

Materials for Fusion Devices

<p>A comparison of helium bubble behaviour in an austenitic and a ferritic steel T.R. Armstrong et al University of Surrey, Guildford, U.K.</p>	743
<p>FATMAC : A machine for the fatigue testing of CT type samples in the HFR, Petten, The Netherlands P. Blanchard et al Commission of the European Communities, Petten, The Netherlands</p>	749
<p>The technology development facility (TDF) J.N. Doggett Lawrence Livermore National Laboratory, Livermore, U.S.A.</p>	753
<p>Spontaneous and continuous structure and surface transformations of refractory transition metals by hydrogen H. Meusemann et al Universität Bonn, Bonn, F.R. of Germany</p>	759
<p>Structural and mechanical anisotropy of a nuclear grade AISI 316 stainless steel M.M. Farag et al The American University in Cairo, Cairo, Egypt</p>	767
<p>Helium bubbles at grain boundaries in an austenitic steel P.L. Lane and P.J. Goodhew University of Surrey, Guildford, U.K.</p>	773
<p>Irradiation creep in first wall model alloys P. Jung Kernforschungsanlage Jülich, Jülich, F.R. of Germany</p>	779
<p>Tritium in vanadium R. Lässer and H. Wenzl Kernforschungsanlage Jülich, Jülich, F.R. of Germany</p>	783
<p>Plastic flow and fracture of Ti - modified 316 austenitic stainless steel after high temperature aging in hydrogen M. Mark-Markowitch et al Nuclear Research Centre, Beer Sheva, Israel</p>	789

Thermal fatigue test facilities for simulating the first wall and limiter operating conditions R. Matera and A. Perfumo Commission of the European Communities, Ispra, Italy and NIRA, Genova, Italy	797
A programme for the study of fatigue of fusion reactor structural materials F. Moons et al SCK/CEN, Mol, Belgium	803
Prospects for low activity aluminum structures J.R. Powell and J.A. Fillo Brookhaven National Laboratory, Upton, U.S.A.	809
The cyclotron facility for radiation damage experiments at the JRC - Ispra G. Riccobono et al Commission of the European Communities, Ispra, Italy	815
Helium ion damage in an amorphous Fe-NI-Mo-B alloy H. Van Swijgenhoven et al Limburgs Universitair Centrum, Diepenbeek, Belgium	823
The surface topography of inconel, stainless steel and copper after argon ion bombardment K. Vogelbruch and E. Vietzke Kernforschungsanlage Jülich, Jülich, F.R. of Germany	829

Reactor Studies

Evaluation of the energy required for constructing and operating a fusion power plant R. Bünde Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	837
The design of a 316 stainless steel first wall for a pulsed fusion reactor with wall loading greater than 10 MWm^{-2} A. Caie and G.J. Butterworth Associated Nuclear Services, Epsom, U.K. and Culham Laboratory, Abingdon, U.K.	845
Tokamak and reversed field pinch reactor cost scaling P.I.H. Cooke Culham Laboratory, Abingdon, U.K.	851
Lifetime considerations for the first wall of a demo reactor W. Daenner Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	857

Overview of the hyfire power/electrolysis reactor design J.A. Fillo et al Brookhaven National Laboratory, Upton, U.S.A.	863
Inertial confinement fusion concepts for advanced fuels G. Miley et al University of Illinois, Urbana, U.S.A.	869
Tokamak design for reacting plasma experiment at IPP Nagoya T. Amano et al Nagoya University, Nagoya, Japan	875
Inertial fusion reactor studies at Lawrence Livermore National Laboratory M.J. Monsler and W.R. Meier Lawrence Livermore National Laboratory, Livermore, U.S.A.	881
Studies of first wall/blanket/shield systems for fusion reactors R. Nygren et al Argonne National Laboratory, Argonne, U.S.A.	889
Behavior of fuel and helium particles in Tokamak reactor on the model of starfire K. Okamoto ULVAC Corporation, Chigasaki, Japan	895
Fed reactor engineering features P.H. Sager et al Oak Ridge National Laboratory, Oak Ridge, U.S.A.	901
Low-shear-stress toroidal magnet for "OMITRON" : an ohmic ignition Tokamak A. Sestero Centro Ricerche Energia Frascati, Frascati, Italy	909

Experimental Systems

Modular mechanical design of the advanced stellarator Wendelstein VII-AS U. Brossmann et al Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	915
Completion and operation of the HBTXIA reversed field pinch apparatus L. Firth et al Culham Laboratory, Abingdon, U.K.	921

Optimization criteria in the electromagnetic design of RFP devices F. Gnesotto and M. Guarnieri Università di Padova, Padova, Italy	929
Construction of the high-beta experiment SPICA II SPICA II Team FOM-Instituut voor Plasmafysica, Nieuwegein, The Netherlands	937
Performance of the TEXTOR structure under rated loads W. Kohlhaas and C. Stickelmann Kernforschungsanlage Jülich, Jülich, F.R. of Germany	945
Design, fabrication, and testing of tandem mirror gamma 10 K. Inutake et al The University of Tsukuba, Tsukuba, Japan	951

Magnet Technology

Development of large bore-high current Nb ₃ Sn coil T. Ando et al Japan Atomic Energy Research Institute, Ibaraki-ken, Japan	959
Considerations on heat deposition by eddy currents in the cold structure of INTOR/NET B. Bloemer and F. Farfaletti-Casali Technische Universität, Braunschweig, F.R. of Germany and Commission of the European Communities, Ispra, Italy	965
Eddy current calculations for the Tore Supra toroidal field magnet J. Blum et al Laboratoire d'Analyse Numérique de Paris VI, Paris, France	971
New supporting concept for large twisted coils U.B. Brossmann and S.B. Mukherjee Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	979
Computational aspects for a modular stellarator fusion reactor magnet U.B. Brossmann et al Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	985

Mechanical stress analysis for the twisted coils of the advanced stellarator Wendelstein VII-AS U. Brossmann et al Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	991
Development of material for the JET mechanical structure G. Celentano et al JET Joint Undertaking, Abingdon, U.K.	997
Mechanical analysis of Tore Supra superconducting toroidal field coils J.J. Cordier et al Centre d'Etudes Nucléaires, Fontenay-aux-Roses, France	1005
Poloidal field coils for the international Tokamak reactor study "INTOR" H.G. Dittrich and U. Jeske Kernforschungszentrum Karlsruhe, Karlsruhe, F.R. of Germany	1011
Mechanical tests on components used in the Tore Supra superconducting coils D. Duthoo et al Centre d'Etudes Nucléaires, Fontenay-aux-Roses, France	1015
Toroidal field coils for INTOR H.G. Dittrich et al Kernforschungszentrum Karlsruhe, Karlsruhe, F.R. of Germany	1021
Employment of the large coil test facility in toroidal field coil development P.N. Haubenreich et al Oak Ridge National Laboratory, Oak Ridge, U.S.A.	1027
Numerical calculations of an effective elasticity tensor and peak stresses for the large fusion magnets T. Iwanicki et al Brown, Boveri & Cie, Mannheim, F.R. of Germany	1033
The toroidal field magnet concept of ASDEX upgrade O. Jandl et al Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	1039
On strength of welded joints in high strength, large scale copper coils for nuclear fusion equipment H. Kimoto et al Hitachi Ltd., Ibaraki-ken, Japan	1045

Vacuum magnetic fields and modular coil system of the advanced stellarator Wendelstein VII-AS J. Kisslinger et al Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	1051
Strength analysis of cooling pipe joints for poloidal field coil for nuclear fusion equipment H. Kojima et al Hitachi Ltd., Ibaraki-ken, Japan	1059
The technical concept of the ASDEX UG poloidal field coils H. Kollotzek et al Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	1067
Electromagnetic systems for high-field Tokamak Y. Alekseev et al I.V. Kurchatov Institute of Atomic Energy, Moscow, USSR	1073
Pulsed ion source of Br-diode type with cryogenic anode K. Kasuya et al Tokyo Institute of Technology, Yokohama, Japan	1081
Experience of T-7 operation in plasma experiments D. Ivanov and B. Stavisskiy I.V. Kurchatov Institute of Atomic Energy, Moscow, USSR	1087
Manufacturing of the European LCT-coil for the large coil task H. Krauth et al Kernforschungszentrum Karlsruhe, Karlsruhe, F.R. of Germany	1095
Numerical analysis of the metal forming process during the winding procedure of the European LCT coil G. Messemer and H. Zehlein Kernforschungszentrum Karlsruhe, Karlsruhe, F.R. of Germany	1101
A procedure for the computation of magnetic field, temperature and force distributions in the design of Tokamak toroidal coils P. Molfino et al Università di Genova, Genova, Italy	1107
The design bending stress criterion for JT-60 coil M. Ohkubo Japan Atomic Energy Research Institute, Ibaraki- ken, Japan	1115

- Toroidal field magnet for FT-U device 1121
A. Pizzuto
Centro Ricerche Energia Frascati, Frascati,
Italy
- Manufacture, assembly and testing of the inner
poloidal coil stacks of JET and TFTR 1127
J.C. Rauch et al
Brown Boveri & Company, Zürich, Switzerland
- Manufacture and test of the TEXTOR BT-coils 1133
U. Schwarz and P.J. Ferry
Kernforschungsanlage Jülich, Jülich, F.R. of
Germany
- Finite-element stress analysis and its impact
on the design of the Swiss LCT coil 1139
A. Segessemann et al
Brown Boveri & Company, Zürich, Switzerland
- The toroidal field coil support structure for
the Culham MKIIC Tokamak reactor 1145
W.R. Spears et al
Culham Laboratory, Abingdon, U.K.
- Electrical insulation system fit for cyclic
high strain (development of insulation of
JT-60 poloidal field coil) 1151
T. Watanabe et al
Hitachi Works, Ibaraki-ken, Japan
- Design-relevant local mechanical effects under
fault conditions of the European LCT coil 1157
H. Zehlein and G. Messemer
Kernforschungszentrum Karlsruhe, Karlsruhe,
F.R. of Germany

Plasma Equilibrium

- The Tore Supra poloidal field system 1165
M. D'Alençon et al
Centre d'Etudes Nucléaires, Fontenay-aux-
Roses, France
- Efficiency of passive circuits for vertical
stability in INTOR reactor 1173
S. Bobbio et al
Università di Napoli, Napoli, Italy
- Measurement and dynamic control of plasma position
in TEXTOR Tokamak 1179
W.A. Brocke and G. Waidmann
Kernforschungsanlage Jülich, Jülich, F.R. of
Germany

Control system of plasma position and current in a Tokamak with strong magnetic field B.A. Alekseev et al D.V. Efremov Scientific Research Institute of Electrophysical Apparatus, Leningrad, USSR	1185
Plasma parameter control experiments on "Tuman-3" V.A. Belyakov et al D.V. Efremov Scientific Research Institute of Electrophysical Apparatus, Leningrad, USSR	1191
The computational model for the control of plasma position in TEXTOR A. Kaleck Kernforschungsanlage Jülich, Jülich, F.R. of Germany	1197
Equilibrium and stability of plasma motion in an iron-core Tokamak A.V. Kuznetsov et al D.V. Efremov Scientific Research Institute of Electrophysical Apparatus, Leningrad, USSR	1203
T-15 poloidal field control system V.A. Belyakov et al D.V. Efremov Scientific Research Institute of Electrophysical Apparatus, Leningrad, USSR	1209
The FTU poloidal field system M. Gasparotto et al Centro Ricerche Energia Frascati, Frascati, Italy	1215
Time evolution of the coil currents shaping and centering a D-shaped reactor plasma A. Nicolai Kernforschungsanlage Jülich, Jülich, F.R. of Germany	1221
Experience with feedback and feedforward for plasma control in ASDEX F. Schneider Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	1227
Applicability verification of Tokamak plasma equilibrium control models K. Yoshioka et al Hitachi Ltd., Hitachi, Japan	1233

Heating Systems

- The JET Neutral Beam Line, component design features and assembly
H. Altmann et al
JET Joint Undertaking, Abingdon, U.K. 1241
- The 1 MW lower hybrid Frascati F.T. heating-system configuration and first operating experience
R. Andreani et al
Centro Ricerche Energia Frascati, Frascati, Italy 1249
- A megawatt power transfer system for RFC-XX
T. Aoki et al
Nagoya University, Nagoya, Japan 1255
- Test bed for a long pulse 160 KeV neutral beam-line
R. Becherer et al
Centre d'Etudes Nucléaires, Fontenay-aux-Roses, France 1261
- High power neutral beam operation at 120 KEV with a single stage extraction system
M. Fumelli et al
Centre d'Etudes Nucléaires, Fontenay-aux-Roses, France 1267
- The high power, long pulse ion cyclotron resonance heating system for TEXTOR
V.P. Bhatnagar et al
Ecole Royale Militaire, Bruxelles, Belgium 1275
- Long pulse operation of the ASDEX ion sources with edge cooled extraction grids
J.F. Bonnal et al
Centre d'Etudes Nucléaires, Fontenay-aux-Roses, France 1283
- Large area ion source for neutral beam injection
F. Bottiglioni et al
Centre d'Etudes Nucléaires, Fontenay-aux-Roses, France 1289
- The technique of Alfvén wave heating in the TCA Tokamak
A. de Chambrier et al
Centre de Recherches en Physique des Plasmas, Lausanne, Switzerland 1295

Design of a water cooled extraction system for a 55 KV, 22 A, 10 sec hydrogen ion source J.-H. Feist et al Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	1301
Some technological problems of the coupling structure for the FT lower hybrid heating system C. Ferro and A. Orsini Centro Ricerche Energia Frascati, Frascati, Italy	1307
Compared behaviour of stainless steel and titanium tests lines for a L.H.H. grill launcher G. Rey et al Centre d'Etudes Nucléaires, Grenoble, France	1311
The RF-ion source RIG for neutral injection J. Freisinger et al 1st Institute of Physics, Giessen, F.R. of Germany	1317
The JET neutral injection deflection magnet A.P.H. Goede et al FOM-Instituut voor Plasmafysica, Nieuwegein, The Netherlands	1321
Long pulse neutral injectors for JET Neutral Injection Group Culham Laboratory, Abingdon, U.K.	1329
Electron tubes for controlled thermonuclear fusion systems P. Guidée et al Thomson-CSF, Boulogne-Billancourt, France	1335
Concurrent correction of ion and electron space charge in ion beam simulation code K. Hayashi and T. Sugawara Toshiba Corporation, Kawasaki, Japan	1343
Line density measurements on a two-stage neutralizer J.L. Hemmerich et al JET Joint Undertaking, Abingdon, U.K.	1347
Long pulse high power ion cyclotron resonance heating generator for TEXTOR K.H. Knobbe et al Herfurth, Hamburg, F.R. of Germany	1353

- A 100KV, 80A, 10 sec power supply for neutral beam injector 1361
M. Matsuoka et al
Japan Atomic Energy Research Institute, Ibaraki-ken, Japan
- The Jülich ion source design and related thermo-mechanical pre-testing 1367
P. Kupschus et al
JET Joint Undertaking, Abingdon, U.K.
- Development of an ion source for long-pulse (30-s) neutral beam injection 1375
M.M. Menon et al
Oak Ridge National Laboratory, Oak Ridge, U.S.A.
- Compact launching structures for lower hybrid waves 1381
T.K. Nguyen and D. Moreau
Centre d'Etudes Nucléaires, Grenoble, France
- Improved performance of the ASDEX neutral beam injectors 1387
O. Vollmer et al
Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany
- Design of 3 MW ICRH system for ASDEX and W VII 1393
F. Braun et al
Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany

Data Acquisition and Control

- An electronic energy measuring system for pulsed neutral beam calorimeters 1401
D. Cooper et al
Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany
- An integrated system for data acquisition, archiving and analysis in eta-beta II 1405
G. Flor and N. Guarino
Università di Padova, Padova, Italy
- Computer control and data acquisition for neutral beam injectors 1411
A.S. Glad
General Atomic Company, San Diego, U.S.A.

Monitoring and control of the TEXTOR grounding system P. Hüttemann et al Kernforschungsanlage Jülich, Jülich, F.R. of Germany	1421
Software tool for design and maintenance of a large CAMAC system T. Kambe et al Japan Atomic Energy Research Institute, Ibaraki-ken, Japan	1427
Computer control system development for large fusion experiments M.J. Kear et al Culham Laboratory, Abingdon, U.K.	1431
System design of ZENKEI, the central control system of JT-60 I. Kondo et al Japan Atomic Energy Research Institute, Ibaraki-ken, Japan	1437
The TEXTOR diagnostic data acquisition system development status and first experience M. Korten Kernforschungsanlage Jülich, Jülich, F.R. of Germany	1443
Structure of the main control system for the FTU device L. Panaccione Centro Ricerche Energia Frascati, Frascati, Italy	1449
Control and data acquisition system for the RF heating plant of the FT Tokamak M. Panella Centro Ricerche Energia Frascati, Frascati, Italy	1455
The data acquisition system for ASDEX D. Zimmermann et al Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	1461
Experience with software-driven control and acquisition system A. Simik Centre de Recherches en Physique des Plasmas, Lausanne, Switzerland	1467

The control and data acquisition system of SPICA II C.A.J. van der Geer et al FOM-Instituut voor Plasmafysica, Nieuwegein, The Netherlands	1473
PCM recorder for raw diagnostic data storage R. Toyokawa et al Japan Atomic Energy Research Institute, Ibaraki- ken, Japan	1481
A high speed transient recorder for fusion research applications D.L. Trotman et al Culham Laboratory, Abingdon, U.K.	1487
Designing & development of the real-time control system for JT-60 plasma discharge R. Yoshino et al Japan Atomic Energy Research Institute, Ibaraki- ken, Japan	1493
 <u>Refueling</u>	
D ₂ pellet acceleration with a centrifuge W. Amenda and R.S. Lang Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	1501
Launching of D ₂ -pellets through guide tubes K. Büchl and W. Sandmann Max-Planck-Institut für Plasmaphysik, Garching, F.R. of Germany	1507
Pellet fueling development at Oak Ridge National Laboratory C.A. Foster et al Oak Ridge National Laboratory, Oak Ridge, U.S.A.	1513
On the injection of deuterium pellets H. Sørensen et al Risø National Laboratory, Roskilde, Denmark	1519
Author Index	1525
