

TABLE OF CONTENTS

Volume 1

Preface	v
Committee members	vi
Industrial exhibitors	vii
 <i>Invited Papers</i>	
The role of the Associations in the European fusion programme <i>K. Pinkau</i>	1
Toward a greater involvement of industry in the Community fusion programme <i>F. Fuster Jaume</i>	7
Tokamak Fusion Test Reactor D-T results <i>D.M. Meade</i>	13
Recent progress in JT-60U experiments <i>Y. Neyatani</i>	25
Recent results from the DIII-D tokamak and implications for future devices <i>J.L. Luxon</i>	39
JET with a pumped divertor: design, construction, commissioning and first operation <i>E. Bertolini</i>	53
JET relevance to ITER, new trends and initial results <i>J. Jacquinot</i>	67
ITER: the first experimental fusion reactor <i>P.-H. Rebut</i>	85
Progress in the design of in-vessel components for ITER <i>R.R. Parker, W.B. Gauster</i>	119
Model coil development and testing for ITER <i>B. Montgomery, K. Okuno, A. Torossian, G. Trokhachev, H. Tsuji</i>	133
Advanced electron cyclotron heating systems for next-step fusion experiments <i>M. Thumm</i>	139

Analyses performed within the European Safety and Environmental Assessment of Fusion Power (SEAFP) <i>I. Cook</i>	171
The 14 MeV neutron source for the development of fusion reactor materials <i>P. Shiller</i>	191
Contributed Papers	
Section I: First Wall, Divertors and Vacuum Systems	
The JET glow discharge cleaning system <i>P. Andrew, G. Bosia, R. Claesen, L. Grobusch, J. Harling, J. How, H.S. Jensen, H. McBryan, J. McCarthy, R. Monk, J. Orchard, R.J. Pearce, G. Saibene, J. Winter</i>	203
RF assisted glow discharge conditioning of the EXTRAP T2 device <i>D. Larsson, H. Bergs�aker, B. Emmoth, D. Haslbrunner, A. Paal</i>	207
Analyses and tests for the baking system of the RFX vacuum vessel by eddy currents <i>P. Collarin, P. Sonato, P. Zaccaria, G. Zollino</i>	211
Investigations of the behaviour of component like first wall specimens under fusion relevant loading conditions <i>J. Wolters, G. Breitbach, M. Roedig, H. Nickel</i>	215
A plasma protection tile concept based on a contact provided by thermally induced expansion <i>G. Federici, E. Martin, S. Chiochio, K. Dietz, B. Esser, G. Janeschitz, R. Matera, R. Tivey</i>	219
Erosion of melt layers developed during a plasma disruption <i>A. Hassanein, A. Konkashbaev, I. Konkashbaev</i>	223
Numerical analysis of crack propagation in a first wall by cyclic high heat flux irradiation <i>T. Nishimura, T. Denda, Y. Sugawara, T. Teramoto, M. Saito</i>	227
The plasma facing components of the TORE SUPRA ICRF antenna <i>B. Beaumont, G. Agarici, E. Gauthier, G. Haste, H. Kuus, J. Schlosser</i>	231
Effects of high heat plasma fluxes on the new C-C composites, different metals and coatings for ITER plasma facing components <i>T.A. Burtseva, A.A. Drozdov, A.A. Gervash, V.M. Kuznetsov, B.V. Ljublin, I.B. Ovchinnikov, V.A. Titov</i>	235
ITER plasma facing materials - some critical considerations <i>V. Barabash, K.J. Dietz, G. Federici, G. Janeschitz, R. Matera, S. Tanaka</i>	239

The study of candidate materials in steady state plasma <i>B.I. Khripunov, V.V. Shapkin, V.B. Petrov, N.V. Antonov</i>	243
Mechanics of brazed joints and compliant layers in high heat flux components <i>G. Lovato, F. Moret, G. Chaumat, G. Cailletaud, P. Pilvin</i>	247
Effect of subcooling on the critical heat flux under one-sided heating conditions <i>M. Araki, R.D. Watson, T.D. Marshall, P.D. Rockett, M. Akiba</i>	251
Cooling of plasma facing components using helium-cooled porous metal heat exchangers <i>J.H. Rosenfeld, M.T. North, D.L. Youchison, R.D. Watson</i>	255
Development of low-Z materials for plasma facing, structural applications in fusion reactors <i>R. Vaßen, J. Förster, A. Yehia, K. Hammelmann, H.-P. Buchkremer, H. Bolt, D. Stöver</i>	259
A simple 3D algorithm for the design of constant heat load surfaces <i>R. Bartiromo, M. Ciotti, G. Maddaluno</i>	263
Thermoelectric conversion at the divertor plates and the first wall of a fusion reactor <i>S. Yamaguchi, A. Sagara, A. Komori, T. Tazima, O. Motojima, A. Iiyoshi, K. Matsubara, M. Onozuka, K. Koganezawa, T. Matsuda</i>	267
The installation of the JET MK I divertor - features and achievements <i>G. Celentano, B. Macklin, M. Pick, S.M. Scott, R. Shaw, J. Tait</i>	271
Design of the MK II divertor with large carbon-fibre composite (CFC) tiles <i>H. Altmann, E.B. Deksnis, J. Fanthome, C. Froger, C. Lowry, R. Mohanti, M. Nilsen, A. Peacock, M.A. Pick, D. Spencer, R.B. Tivey, G. Vlases</i>	275
Alignment systems for pumped divertor installation at JET <i>B. Macklin, R. Brade, G. Celentano, J.J. Cordier, G. Israel, J. Tait, E. van Lente</i>	279
Design, manufacturing and thermo-mechanical testing of a relevant size monoblock divertor prototype <i>A. Cardella, G. Vieider, E. Di Pietro, A. Orsini, M. Sacchetti, D. Ciric, H. Falter, P. Massmann, H. Viallet, M. Febvre, U. Guerreschi, N. Reheis, L. Bruno</i>	283
Thermal fatigue testing of a diffusion-bonded beryllium divertor mock-up under ITER relevant conditions <i>D.L. Youchison, R. Guiniatouline, R.D. Watson, J.M. McDonald, B.E. Mills, D.R. Boehme</i>	287
Comparison between actively cooled divertor dump plates with beryllium and CFC armour <i>H.D. Falter, D. Ciric, E.B. Deksnis, P. Massmann, K. Mellon, A. Peacock, M. Akiba, M. Araki, K. Sato, S. Suzuki, A. Cardella</i>	291

High heat flux tests at divertor relevant conditions on water-cooled swirl tube targets <i>J. Schlosser, J. Boscary</i>	295
Design, fabrication, and testing of a helium-cooled module for the ITER divertor <i>C.B. Baxi, J.P. Smith, D. Youchison</i>	299
The design of the ITER baffle/toroidal limiter <i>A. Antipenkov, G. Janeschitz, S. Chiochio, G. Federici, E. Martin</i>	303
Beryllium mock-ups development and ultrasonic testing for ITER divertor conditions <i>V.R. Barabash V.A. Bykov, R.N. Giniyatulin, A.A. Gervash, T.M. Gurieva, K.E. Egorov, V.L. Komarov, M.D. Korolkov, I.V. Mazul, L.S. Gitarsky, I.L. Strulia, V.S. Sizenev, V.T. Pronyakin</i>	307
Development of the divertor plate at JAERI <i>S. Suzuki, M. Araki, K. Sato, K. Masaki, K. Nakamura, M. Akiba, T. Ando, K. Yokoyama, M. Dairaku, Y. Ohara</i>	311
Development of actively cooled divertor plates for fusion experimental devices <i>M. Onozuka, M. Toyoda, S. Tsujimura, M. Inoue, M. Satoh</i>	315
The magnetic vapour shield effect at divertor plates during plasma disruptions <i>G. Piazza, B. Goel, W. Höbel, H. Würz, I. Landman</i>	319
Structure of divertor for the optimised stellerator W7X <i>H. Greuner, W. Bitter, F. Kerl, J. Kisslinger, H. Renner</i>	323
Engineering design of a radiative divertor for DIII-D <i>J.P. Smith, S.L. Allen, P.M. Anderson, C.B. Baxi, E. Chin, M.E. Fenstermacher, D.N. Hill, M.A. Hollerbach, A.W. Hyatt, R. Junge, M.A. Madhavi, G.D. Porter, K. Redler, E.E. Reis, M.J. Schaffer, D.L. Sevier, R.D. Stambaugh</i>	327
Conceptual design of a high heat flux toroidal pumped limiter for Tore Supra <i>L. Doceul, J. Schlosser, Ph. Chappuis, M. Chatelier, J.P. Cocat, C. Deck, F. Faisse, A. Grosman, R. Mitteau, G. Tonon</i>	331
Vapor shield formation and erosion of divertor plates during ITER Tokamak plasma disruptions <i>I. Landman, H. Würz</i>	335
Design of ITER divertor cassettes <i>R. Tivey, E. Martin, G. Federici, S. Chiochio, K. Dietz, G. Janeschitz, K. Shibamura</i>	339
Operational safety of the JET in-vessel divertor cryopump system <i>S. Papastergiou, P. Ageladarakis, W. Obert, E. Thompson</i>	343

The DIII-D divertor cryopump system: design and operational experience <i>K.M. Schaubel, J.P. Smith, G.J. Laughon, C.B. Baxi, G.L. Campbell, M.A. Mahdavi, R. Maingi, M.M. Menon, M.J. Schaffer, R.D. Stambaugh</i>	347
ITER vacuum vessel design and electromagnetic analysis of in-vessel components <i>K. Ioki, G. Johnson, K. Shimizu, D. Williamson, T. Iizuka</i>	351
The new electron beam facility for materials testing in hot cells - design and preliminary experience <i>R. Duwe, W. Kühnlein, H. Münstermann</i>	355
Disruption-like heat load tests with EB200 test facility <i>M. Febvre, E.V. van Osch, H. Viallet</i>	359
Experimental complex for high flux-materials interaction research <i>V.K. Gagen-Torn, I.R. Kirillov, V.L. Komarov, V.N. Litunovsky, I.V. Mazul, I.B. Ovchinnikov, Yu.G. Prokofjev, G.L. Saksagansky, V.A. Titov</i>	363
Test of divertor materials under simulated plasma disruption conditions at the SOM electron beam facility <i>V. Engelko, R. Kurunov, I. Landman, B. Ljublin, L. Smirnov, H. Würz</i>	367
Electron and hot plasma stream-target interaction experiments under simulated ITER plasma disruption conditions at the GOL-3 facility <i>V.T. Astrelin, A.V. Burdakov, V.V. Filippov, V.S. Koidan, S.V. Lebedev, K.I. Mekler, P.I. Melnikov, V.V. Postupaev, A.F. Rovenskikh, M.A. Shcheglov, K.V. Tsigutkin, S.G. Voropaev, H. Würz</i>	371
Manufacturing and testing of a copper/CFC divertor mock-up for JET <i>M. Brossa, D. Ciric, E. Deksnis, H. Falter, U. Guerreschi, A. Peacock, M. Pick, M. Rossi, Y. Shen, F. Zacchia</i>	375
Heat-flux testing of protection tiles in front of a first wall mockup <i>G. Hofmann, E. Diegele, E. Eggert, C. Petersen</i>	379
Heat flux experiments on heat pipes for plasma facing applications <i>H. Bolt, W. Kohlhaas, R. Duwe, A. Gervash, J. Linke, I. Mazul</i>	383
Disruption simulation experiments in a pulsed plasma accelerator - energy absorption and damage evolution on plasma facing materials <i>H. Bolt, V. Barabash, A. Gervash, J. Linke, L.P. Lu, I. Ovchinnikov, M. Rödiger</i>	387
Light emission from graphite surfaces during beam bombardment, observation and consequences for use of graphite in divertors <i>D. Ciric, H.D. Falter, P. Massmann, K.N. Mellon</i>	391
Plasma temperature measurements in disruption simulated experiment <i>N.I. Arkhipov, V.P. Bakhtin, V.M. Safronov, D.A. Toporkov, S.G. Vasenin, H. Würz, A.M. Zhitlukhin</i>	395

First results of laser welding of neutron irradiated stainless steel <i>E.V. van Osch, D.S. d'Hulst, J.G. van der Laan</i>	399
Hydrogen transport parameters in the low activation martensitic steel LA12TaLC <i>S. Alberici, A. Perujo, J. Camposilvan</i>	403
Hydrogen embrittlement of martensitic and austenitic stainless steels for fusion applications <i>G. Benamati, A. Donato, A. Solina, R. Valentini</i>	407
Dynamic fracture toughness evaluation of irradiated 316L stainless steel <i>J. Eysermans, F. Moons, J.L. Puzzolante, J. Van de Velde</i>	411
Neutron diffraction study of residual strains across electron beam welds in AISI 316L stainless steel <i>C. Braham, M. Ceretti, R. Coppola, A. Lodini, F. Rustichelli, S. Tosto</i>	415
Influence of thermocycling heating on bubble swelling of beryllium <i>G.A. Sernyaev, V.R. Barabash, M.N. Chernetsov, A.V. Kozlov</i>	419
Manufacturing and some properties of powder beryllium with high radiation stability <i>I.B. Kupriyanov, V.A. Gorokhov, A.M. Khomutov</i>	423
Deuterium permeation through beryllium with surface element composition control <i>I.L. Tazhibaeva, V.P. Shestakov, E.V. Chikhray, O.G. Romanenko, A.Kh. Klepikov, G.L. Saksaganskiy, Yu.G. Prokofiev, S.N. Mazaev</i>	427
Further developments in the brazing of beryllium to CuCrZr <i>C.M. Ibbott, H.D. Falter, P. Meurer, E. Thompson, M.J. Watson, G. Critchlow, D. Cirić</i>	431
Development and testing of CFC-copper high heat flux elements <i>R. Mitteau, P. Chappuis, P. Deschamps, M. Febvre, J. Schlosser, H. Viallet, G. Vieider</i>	435
Thermomechanical behavior of brazed CFC/TZM composite <i>J.H. You, H. Bolt, G. Breitbach, R. Duwe, J. Linke, R. Lison, H. Nickel</i>	439
Mechanical behaviour of CfC-SEPCARB N 112 at room temperature <i>T. Fett, H. Zimmermann</i>	443
Mechanical properties of Al ₂ O ₃ -dispersed copper and SS316 joints fabricated by friction welding method <i>K. Tsuchiya, H. Kawamura, M. Saito</i>	447
High temperature mechanical properties of unirradiated dispersion strengthened copper <i>J.M. Gentzbittel, C. Rigollet, G. Robert</i>	451

Characterisation of boron carbide coatings for actively cooled plasma facing components <i>M. Lipa, E. Gauthier</i>	455
Fast titanium coating of the GDT first wall <i>A.V. Anikeev, P.A. Bagryansky, E.D. Bender, A.A. Ivanov, A.N. Karpushov, I.V. Shikhovtsev</i>	459
Plasma-material interaction under simulated disruption conditions <i>N.I. Arkhipov, V.P. Bakhtin, V.M. Safronov, D.A. Toporkov, S.G. Vasenin, H. Würz, A.M. Zhitlukhin</i>	463
Visualisation of thermal contact with a commercial CCD video system <i>H.D. Falter, D. Ciric, F.D. Long</i>	467
 Section II - Plasma Heating and Control	
A high power RF plasma source for ASDEX Upgrade Neutral Beam Injection <i>W. Kraus, J.-H. Feist, B. Speth, R. Wilhelm</i>	473
Engineering design of ITER RF systems <i>M. Makowski, G. Bosia, T. Nagashima, D. Remsen</i>	477
Status of the ECRH system of Tore Supra <i>M. Pain, G. Berger-By, G. Bon Mardion, J.M. Bottereau, J.J. Capitain, J.P. Crenn, P. Nouvel, D. Piat, D. Roux, F. Smits</i>	481
Millimetre-wave technology and performance of the 2 MW, 140 GHz ECRH system on the stellerator W7-AS <i>W. Förster, G. Gantenbein, T. Graubner, W. Kasperek, H. Kumric, G.A. Müller, P.G. Schüller, D. Wagner, V. Erckmann, T. Geist</i>	485
Quasi-CW 0.5 MW - 118 GHz Gyrotron for ECRH <i>M. Pain, G. Tonon, T.M. Antonsen Jr., M.Q. Tran, T.M. Tran, D.R. Whaley, E. Borie, C. Grüber, A. Möbius, B. Piosczyk, J. Pretterebner, M. Thumm, A. Wien, A. Dubrovin, P. Garin, E. Giguët, J.-M. Krieg, H.-G. Mathews</i>	489
The 110 GHz ECRH system on the RTP tokamak <i>O.G. Kruijt, J. Allen, W.A. Bongers, G.G. Denisov, A. Kruglov, V.I. Kurbatov, S. Kuyvenhoven, Á.A.M. Oomens, R.W. Polman, P.R. Prins, A. Pylín, F.C. Schüller, M.Yu. Smelyov, A.B. Sterk, A.G.A. Verhoeven, D. Vinogradov, R.M.M. Weijman, RTP-Team</i>	493
Development of advanced high-power 140 GHz gyrotrons for fusion plasma applications <i>M. Kuntze, E. Borie, G. Dammertz, O. Höchtl, C. Iatrou, S. Kern, A. Möbius, H.-U. Nickel, B. Piosczyk, C. Semmlé, M. Thumm, A. Wien</i>	497

Development of high power gyrotron with energy recovery system <i>K. Sakamoto, M. Tsuneoka, A. Kasugai, K. Takahasi, S. Maebara, T. Imai, T. Kariya, Y. Okazaki, K. Hayashi, Y. Mitsunaka, Y. Hirata</i>	501
Conceptual design and thermodynamics study of cryogenically edge cooled windows for ECR plasma heating <i>H.E. Häfner, P. Norajitra, K. Müller, M. Thumm</i>	505
Dielectric measurements on amorphous and monocrystalline quartz grades for EC wave broadband windows <i>R. Heidinger, G. Link</i>	509
Miter bend with movable corrugated waveguides and 62m-straight corrugated waveguide for ECH transmission system <i>K. Ohkubo, S. Kubo, M. Iwase, H. Idei, M. Sato, T. Shimozuma, Y. Takita, T. Kuroda</i>	513
Regulated high voltage power supply for gyrotrons based on pulse step modulator technology <i>G. Besson, J.D. Pahud, M.Q. Tran, W. Schminke, N. Tomljenovic</i>	517
Symmetry breaking in coaxial cavities and its influence on gyrotron operation <i>O. Dumbrajs, A.B. Pavelyev</i>	521
Three-dimensional neutronics analysis for the electron cyclotron wave heating system of ITER <i>U. Fischer, M.E. Sawan</i>	525
The microwave system for ECRH experiments on TJ-1U torsatron <i>R.G. Martin, Yu.V. Bobkov, S.D. Bogdanov, I.A. Ivannikov, L.M. Kovrizhnykh, L.V. Kolik, V.I. Kurbatov, K.M. Likin, N.V. Matveev, A.Ye. Petrov, B.M. Rassadin, K.A. Sarsyan, E.M. Tai</i>	529
ICRF heating during DT experiments on TFTR-system improvements and results <i>J.R. Wilson, J.C. Hosea, P. Larue, R. Majeski, C.K. Phillips, J. Rogers, G. Schilling, R. Sorenson, J. Stevens, G. Taylor and the TFTR Group</i>	533
ICRF heating and H-mode; operational experience and results at ASDEX-Upgrade <i>F. Wesner, F. Braun, F. Hofmeister, J.M. Noterdaeme, Th. Sperger</i>	537
ICRH antennae system for the JET pumped divertor <i>P. Crawley, G. Agarici, T. Brown, C. Gormezano, G. Jessop, A. Kaye, H. Panissie, R. Walton</i>	541
Matching of Tore Supra ICRH antennas <i>L. Ladurelle, B. Beaumont, H. Kuus, G. Lombard</i>	545

Design and power test of a new hybrid RF generator composed of a tetrode and a solid-state driver for ICRH <i>S. Moriyama, T. Fujii, H. Kimura, M. Saigusa, T. Yamamoto, S. Maebara, Y. Ogawa, H. Okutsu, N. Kobayashi</i>	549
2x2 MW ICRH amplifier system <i>Ch. Imboden, W. Schminke, J. Wyss</i>	553
Outgassing studies of lower hybrid antenna module during CW high RF power injection <i>M. Goniche, J. Brossaud, G. Berger-By, Ph. Bibet, S. Poli, G. Rey, G. Tonon, M. Seki, K. Obara, S. Maebara, Y. Ikeda, T. Imai, T. Nagashima</i>	557
Development of high RF efficiency 5 GHz Klystron for LHRF system in next Tokamak machine <i>S. Maebara, T. Imai, T. Nagashima, S. Itoh, K. Tetsuka, S. Miyake, H. Yonezawa, K. Ohya</i>	561
Conceptual study of a reflector array for launching lower hybrid waves in reactor-grade plasmas <i>Ph. Bibet, X. Litaudon, D. Moreau</i>	565
LHCD operations in JET and developments for fusion applications <i>P. Froissard, G. Agarici, Y. Baranov, M. Brandon, M. Brusati, J.A. Dobbing, A. Ekedahl, P. Finburg, B. Fischer, C. Gormezano, P. Haydon, A. Kaye, M. Lennholm, T. McCarthy, R. Page, P. Paling, G. Platt, D. Pledge, J. Plancoulaine, F. Rimini, P. Schild, F.X. Söldner</i>	569
4 MW fast wave current drive upgrade for DIII-D <i>R.W. Callis, F.W. Baity, W.P. Cary, J.S. deGrassie, S.W. Ferguson, D.J. Hoffman, R.C. O'Neill, C.C. Petty, D.R. Phelps, R.I. Pinsker, D.B. Remsen, D.J. Taylor</i>	573
Experimental and theoretical results concerning the development of the main RF components for next Tore Supra LHCD antennae <i>Ph. Bibet, T.K. Nguyen, J. Achard, G. Berger-By, S. Berio, M. Goniche, G. Rey, G. Tonon</i>	577
The 3.7 GHz LHCD system on the TdeV tokamak <i>G.-A. Chaudron, Y. Demers, J. Bagdoo, R. Decoste, A. Dubé, P. Garcia, V. Glaude, J.-M. Guay, D. Larose, P. Jacquet, R. Magne, R. Mireault, A. Robert, C. Trudel, L. Vachon</i>	581
Design and commissioning of the TdeV launcher <i>R. Mireault, Y. Demers, J. Bagdoo, P. Brooker, G.-A. Chaudron, R. Décoste, A. Dubé, V. Glaude, F. Guerdain, A. Hubbard, P. Jacquet, A. Robert, M. St-Onge, J.-F. Thériault, L. Vachon</i>	585
Technical aspects and status of the FOM Fusion FEM <i>A.B. Sterk, A.G.A. Verhoeven, A. Verheul, A. Krasnykh, W.H. Urbanus</i>	589

Performance of the first ASDEX Upgrade neutral beam injector <i>A. Stäbler, O. Vollmer, J.H. Feist, E. Speth, B. Heinemann, W. Melkus, S. Obermayer, R. Riedl, W. Schärich, K. Wittenbecher</i>	593
Space charge effects in the ion removal system of the ASDEX Upgrade Injector <i>E. Speth, J.-H. Feist, J. Sielanko</i>	597
Diagnostic neutral beam injector for TEXTOR 94 <i>G.F. Abdrashitov, E.D. Bender, V.I. Davidenko, P.P. Deichuli, A.A. Ivanov, A.N. Karpushov, V.A. Feller, A.I. Rogozin, I.V. Shichovtsev, B. Schweer</i>	601
Description of the Mantis test bed and preliminary results on the Dragon negative ion source <i>G. Mayaux, D. Chatain, R. Hemsworth, A. Holmes, C. Jacquot, J.Y. Journeaux, J. Pamela, D. Riz</i>	605
Development of a high-efficient negative ion source for NBI system in large helical device <i>Y. Takeiri, A. Ando, O. Kaneko, Y. Oka, K. Tsumori, T. Takanashi, R. Akiyama, E. Asano, T. Kawamoto, M. Tanaka, H. Kawakami, T. Okuyama, Y. Suzuki, T. Kuroda</i>	609
Results from preliminary experiments of the 1 MeV 0.1 A D ⁻ project at CEA-Cadarache <i>A. Simonin, M. Fumelli, F. Jequier, J. Paméla, J. Bucalossi, J.-M. Bottereau, R. Brugnetti</i>	613
A 1 MeV, 1 A negative ion accelerator test facility <i>M. Hanada, M. Dairaku, T. Inoue, K. Miyamoto, Y. Ohara, Y. Okumura, K. Watanabe, K. Yokoyama</i>	617
Negative-ion based neutral beam injector for JT-60U <i>M. Kuriyama, N. Akino, T. Aoyagi, M. Araki, N. Ebisawa, M. Hanada, A. Honda, T. Inoue, T. Itoh, M. Kawai, M. Kazawa, J. Koizumi, T. Kunieda, M. Matsuoka, K. Miyamoto, K. Mogaki, Y. Ohara, T. Ohga, Y. Okumura, H. Oohara, F. Satoh, T. Suzuki, S. Takahashi, T. Takayasu, H. Usami, K. Usui, K. Watanabe, M. Yamamoto, T. Yamazaki, Y. Ono, S. Kawashima</i>	621
Development of a 400 KeV multi-stage electrostatic accelerator for neutral beam injectors <i>K. Miyamoto, M. Hanada, T. Inoue, N. Miyamoto, A. Nagase, Y. Ohara, Y. Okumura, K. Watanabe</i>	625
Outline design of a neutral beam injector for ITER EDA <i>J. Paméla, R. Hemsworth, J. Feist, M. Fumelli, B. Heinemann, C. Jacquot, F. Jequier, M. Lochter, S. Martin, M. Nightingale, J. Sielanko, A. Simonin, C. Speniak, E. Speth, N. Taylor, E. Thompson, M. Watson</i>	629
Magnetic shielding considerations for the ITER neutral beam injectors <i>J.-H. Feist, B. Heinemann, J. Sielanko, E. Speth</i>	633

Pellet injector research and development at ORNL <i>S.K. Combs, G.C. Barber, L.R. Baylor, G.R. Dyer, P.W. Fisher, D.T. Fehling, C.A. Foster, C.R. Foust, M.J. Gouge, T.C. Jernigan, S.L. Milora, A.L. Qualls, D.E. Schechter, D.O. Sparks, C.C. Tsai, A. Frattolillo, S. Migliori, F. Scaramuzzi, M. Capobianchi, C. Domma, G. Ronci</i>	637
A centrifuge for high-speed pellet injection <i>P.T. Lang, M. Alexander, C. Andelfinger, P. Cierpka, R.S. Lang, V. Mertens</i>	641
3400 m/s deuterium pellet injector for Tore Supra <i>J.P. Perin, A. Géraud</i>	645
High speed pellet injection system HIPEL for large helical device <i>S. Sudo, M. Kanno, H. Kaneko, H. Yamada</i>	649
Compact gas gun injector for differently sized solid pellets <i>P.T. Lang, P. Cierpka, S.M. Egorov, B.V. Kuteev, R.S. Lang, V. Mertens, P.V. Reznichenko, V.Yu. Sergeev</i>	653
Development of a device to produce double layer pellet <i>H. Itoh, S. Sudo</i>	657
Development of repetitive railgun pellet accelerator and steady-state solid hydrogen extruder <i>Y. Oda, K. Azuma, M. Onozuka, S. Kasai, K. Hasegawa</i>	661
A one hertz continuous pellet generator for controlled fusion application <i>G. Claudet, F. Disdier, J.P. Périn</i>	665
Section III - Experimental Systems	
The Tore Supra control computer system: six years of operation and improvements <i>J.Y. Journeaux, O. Badie, E. Chatelier, F. Hennion, P. Lebourg, P. Levèque, M. Hernandez, D. Moulin</i>	671
An enhanced plasma control for ASDEX upgrade <i>G. Neu, C. Aubanel, V. Mertens, G. Raupp, H. Richter, D. Zasche, T. Zehetbauer</i>	675
Protection strategy in the ASDEX Upgrade control system <i>G. Raupp, O. Gruber, V. Mertens, G. Neu, H. Richter, B. Streibl, W. Treutterer, W. Woyke, D. Zasche, T. Zehetbauer</i>	679
Improved CAMAC modules for the timing system of the TEXTOR tokamak experiment <i>W. Becker, G. Brandenburg, M. Korten, U. Schaufert</i>	683

Control system for the Spanish stellarator TJ-II <i>L. Pacios, M. Blaumoser, A. de al Peña, R. Carrasco, I. Labrador, F. Lapayese, J.C. Díaz, L. Martinez Laso</i>	687
DSP application to fast parallel processing in JT-60U plasma control <i>T. Kimura, Y. Kawamata, K. Akiba</i>	691
A combined divertor and bulk plasma density control system <i>M. Gadeberg, P. Andrew, T. Budd, T. Hartrampf, J. How, H.S. Jensen, A. Peacock</i>	695
Introduction of the EISA-PC into existing fusion experiments <i>W. Tenten, G. Bertschinger, K.D. Müller, P. Reinhart, F. Rongen</i>	699
Analysis of experimental performance and robust stability of vertical position on the COMPASS-D tokamak <i>P. Vyas, A.W. Morris, D. Mustafa</i>	703
Vertical instability in non-circular deformable plasmas <i>C. Rita, M. Roccella, M. Nassi, S. Graziadei</i>	707
Positional drift of tokamak plasmas <i>S. Brémond, J.M. Ané, B. Bareyt, E. Boisseau, F. Collédani, C. Leloup, F. Parlange</i>	711
Development of compact toroids injector for direct plasma controls <i>K. Azuma, Y. Oda, M. Onozuka, T. Uyama, M. Nagata, N. Fukumoto</i>	715
Operating points and feedback control of plasma characteristics in tokamaks with full current drive <i>D.W. Swain, S.E. Attenberger, P.T. Bonoli, W.A. Houlberg, W.M. Nevins</i>	719
Ripple reduction with magnetic inserts and saddle coils <i>J.M. Ané</i>	723
Study on high Tc superconducting ripple reducer <i>T. Uchimoto, K. Miya, Y. Yoshida</i>	727
Design of a plasma shape and stability control system for advanced tokamaks <i>D.A. Humphreys, R.H. Bulmer, S.W. Haney, A.G. Kellman, J.A. Leuer, L.D. Pearlstein, A. Portone</i>	731
Breakdown analysis of tokamak plasma by 2D computer simulations <i>M. Ichikawa, H. Tsutsui, R. Shimada</i>	735
Beta normal control of TFTR using fuzzy logic <i>J.E. Lawson, M.G. Bell, R.J. Marsala, D. Mueller</i>	739

A real time plasma boundary determination and display system using transputers <i>J. Ellis, E. van der Goot, D.P. O'Brien</i>	743
First operational experience with the new plasma position and current control system of JET <i>M. Garribba, M.L. Browne, D.J. Campbell, Z. Hudson, R. Litunovsky, V. Marchese, F. Milani, J. Mills, P. Noll, S. Puppini, F. Satori, L. Scibile, A. Tanga, I. Young</i>	747
Neutron radiation testing of JET in-vessel inspection system components <i>G. Sordon, G.P. Tartaglia, T. Businaro</i>	751
Modification of the JET vacuum vessel support and restraint systems <i>G. Sannazzaro, G. Celentano, A. Miller, T. Raimondi, S. Saunders, J. Tait, J. van Veen, M. Wykes</i>	755
Machine performance and its effects on experiments in JT-60U <i>I. Kondo, JT-60 Team</i>	759
Overview of the JT-60 super upgrade design <i>H. Ninomiya, T. Aoyagi, Y. Ikeda, Y. Kamada, M. Kikuchi, G. Kurita, M. Kuriyama, N. Miya, K. Nagashima, K. Nakagawa, S. Nakajima, S. Oguri, A. Sakasai, Y. Takahashi, T. Takizuka, N. Toyoshima, K. Ushigusa, S. Nakagawa, K. Nakashima, M. Otsuka</i>	763
Assembly and dimensional control of the Spanish stellarator TJ-II <i>A.A. Martínez, M. Blaumoser, R. Perez, J. Fernandez, J. Laulom</i>	767
Fabrication of the vacuum vessel of the Spanish stellarator TJ-II <i>J. Botija, M. Blaumoser, E. de la Cal, A. García, F. Tabarés, L. Molleta, D. Rigadello, S. Dal Maso, G. Bevilacqua</i>	771
The Pisces-Upgrade facility for fusion plasma-materials interactions research <i>R. Doerner, R.W. Conn, D. Phelps, L.M. Waganer</i>	775
Calibration and operation of the magnetic measurements of RFX <i>P.P. Campostrini, G. Chitarin, N. Pomaro, F. Trevisan</i>	779
The Ignitor machine: construction of prototypes <i>F. Carpignano, B. Coppi, M. Nassi, Ignitor Project Group</i>	783
Manufacturing and testing of prototypes of the IGNITOR machine <i>A. Cucchiaro, G. Ghia, G. Munaro, A. Pizzuto, L. Zucchi</i>	787
ITER vacuum vessel dynamic stress analysis of a disruption <i>B.W. Riemer, D.L. Conner, D.J. Strickler, D.E. Williamson</i>	791

A neutral network technique for the selection of the number and location of the magnetic sensors for plasma shape reconstruction in ITER <i>E. Coccorese, P.J. McCarthy, F.C. Morabito</i>	795
MAST: A Mega Amp Spherical Tokamak <i>A.C. Darke, J.R. Harbar, J.H. Hay, J.B. Hicks, J.W. Hill, J.S. McKenzie, A.W. Morris, M.P.S. Nightingale, T.N. Todd, G.M. Voss, J.R. Watkins</i>	799
Development of electrical insulation and conduction coating for fusion experimental devices <i>M. Onozuka, S. Tsujimura, M. Toyoda, M. Inoue, T. Abe, Y. Murakami</i>	803
Plasma engineering and electromagnetic aspects in ITER design <i>R. Albanese, G. Ambrosino, L. Bottura, E. Coccorese, A. Formisano, R. Fresa, F. Garofalo, C. Morabito, A. Pironti, R. Martone, G. Rubinacci, S. Scala, S. Ventre</i>	807
The engineering design of the Tokamak Physics Experiment (TPX) <i>W.T. Reiersen, TPX Project Team</i>	811
Engineering a new compact soft X-ray diagnostic on JET <i>S.F. Dillon, B. Alper, A. Edwards, R.D. Gill, S.A.B. Staunton-Lambert, D. Wilson</i>	815
Antennas and waveguides for the JET pumped divertor microwave diagnostics <i>P.C.S. Prior, D.V. Bartlett, R. Prentice, R.J. Smith, X. Tellier</i>	819
The engineering of JET diagnostics <i>C.I. Walker, S.F. Dillon, N.P. Hammond, C.J. Hancock, N. Lam, E.J. McCarron, P.C.S. Prior, J. Reid, S. Sanders, X. Tellier, A.J. Tiscornia, G.A.H. Whitfield, C.H. Wilson, D.J. Wilson</i>	823
Beam profiles measurement using a unidirectional CFC-target and infrared imaging <i>D. Ciric, H.D. Falter, J.G.A. Fanthome, P. Massmann, K.N. Mellon</i>	827
Specialized mass spectrometers for analyses of hydrogen-helium mixtures in tritium thermonuclear systems <i>Y.A. Mileshkin, N. N. Riazantseva</i>	831
A scalable data acquisition system for superconducting coil experiment <i>H. Okumura, S. Yamaguchi, Y. Teramachi, J. Kariya, T. Ohsaka, Y. Tanahashi, T. Senba, N. Yanagi, Y. Yamazaki, J. Yamamoto, O. Motojima</i>	835
The control and data acquisition system for reflectometry on ASDEX-Upgrade <i>C. Loureiro, J. Santos, A. Silva, P. Varela, L. Cupido, C. Correia, F. Sera, M. Manso, P. Heimann, G. Schramm, M. Zilker</i>	839
