

TABLE OF CONTENTS

<i>Preface</i>	v
<i>Distribution of the Subjects in the Proceedings</i>	viii
<i>Information on the Up-Coming Symposium</i>	viii
<i>Affiliation Abbreviation</i>	xxxv

PLENARY SESSION

Monday, October 26, 1981

<i>Beginning Steps Toward Fusion Technology Development</i> , E. E. Kintner (DOE)	1
<i>A View of Fusion From Capitol Hill</i> , A. T. Mense (Science Consultant, House of Representatives)	5
<i>The EPRI Fusion Program and Its Thrust in Fusion Engineering</i> , F. R. Scott (EPRI)	11
<i>The Fusion Engineering Development Plan</i> , G. M. Haas (DOE)	15
<i>A Perspective on the Industrial Role in Fusion</i> , D. L. Kummer (MDAC)	20
<i>Technology Transfer: The Key to Fusion Commercialization</i> , S. C. Burnett (GA)	23

SESSION 2B. QUALITY ASSURANCE WORKSHOP

Monday, October 26, 1981

Chairman: W. Osborne (PPPL)

<i>Summary of Quality Assurance Workshop - How Can More Quality Be Designed Into Fusion Facilities?</i> , W. J. Osborne (PPPL)	26
<i>A General Approach to Quality in Design</i> , W. J. Osborne (PPPL)	27
<i>Enhanced Operations Through Designing in Reliability and Maintainability</i> , T. W. DeMund (Grumman)	30
<i>Designing Quality Into Software</i> , D. R. Becker (LLNL)	34
<i>Interfacing Between Concrete and Steel Construction and Fusion Research Devices</i> , E. Willoughby (Giffels Assoc.)	37
<i>Exchange of Design Quality "Lessons Learned"</i> , F. H. Bohn (IPP-Jülich)	39

SESSION 2C. ELMO BUMPY TORUS

Monday, October 26, 1981

Chairman: R. Debellis (MDAC)

<i>Intrinsic Engineering Problems for Elmo Bumpy Torus-Scale (EBT-S)</i> , D. A. Everitt (Union Carbide); H. O. Eason, R. L. Livesey, T. L. White (ORNL)	43
<i>Engineering Overview of EBT-P Device Systems</i> , W. R. Hamilton (Union Carbide); H. F. Imster (MDAC)	47
<i>Elmo Bumpy Torus Fusion Reactor Design Study</i> , R. A. Krakowski (LANL); D. A. DeFreece (MDAC)	51
<i>Bottoms Up Design of the Elmo Bumpy Torus - Proof of Principal (EBT-P) Fusion Research Facility</i> , D. T. Erickson (MDAC)	56
<i>The Role of Systems Integration in EBT-P</i> , D. W. Haas (MDAC)	60
<i>EBT-P Instrumentation and Control System-Overview</i> , R. J. Schmitt (MDAC)	64
<i>EBT-P Data Acquisition System Design</i> , B. A. Boyd (MDAC)	68
<i>EBT-P Plasma Heating System Instrumentation and Control Design</i> , T. L. Weaver (MDAC)	72
<i>The Mechanical Design of a Toroidal Divertor for EBT-S</i> , F. S. Malick, W. C. Brenner, R. B. Chianese (W)	76

SESSION 2P. MAGNET DESIGN AND EDDY CURRENTS

Monday, October 26, 1981

Chairman: S. Wipf (LANL)

<i>TMX-Axisymmetric Magnet Set Design Study</i> , R. L. Wong, A. K. Chargin, B. G. Logan (LLNL)	80
<i>An Iterative Numerical Procedure for Determining the Shape of a Constant Tension "D" Magnet</i> , R. B. Chianese (W).	83
<i>Ripple Reduction Poloidal Field Coils for Tokamak Fusion Reactors</i> , G. Bateman (Georgia Tech.)	87
<i>A Computer Circuit Analysis of Induced Currents in the MFTF-B Magnet System</i> , G. D. Magnuson, E. L. Woods (General Dynamics).	91
<i>Analysis and Design of Short, Iron-Free Dipole Magnets</i> , A. R. Harvey (LLNL)	95
<i>TMX Upgrade Magnet System Mechanical Issues</i> , L. R. Pedrotti, J. O. Myall, S. M. Hibbs, R. L. Wong, D. S. Ng, E. B. Hooper, R. E. Priest, M. O. Calderon, A. K. Chargin (LLNL).	99
<i>Evaluation of the Use of a Normal Shield to Reduce Transient Field Induced Losses in Tokamak Superconducting Coils</i> , Z. J. J. Stekly (Magnetic Corp.)	103
<i>Magnet System for a Thermal Barrier Tandem Mirror Reactor</i> , N. S. Kim, R. W. Conn (U. Cal.-Los Angeles)	107
<i>Eddy Current Load Estimation for Toroidal Shells as a Result of Plasma Disruptions</i> , R. J. Thome, R. D. Pillsbury, Jr., W. G. Langton (FBNML).	111
<i>A Model of Toroidal Magnet Systems as Orthotropic Shells of Finite Thickness</i> , E. S. Bobrov, J. H. Schultz (MIT)	115
<i>Calculation of Transient Current Response of a Set of Coupled Circuits Using an Eigenvalue Technique</i> , S. S. Kalsi (ORNL).	119
<i>PF Coil Current Sheets for Circular Section Tori to Produce Specified Internal Fields</i> , R. J. Thome, W. G. Langton, R. D. Pillsbury, Jr. (FBNML).	123
<i>Analysis of External Hybrid Poloidal Coil System</i> , Y. Hamada, Y. Abe, S. Kitagawa, K. Toi (Nagoya U.).	127
<i>Calculation of Eddy Current Losses in Toroidal Field Coil Casing</i> , S. S. Kalsi, R. J. Hooper (ORNL). .	131
<i>Generation of Multipole Nulls in a Tokamak Geometry</i> , J. Kalnavarns (MPB Tech.).	135
<i>Optimization of the Central Support for Demountable Rectangular Tokamak Toroidal-Field Coils</i> , J. Kalnavarns (MPB Tech.).	139
<i>Spherical Fusion Plasma Confinement Field of Surrac Type</i> , S. L. Wipf (LANL)	143
<i>Optimization of the Poloidal Field Coil System in Pulsed Tokamaks</i> , W. R. Spears (Culham Lab).	146
<i>Normal Conducting Steady-State Toroidal Magnet Systems for Large Tokamaks</i> , K. Borrass, M. Soll (IPP-Garching).	150
<i>Pulsed Field Heating in Tokamak Reactor TF-Coil Helium Vessels</i> , W. Y. Chen, J. R. Purcell, J. S. Alcorn (GA).	154
<i>Eddy Current Calculations for the Tokamak Fusion Reactor Through Fields Harmonics Content</i> , K. Denno (NJ Tech.).	158
<i>Design and Fabrication considerations for Normal Copper PF Coils Located Inside TF Coils to Facilitate Replacement</i> , J. W. Ayers, V. C. Srivastava (Magnetic Corp.)	162
<i>Design Description of the Large Coil Test Facility Pulse Coil</i> , R. O. Hussung, C. C. Queen, Jr., K. K. Chipley (Union Carbide)	166

SESSION 2Q. COIL MACHINE STRUCTURE DESIGN AND TESTING

Monday, October 26, 1981

Chairman: E. Dalder (LLNL)

<i>Nonlinear Stress Analysis of the Poloidal Field Coil For JT-60 Tokamak Machine</i> , H. Miyata, H. Kojima, H. Kimoto, T. Takizawa, M. Furuyama (Hitachi); T. Ando, M. Masuda, M. Ohkubo, M. Ohta (JAERI).	170
---	-----

<i>Fatigue Design of the Poloidal Field Coil for JT-60 Tokamak Machine</i> , H. Miyata, H. Kimoto, H. Kojima, T. Takizawa, M. Furuyama (Hitachi); M. Ohkubo, T. Ando, M. Masuda, M. Ohta (JAERI)	174
<i>Load Tests of a Large Coil</i> , M. Ohkubo, M. Masuda, T. Ando, N. Kawamoto, T. Nishio (JAERI); T. Takizawa, Y. Shizuoka, H. Sasajima (Hitachi).	178
<i>On Mechanical Stresses in Solenoids Constructed of Transversely Isotropic Materials</i> , W. H. Gray, W. D. Cain (ORNL).	182
<i>New Developments in Program Stansol Version 3</i> , W. H. Gray (ORNL)	185
<i>Bitter-Type Magnet Plate Design With Compound Conductor of Ultrahigh Mechanical Strength</i> , W. D. Haubenberger (IPP-Garching)	189
<i>Development of TF Coil Support Concepts by Design Methodology in the Case of a Bitter-Type Magnet</i> , U. B. Brossmann (IPP-Garching)	193
<i>Design and Fabrication of the MFTF Magnet Support System</i> , R. E. Hinkle, J. A. Horvath, E. N. C. Dalder (LLNL).	197
<i>A Finite Element Model for Responses of Fusion Magnets</i> , A. J. Jarabak, F. J. Bogden (W); E. L. Westermann (O'Donnell).	198
<i>Structural Behavior of the Bitter Plate TF Magnet for the Zephyr Ignition Test Reactor</i> , E. S. Bobrov, H. Becker (MIT).	199
<i>Missile Generation Due to Electrical Arcing in High Field Fusion Magnets</i> , H. Schneider, A. Caretta (ISPRA)	203

SESSION 2R. COIL, VACUUM AND MACHINE STRUCTURE, RELATED MATERIALS AND TECHNIQUES

Monday, October 26, 1981

Chairman: R. Derby (ORNL)

<i>Inspection, Analysis, and Removal of Weld-Flaws in MFTF Magnet Cases</i> , B. J. McKinley, J. A. Horvath, E. N. C. Dalder (LLNL).	207
<i>Electrical Insulation Qualification Tests for TFTR TF and PF Coils</i> , H. G. Johnson (PPPL); R. J. Alton (Ebasco)	208
<i>Development of Ferritic Alloy Steels for Structural Use at 4K</i> , J. W. Morris, Jr. (U. Cal.-Berkeley)	212
<i>The Selection and Application of C18200 Chrome Copper For the OHTE Confinement Test Helical Coil</i> , F. A. Puhn, D. W. Graumann (GA).	213
<i>Development of a Prestressed Epoxy-Glass Cylinder for Preloading the Doublet 111 B-Coil Centerpost</i> , E. E. Reis, (GA)	216
<i>Design, Fabrication, and Testing of the Magnet Liner Supports for the Mirror Fusion Test Facility</i> , Y. Chang (LLNL).	220
<i>Results of an Insulator Materials Test Program for Applications Inside the TFTR Plasma Chamber</i> , R. E. Renman, J. J. Sredniawski (Grumman); P. W. Trester (GA).	222
<i>Mechanical Properties Considerations for Use of Epoxy Insulators and Bonded Joints in Neutral Beam Ion Sources</i> , D. W. Doll, P. W. Trester, H. G. Staley (GA).	226
<i>The Response of Materials to Tokamak Plasma Disruptions</i> , J. B. Whitley, A. W. Mullendore, R. S. Blewer, W. Beezhold (SNL)	230
<i>Ceramic to Metal Brazed Rectangular Insulator for Neutral Beam Accelerators</i> , J. A. Paterson, G. W. Koehler, D. P. Yee (LBL)	233
<i>Limiter, of Dense and High Thermal Conducting Material, For a Fusion Reactor</i> , H. G. Bogensberger, Th. Schmidt-Hansberg, R. Schönfeld (NUKEM)	236
<i>TFTR Vacuum Vessel Dielectric Joint Material Selection Test and Fabrication</i> , A. W. Brooks (Ebasco); L. Poveromo (Grumman)	239
<i>Fatigue Testing of T. F. T. R. Vacuum Vessel Bellows</i> , G. H. Rappé, G. Brown, E. Perry (PPPL)	240

<i>Initial Thermal Outgassing Properties of Aluminium Between 20°C and 320°C,</i> F. Reiter, J. Camposilvan (ISPRA)	244
<i>Thermal and Mechanical Testings of TiC and TiN Coating Materials With Mo Substrates,</i> Y. Gomay, H. Koizumi, H. Ishihara (Toshiba)	248
<i>Electron Assisted Methane Production on Carbon Surfaces,</i> O. Auciello, A. A. Haasz, P. C. Stangeby, P. R. Underhill (U. Toronto)	252
<i>Fatigue Data of Molybdenum,</i> T. Kimishima, M. Sukekawa, K. Owada (Hitachi); M. Shimizu, H. Nakamura, M. Masuda (JAERI)	255

SESSION 2S. SUPERCONDUCTING MAGNETS

Monday, October 26, 1981

Chairman: R. Smith (ANL)

<i>Large Coil Test Stand Structural Analysis,</i> T. V. Baudry, W. H. Gray (ORNL)	259
<i>Cryogenic Voltage Withstand and Heat Transfer Tests for the General Electric Large Coil Turn Heaters,</i> S. W. Schwenterly, C. M. Fitzpatrick (ORNL); W. R. Court (GE)	260
<i>Design Description of the Large Coil Test Facility Pulse Coil Support and Transport System,</i> C. C. Queen, Jr. (Union Carbide)	265
<i>Design of the Westinghouse Large Coil Program Forced Flow Nb₃Sn Superconductor Jacket,</i> F. N. Domeisen, D. T. Hackworth, T. D. Hordubay (W)	268
<i>Extended Field Operation of an Internally Cooled Superconducting Magnet,</i> J. W. Lue, J. R. Miller (ORNL)	269
<i>Two-Phase Helium-IV Quench Analysis for Superconducting Magnets,</i> G. A. Byington, W. D. Shipley, T. L. Ryan (Union Carbide)	273
<i>Pool Boiling Helium Heat Transfer From Two Large Monolithic Copper Stabilizers,</i> S. D. Peck, E. H. Christensen (General Dynamics)	277
<i>EBTR Magnet Design,</i> D. W. Lieurance (General Dynamics); C. G. Bathke (LANL)	281
<i>A superconducting Toroidal Particle Detector for High-Energy Physics Research,</i> P. Materna, P. Bonanos, P. Heitzenroeder, J. File, B. Pope (PPPL)	285
<i>Conceptual Design for a Modular Stellarator Fusion Reactor Magnet,</i> S. W. Van Sciver, A. Khalil, K. Y. Yuan, I. N. Sviatoslavsky (U. Wisconsin)	289
<i>Finite Element Analyses and Instrumentation Layout for the Superconducting Test Facility "TOSKA",</i> H. Zehlein, B. Dolensky, H. Krauth, G. Messemer, A. Ulbricht (KfK)	293
<i>A Superconducting Ohmic Heating Solenoid Concept for ISX-C,</i> S. S. Shen, R. L. Brown, W. H. Gray, M. S. Lubell (ORNL)	297
<i>Safety Implications of Shorted Turns in Superconducting Magnets for Fusion,</i> L. R. Turner (ANL)	301
<i>Emerging Perceptions of Magnet Engineering Challenges for Tokamak Reactors,</i> J. Alcorn, J. Purcell (GA)	305
<i>Acoustic Emission Triangulation of Mechanical Disturbances in Superconducting Magnets,</i> O. Tsukamoto, M. F. Steinhoff, Y. Iwasa (FBNML)	309
<i>Helium Vapor Induced Quench Propagations in Superconducting Magnet Windings,</i> Y. Iwasa, O. Tsukamoto, J. F. Maguire, R. J. Thome (FBNML)	313
<i>Triangulation of Quench Sources in Superconducting Magnets Using Acoustic Emission Technique,</i> O. Tsukamoto, M. F. Steinhoff, Y. Iwasa (FBNML)	314
<i>A Comparison Between Experimental and Analytical Electromechanical Strain For Three Superconducting Solenoids,</i> W. H. Gray, J. K. Ballou, R. L. Brown, W. A. Fietz, J. W. Lue, J. R. Miller, P. L. Walstrom (ORNL)	315
<i>A Comparison Between Experimental and Analytical Winding Prestrain for a Circular Solenoid,</i> W. H. Gray, T. J. McManamy, J. K. Ballou, R. L. Brown (ORNL)	316

SESSION 2T. SUPERCONDUCTOR MATERIALS

Monday, October 26, 1981

Chairman: Y. Iwasa (MIT)

<i>Coil Performance Test of Nb₃Sn Conductor to be Used in the Advanced Cluster Test Facility,</i> T. Ando, Y. Takahashi, M. Nishi, H. Tsuji, Y. Sanada, S. Shimamoto, K. Yasukochi (JAERI); T. Hamajima, M. Yamaguchi, O. Osaki, S. Murase, T. Uchida, H. Ichikawa (Toshiba)	320
<i>Manufacture of a 16,000 AMP Superconducting Conductor for the Tokamak Toroidal Field Coil Large Coil Program,</i> W. C. Hamilton, S. L. Carr, J. G. Declercq, R. W. Lincoln, D. A. Pollock, B. A. Zeitlin (Intermagetics).	324
<i>Development of Low-Cost Multifilamentary Nb₃Sn Superconductors,</i> K. Hemachalam, R. E. Schwall, B. A. Zeitlin, J. M. Royet, G. M. Ozeryansky, D. W. Hazelton, J. F. Clements (Intermagetics).	328
<i>Fabrication and Performance of Compacted Monolithic Conductor,</i> S. O. Hong, E. Adam, E. Gregory (Airco).	329
<i>The Origin of Resistive Voltage and the Related Problems in Large-Capacity Nb₃Sn Conductor,</i> Y. Furuto, Y. Tanaka, S. Meguro, T. Suzuki, I. Inoue (Furukawa).	330

SESSION 2U. COIL FABRICATION AND COOLING

Monday, October 26, 1981

Chairman: R. Derby (ORNL)

<i>A Description of the Molding System for the Epoxy Impregnation of the TFTR Poloidal Field Coils,</i> J. C. McDade, L. E. Dudek (PPPL)	335
<i>Epoxy Impregnation System for TFTR Large Coil Program,</i> J. H. Chrzanowski, M. A. Pereira, P. G. Snook (PPPL)	339
<i>Design Characteristics of the TFTR Sector Module (I),</i> E. Stern, G. Cargulia, F. Spinos (Grumman); M. Sabado (Ebasco)	342
<i>Development of TFTR Sector Module Assembly Procedures (II),</i> E. Stern, G. Cargulia, F. Spinos (Grumman); M. Sabado (Ebasco)	346
<i>Design and Fabrication of Liquid Nitrogen Thermal Shields for the MFTF Yin-Yang Magnets,</i> G. L. Johnson, Y. Chang, J. H. Van Sant (LLNL)	350
<i>Thermal Design Considerations of Shields for Levitated Coils,</i> S. P. Grotz (U. Cal.-Los Angeles).	354
<i>Enhanced Cooling With Helium Channels in the TF Coil Casing for FED,</i> V. C. Srivastava (ORNL)	358

SESSION 2V. ENERGY STORAGE, SWITCHING AND SUPPLY

Monday, October 26, 1981

Chairman: R. Boom (U. Wisconsin)

<i>Text Poloidal Field Power Systems Operation,</i> K. Nelin, H. S. Hutchins, J. C. Kellogg (U. Texas).	362
<i>Text Toroidal Field Power Supply Operation,</i> D. Brower, H. W. Harris, K. Nelin, H. S. Hutchins, P. Wildi (U. Texas); J. Cox (Cox); H. P. Ross (Transrex)	366
<i>Installation and Operation of the Motor-Generator for the Texas Experimental Tokamak,</i> P. Wildi, D. Brower, H. W. Harris (U. Texas); L. C. Elliott (W).	370
<i>Automatic Pulse Phase Shifter for Thyristor Power Supplies in Thermonuclear Fusion Device,</i> K. Yabuno, H. Konishi, Y. Sakurai, K. Murai, Y. Kodama, Y. Miyahara (Hitachi).	374
<i>Development of Large-Scale Thyristor DC Circuit Breaker,</i> S. Kobayashi, Y. Tanoue, H. Ikegame, T. Matushita, Y. Sato (Toshiba)	378
<i>Design, Fabrication and Erection of Flywheel-Generator-Convertors for the Jet Tokamak,</i> M. Huart (JET)	382
<i>The Jet Ohmic Heating Circuit,</i> H. Helgesen, P. L. Mondino, C. Raymond, A. Stella (JET)	386
<i>Poloidal-Field Thyristor Amplifier With Improved Power Factor, For Textor,</i> J. Lisser, K. Bouwknecht (Holec); B. Giesen (IPP-Jülich); F. Petree (Ebasco).	390

<i>Commissioning Tests For the Textor Toroidal Field Power Supply System,</i> B. Giesen (IPP-Jülich); F. Petree (Ebasco); J. Bekink (Holec)	394
<i>4000 Shots With the ASDEX Ohmic Heating Breaker,</i> H. Wedler, E. van Mark (IPP-Garching)	399
<i>Power Supplies for the Varennes Tokamak A Quasi-Continuous Operation Experiment,</i> G. Harbec (IREQ); R. Przysiezniak (Shawinigan)	403
<i>Design and Test of Low Capacitance, Air-Insulated, 80 kV, 0.5 Sec Source Cables for MFTF Sustaining Neutral Beam Power Supplies,</i> D. J. Mayhall, J. H. Wilson, W. J. Caldwell (LLNL); T. F. Watson, J. W. Jenkins, Jr. (Unibus)	407
<i>The Magnetizing Circuit of TEXTOR,</i> U. Braunsberger (TU Braunschweig); M. Lochter (IPP-Jülich); W. Weigand (Siemens)	411
<i>Elimination of Output Current Transients in the MFTF Sustaining Neutral Beam Arc Power Supplies,</i> H. W. Van Ness, D. J. Mayhall, J. H. Wilson (LLNL)	416
<i>Design and Test of 80 kV Snubber Core Assemblies for MFTF Sustaining Neutral Beam Power Supplies,</i> S. R. Bishop, D. J. Mayhall, J. H. Wilson, K. R. De Vore, R. I. Ross (LLNL); R. G. Sears (EG&G)	419
<i>Development of a High Voltage Crowbar,</i> K. M. Zubair, R. R. Rodine (Aydin-Transrex)	423
<i>The Lawrence Berkeley Laboratory Neutral Beam Engineering Test Facility Power Supply System,</i> I. C. Lutz, C. A. Arthur, G. J. deVries, H. M. Owren (LBL)	427
<i>TFTR Neutral Beam Test Facility,</i> N. M. Turitzin, R. A. Newman (PPPL)	431
<i>ZT-40M System Design, Modification, and Installation,</i> C. F. Hammer (LANL)	435
<i>A 2.0 MVA Voltage Doubler Power Supply for Capacitor Bank Charging,</i> B. T. Merritt (LLNL); R. Tarter, J. B. Button (Aydin)	438
<i>Application of Power Factor Correction in the Tandem Mirror Experiment Upgrade Magnet Power Supply,</i> W. C. Corvin (LLNL)	442
<i>Analysis of Switching Surges Generated by Current Interruption in an Energy Storage Coil,</i> P. Chowdhuri (LANL)	444
<i>Performance of Large Magnets Under Transient Voltages,</i> P. Chowdhuri, M. Anderson (LANL)	448
<i>Design and Testing of a 13.75 MW Converter for a Superconducting Magnetic Energy Storage System,</i> H. J. Boenig, R. D. Turner (LANL); C. L. Neft, K. H. Sueker (Robicon)	452
<i>An Energy Dump Concept for Large Energy Storage Coils,</i> Y. M. Eyssa, G. E. McIntosh, M. A. Hilal, A. Khalil, B. Nilsson (U. Wisconsin)	456
<i>A 10 kA Pulsed Power Supply for Superconducting Coils,</i> M. Ehsani, R. E. Fuja, R. L. Kustom (ANL)	460
<i>LCT Protective Dump Switch Tests,</i> W. M. Parsons (LANL)	463

SESSION 2W. PLASMA ENGINEERING

Monday, October 26, 1981

Chairman: D. Cohn (MIT)

<i>Analysis of Field Error Criteria In An EBTR Reactor,</i> N. A. Uckan, D. W. Swain, D. K. Lee, T. Uckan, L. W. Owen, M. R. Gordinier (ORNL)	467
<i>Magnetics/Transport Aspects of EBTR Reactors,</i> C. G. Bathke (LANL)	471
<i>Studies of Fusion Product Confinement and Heating in EBT Reactors,</i> D. E. Driemeyer (MDAC); J. C. DeVeaux (U. Illinois)	475
<i>EBTR Design-Point Selection,</i> R. A. Krakowski, C. G. Bathke (LANL)	479
<i>Plasma Engineering Considerations for an Inside-Barrier Tandem Mirror Test Facility,</i> J. F. Santarius, G. A. Emmert (U. Wisconsin)	483
<i>Kinetic Study of the Sheath Region Near the First Wall For Tokamak Fusion Reactors,</i> L. A. Schwager (U. Illinois)	487

<i>Study of Plasma Edge Conditions for a Commercial Tokamak Reactor,</i> C. D. Boley, J. N. Brooks (ANL)	491
<i>Redeposition of the Sputtered Surface In Limiters,</i> J. N. Brooks (ANL); R. T. McGrath (Penn. St. U.)	495
<i>Measured and Projected Performance of Plasma Direct Converters,</i> W. L. Barr, R. W. Moir (LLNL)	499
<i>Plasma Control Techniques of the ASDEX Feedback System,</i> F. Schneider (IPP-Garching)	503
<i>RF-Assisted Current Startup in FED,</i> S. K. Borowski (U. Mich.); Y-K. M. Peng (ORNL); T. Kammash (U. Mich.)	507
<i>A Proposed Experimental Study of Fast Ion Driven Electromagnetic Instabilities at Low Thresholds,</i> W. R. Sutton, C. K. Choi, G. H. Miley (U. Illinois)	511
<i>The Poloidal Field Coil System of the Fusion Engineering Device,</i> D. J. Strickler, Y-K. M. Peng (ORNL)	515

SESSION 3A. COIL, MACHINE DESIGN, MANUFACTURING AND INSTALLATION

Tuesday, October 27, 1981

Chairman: J. Williams (MIT)

<i>Status of the Magnet Systems and Highlight of the Main Assembly Problems,</i> E. Salpietro, M. Huguet, J. R. Last, R. Pöhlchen (JET)	519
<i>Engineering Feasibility Challenges For the Magnet Community,</i> D. B. Montgomery (MIT)	523
<i>Transport/Installation of the MFTF Magnet and Magnetic Field Measurements,</i> C. L. Hanson, R. E. Hinkle, D. W. DePue (LLNL)	528
<i>TMX Upgrade Magnet Set Geometry Design,</i> R. L. Wong (LLNL)	531
<i>The Engineering Design and Construction of the S-1 Spheromak Coil Systems,</i> P. J. Heitzenroeder, R. C. Helmich, M. A. Pereira, G. D. Loesser (PPPL)	535
<i>Structural Design Procedures for FED Magnets,</i> R. J. Hooper, B. L. Hunter (ORNL)	539
<i>Design and Construction of the EBT-P Development Coils,</i> J. K. Ballou, T. J. McManamy, R. L. Brown, W. H. Gray, M. S. Lubell (ORNL)	543
<i>The Pool Boiling Superconducting Coils for the Large Coil Task,</i> J. N. Luton, Jr. (ORNL); G. S. Kruse (General Dynamics); C. L. Linkinhoker (GE); S. Shimamoto (JAERI)	547
<i>QA Engineering for the LCP USA Magnet Manufacturers,</i> C. E. Childress, J. E. Batey, P. B. Burn (ORNL)	552

SESSION 3B. INTOR I

Tuesday, October 27, 1981

Chairman: M. Abdou (ANL)

<i>International Tokamak Reactor Conceptual Design Overview,</i> W. M. Stacey, Jr. (Georgia Tech.)	556
<i>Engineering Features of the INTOR Conceptual Design,</i> T. E. Shannon (ORNL)	560
<i>INTOR Physics,</i> J. A. Schmidt (PPPL)	564
<i>Overview of INTOR Nuclear Systems,</i> M. A. Abdou (ANL)	569
<i>Design Review of the INTOR Mechanical Configuration,</i> T. G. Brown (ORNL)	574
<i>Design and Analysis of the INTOR Toroidal Field Coil Structural System,</i> J. A. O'Toole, T. G. Brown (Grumman); T. E. Shannon (ORNL)	578
<i>Magnet Design For INTOR,</i> B. L. Hunter (ORNL)	582
<i>INTOR As An Engineering Test Device,</i> C. A. Trachsel (MDAC); M. Abdou, T. Yule (ANL); G. Deis, P. Hsu, L. Masson, L. Miller, K. Watts (EG&G); E. Opperman (HEDL)	586

SESSION 3C. DATA HANDLING

Tuesday, October 27, 1981

Chairman: D. Drobnis (GA)

<i>System-Wide Data Management for General Atomic's Doublet III Distributed Computer System,</i> A. S. Glad (GA)	587
<i>An Operator-Generated Command Language for Computer Control of Doublet III,</i> D. D. Drobnis, P. I. Petersen (GA)	591
<i>Data Acquisition and Control System for a Thomson Profile Diagnostic on Doublet III,</i> E. J. Heckman Jr., G. Campbell, D. McColl, J. R. Smith, D. Vaslow (GA)	595
<i>An Automatic Data Acquisition and Communications Computer Network for Fusion Experiments,</i> C. O. Kemper (ORNL)	598
<i>Status of Doublet III Data Archival and Retrieval System,</i> G. W. Shephard, S. Karin (GA)	601
<i>A Data Collection System for a Tokamak Fusion Experiment,</i> R. Huckins, D. Roberts, H. Ryan (Nuclear Data)	604
<i>The Diagnostic Timing System for the TMX-Upgrade,</i> H. H. Bell, Jr., G. W. Coutts, A. F. Hinz (LLNL)	608
<i>Data System Design Considerations for a Pseudo-Steady-State Device,</i> W. R. Wing (ORNL)	611
<i>Electron Cyclotron Resonant Heating (ECRH) Diagnostic System on TMX,</i> F. E. Coffield, D. H. Griffin (LLNL)	615

SESSION 3D. SUPERCONDUCTING MAGNET DESIGN AND TESTING

Tuesday, October 27, 1981

Chairman: L. Turner (ANL)

<i>Thermal Expulsion of Helium From a Quenching Cable-In-Conduit Conductor,</i> L. Dresner (JAERI)	618
<i>Pressure Rise In a Quenching Internally Cooled Superconducting Magnet: Protection of the Coil and Refrigeration Components,</i> J. R. Miller, W. Herz, J. W. Lue, S. S. Shen (ORNL)	622
<i>Lorentz Force Induced Strand Motion in a Superconducting Cable,</i> H. Maeda, J. F. Maguire, O. Tsukamoto, N. Tamada, Y. Iwasa (FBNML)	623
<i>Studies on Stability and A. C. Losses of Filamentary Conductors for Fast Ramp Rate Ohmic Heating Coils,</i> T. Ogasawara, Y. Kubota, T. Makiura, R. Akihama, K. Yasukochi (JAERI/Nihon U.)	627
<i>Persistent Resistive Regions and Cryogenic Stability of Composite Conductors: Effect of Cooling Spacers,</i> M. A. Hilal (Michigan Tech.)	631
<i>The Development of Superconducting Poloidal Field Coils for Tokamak Reactors,</i> S. H. Kim (ANL)	635
<i>Bipolar Energy Loss Measurements on Cryostable, Low-Loss Conductors,</i> J. J. Wollan (LANL)	640
<i>Design of a Superconducting 20 MJ Induction Coil,</i> S. K. Singh, A. J. Jarabak, E. A. Ibrahim, J. B. Davis, P. C. Gaberson (W): J. D. Rogers, P. Thullen (LANL); M. S. Walker (Intermagnetics)	644
<i>Engineering, Testing and Manufacturing the General Dynamics Test Coil For the Large Coil Program-An Update,</i> D. S. Hackley, G. S. Kruse, D. L. Walker, R. T. Mulroy, R. E. Bailey, D. R. Nash (General Dynamics)	648
<i>Heated Length Dependence of the Stability of an Internally Cooled Superconductor,</i> J. W. Lue, J. R. Miller (ORNL)	652

SESSION 3E. INERTIAL CONFINEMENT FUSION

Tuesday, October 27, 1981

Chairman: J. Greig (NRL)

<i>Pulsed Power for Inertial Confinement Fusion</i> , T. H. Martin, J. P. VanDevender, D. L. Johnson, E. L. Neau, W. B. Boyer, J. T. Crow, B. N. Turman (SNL)	656
<i>Transport of Light Ion Beams in Plasma Channels</i> , J. N. Olsen (SNL)	660
<i>Preliminary Conceptual Design and Engineering Aspects of a Light Ion Fusion Target Development Facility (TDF)</i> , D. L. Cook (SNL)	664
<i>Low Density Cavity Gas Fireball Dynamics in the Light Ion Beam Target Development Facility</i> , R. R. Peterson, K. J. Lee, G. A. Moses (U. Wisconsin)	668
<i>Engineering Opportunities in Inertial Confinement Fusion</i> , E. W. Sucov (W)	672
<i>High Target Gain to ICF Reactor - A Problem of Repetition</i> , G. A. Moses (U. Wisconsin)	673
<i>Heat-Transfer Limitations on Pellets Used in ICF Reaction Chambers</i> , J. H. Pitts (LLNL)	676
<i>Gas Dynamics and Heat Transfer Phenomena in Liquid Metal ICF Reactor First Surfaces</i> , R. R. Peterson, D. K. Sze, A. M. Hassanein, L. Pong (U. Wisconsin)	680
<i>Development of the RF Linear Accelerator Test Bed For Heavy Ion Fusion</i> , J. M. Watson, HIF Group (ANL)	684

SESSION 3F. PLASMA ENGINEERING

Tuesday, October 27, 1981

Chairman: N. Uckan (ORNL)

<i>Plasma Engineering Analyses of Tokamak Reactor Operating Space</i> , W. A. Houlberg, S. E. Attenberger (ORNL)	688
<i>Projections of Transport Scaling Laws for Small Toroidal Reactors</i> , B. McNamara (LLNL)	692
<i>The Analysis and Design of a Pumped-Limiter Impurity-Control System for EBTR</i> , D. E. Driemeyer, P. B. Stones (MDAC); R. A. Krakowski (LANL)	696
<i>DC Gradient-B Pumping of Tandem-Mirror Thermal Barriers</i> , G. W. Hamilton (LLNL)	700
<i>Plasma Losses From a Magnetic Well</i> , I. I. Kutbi, A. Valfells (Iowa St. U.)	704
<i>Driver Options For Steady-State Tokamak Reactors</i> , D. A. Ehst (ANL)	708
<i>FRTP Prototype Power Reactors With Neutral-Beam Heating and Pellet Injection</i> , Q. T. Fang, J. G. Gilligan, M. Y. Hsiao, G. H. Miley (U. Illinois)	712
<i>Optimal Neutral Beam Heating Scenario For FED</i> , L. M. Hively (GE); W. A. Houlberg, S. E. Attenberger (ORNL)	715
<i>A Physical Sputtering Code For Fusion Applications</i> , D. L. Smith, J. N. Brooks (ANL); D. E. Post, D. B. Heifetz (PPPL)	719

SESSION 4C. INTOR II

Tuesday, October 27, 1981

Chairman: M. Abdou (ANL)

<i>Conceptual Design of the INTOR First Wall System</i> , D. L. Smith, S. Majumdar, R. F. Mattas, L. Turner, J. Jung, M. A. Abdou (ANL); D. Bowers, C. Trachsel (MDAC); B. Merrill (EG&G)	723
<i>U. S. INTOR Divertor Design</i> , R. F. Mattas, M. A. Abdou, J. Brooks, Y. Gohar, B. Misra, D. L. Smith (ANL); G. D. Morgan, D. Bowers, M. Delaney, C. D. Growing (MDAC)	728

<i>Conceptual Design of Tritium Breeding Blanket for INTOR</i> , G. D. Morgan, D. A. Bowers, M. J. Delaney, A. E. Hartman, (MDAC); R. G. Clemmer, M. A. Abdou, P. A. Finn, J. Jung, B. Misra, D. L. Smith (ANL)	732
<i>Neutronics Analysis of Graphite-Moderated Solid Breeder Blanket Designs for INTOR</i> , J. Jung, M. A. Abdou (ANL)	736
<i>INTOR Radiation Shielding for Personnel Access</i> , Y. Gohar, M. Abdou (ANL)	740
<i>Design of a Materials Testing Experiment for the INTOR</i> , M. A. Vogel, E. K. Opperman (HEDL)	744
<i>INTOR Neutral Beam Injector Concept</i> , D. H. Metzler (GE); L. D. Stewart (PPPL)	748
<i>INTOR Power Handling and Conversion</i> , G. Bronner (PPPL); G. E. Gorker (GE); J. G. Murray (PPPL); S. Thomson (Bechtel); H. Vogel (LANL)	752
<i>Superconducting Poloidal Field Coil Studies for INTOR</i> , L. R. Turner, S. H. Kim, R. P. Smith (ANL); B. L. Hunter (ORNL); J. S. Alcorn (GA)	756

SESSION 4P. NEUTRAL BEAM HEATING SYSTEMS

Tuesday, October 27, 1981

Chairman: J. Conrad (U. Wisconsin)

<i>Installation and Start-Up of the PDX Neutral Beam Injection System</i> , M. D. Williams, H. P. Eubank, T. Kozub, H. W. Kugel, J. E. Rossmassler, G. Schilling, A. VonHalle (PPPL)	760
<i>Performance Characteristics of NBSTF, The Prototype Neutral-Beamline for TFTR</i> , K. H. Berkner (LBL); J. H. Feist (IPP-Garching); V. L. Jacobson, A. F. Lietzke, J. W. Roberts R. R. Smith, A. Wekhof, J. E. Willis (LBL)	763
<i>Performance of the ASDEX Neutral Beam Injector</i> , A. Stäbler, O. Vollmer, J. Bäumlner, D. Cooper, W. Ertl, J. H. Feist, K. Freudenberger, J. Kolos, R.-C. Kunze, H. Lohnert, W. Melkus, E. Speth, G. Wulff (IPP-Garching)	767
<i>Preliminary Operating Experience With The Doublet III Neutral Beam Injector System</i> , A. P. Colleraine, J. W. Beal, J. Fasolo, J. H. Kamperschroer, J. Kim, F. S. LeVine, D. B. McColl, T. McMahon, A. Nerem, J. F. Pipkins, R. L. Silagi, J. F. Tooker, J. R. Treglio, J. C. Wesley, J. Williams (GA); K. H. Berkner, J. V. Franck (LBL)	771
<i>Upgrade of Doublet III Neutral Beam Injection to Long Pulse Operation</i> , D. W. Doll, D. B. McColl, J. F. Pipkins (GA)	775
<i>Experience With the Wendelstein VII-A Neutral Injectors</i> , W. Ott, F. P. Penningsfeld, D. Cooper, K. Freudenberger, F. Probst, H. Ringler, E. Speth, R. Suess (IPP-Garching)	779
<i>Highlights of the ZEPHYR Neutral Beam Injection System Conceptual Design</i> , W. S. Cooper, O. A. Anderson, V. P. Elischer, D. A. Goldberg, D. B. Hopkins, V. L. Jacobson, K. H. Lou, J. T. Tanabe (LBL)	783
<i>Beam Trajectories Calculation Code For Ion Source in Neutral Beam Injector</i> , H. Nishimura, T. Sato, S. Isobe (Hitachi)	787
<i>Gas Density Distribution Results for NBSTF</i> , J.-H. Feist (IPP-Garching)	791
<i>Conductance Thermal Accommodation and Beaming From Neutralizer Gas-Cells</i> , J. L. Hemmerich (IPP-Jülich); E. B. Deksnis (Canatom)	795
<i>Beam Induced Pressure Variations in a TFTR Neutral Beam Injector</i> , J. E. Willis, K. H. Berkner (LBL)	798
<i>Development, Fabrication and Tests of the Periplasmatron Ion Sources for ASDEX</i> , J. F. Bonnal, J. Druaux, M. Fois, R. Oberson, D. Tual (EURATOM-CEA)	802
<i>ARC Notching on PDX Neutral Beams</i> , M. Katz, C. Segers (PPPL)	806
<i>Pulsed Cooling Water Systems for Actively Cooled Beam Dumps</i> , J. A. Paterson, M. Fong, S. Moon, P. Purgalis, R. P. Wells (LBL)	807
<i>Damping Elements in the High-Voltage Circuits of the ASDEX Neutral Injectors</i> , R.-C. Kunze, H. Lohnert (IPP-Garching)	811

<i>The Doublet III Neutral Beam Power System</i> , A. Nerem, J. W. Beal, A. P. Colleraine, F. H. Levine, J. F. Pipkins, D. B. Remsen, J. F. Tooker, H. Varga (GA); J. V. Franck (LBL)	815
<i>Magnetic Shielding and Eddy Current Effects Measurements in a Doublet III Neutral Beam Injector</i> , J. Fasolo, J. Kim, J. Pipkins, J. Treglio (GA)	819
<i>Sputtering Erosion Estimates For NBETF Beam Dumps</i> , A. Wekhof, K. H. Berkner (LBL)	823
<i>The Design and Development of an Electronic Crowbar For The Protection of HVDC Neutral Beam Components</i> , D. H. Hesselgrave (Aydin)	826

SESSION 4Q. R. F. PLASMA HEATING SYSTEMS

Tuesday, October 27, 1981

Chairman: G. Schilling (PPPL)

<i>The MFTF-B Electron Cyclotron Resonance Heating System</i> , K. H. Krause, G. G. Pollock, J. J. Yugo (LLNL)	827
<i>ICRF Antenna Design for a 3 MW, 3 s Heating System on the TEXTOR Tokamak</i> , J.-M. Noterdaeme, R. R. Weynants, A. M. Messiaen (Ecole Royale)	831
<i>The R.F. System For Alfvén Wave Heating of the TCA Tokamak</i> , A. Lietti, G. Bugmann, A. D. Cheetham, A. DeChambrier, A. Heym, F. Hofmann, B. Joye, R. Keller, J. B. Lister, A. Pochelon, A. Simik, W. C. Simm, J.-L. Toninato, A. Tuszel (Ecole Polytech.-Swiss)	835
<i>Mechanical Aspects of the Design of a Lower Hybrid Frequency Grill Launcher For the Joint European Torus (J.E.T.)</i> , M. Lipa, G. Melin, G. Rey, G. Tonon (EURATOM-CEA)	839
<i>High Voltage RF Coaxial Vacuum Bushing Design Considerations</i> , N. Greenough, G. Grotz (PPPL)	844
<i>Design of a 9 Inch Stub Tuner for PLT ICRH Operation</i> , A. H. Bohr (PPPL)	848
<i>A 1.2 Megawatt, 800 MHz RF Generator For Lower Hybrid Resonance Heating</i> , F. J. Schnabl, A. R. Martin, W. G. Newman (PPPL)	851
<i>A Beam Waveguide Launcher for High Power ECRH Heating in Large Tandem Mirror Machines</i> , J. B. Beyer, J. E. Scharer, K. Audenaerde (U. Wisconsin)	855
<i>60 GHz Microwave Components for ECH Experiments</i> , C. P. Moeller (GA)	858
<i>FED and STARFIRE ICH Systems</i> , S. Freije (TRW)	859
<i>ICH System Characteristics</i> , S. Freije (TRW)	864

SESSION 4R. CONTROLS

Tuesday, October 27, 1981

Chairman: R. Turnbull (U. Illinois)

<i>Safety Procedures for the MFTF Sustaining Neutral Beam Power Supply</i> , J. H. Wilson (LLNL)	868
<i>Analysis of Optimal Control Theory Applied to Plasma Position and Current Control During Neutral Beam Heating in TFTR</i> , M. A. Firestone (PPPL); M. Rossi, R. Gran (Grumman)	872
<i>Towards a Generalized Computer Control System: A Condensed Analysis</i> , G. Speckert, C. Grant (LLNL); D. Guenther (EG&G)	876
<i>Experience from the Implementation of a Control-and Data Acquisition System for the Tokamak TEXTOR</i> , F. H. Bohn, H. Halling (IPP-Jülich)	880
<i>System Design of ZENKEI, The Central Control System for JT-60</i> , Y. Suzuki, I. Kondo, A. Ogata, T. Kimura (JAERI); T. Hatakeyama, K. Murai, D. Iba (HITACHI)	884
<i>A High Speed Auxiliary Crate Controller For the TMX Heavy Ion Beam Probe</i> , T. L. Letendre (LLNL); G. A. Hallock (RPI)	887
<i>A Device Configuration Management System</i> , D. M. Nowell (LLNL)	890

<i>Debugging in a Multi-Processor Environment</i> , J. M. Spann (LLNL)	894
<i>Programmable Controllers Replace Relays in MFTF-B Personnel Safety Interlocks</i> , J. D. Branum (LLNL).	898
<i>Evaluation of Forced Convection Nucleate Boiling Detection by Acoustic Emission</i> , R. P. Wells, J. A. Paterson (LBL).	901
<i>Design Concept of Real-Time Plasma Control for JT-60</i> , N. Hosogane, R. Yoshino, K. Kurihara, T. Kimura, A. Ogata, I. Yonekawa, H. Aikawa, I. Kondo, Y. Suzuki (JAERI)	904
<i>Optimization of Sequential Control in Operation of Fusion Device</i> , T. Kimura, A. Ogata (JAERI).	908
<i>Development and Operation of PDX Neutral Beam Computer System</i> , T. A. Kozub, J. E. Rossmassler, H. P. Eubank, H. W. Kugel, G. Schilling, A. von Halle, M. D. Williams (PPPL).	912
<i>Experimental Study on Feedback Control System of Plasma Position</i> , M. Abe, M. Otsuka, M. Nishi, T. Kanamori, T. Kobayashi, S. Uchikawa (Hitachi).	916
<i>Design and Development of the Torus Gas Injection Control System for TFTR</i> , W. A. Rauch (PPPL).	920
<i>Control and Data Acquisition Systems for the S-1 Spheromak</i> , R. D. Woolley (PPPL)	924
<i>PDX Operating Controls</i> , P. Máthé, R. Robertson, R. Woolley (PPPL).	928
<i>TFTR Diagnostic Vacuum Controller</i> , D. Olsen, R. Persons (PPPL)	932
<i>PDX Diagnostic Control System</i> , R. Mika (PPPL).	936
<i>A Very High Level Neutral Beam Control System</i> , V. Elischer, V. Jacobson, E. Theil (LBL).	941
<i>The Control of a High-Power Neutral Beam Generator by Means of ARC-Current Regulation</i> , A. F. Lietzke, G. J. deVries (LBL)	945
<i>Local Controls and Instrumentation for MFTF</i> , R. L. Peterson (LLNL)	949
<i>Prospects of Energy Transformation Between Fusion Reactor and OTEC Plant</i> , K. Denno (NJ Tech.).	950
<i>Software Requirements of the Central Control System Computer for the TEXT Tokamak</i> , D. R. Terry, T. E. Dietz, A. B. Macmahon, H. S. Hutchins (U. Texas).	954

SESSION 4S. INSTRUMENTATION

Tuesday, October 27, 1981

Chairman: R. Turnbull (U. Illinois)

<i>Optically Insulated Power Supply for High Voltage Instruments</i> , A. Nudelman, D. L. Ashcroft (PPPL).	958
<i>Hardening of Instruments for Fusion Reactors</i> , J. F. Baur, P. H. Miller, Jr. (GA)	960
<i>Microwave Interferometer for Plasma Density Measurement on TMX Upgrade</i> , F. E. Coffield, R. D. Stever, N. P. Lund (LLNL).	961
<i>A Display Management System for MFTF</i> , D. O. Nelson (LLNL).	965
<i>Digitally Controlled Twelve-Pulse Firing Generator</i> , D. Berde, A. A. Ferrara (Grumman).	969
<i>Instrumentation System for Long Pulse MFTF Neutral Beams</i> , D. M. Risch (LLNL)	973
<i>A Versatile Timing System for MFTF</i> , N. H. C. Lau (LLNL).	977
<i>Results of Studies of Fiber Optic Links for MFTF</i> , N. H. C. Lau (LLNL).	981
<i>Shot Synchronization for the Mirror Fusion Test Facility</i> , R. Aley (EG&G)	985
<i>A CAMAC-Based Interlock System for Power Supply Hardware Protection on MFTF</i> , M. S. Strauch (LLNL).	989
<i>Low Noise, High Impedance, DC Coupled Auto Zeroing Amplifier for TFTR</i> , R. J. Marsala (PPPL).	993
<i>TFTR Structural Instrumentation</i> , G. M. Brown (PPPL).	997
<i>A Small CAMAC-Based Data Acquisition System</i> , G. M. Brown (PPPL).	1000
<i>Neutral-Beam Plasma Source Metal-Arc Protection Circuit</i> , G. J. deVries, D. B. Hopkins, A. F. Lietzke, H. M. Owren (LBL).	1003

SESSION 4T. DATA HANDLING

Tuesday, October 27, 1981

Chairman: V. Elisher (LBL)

<i>An Overview of the Data Acquisition System (Including Shielding, Isolation, and Grounding) on the Beta II Field-Reversed Plasma Gun Experiment, H. H. Bell, Jr. (LLNL)</i>	1007
<i>Expansion and Redundancy of the Doublet III Data Acquisition Computer System, B. B. McHarg, Jr. (GA)</i>	1011
<i>Data Acquisition System of TFR Tokamak Experiment, J. Breton, A. Cohen, F. Hennion, J. Idmtal, J. Touche (EURATOM-CEA)</i>	1015
<i>High Speed Digital Data Acquisition System on ALCATOR, P. D. Besen, P. D. Grearson (MIT)</i>	1018
<i>Low Level Signal Data Acquisition for the MFTF Superconducting Magnet System, C. R. Montoya (LLNL)</i>	1022
<i>A Method For Transmitting Analog Data Over a Fiber-Optic Link, G. R. Dyer (ORNL)</i>	1026
<i>Wide Band Fiber Optic Analog Data Link, G. Cutsogeorge (PPPL)</i>	1030
<i>CAMAC Timing and Sequencing Module, J. E. Lawson (PPPL)</i>	1034
<i>CAMAC Analog Signal Conditioning Module, G. G. Pearson (PPPL)</i>	1038
<i>Cable Information Retrieval Program, H. Murray, L. F. Calaby, J. E. Davis (PPPL)</i>	1040
<i>Software System for the Doppler Ion Diagnostic on Doublet III Using a TRACOR Northern 1710-31 and an LSI-11/2, P. Henline, J. Lohr (GA)</i>	1044
<i>Data Processing System for JT-60, A. Ogata, R. Toyokawa, T. Nishitani, T. Kumahara, S. Tahira, T. Kambe, (JAERI); O. Mochizuki, N. Tahara (Fujitsu); A. Fujioka, M. Fujita (Fujifacom)</i>	1047

SESSION 4U. DIAGNOSTICS

Tuesday, October 27, 1981

Chairman: V. Elisher (LBL)

<i>Fuel Density-Radius Diagnostic For Inertial Confinement Fusion Experiments, T. E. Blue, J. S. Durham, J. J. Reyes, B. W. Wehring (U. Illinois); J. W. Blue (NASA Lewis)</i>	1051
<i>Fusion-Product Energy-Loss Measurements from Laser-Imploded Micro-Balloons, G. H. Miley, C. K. Choi, T. E. Blue, A. H. Bennis, S. V. Coggeshall, D. B. Harris (U. Illinois)</i>	1055
<i>A Passive Non-Perturbing Diagnostic for Fuel Mixture Ratio and Power Density in DT Fusion Reactors, J. R. Roth, J. E. Doss, J. R. Haines, J. A. Moore, W. R. O'Neil, R. A. Richardson, P. T. Spampinato, V. C. Srivastava (U. Tenn.)</i>	1058
<i>A Real Time Two Wavelength Interferometer System, S. T. Lee, D. R. Baker (GA)</i>	1059
<i>Electrical Design of a Multi-Channel Far Infrared Interferometer For TFTR, H. Anderson, L. C. Johnson, D. K. Mansfield (PPPL)</i>	1063
<i>MIRI - A Multichannel Far Infra-Red Interferometer For TFTR, V. S. Foote (PPPL)</i>	1067
<i>Infrared Monitoring of the Doublet III Neutral Beam Armor Plate, T. McMahon, J. Kamperschroer, A. Colleraine, J. Kim, D. McColl, J. Tooker, J. Treglio (GA)</i>	1071
<i>Neutral-Beam Aiming and Calorimetry For MFTF-B, A. I. Goldner, D. Margolies (LLNL)</i>	1074
<i>A CAMAC Module For Waterflow Calorimetry, V. Jacobson, J. Fiddler, J. Greer (LBL)</i>	1078
<i>Mechanical Design of Epithermal Neutron Diagnostic for TFTR, R. C. Groo (PPPL)</i>	1082
<i>The Effect of High Energy Neutrons on a Microchannel Plate Detector, R. Persing, S. S. Medley (PPPL)</i>	1086
