

VOLUME II

---

Neutral Beam Heating Systems - Materials

Neon, Helium and Self-Ion Damage in Nickel N. Marochov et al	951
Development of Low Activation Al Base Alloys for Fusion - Comparison Between I/M and P/M Alloys K. Kamada et al	957
The Corrosion of Steels by Lithium Monoxide and by Lithium Silicate R.J. Pulham et al	963
The Corrosion of 316 Steel by Lithium-Lead Alloys under Nitrogen W.R. Watson and R.J. Pulham	969
The Influence of Helium on the High Temperature Fatigue Life of Austenitic Stainless Steel A. Leeser et al	973
Corrosion of AISI 316L Steel in Liquid Lithium in the Presence of a High Magnetic Field F. De Schutter et al	981
Effect of Helium and Fission Neutrons on the Tensile Properties of V-5Ti W. van Wittenburg and H. Scheurer	987
Irradiation Effects on Mechanical Properties of the NET 316L Reference Heat B. van der Schaaf	993
Physico Chemical Properties of Porous $\gamma$ LiAlO <sub>2</sub> B. Rasneur	999
Fundamental Behaviour of Shape Memory Alloy Coupler for Quick Replacement Handling of Fusion Core Parts in Cassette Compact Toroid Reactor M. Nishikawa et al	1007
The Preparation, Characterisation and Properties of Lithium Oxide and Lithium Meta-Zirconate Specimens Irradiated in HFR Petten in the Second and Third Exotic Experiments P. Kennedy et al	1013
The Corrosion of Type 316 Stainless Steels in Static and Dynamic Liquid Lithium M.G. Barker et al	1019
The Effect of Irradiation at 550°C on the Tensile and Impact Properties of Austenitic and Martensitic Steels W. Vandermeulen et al	1025
The Effect of Irradiation at 150 and 300°C on the Tensile Properties of Cu and CuCrZr W. Vandermeulen et al	1031

Magnetic Phase Induced by Plasma Disruption in AISI 316 SS F. Brossa et al	1037
Stored Energy in MgO and Al <sub>2</sub> O <sub>3</sub> M. Jiménez de Castro et al	1045
Tensile and Fatigue Properties of 316 LN Austenitic Steel at Cryogenic Temperatures C. Prioul et al	1051
Quantification of Plasma Induced Defects in First Wall Materials K. Koizlik et al	1057
Behaviour of Graphites under Intense Heat Loads J. Bohdansky et al	1063
Electron Beam Disruption Simulation of Refractory Metals E. Kny et al	1069
High Heat Flux Tests of Graphites for Limiter Applications J. Ohmori et al	1077
Metal/Graphite-Composite Materials for Fusion Devices G. Kneringer et al	1083
SIENA : A Spectrum Tailoring Device for Fusion Materials Irradiation in a MTR G. Tsotridis et al	1089
Neutron and Deuteron Irradiation Creep in Stainless Steel Alloys H. Hausen et al	1095
Textor Neutral Injector Beam Line Design C.N. Meixner	1103
Feedback Control System for Stable Ion Beam Extraction J. Morikawa et al	1109
Achievements with the ASDEX Neutral Beam System During Operation O. Vollmer et al	1115
Calculations and Measurements : Ion Removal System in the ASDEX/W VII-AS Long-Pulse Neutral-Injection Beam Line J.H. Feist et al	1121
Test of an RF-Ion Source with a Large Scale Extraction System J.H. Feist et al	1127
Inertia Targets and Acceleration Grids for NBI-Textor H. Bousack, H. Heybutzki et al	1133
Performance of the First JET Neutral Beam Injector A.P.H. Goede et al	1139
A Fast Shutter System for the JET Neutral Injectors M.J. Watson et al	1145
The TORE-SUPRA Ion Source F. Jequier et al	1153

First Results from the TORE SUPRA Prototype Injector M. Fumelli et al	1159
Interaction of Charged Particle with Fusion Material S. Kawata	1165
<u>Blanket Technology - Refueling - Safety</u>	
The Compatibility of H <sub>2</sub> O with Li <sub>7</sub> Pb <sub>2</sub> and its Interactions with Hydrogen Isotopes H.M. Kottowski et al	1173
Optimal Use of Beryllium for Fusion Reactor Blankets U. Fischer	1179
Interaction of Hydrogen Isotopes with the Liquid Eutectic Alloy 17Li83Pb F. Reiter et al	1185
An Alternative Neutronics Solution for Liquid Lithium Blankets L. Giancarli	1191
BEATRIX - The International Breeder Materials Exchange C.E. Johnson et al	1197
Manufacturing Feasibility Study of Water Cooled Liquid Breeder Blanket Modules for NET J.P. Peyrelongue et al	1203
Thermochemistry in the System LI-SI-BE-O H. Migge	1209
A Low-Risk Aqueous Lithium Salt Blanket for Engineering Test Reactors P. Gierszewski et al	1217
Transient Analysis of the Water-Cooled Eutectic LiPb Blanket of NET H.T. Klippel	1223
Thermal and Stress Analysis of the Solid B.O.T. Blanket for NET M. Ferrari and G. Simbolotti	1231
Effects of Openings in a Fusion Reactor Blanket (Tokamak Type) B.V. Robouch et al	1237
Neutronic Experiments in a LI-PB Spherical Assembly K. Sugiyama et al	1243
Ceramic Tritium Breeder Materials - Promise and Performance C.E. Johnson and G.W. Hollenberg	1249
Thermal Properties and Application of Potential Lithium Silicate Breeder Materials A. Skokan et al	1255

Progress in Fusion Reactors Blanket Analysis and Evaluation at CEA E. Proust et al	1261
A Helium Cooled Lithium-Lead Blanket for a Demo Tokamak Reactor L.J. Baker et al	1267
Liquid Metal Cooled Blanket Concept for NET S. Malang et al	1273
Progress in Design and Analysis of the NET Water Cooled Liquid Breeder Blanket W. Dänner et al	1281
Design and Thermohydraulic Optimization of a Solid Ceramic Breeder Blanket for NET A. Cardella et al	1291
Il Mantello - A Helium Cooled Solid Breeder Blanket for NET L. Anzidei et al	1299
First Wall Risk Analysis for a Loss of Coolant Accident in an Experimental Fusion Reactor H. Djerassi et al	1305
Activation Studies for Potential Structural Materials of Fusion Reactors J. Sanz et al	1315
Tritium Atmospheric Release : A Simple Model for the Evaluation of HTO Formation G. Graziani	1323
Safety Analysis Related to the Possible Release of Activated Erosion Dust in Fusion Reactors L. Deleanu et al	1329
First Wall and 17Li-83Pb Blanket Systems Accident Analysis for NET S. Sarto et al	1335
The Implications of $\gamma$ Dose Rate Limits for the Recycling of Fusion Reactor First Wall Structural Material L. Giancarli and G.J. Butterworth	1343
Device for Varying Pellet Size in a Centrifuge Pellet Injector C. Andelfinger	1349
D2 Pellet Injector for the Reversed Field Pinch Eta Beta II in Padova H. Sørensen et al	1355
On Arc Heated Gas Gun Acceleration of Pellets S.A. Andersen et al	1361
Experimental Test of 6mm Diameter D <sub>2</sub> Pellets Produced by In-Situ Condensation J. Lafferranderie et al	1367

Pneumatic Pellet Injectors for TFTR and JET S.K. Combs and S.L. Milora	1375
Development of a Two-stage Injector for Solid H <sub>2</sub> Pellets A. Reggiori and F. Scaramuzzi	1381
<u>Tritium Handling - Data Acquisition and Control Systems</u>	
The Compass Data System M.F. Payne	1389
The Compass Control and Engineering Monitoring System D. Richardson and J.R. Watkins	1395
The AMOS/D Data Analysis System for ASDEX UPGRADE F. Hertweck et al	1401
Some Features of the Data-Handling Systems in Rijnhuizen W. Kooijman et al	1409
Electronics for Data Preparation and Diagnostics Control in ASDEX F. Schneider et al	1415
The JET Pulse Termination Network J.A. How et al	1421
Distributed Intelligence in a Lan Architecture Increases the Flexibility in Control Systems for Fusion Experiments W. Tenten et al	1427
The TORE SUPRA Control Computer System B. Gagey et al	1433
Application of the Fast Array Processor for JT-60 Plasma Control T. Kimura et al	1439
Structure of the RFX Control and Monitoring System V. Schmidt et al	1445
Overview and Operation of the Control, Safety and Interlock on the JET Neutral Beam Injector D. Stork et al	1451
The Diagnostic Subsystems of the AMOS/D System P. Heimann et al	1461
Computer-to-Process Interface in JET's Control and Diagnostic Systems K. Fullard et al	1467
A Fast Signal Acquisition System for the Time Resolved Lyman-Alpha Diagnostic on Textor Ph. Mertens et al	1473

Development Status of FTU Control System B. Berardi et al	1479
The TORE SUPRA Data Acquisition System B. Rothan et al	1485
The Tara Control, Monitoring, Data Acquisition, and Analysis System J.D. Sullivan et al	1491
The JET Fast Transfer Diagnostic System - Installation & Commissioning I. Gray et al	1499
Tritium Release from Neutron Irradiated $\text{Li}_7\text{Pb}_2$ and $\text{Li}_{17}\text{Pb}_{83}$ V.G. Vasilyev	1505
Air Detritiation Systems for Fusion Facilities Based on CANDU Developments A.H. Dombra et al	1511
Development of an Electrolysis Cell for the Recovery of Tritium from its Oxides A. Rahier et al	1519
Impact of Bubble Nucleation on Tritium Recovery from Blanket Containment A.M. Polcaro et al	1523
Solidification of Tritiated Waste R.-D. Penzhorn et al	1531
Out of Pile Tritium Release from Various Lithium Materials F. Botter et al	1537
An Assessment of the Tritium Inventory in, Permeation Through and Releases from the NET Plasma Facing Materials C.H. Wu	1545
Experimental Determination of the Kinetic Conversion Rate of Gaseous Tritium into HT0 W. Gulden et al	1551
A Ceramic Container for Hydrogen Purification on Hot Uranium E. Hutter et al	1559
New Concepts for the Recovery and Isotopic Separation of Tritium in Fusion Reactors A.H. Dombra et al	1565
Progress in Tritium Technology in the IPP T-Laboratory Scale-up of Gas Chromatograph System; Removal of Tritium from Secondary Containments H. Weichselgartner et al	1573

Tritium Separation from LiPb Blankets by Permeation into a Gas Stream or into NAK J. Reimann et al	1579
Hydrogen Extraction from a Gas Mixture M. Caron-Charles	1585
Torus Evacuation and Tritium Handling on NET : Requirements, Design Approaches and Development Issues P. Dinner et al	1591
<u>Magnet Technology - Reactor Studies - Remote Handling</u>	
Shear Strength of the ASDEX UPGRADE TF Coil Insulation : Rupture, Fatigue and Creep Behaviour B. Streibl et al	1601
Laser Beam Welding of Advanced Superconducting Cable Conduits A. Nyilas	1609
Geometrical Considerations for the Bending of Superconductors for Planar and Nonplanar Magnets H. Zehlein	1617
TFTR Control Systems for Protection and for Normal Control of Magnetic Field Coils R.D. Woolley	1623
Mechanical Behaviour of Medium Sized Modular Stellarator Coil Configurations E. Harmeyer et al	1631
Improvements in the FEM-Model of the EURATOM-LCT Coil and Comparison with Results Measured in the TOSKA Test A. Maurer et al	1637
The JET Magnets : Operational Experience and Plans for UPGRADE J.R. Last et al	1643
Different Manufacturing Process of Internal Connections of Toroidal Coils A. Laurenti et al	1649
The Central Solenoid of NET R. Pöhlchen et al	1655
Manufacturing of the LN <sub>2</sub> Cooled Toroidal Coils of FTU G. Dal Mut et al	1663
A New Concept in the Design of High-Field Toroidal Magnets A. Sestero	1669
Fabrication and Test Results of the Conductor for the Toroidal Field Coils of TORE SUPRA B. Turck et al	1675

Tests of the Toroidal Field Coils of TORE SUPRA P. Riband et al	1683
Manufacture and Transport of the TORE SUPRA Large Poloidal Magnetic Field Coils J.M. Ané et al	1691
Manufacture and Test of the TORE SUPRA OHMIC Heating Coil J.M. Ané et al	1699
Development of a Forced-Cooled Superconducting Coil K. Nakanishi et al	1707
Design, Construction and Test on a Prototype of a Poloidal Coils of the F.T.U. A. De Vellis et al	1713
Dimensional Accuracies Obtained in the TORE SUPRA Toroidal Field Coils A. Laurenti et al	1721
Contact Resistance of Demountable Multi-Pin Joint for Superconducting Helical Coil K. Uo et al	1727
Response of Superconducting Coils to Internal Heating K. Okuno et al	1733
Testing Electrical Insulation of LCT Coils and Instrumentation J.N. Luton et al	1741
The Tara 24 MVA Magnet System M.P.J. Gaudreau et al	1749
First Results of the TESPE-S Magnet System Safety Experiments K.P. Jüngst et al	1759
ASDEX UPGRADE Poloidal Field Coils - Concept, Manufacturing, Preliminary Tests M. Pillsticker et al	1765
Design of Superconducting Pulsed Coil by a CAD System B. Ikeda et al	1773
Compass Magnetic Field Coils and Structure Systems R.T. Crossland et al	1781
A Low Loss Superconducting Cable for Poloidal Field Coils (Design, Development, Measurements) U. Jeske et al	1787
Progress in the NET Toroidal Field Coil Mechanical Design G. Malavasi et al	1795

Experience With Cooldown of Superconducting Magnet Coils in the Large Coil Task P.N. Haubenreich et al	1803
Considerations on Magnet Design Based on Forced Flow of HE II in Internally Cooled Cables A. Hofmann and A. Khalil	1811
Stress Analysis of the SIN Conductor for the NET TF-Coil C. Marinucci and C.U. Wassermann	1819
The In-Vessel Inspection System on the JT-60 M. Ohkubo et al	1825
The JET In-Vessel Inspection System T. Raimondi et al	1833
Remote Handling Tools for JET M. Wykes	1839
Tokamak-Reactor Configuration and Maintenance A.I. Kostenko et al	1845
Plant Design for Reversed Field Pinch Reactor (TITAN) A.E. Dabiri	1851
On Some Interesting Properties of the Working Temperature in a Tokamak Reactor B. Brunelli	1857
Studies on Ignition Target and Reactor in ICF Research S. Ido et al	1863
The Promise of Tritium Lean Fuels W. Kernbichler et al	1869
The Dense Z Pinch as a Fusion Power Reactor : Breeding and Radiation Damage Considerations S.P. Walker et al	1875
TIBER II Configuration and Structural Design J.N. Doggett	1881
<u>Author Index</u>	1887
