

## CONTENTS

### V O L U M E I

#### Opening Addresses

R. Theenhaus, Board of Directors, Kernforschungsanlage Jülich GmbH.	1
J. Darvas, Head of Technology, Division of the Fusion Program of the Commission of the European Communities	5
H. Conrads, Chairman of the Conference	7

#### Invited Lectures

Perspectives of nuclear fusion and spallation sources for breeding fissile fuel S.O. Schriber Atomic Energy of Canada Limited, Chalk River, Canada	13
Effects of pulsed loads on supply networks K.-B. Nevries Rheinisch-Westfälisches Elektrizitätswerk AG, Essen, F.R. of Germany	25
INTOR impurity control and first wall system M.A. Abdou Argonne National Laboratory, Argonne, U.S.A.	39
Key issues for remote inspection and repair of a Tokamak D. Hagmann and J. White Remote Technology Corporation, Oak Ridge, U.S.A.	57
What are we learning from INTOR ? Features of the test programme P. Schiller Commission of the European Communities, Ispra, Italy	69
The industry's role and experience in fusion S. Terasawa Hitachi, Ltd., Tokyo, Japan	75
The first wall in JET - status and perspectives P.H. Rebut and K.J. Dietz JET Joint Undertaking, Abingdon, U.K.	85

Electron-cyclotron heating in toroidal plasmas G.S. Nusinovich et al Academy of Sciences of the USSR, Gorky, USSR	101
Materials and design solutions for breeding tritium in INTOR G. Casini Commission of the European Communities, Ispra, Italy	115
Large D <sup>-</sup> ion source for energetic neutral beam C. Jacquot Centre d'Etudes Nucléaires, Grenoble, France	125
Large scale commercial facility for production of elemental tritium J.W. Richman et al Canadian Fusion Fuel Technology Project, Toronto, Canada	135

#### Oral Presentations

Energy accounting for heavy ion ICF reactor N. Kobayashi et al Toshiba Corporation, Tokyo, Japan	145
The FTU project The FTU Design Team Centro Ricerche Energia Frascati, Frascati, Italy	151
The advanced stellarator Wendelstein VII-AS J. Sapper et al Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	161
Design and fabrication of the superconducting magnet system for the mirror fusion test facility (MFTF-B) R.E. Tatro et al General Dynamics Convair Division, San Diego, U.S.A.	167
Heavy ion beams for inertial confinement fusion : the HIBALL scenario D. Böhne Gesellschaft für Schwerionenforschung, Darmstadt, F.R. of Germany	175
The design of the ELM0 Bumpy Torus proof-of-principle device J.C. Glowienka Oak Ridge National Laboratory, Oak Ridge, U.S.A.	181

ASDEX upgrade - A Tokamak experiment with a reactor-compatible poloidal divertor ASDEX Upgrade Design Team and Tokamak Theory Group Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	187
A proposed RF-technology R&D plan for the United States W.R. Becraft et al General Electric Company, Oak Ridge, U.S.A.	193
Extraction of 75 KEV, 70 A, 10 SEC ion beam at the prototype injector unit for JT-60 S. Matsuda et al Japan Atomic Energy Research Institute, Ibaraki-ken, Japan	199
T-15 installation. The main characteristics. Electromagnetic system B. Kadomtsev et al I.V. Kurchatov Institute of Atomic Energy, Moscow, USSR	207

## Poster Presentations

### First Wall and Vacuum Systems

- In-situ coating of titanium carbide 221  
T. Abe et al  
Japan Atomic Energy Research Institute, Ibaraki-ken,  
Japan
- Mechanical calculations for torus supra vacuum vessels - 227  
Tests of models  
M. D'Alençon et al  
Centre d'Etudes Nucléaires, Fontenay-aux-Roses, France
- Manufacture, testing and assembly preparation of the 235  
JET vacuum vessel  
J. Arbez et al  
JET Joint Undertaking, Abingdon, U.K.
- Torus-supra : design of thermal radiation shield at 243  
80 K  
R. Aymar et al  
Centre d'Etudes Nucléaires, Fontenay-aux-Roses, France
- High current vacuum bushing for Liner-heating of 249  
TEXTOR  
B. Bloemer et al  
Technische Universität, Braunschweig, F.R. of Germany
- The ignitor plasma chamber 255  
G. Bonizzoni  
Istituto di Fisica del Plasma, Milano, Italy
- Heating and cooling system for the vacuum vessel 261  
of TEXTOR using an organic heat transfer fluid  
D.A. Butzek et al  
Kernforschungsanlage Jülich, Jülich, F.R. of Germany
- Preliminary analysis of the vacuum vessel and short- 267  
time-constant copper shell of the FTU device  
A. Cecchini et al  
Centro Ricerche Energia Frascati, Frascati, Italy
- The dimensional survey of vacuum vessel sectors 273  
R.S. Challender  
Risley Nuclear Power Development Establishment,  
Warrington, U.K.
- Comparison of three options for fast pumping of the 277  
Tokamak de Varennes  
E.B. Deksnis and B. Terreault  
Canatom Inc., Montréal, Canada and INRS-Energie,  
Varennes, Canada

Turbomolecular pumps for use on plasma fusion experiments D.G. Götz Leybold-Heraeus, Köln, F.R. of Germany	285
Pre-operational testing of TFTR systems S. Goldfarb and C.O. Ward Princeton University, Princeton, U.S.A.	291
Control of CO and O <sub>2</sub> impurities in hydrogen by metal gettering H. Heimbach et al Kernforschungsanlage Jülich, Jülich, F.R. of Germany	297
The JET gas baking and cooling plant J.L. Hemmerich et al JET Joint Undertaking, Abingdon, U.K.	303
Electromagnetic forces and mechanical stresses in the vacuum vessel for ASDEX upgrade O. Jandl et al Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	309
Tests of a cooling and heating system model for JT-60 vacuum vessel S. Kajiura et al Hitachi Works, Ibaraki-ken, Japan	315
Development of hard-seal gate valve and fast shutter for JT-60 neutral beam injectors S. Kuribayashi et al Mitsubishi Heavy Industries, Tokyo, Japan	321
Dynamic analysis of the vacuum vessel of ignitor experiment A. De Luca and G. Rubinacci Università di Napoli, Napoli, Italy	327
Electrical, thermal and mechanical aspects in the design of the RFX vacuum vessel C. Majorana et al Università di Padova, Padova, Italy	333
Eddy current analysis in JT-60 Y. Nakamura and T. Ozeki Japan Atomic Energy Research Institute, Ibaraki-ken, Japan	339
ECR discharge cleaning of torus devices Y. Sakamoto et al The Institute of Physical and Chemical Research, Sitama, Japan	347

High capacity cryopump system for a neutral beam test-bed Z. Sledziewski Centre d'Etudes Nucléaires, Fontenay-aux-Roses, France	353
Evaluation of fatigue strength of the JT-60 vacuum vessel based on the dynamic response analysis under the electromagnetic force H. Takatsu et al Japan Atomic Energy Research Institute, Ibaraki-ken, Japan	357
Calculation of the hydrogen recycling from the TEXTOR first wall at various temperatures and under the influence of a thermal plasma load P. Wienhold et al Kernforschungsanlage Jülich, Jülich, F.R. of Germany	363
The TEXTOR RG-discharge cleaning system J. Winter et al Kernforschungsanlage Jülich, Jülich, F.R. of Germany	369
<u>Supplies</u>	
200 kW gyrotron power supply and protection system for the electron cyclotron resonant heating experiment on thor, CNR, Milano R. Andreani et al Centro Ricerche Energia Frascati, Frascati, Italy	377
A 5 MW, 1kHz thyristor chopper for plasma equilibrium on TFR 600 J.M. Bottereau Centre d'Etudes Nucléaires, Fontenay-aux-Roses, France	383
The mains harmonic filter of TEXTOR K. Bouwknecht Holec, Hengelo, The Netherlands	387
The power supply and protection system for the extraction grid of the JET neutral injectors H. Aslin et al RPC Industries, Hayward, U.S.A.	391
The FTU power supply system : a preliminary design A. Coletti et al Centro Ricerche Energia Frascati, Frascati, Italy	399
Evaluation of the performance of thyristor-controlled pulsed power supplies for TEXTOR J.S. Bekink and B. Giesen Holec, Hengelo, The Netherlands and Kernforschungsanlage Jülich, Jülich, F.R. of Germany	405

Power supply characteristics and operating scenarios for the Varennes Tokamak G. Harbec et al IREQ, Varennes, Canada	411
High voltage control and protection system for the Culham Multi-Megawatt Beam Line J.B. Hicks et al Culham Laboratory, Abingdon, U.K.	419
Design, construction and tests of the power crowbar and predischage circuit of the SPICA II experiment A.M. van Ingen et al FOM-Instituut voor Plasmafysica, Nieuwegein, The Netherlands	425
The design study of high voltage plasma focus for $10^{20}$ fluence neutron source by using a water capacitor bank T.S. Kobata et al University of Tokyo, Tokyo, Japan	431
A proposed alternative for protecting ion sources of neutral injectors against damage from high voltage sparking P.H. Kupschus et al Kernforschungsanlage Jülich, Jülich, F.R. of Germany	439
A high-bandwidth, high-voltage divider for neutral injectors P. Kupschus et al Kernforschungsanlage Jülich, Jülich, F.R. of Germany	447
The effect of capacitive stored energy on neutral beam accelerator performance H.M. Owren et al Lawrence Berkeley Laboratory, Berkeley, U.S.A.	455
A preliminary study on feeding power and energy to the poloidal field power supply for a Tokamak reactor R. Shimada et al Japan Atomic Energy Research Institute, Ibaraki-ken, Japan	461
Study of Ohmic Heating (OH) power supply system using DC thyristor circuit breaker K. Tani et al Japan Atomic Energy Research Institute, Ibaraki-ken, Japan	467
The TFTR Neutral Beam Power System R.A. Winje Princeton University, Princeton, U.S.A.	475

Development of thyristor phase control system with  $\cos^{-1}$  characteristics 481  
K. Yabuno et al  
Hitachi Research Laboratory, Ibaraki-ken, Japan

### Divertor Technology

Experimental tests concerning the use of the tungsten-copper couple design concept on the divertor system 491  
F. Brossa et al  
Commission of the European Communities, Ispra, Italy

Advanced limiter test (ALT-I) in the TEXTOR Tokamak - Concept and experimental design 497  
R.W. Conn et al  
University of California, Los Angeles, U.S.A.

A coil system to perturb the magnetic surfaces at the Tokamak boundary 505  
P. Dierks et al  
Kernforschungsanlage Jülich, Jülich, F.R. of Germany

Graphite limiter and armor damage in Doublet III 511  
T. McKelvey et al  
General Atomic Company, San Diego, U.S.A.

The cooling of the divertor collector plates in the international Tokamak reactor 519  
A. van Melle  
TNO, Apeldoorn, The Netherlands

### Tritium Handling

The development of tritium technology at the tritium systems test assembly 527  
J.L. Anderson and J.R. Bartlit  
Los Alamos National Laboratory, Los Alamos, U.S.A.

Hydrogen isotope separation using palladium alloy membranes 537  
R.A. Bond et al  
Culham Laboratory, Abingdon, U.K.

The diffusivity of tritium in the system  $\text{Li}_2\text{O}-\text{Al}_2\text{O}_3$  543  
D. Brüning et al  
Kernforschungsanlage Jülich, Jülich, F.R. of Germany

A pilot plant for the recovery and separation of tritium from the spent fuel of fusion experiments 549  
H. Frischmuth et al  
Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany

Thermal release of tritium from neutron irradiated glass M. Miyake et al Osaka University, Osaka, Japan	555
Design and performance of a thermal diffusion column for separation of the hydrogen isotopes A. Neubert et al Kernforschungsanlage Jülich, Jülich, F.R. of Germany	561
Tritium and deuterium permeation through the first wall of a fusion reactor A. Nicolai and D. Reiter Kernforschungsanlage Jülich, Jülich, F.R. of Germany	567
The TROC process - Tritium removal with organic compounds H. Weichselgartner Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	573

#### Remote Handling

Mechanical configuration and system integration studies of INTOR/NET F. Farfaletti-Casali et al Commission of the European Communities, Ispra, Italy	581
Design consideration and remote maintenance of INTOR J-II N. Fujisawa et al Japan Atomic Energy Research Institute, Ibaraki-ken, Japan	587
Status of remote handling in JET T. Raimondi JET Joint Undertaking, Abingdon, U.K.	593
The gas cushion technique as a handling means for the remote removal of Tokamak segments J. Removille and R. Stephano Gradel, Steinfort, Luxemburg	599

#### Blanket Technology and Shielding

Demonstration Tokamak power plant M. Abdou et al Argonne National Laboratory, Argonne, U.S.A.	609
Blanket designs with Li-Pb liquid breeders G. Casini et al Commission of the European Communities, Ispra, Italy	623

An electricity producing and tritium breeding blanket sector for INTOR A. Bond et al Culham Laboratory, Abingdon, U.K.	629
Enhancement of benchmark experiments for CTR blankets P. Cloth et al Kernforschungsanlage Jülich, Jülich, F.R. of Germany	637
Lay-out studies for Inpile-testing of blanket materials and sub-modules W. Krug and Blanket Group of KFA Kernforschungsanlage Jülich, Jülich, F.R. of Germany	643
Neutronic implications of lead-lithium blankets W.R. Meier Lawrence Livermore National Laboratory, Livermore, U.S.A.	649
Thermodynamic stability of aluminum ceramics in liquid lithium H. Migge Hahn-Meitner-Institut für Kernforschung Berlin, Berlin, F.R. of Germany	655
Tritium recovery from liquid $\text{Li}_{17}\text{Pb}_{83}$ G. Pierini et al Commission of the European Communities, Ispra, Italy	663
Thermodynamic properties of $\text{Li}_{17}\text{Pb}_{83}$ F. Reiter et al Commission of the European Communities, Ispra, Italy	671
Osaka University 14MEV intense neutron source and its utilizations for fusion studies (OKTAVIAN program) K. Sumita et al Osaka University, Osaka, Japan	675
Guide lines of fusion reactor blanket nuclear design S. Taczanowski Kernforschungszentrum Karlsruhe, Karlsruhe, F.R. of Germany	681
Measurements of neutron multiplication by lead shells and leakage spectra from lithium, graphite and stainless steel slabs A. Takahashi et al Osaka University, Osaka, Japan	687

Neutron transport calculations for JET neutron  
diagnostics 693  
K.A. Verschuur  
Netherlands Energy Research Foundation, Petten,  
The Netherlands

A study of the interaction of tritium with liquid 699  
 $\text{Li}_{17}\text{Pb}_{83}$   
C.H. WU and A.J. Blair  
Kernforschungsanlage Jülich, Jülich, F.R. of  
Germany

### Safety

Studies on site and facilities in R-project 707  
H. Amano et al  
Nagoya University, Nagoya, Japan

Safety design of the JT-60 control system 713  
T. Kimura et al  
Japan Atomic Energy Research Institute, Ibaraki-  
ken, Japan

Safety analysis of NET/INTOR first wall and blanket 721  
H.T. Klippel  
Netherlands Energy Research Foundation, Petten,  
The Netherlands

Safety and environmental problems of INTOR/NET 729  
P. Rocco et al  
Commission of the European Communities, Ispra,  
Italy

The safety and security system of TEXTOR 735  
H. Lang et al  
Kernforschungsanlage Jülich, Jülich, F.R. of  
Germany
