

## CONTENTS

### ADVANCED FUEL

A Comparative Study of Various Advanced Fusions (IAEA-TC-392/35) .....	3
<i>H. Momota, Y. Tomita, Y. Nomura</i>	
Advanced Fuel Concepts and Applications (IAEA-TC-392/36) .....	15
<i>G.H. Miley</i>	
The Satyr Study of d-d Cycle Tandem Mirror Reactors (IAEA-TC-392/37) .....	29
<i>R.W. Conn, N.M. Ghoniem, D. Goebel, S.P. Grotz, F. Kantrowitz, N.S. Kim, T.K. Mau, G.W. Shuy, A.E. Walstead, M.Z. Youssef</i>	
p- <sup>11</sup> B Multipole Evaluation (IAEA-TC-392/38) .....	47
<i>J.D. Gordon, T.K. Samec, B.I. Hauss, S.A. Freije, I.N. Sviatoslavsky, D.K. Sze, R. Sanders, L.T. Pong, R.W. Conn, G. Shuy, R.N. Cherdack, J. Wysocki, J. Celnik</i>	

### BLANKET DESIGN, NEUTRONICS AND TEST PROGRAMME

Integral Experiments on Lithium Oxide Spherical Assembly with Graphite Reflector and on Duct Streaming (IAEA-TC-392/39) .....	65
<i>T. Nakamura, H. Maekawa, S. Tanaka, Y. Seki, Y. Ikeda, Y. Oyama, T. Iguchi</i>	
Neutronics Design of the Next Tokamak (Swimming Pool Type) (IAEA-TC-392/40) .....	79
<i>Y. Seki, H. Iida, H. Kawasaki, K. Kitamura, A. Minato, H. Nishida, S. Mori, K. Sako</i>	
Blanket and Vacuum Vessel Design of the Next Tokamak (Swimming Pool Type) (IAEA-TC-392/41) .....	95
<i>H. Iida, A. Minato, K. Kitamura, Y. Seki, N. Hamano, K. Sako, Y. Tanaka, T. Kobayashi, S. Mori, T. Kuroda, S. Yamazaki</i>	
First Wall and Blanket Engineering Development for Magnetic Fusion Reactors (IAEA-TC-392/43) .....	115
<i>C. Baker, H. Herman, V. Maroni, L. Turner, R. Clemmer, P. Finn, C. Johnson, M. Abdou</i>	
Progress in Engineering Simulation Testing of Fusion Reactor First Wall Components (IAEA-TC-392/44) .....	137
<i>T.C. Varljen, J.W.H. Chi, H. Herman</i>	

Cyclic Thermal Stresses in Fusion Reactors (IAEA-TC-392/45) .....	149
<i>I.O. Bohachevsky, R.N. Kostoff</i>	
Blanket Design Study of Tokamak Reactor (IAEA-TC-392/46) .....	161
<i>Y. Tanaka, Y. Nakai, T. Kobayashi, T. Aota, T. Suzuki, H. Iida, T. Hiraoka, K. Sako</i>	
Neutronics in ICF Reactor "SENRI-I" (IAEA-TC-392/47) .....	175
<i>S. Nakai, S. Ido, H. Oomura, C. Yamanaka</i>	

## TRITIUM SYSTEM AND REMOTE MAINTENANCE

Remote Maintenance of Tokamak Reactor with Double Null Poloidal Divertor (IAEA-TC-392/48) .....	193
<i>T. Iwamoto, S. Ando, T. Kasahara, R. Saitoh, S. Itoh, H. Satoh, Y. Imura, K. Sako, H. Iida</i>	
Remote Maintenance Considerations for Swimming Pool Tokamak Reactor (IAEA-TC-392/49) .....	207
<i>S. Niikura, M. Yamada, M. Kasai, R. Saitoh, H. Tomita, T. Ohmichi, T. Yamanaka, Y. Imamura, K. Sako, H. Iida</i>	
Reactor Structure and Remote Maintenance of Tokamak Reactor with Single Null Poloidal Divertor (IAEA-TC-392/50) .....	225
<i>Y. Sawada, T. Uchida, N. Miki, T. Honda, T. Munakata, K. Sako, T. Hiraoka, N. Fujisawa, Y. Seki, H. Iida</i>	
Engineering Aspects in the Design of Experimental Power Tokamak Reactors (IAEA-TC-392/51) .....	241
<i>G. Casini</i>	
Present Status of Tritium Research Activities at Universities in Japan (IAEA-TC-392/52) .....	259
<i>K. Kawamura</i>	
INTOR Fuel Cycle System (IAEA-TC-392/53) .....	265
<i>D. Leger</i>	
Tritium System Design for the Next Tokamak (IAEA-TC-392/54) .....	277
<i>Y. Naruse, Y. Matsuda, H. Yoshida, M. Kinoshita, S. Hirata, S. Konishi</i>	

## SUPERCONDUCTING MAGNETS

Superconducting Magnet Design for the Next Tokamak and the Status of the Research and Development (IAEA-TC-392/55) .....	291
<i>S. Shimamoto, H. Tsuji, K. Yasukochi</i>	

Design Constraints on Magnet Systems of Future Tokamaks Based on Experiences of Present S.C. Magnet Development (IAEA-TC-392/56) ....	303
<i>W. Heinz, U. Jeske, P. Komarek, H. Krauth</i>	

## MATERIALS

Status of Lithium Oxide Blanket Material Research (IAEA-TC-392/57) .....	319
<i>H. Watanabe, H. Kudo</i>	
Problems of Tritium Extraction from Solid Blankets (IAEA-TC-392/58) ....	333
<i>E. Roth</i>	
Materials Data Base as an Interface Between Fusion Reactor Designs and Materials Development (IAEA-TC-392/59) .....	341
<i>S. Ishino, S. Iwata</i>	
Fusion Materials: Adapting to Realistic Reactor Environments (IAEA-TC-392/60) .....	353
<i>G.L. Kulcinski</i>	
Critical Plasma-Materials Issues for Fusion Reactor Designs (IAEA-TC-392/61) .....	377
<i>K.L. Wilson, W. Bauer</i>	
Assessment of Ferritic Steels for Steady-State Fusion Reactors (IAEA-TC-392/62) .....	389
<i>N.M. Ghoniem, R.W. Conn</i>	
Characterization of Various TiC Coatings as Low-Z Materials (IAEA-TC-392/63) .....	403
<i>M. Okada, M. Fukutomi, M. Kitajima, H. Shinno, T. Shikama, M. Fujitsuka</i>	

## SAFETY AND ENVIRONMENTAL

Safety Considerations in Fusion Reactor Design (IAEA-TC-392/64) .....	413
<i>J.G. Crocker</i>	
Environmental Implications of Reacting Plasma Experiment at IPP Nagoya (IAEA-TC-392/65) .....	429
<i>A. Miyahara, H. Amano, T. Hyodo, J. Kodaira, H. Obayashi, S. Tanahashi</i>	
Plasma Control of the Next Tokamak (IAEA-TC-392/66) .....	441
<i>N. Fujisawa, M. Sugihara, K. Ueda, A. Hatayama, S. Saito, T. Hiraoka</i>	

Plasma Design Considerations of the Next Tokamak (IAEA-TC-392/67) ....	457
<i>M. Sugihara, N. Fujisawa, K. Ueda, S. Saito, A. Hatayama,</i>	
<i>R. Shimada</i>	
Secretariat .....	473
List of Participants .....	475
