

CONTENTS

SPECIAL ISSUE on Nuclear Power Development— The Next Decade

INTRODUCTION	97	Fusion Power Development—The Next Decade <i>Stephen O. Dean</i>
PANEL DISCUSSIONS	101	Progress and Directions in Magnetic Fusion <i>Harold P. Furth, T. Kenneth Fowler, and Harry Dreicer</i>
	115	Progress and Directions in Inertial Fusion <i>Richard L. Schriever, John L. Emmett, Robert L. McCrory, Damon Giovanielli, Stephen Bodner, and Gerold Yonas</i>
PRESENTATIONS	129	U.S. Fusion Technology Programs <i>Robert Dowling</i>
	133	Critical Issues and Required Facilities <i>Mohamed Abdou</i>
	139	Fusion Blankets—A Comparative Study <i>Charles C. Baker</i>
	145	Fusion Materials: The U.S. Program <i>Gregory M. Haas</i>
PANEL DISCUSSION	149	Nuclear Technologies—Their Role and Future Impact <i>James A. Maniscalco and Charles C. Baker</i>
PRESENTATION	155	Tritium Systems: Issues and Answers <i>James L. Anderson</i>
PANEL DISCUSSION	161	Fusion Reactors: Their Commercial Potential <i>Philip Stone, Michael Monsler, B. Grant Logan, Betty K. Jensen, and Daniel R. Cohn</i>
PRESENTATIONS	171	What Have Fusion Reactor Studies Done for You Today? <i>G. L. Kulcinski</i>
	181	Economic Potential of Inertial Fusion <i>John H. Nuckolls</i>

	187	Generic Magnetic Fusion Reactor Cost Assessment <i>John Sheffield</i>
	199	Planning for the Future <i>John F. Clarke</i>
PANEL DISCUSSIONS	209	The Role of Industry in Fusion <i>Harold K. Forsen, T. Kenneth Fowler, James A. Maniscalco, Leonard F. C. Reichle, and Roger J. Gould</i>
	217	The Role of Tokamak Ignition Device Options <i>N. Anne Davies, Paul Rutherford, Daniel R. Cohn, and Carl D. Henning</i>
	225	The Role of Improved Fusion Concepts <i>David B. Nelson, Rulon K. Linford, Chuan S. Liu, B. Grant Logan, Peter H. Rose, and John Sheffield</i>
	235	Technology Research and Development <i>Gregory M. Haas, Charles C. Baker, Mohamed Abdou, and Raymond F. Beuligmann</i>
