven Pellet Fusion Reactor, J. K. Baird and V. E. Anderson, Oak Ridge National Laboratory, USA	1015
A Repetitively Pulsed Capacitor Bank for the Dense-Plasma Focus O. Zucker, W. Bostick, R. Gullickson, J. Long, J. Luce and H. Sahlin, Lawrence Livermore Laboratory, USA	1020
Problems of Particle Removal from Tokamak Divertors E. W. Sucov, Westinghouse Electric Corporation, USA	1034
Some Physics Considerations for TEPR Designs J. T. Hogan, J. A. Rome, and S. E. Attenberger, Oak Ridge National Laboratory, USA; and D. G. McAlees, Exxon Nuclear Company, Inc., USA	1037

INSTRUMENTATION AND DATA HANDLING

(Presented Thursday Afternoon, November 20, 1975; Session Chaired by
F. K. Bennett, Princeton Plasma Physics Laboratory, USA)

A Simple Versatile System for Digitizing and Reducing Data in Photographic Form I. Henins, J. Marshall, and A. R. Sherwood, Los Alamos Scientific Laboratory, USA	1041
Transient Analyzer M. D. Muir, Princeton Plasma Physics Laboratory, USA	1043
Ultra-Fast Image Converter Streak Cameras for Laser Fusion Diagnostics J. W. Houghton, S. W. Thomas, D. T. Attwood, and L. W. Coleman, Lawrence Livermore Laboratory, USA	1049
Data Acquisition System for Texas Turbulent Torus A. B. Macmahon, H. S. Hutchins, G. S. Caldwell, and D. M. Patterson, University of Texas at Austin, USA	1054
Scylla IV-P Computer Based Control and Data Acquisition System J. W. Lillberg, G. I. Chandler, and F. T. Seibel, Los Alamos Scientific Laboratory, USA	1059
Control and Data Management for a Large Fusion Laser J. W. Davis and F. Halloway, Lawrence Livermore Laboratory, USA	1062
2XIIB Computer Data Acquisition System G. C. Tyler, Lawrence Livermore Laboratory, USA	1066
Data Acquisition for PLT P. A. Thompson, Princeton Plasma Physics Laboratory, USA	1071
Software Implementation of a High-Speed Interface between a PDP-10 and Several PDP-11s, N. P. DeMesa III, Princeton Plasma Physics Laboratory, USA	1076
An Update of PPPL's DAS-1800 K. H. Booth, Princeton Plasma Physics Laboratory, USA	1080

REACTOR COIL DESIGN

(Presented Friday Morning, November 21, 1975; Session Chaired by
C. Henning, Intermagnetics General Corporation, USA)

Pure Tension Superconducting Toroidal-Field Coil System Design Studies for the Argonne Experimental Power Reactor, S. T. Wang, J. R. Purcell, D. W. Demichele, and L. R. Turner, Argonne National Laboratory, USA	1084
Superconducting Ohmic-Heating Coils for the Argonne TEPR Design Study L. R. Turner, S. T. Wang, and J. R. Purcell, Argonne National Laboratory, USA	1089
Superconducting Equilibrium Coils Design Studies for the Argonne Experimental Power Reactor, S. T. Wang, J. R. Purcell, and L. R. Turner, Argonne National Laboratory, USA	1093
Field Ripple Effects in the Design of Toroidal Magnets for a Tokamak Experimental Power Reactor, R. K. Thomas, General Atomic Company, USA	1097
Field Shaping Coils for an Experimental Power Reactor W. E. Toffolo and P. I. Petersen, General Atomic Company, USA	1100
Toroidal Field Ripple Effects in Large Tokamaks N. A. Uckan, K. T. Tsang, and J. D. Callen, Oak Ridge National Laboratory, USA	1105
A Magnetic Shielding System for the Tokamak Experimental Power Reactor F. B. Marcus, Y-K. M. Peng, R. A. Dory, and J. R. Moore, Oak Ridge National Laboratory, USA	1110
Magnetic Field Shielding System in a Tokamak Experimental Power Reactor (EPR) - Concepts and Calculations, Y-K. M. Peng, F. B. Marcus, R. A. Dory, and J. R. Moore, Oak Ridge National Laboratory, USA	1114
A Structural Analysis of an Experimental Power Reactor Magnet System R. M. Pardue and N. E. Johnson, Mechanics Research, Inc., USA	1118
The Magnet System for a Laser Heated Solenoid Fusion Reactor P. G. Marston, J. J. Nolan, and R. J. Averill, Magnetic Engineering Associates, U.S.A.	1123
Mechanical Design of a 250 Kilogauss Solenoidal Magnet P. Bonanos, Princeton Plasma Physics Laboratory, USA	1127
Electrical Insulation in Magnets for Fusion Reactors R. D. Hay and E. Rapperport, Magnetic Engineering Associates, USA	1130

MATERIALS, WALLS, AND BLANKETS

(Presented Friday Morning, November 21, 1975; Session Chaired by
M. R. Jonzen, General Atomic Company, USA)

X-Ray Impact Induced Desorption of Gases from Stainless Steel Surfaces S. Braumbach and M. Kaminsky, Argonne National Laboratory, USA	.1135
Particle Emission from Polycrystalline and Monocrystalline Niobium under 14.1 MeV Neutron Impact, M. Kaminsky and S. K. Das, Argonne National Laboratory, USA	.1141
Irradiation of Graphite Cloth at Various Temperatures with Deuterons and Helium Ions R. Ekern, S. K. Das, and M. Kaminsky, Argonne National Laboratory, USA	.1146
Reduction of Surface Erosion Caused by Helium Blistering: Comparison between Vacuum-Cast and Sintered-Beryllium, S. K. Das and M. Kaminsky, Argonne National Laboratory, USA	.1151
Tritium Permeation through Metals and Alloys C. W. Kuehler and R. C. Axtmann, Princeton Plasma Physics Laboratory, USA	.1154
Design of the ORNL EPR Blanket E. S. Bettis, T. J. Huxford, D. G. McAlees, R. T. Santoro, H. L. Watts, and M. L. Williams, Union Carbide Corporation, USA	.1159
Heat Transfer Considerations in the Blanket Design of a Non-Breeding Experimental Power Reactor, D. W. Kearney and H. D. Chiger, General Atomic Company, USA	.1162
Low Activity Blankets for Experimental Power Reactors R. Benenati, J. Fillo, O. W. Lazareth, S. Majeski, J. R. Powell, and P. Tichler, Brookhaven National Laboratory, USA	.1168
Engineering Design of Radiation Protection System for the Tokamak Fusion Test Reactor J. Jedruch, Westinghouse Electric Corporation, USA	.1175
Conceptual Thermal-Mechanical Design of the TFTR First Wall Armor against Neutral Beam Impingement, J. W. H. Chi and R. Flaherty, Westinghouse Electric Corporation, USA	.1180
Neutron Wall Load Distributions in Non-Circular Cross Section Tokamaks D. L. Chapin and W. G. Price, Jr., Princeton Plasma Physics Laboratory, USA	.1187
Transmutation and Activity in a Thermal Blanket J. Gruber, Hahn-Meitner-Institut für Kernforschung Berlin, Germany	.1192
Radiation Induced Vibration of Vacuum Vessel for Controlled Thermonuclear Reactor, K. Miya, T. Kidera, S. Tagawa, and Y. Tabata, University of Tokyo, Japan	.1197
Impact of Radiation Transport on Wall Loading in Fusion Reactors S. Grammel and J. Patten, Argonne National Laboratory, and T. Kammash, University of Michigan, USA	.1204

LARGE POWER SUPPLIES

(Presented Friday Morning, November 21, 1975; Session Chaired by
D. L. Smart, Culham Laboratory, England)

Proposed TFTR Electrical System
G. Bronner and J. Murray, Princeton Plasma Physics Laboratory, USA1209

Analysis of the TFTR Toroidal Field Power Supply and Its Interactions with
Other Loads, W. E. Newell, Westinghouse Fusion Power Systems, USA1213

Energy System for the Generation of Divertor Magnetic Fields in the PDX Fusion
Research Device, N. M. Turitzin, Princeton Plasma Physics Laboratory, USA1218

Pulsed Power Line for PLT Energy Systems
C. A. Armellion, G. Bronner, and J. G. Murray, Princeton Plasma Physics
Laboratory, USA1222

PLT Bias Fields and Their Current Supplies
F. W. Kloiber, Princeton Plasma Physics Laboratory, USA1227

Application Data for PLT Stabilizing Field Rectifier
G. Bronner, J. G. Murray, and G. E. Oliaro, Princeton Plasma Physics
Laboratory, USA1231

Phase Controlled Rectifier Study
G. Bronner and J. G. Murray, Princeton Plasma Physics Laboratory, USA1234

Construction and Testing of the 2XIIB Flat-Topping Power Supply
L. L. Reginato and B. H. Smith, Lawrence Livermore Laboratory, USA1238

PLT Neutral Injection Ignitron Accelerating Supply
D. L. Ashcroft, J. G. Murray, R. A. Newman, and F. L. Peterson, Princeton
Plasma Physics Laboratory, USA1242

Fault Protection for Neutral-Beam Injection Systems
R. C. Knauer, D. L. Ashcroft, J. G. Murray, and R. A. Newman, Princeton
Plasma Physics Laboratory, USA1245

High Voltage Protection for Megawatt Beam Line
D. P. Hammond, Culham Laboratory, England1249

High Power Semiconductor Switching in the Nanosecond Regime
O. S. Zucker, J. R. Long, V. L. Smith, D. J. Page, and J. S. Roberts,
Lawrence Livermore Laboratory, USA1253

LIST OF ATTENDEES1257

AUTHOR INDEX1272
