

## CONTENTS

### VOLUME I

---

#### Opening Session

Introduction by G.R. Bishop  
C.E.C. - Joint Research Centre Ispra, Director of the Establishment 3

P. Schiller, Chairman's Remarks  
C.E.C. - Joint Research Centre Ispra 9

#### Invited Papers

|   |     |
|---|-----|
| Fusion in Europe<br>D. Palumbo  | 13  |
| The European Fusion Technology Programme<br>J.A. Goedkoop   | 25  |
| TFTR Operating Status and Plans<br>R. Little  | 35  |
| Small Fusion Reactors: Problems, Promise, and Pathways<br>R.A. Krakowski et al                      | 45  |
| JET Neutral Beam Injection System, Construction and Component Tests<br>G. Duesing                   | 59  |
| The Possibilities to Simulate Radiation Damage Caused by Fusion<br>Neutrons<br>H. Ullmaier          | 77  |
| Comparison Between a Pumped-Limiter and a Divertor for the Next<br>Step Machines<br>M.F.A. Harrison | 81  |
| Present Status of Commissioning and Operation of JET<br>M. Huguet et al                             | 91  |
| Vacuum System and Wall Conditioning in JET<br>E. Usselmann et al                                    | 105 |
| The JET Power Supplies: a Review After one Year of Operation<br>P.L. Mondino                        | 119 |
| Approach to the Definition of NET<br>R. Toschi  | 133 |

Oral Papers

|   |     |
|---|-----|
| Materials Selection for NET and the Associated R & D Programmes<br>D.R. Harries and J.-M. Dupouy        | 147 |
| Fusion Nuclear Technology Development: Issues and Strategy<br>M.A. Abdou                                | 153 |
| Conceptual Study of a Helium Cooled Ceramics/Beryllium Blanket<br>for a Power Reactor<br>F. Carré et al | 165 |
| Tritium Control in a Helium Cooled Ceramic Blanket<br>M. Dalle Donne and S. Dorner                      | 173 |
| NET Energy Gain from DT Fusion<br>R. Buende   | 181 |
| The RFX Project: a Design Review<br>G. Rostagni et al   | 189 |
| Status and Progress of ASDEX Upgrade<br>ASDEX Upgrade Team presented by W. Köppendörfer                 | 203 |
| Progress in Fusion Technology in the U.S. Magnetic Fusion Program<br>R.J. Dowling et al                 | 209 |
| Progress Report on FT-Upgrade<br>FTU Design Team presented by R. Andreani                               | 217 |

Poster Sessions

Refuelling

|  |     |
|--|-----|
| Recent Developments of a Two-Stage Light Gas Gun for Pellet Injection<br>A. Reggiori                   | 231 |
| Development of D <sub>2</sub> Pellet Injectors<br>S.A. Andersen et al                                  | 237 |
| A Centrifugal D <sub>2</sub> Pellet Injector for Refuelling Plasma Machines<br>W. Amenda and R.S. Lang | 243 |
| The Gas Introduction System of JET<br>A. Boschi et al  | 247 |
| Pellet Injector for JET<br>C. Andelfinger et al  | 255 |

First Wall Technology and Vacuum Technology

|  |     |
|--|-----|
| Development of a Fast Closing Valve System<br>K. Nakajima et al  | 263 |
| A Design of a First Wall for a Demo Reactor<br>A. Bond et al   | 271 |
| First Wall Lifetime of the Near Term Fusion Reactors<br>R. Matera et al                                    | 277 |
| Fabrication, Quality Control and Thermal Fatigue Testing of a Panel Type First Wall<br>U. Guerreschi et al | 285 |
| The Predicted Performance of Getter Panels Situated near the Limiters of a Large Tokamak<br>E.S. Hotston   | 291 |
| A First Wall Concept for INTOR and NET Experimental Power Reactors<br>A. Cardella et al                    | 297 |
| TORE SUPRA Vacuum Vessel and Shield Manufacturing<br>J. Blateyron and R. Lepez                             | 305 |
| The JET Cryopump System and its Cryolines for Neutral Injection<br>W. Obert et al                          | 311 |

|   |     |
|---|-----|
| Electromagnetic Forces Distribution and Mechanical Analysis<br>in the First Wall Structure for INTOR/NET<br>E. Coccorese et al                  | 319 |
| The Vacuum Vessel for the FTU Device: Design Constraints and<br>Stress Analysis<br>R. Andreani et al  | 325 |
| FTU Vacuum Vessel and Copper Shell Electromagnetic Loads<br>Calculations<br>M. Gasparotto et al   | 331 |
| TORE SUPRA: Dimensional Survey of Vacuum Vessels and Thermal<br>Shields<br>J.J. Cordier et al   | 337 |
| A New Titanium Getter Pump<br>Z. Sledziewski  | 343 |
| Development and Testing of One-Turn Resistive Structures of<br>Aluminum Alloy Vacuum Vessel for Reacting Plasma Experiment<br>T. Uchikawa et al | 347 |
| Metal Seals for the Large Ports of Textor<br>W. Kohlhaas et al  | 353 |
| Type Tests of Welded Bellows for Ports of JT-60 Vacuum Vessel<br>H. Takatsu et al   | 359 |
| The Potential of High-Strength Copper Alloys for High Heat<br>Flux First Wall Applications<br>A. Caie and G.J. Butterworth                      | 365 |
| Electromagnetic and Structure Analysis in an Aluminum-Alloy<br>Vacuum Vessel for a Low-Activation Device<br>K. Ioki et al                       | 373 |
| JT-60 Torus Vacuum Pumping System<br>N. Ogiwara et al   | 381 |
| 2D - Finite Element Stress Analysis of NET First Wall Designs<br>S.B. Mukherjee et al   | 389 |
| Zr Based Gettering Alloys for Hydrogen Isotopes Handling<br>B. Ferrario et al   | 395 |
| Electron Beam Disruption Simulation of First Wall Material<br>D. Quataert et al   | 401 |

#### Tritium Handling and Technology

|  |     |
|--|-----|
| Solubility of Hydrogen Isotopes in Inconel 600<br>G. Gervasini et al | 411 |
|--|-----|

|   |     |
|---|-----|
| Improved Performance of a Thermal Diffusion Column for the Separation of Hydrogen Isotopes<br>A. Neubert et al                            | 417 |
| Removal of Nitrogen and Methane from Hydrogen by Metal Getters<br>H. Heimbach et al   | 421 |
| Diffusion of Tritium in, and Thermochemistry of, Lithium-Orthosilicate<br>H.R. Ihle et al   | 427 |
| Development of the ELEX Process for Water Detritiation<br>A. Bruggeman et al  | 433 |
| Tritium Operation of a Gas Chromatographic Isotope Separation Plant- First Results<br>H. Weichselgartner et al                            | 441 |
| Proposal to Limit First Wall Tritium Permeation by Application of Downstream Oxide Barriers<br>H.J. Leyers et al                          | 447 |
| Current Experimental Work Related to a System Alternative to that Using the Cryogenic Separation of Hydrogen Isotopes<br>G. Pierini et al | 455 |
| Feasibility Study of Tritium Recovery Systems from 83PB17LI Breeding Material of a D-T Fusion Reactor<br>G. Pierini et al                 | 463 |
| A Review of Fusion Device Fuel Cleanup Systems<br>A.H. Dombra and M. Carney   | 473 |

#### Plasma Equilibrium

|  |     |
|--|-----|
| Control of Divertor Configuration in JT-60<br>R. Yoshino et al   | 483 |
| Modelling of Plasma Dynamics in Conducting Shells<br>H. Preis and H.P. Zehrfeld                            | 491 |
| Burn Stabilization via Feedback Ripple Regulation in an Ignited Tokamak<br>K. Borrass and M. Soell         | 497 |
| The JET Plasma Position and Current Control System<br>P. Noll et al  | 503 |
| Computer-Based Design Technique of Controllers for the Plasma Vertical Stabilization<br>G. Ambrosino et al | 511 |

|   |     |
|---|-----|
| FTU Plasma Horizontal Position Control System<br>A. Coletti et al                             | 517 |
| Self Consistent Description of Plasma Equilibrium<br>Evolution in TORE SUPRA<br>J. Blum et al | 523 |
| NET Vertical Stability<br>R. Albanese et al   | 531 |

### Heating

|   |     |
|---|-----|
| Transmission Characteristics of Mode Converters for<br>28GHz Electron Cyclotron Heating System<br>M. Otsuka et al   | 539 |
| Diagnostics for the NBETF Actively Cooled Beadmump<br>E. Theil and Van Jacobson   | 545 |
| Overmoded Waveguide Components for 28 GHz and 70 GHz<br>ECRH Systems<br>V. Erckmann et al   | 553 |
| Lay-out of a Launching System for the Lower-Hybrid Waves<br>in INTOR and NET<br>F. Farfaletti-Casali and J.G. Wegrowe   | 559 |
| Design and Operation of 120 KEV, 75 A, 1 Sec Ion Source<br>and High Specific Pumping Cryopump on the 5 MW Neutral<br>Beam Test Stand at IPP, Nagoya<br>Y. Oka et al | 565 |
| The JET Neutral Beam Test Bed Facility and First Results<br>H.D. Falter et al   | 571 |
| Manufacture of Beam Sources and Neutralisers for JET<br>Neutral Injection<br>H. Altmann   | 579 |
| Technical Study and Launcher Design for Ion Cyclotron<br>Waves in NET-INTOR<br>F. Moons and F. Farfaletti-Casali  | 587 |
| 8GHz, 0,5 MW Lower Hybrid "Electron Mode" Additional<br>Heating System on FT Tokamak<br>F. Mirizzi et al  | 593 |
| RF Tests on JET First Stage Antenna System<br>B. Beaumont et al   | 599 |
| Periplasmatron Ion Sources for the Stellarator W7AS<br>J.F. Bonnal et al  | 605 |

|  |     |
|--|-----|
| Transmission Line System for Electron Cyclotron Heating<br>on the TFR Tokamak<br>R. Cano et al                                       | 611 |
| Operation of a 160 keV, 37 A Neutral Deuterium Beam<br>Injector<br>M. Fumelli et al  | 617 |
| T.F.R. Neutral Injection Lines<br>J. Druaux et al  | 625 |
| ICRH Test Bed and First Experimental Results<br>H. Wedler et al  | 633 |
| Long-Pulse Beamlines for the Mirror Fusion Test Facility<br>R.R. Stone et al   | 639 |
| Design of Long Pulse Heating Systems for Doublet III-D<br>J.M. Rawls et al   | 645 |
| $H^-$ Ion Source for Neutral Beam Injector<br>C. Jacquot et al   | 651 |
| Study of Glow Discharges Used for Conditioning of Lower<br>Hybrid Heating Antenna<br>P. Bibet et al                                  | 657 |
| A 4 Waveguide Multijunction Antenna for L.H.H. in Petula<br>T.K. N'Guyen et al   | 663 |
| The JET ICRF Antennae Systems: Description and Test Bed<br>Results<br>A. Kaye et al  | 669 |
| Installation and Testing of a High Power (3 MW) Long Pulse<br>(3 s) RF System for ICRH Experiments on TEXTOR<br>V.P. Bhatnagar et al | 675 |
| The Challenges of Handling Long-Pulse Neutral Beams -<br>The NBETF Experience<br>K.H. Berkner et al                                  | 685 |
| Performance Data for the 80 keV Injectors for JET<br>T.S. Green  | 693 |
| Neutral Beam Heating Systems for TFTR - Initial Operating<br>B.A Prichard et al  | 703 |
| Pure Beam Extraction from Pulsed Cryogenic Diode and Laser<br>Initiation of Beam Transport Channel<br>K. Kasuya et al                | 709 |
| Construction of the JT-60 NBI System<br>Y. Ohara et al   | 715 |

Collective Acceleration of Cluster Ions 721  
H. Enjoji et al

JET ICRF Power Plant 727  
T. Wade et al

Experimental Systems

Low-Activation R-Tokamak with Large Plasma Current 735  
Y. Hamada et al

Engineering Aspect of Reversed Field Pinch Torus 741  
"REPUTE-1"  
T. Watanabe et al

Fabrication of JIPP T-IIU Tokamak 747  
T. Ishizuka et al

The Compass Tokamak/Pinch Load Assembly Design 753  
R.J. Hayward et al

The Engineering Aspects of HT-6M Tokamak 759  
HT-6M Team, presented by S. Wang and G. Li

Facilities and Auxiliary Systems for the Tokamak 765  
Fusion Core Experiment  
R.B. Fleming

TFCX - Mechanical Design 773  
J.C. Citrolo

Overview of the Modification to the Poloidal Divertor 779  
Experiment (PDX) to Produce the Princeton Beta  
Experiment (PBX)  
D. Knutson

Mechanical Design of a High-Beta TFCX Tokamak with a 787  
Demountable TF Coil  
F. Puhn et al

Computational Analysis for the Compass Machine 795  
I.L. Robertson et al
