

CONTENTS

Proceedings of the IAEA Technical Committee Meeting on

Fast Wave Current Drive in Reactor Scale Tokamaks (Synergy and Complementarity with LHCD and ECRH)

ARLES (FRANCE) September 23 - 24 - 25, 1991

	Page
<i>Préface, D. Moreau, A. Bécoulet, Y. Peysson</i>	iii
1. RF CURRENT DRIVE THEORY AND MODELLING	1
1.1 RF Current Drive Theory	
Lower Hybrid and Fast Alfvén Wave Current Drive : Status of Theory (<i>invited paper</i>), <i>A. Bers and A.K. Ram</i>	2
Damping Mechanisms in the Frequency Domain of Fast Waves, <i>R. Koch and D. Van Eester</i>	36
An Analysis of Trapped Particle Effects on Fast Wave Current Profiles, <i>T. Hellsten and L.G. Eriksson</i>	48
1.2 Full Wave Modelling	61
Analysis of Fast Wave Current Drive from the ALCYON Code (<i>invited paper</i>), <i>A. Bécoulet, D. Moreau, G. Giruzzi and B. Saoutic</i>	62
Full-Wave/Fokker-Planck Analysis of Fast Wave Current Drive, <i>G. Giruzzi, A. Bécoulet, D. Moreau and B. Saoutic</i>	76
Full Wave Calculation of Fast Wave Current Drive in Tokamaks including k_{\parallel} Variations, <i>E.F. Jaeger and D.B. Batchelor</i>	86
Calculation of Fast Wave Current Drive Efficiencies and Profiles with a Global Wave Code, <i>L.G. Eriksson and T. Hellsten</i>	98

Contents

	Page
1.3 Ray-Tracing/Fokker-Planck Calculations	109
Fast Wave Current Drive Efficiency Calculations for JET A2-Antennas, <i>V. Bhatnagar, J. Jacquinet and D.F.H. Start</i>	110
3D Calculations of LHCD/FWCD Synergism Including Radial Transport Effects, <i>M. Cox, M.R. O'Brien and C.D. Warrick</i>	122
3D Fokker-Planck Calculation of Combined Fast Wave/Lower Hybrid and Electron Cyclotron Current Drive in a Tokamaks, <i>R.W. Harvey, S.C. Chiu, M.G. McCoy, G.D. Kerbel, G.R. Smith and T.K. Mau</i>	134
Fokker-Planck Formulation for RF Current Drive Including Wave Driven Radial Transport, <i>K. Kupfer</i>	148
1.4 Helicity Injection and Ponderomotive Effets	165
Helicity Injection and Fast Wave Current Drive in Tokamaks (<i>invited paper</i>), <i>J.A. Tataronis and P.E. Moroz</i>	166
Plasma Nonlocality Effects on Ion-Cyclotron Absorption and Current Generation by Fast Waves, <i>A.G. Elfimov, F.M. Nekrasov, M.V. Dmitrieva, I.F. Potapenko</i>	182
On Nonlinear Changes of the Reflection Coefficient of the Fast Wave at Lower Hybrid Frequencies due to Ponderomotive Forces, <i>V. Petrzilka</i>	190
1.5 Alternative RF Current Drive Schemes	199
High-Efficiency Toroidal Current Drive Using Low-Phase-Velocity Kinetic Alfvén Waves, <i>S. Puri</i>	200
Combined Lower-Hybrid Current Drive and Ion Bernstein Heating for PBX - A Simulation with the TSC Code, <i>M. Shoucri, I. Shkarofski, S. Jardin, R. Harvey, M. McCoy</i>	212
2. PRESENT EXPERIMENTS	225
Fast Wave Heating and Current Drive on JET : Present Results and Future Plans (<i>invited paper</i>), <i>D.F.H. Start, V.P. Bhatnagar, G. Bosia, M. Brusati, M. Bures, D. Campbell, C. Challis, G.A. Cottrell, M. Cox, A. Edwards, L.G. Eriksson, P. Froissard, C. Gormezano, C. Gowers, S. Hugonard, J. Jacquinet, P. Kupschus, N. Gottardi, M.R. O'Brien, D. Pasini, F. Porcelli, E. Righi, F. Rimini, G. Sadler, D. Stork, A. Tanga, K. Thomsen, F. Tibone, B. Tubbing, and M. Von Hellermann</i>	226
Synergistic Effects between Lower Hybrid and Fast Magnetosonic Waves in JET, <i>C. Gormezano, M. Brusati, A. Ekedahl, P. Froissard, J. Jacquinet, F. Rimini</i>	244
Studies on Fast Wave Current Drive in the JAERI Tokamaks (<i>invited paper</i>), <i>H. Kimura, T. Yamamoto, T. Fujii, H. Kawashima, H. Tamai, M. Saigusa, T. Imai, K. Hamamatsu and A. Fukuyama</i>	260

Contents

	Page
Fast Wave Electron Heating and Current Drive Experiment on JFT-2M, <i>Y. Uesugi, T. Yamamoto and H. Kawashima</i>	278
Optimization of Phased Four-Loop Antenna for Fast Wave Current Drive in JFT-2M, <i>H. Kawashima, T. Yamamoto, C.C. Petty, Y. Uesugi, M. Saigusa, H. Kazumi and K. Yoshioka</i>	286
A Study of Wave-Particle Interactions in Fast and Slow Waves on JIPP T-II U, <i>T. Watari</i>	298
Initial Fast Wave Heating and Current Drive Experiments on DIII-D Tokamak (<i>invited paper</i>), <i>R. Prater, M. J. Mayberry, C.C. Petty, R.I. Pinsker, M. Porkolab, S.C. Chiu, R. W. Harvey, T.C. Luce, P. Bonoli, F.W. Baity, R.H. Goulding, D.J. Hoffman, R.A. James, H. Kawashima, A. Bécoulet, D. Moreau, and V. Trukhin</i>	308
Synergy between Neutral Beam Current Drive and ICRH in TEXTOR, <i>A. Messiaen, D. Van Eester, R. Koch, J. Ongena, G. Van Wassenhove, R.R. Weynants, H. Conrads, T. Delvigne, F. Durodié, H. Euringer, M. Gaigneaux, B. Giesen, M. Jadoul, D. Lebeau, R. Leners, M. Lochter, M. Sauer, G. Telesca, R. Uhlemann, P.E. Vandenplas, R. Van Nieuwenhove, G. Van Oost, G. Waidmann</i>	334
Alfvén Method Studies for Plasma Heating and Noninductive Current Sustainment in Toroidal Systems - Research Programme for the TMR Tokamak, <i>A.G. Elfimov, L.F. Ruchko</i>	354
Lower Hybrid Experiments on Current Profile Control on Asdex, <i>F.X. Söldner, R. Bartiromo, S. Bernabei, R.W. Harvey, F. Leuterer, K. McCormick</i>	368
3. REACTOR APPLICATIONS	383
Bootstrap and Fast Wave Current Drive for Tokamak Reactors (<i>invited paper</i>), <i>D.A. Ehst</i>	384
Heating and Current Drive Scenarios for the Next-Step Device (<i>invited paper</i>), <i>J.G. Wegrowe, V. Parail</i>	402
Analysis of Fast Wave Current Drive for ITER, <i>H. Kimura, T. Nakazato, A. Fukuyama</i>	432
Fast Wave Employment for Current Drive in ITER, <i>V.E. Dyakov, A.V. Longinov</i>	445
Design and Matching Problems Associated with Fast-Wave Current Drive Antennas (<i>invited paper</i>), <i>D.J. Hoffman, R.H. Goulding, P.M. Ryan, D.B. Batchelor, E.F. Jaeger, F.W. Baity, M.J. Mayberry, R.I. Pinsker, R. Prater, C.C. Petty</i>	456
Phased Antenna Arrays for Fast Wave Power Generation, <i>G. Bosia, J. Jacquinot</i>	471
List of participants	497
Author index	499
