

CONTENTS

Introduction	1
Discussion Session - PLASMA MODELING Chairman: R.J. Bickerton	5
Discussion Session - TECHNOLOGY AND SYSTEMS Chairman: J.B. Adams	9
Discussion Session - INTERNATIONAL COLLABORATION Chairman: C. Salvetti	15
Annex 1	29
PHYSICS	
Plasma-Wall Interactions R. BEHRISCH	37
Computer Predictions for Future Tokamaks D.F. DUECHS	73
Numerical Studies of Impurity Phenomena D.F. DUECHS, R. BEHRISCH	75
Computer Studies D.F. DUECHS	77
Review of Experimental Results I and II H.P. FURTH	79
MHD Equilibrium and Stability D. PFIRSCH	125
Magnetic Divertors M. KEILHACKER	171
TOKAMAK DEVICES	
The "FINTOR 1" Design - a Minimum Size Tokamak Experimental Reactor E. BERTOLINI	201
Philosophy and Physics of Predemonstration Fusion Devices J.F. CLARKE	239
Compact Experiments for α -Particle Heating B. COPPI	303
JET and the Large Tokamak Experiments P.H. REBUT	327
TECHNOLOGY	
Fuel Technology and the Environment J. DARVAS	331

TECHNOLOGY (cont.)

Superconducting Magnets - A. Some Fundamentals and their State of the Art W. HEINZ	359
Superconducting Magnets - B. Systems in EPR Designs A.F. KNOBLOCH	389
Materials Problems and Possible Solutions for Near Term Tokamak Fusion Reactors G.L. KULCINSKI	449
Energy Sources and Conventional Magnets K.I. SELIN	485
Auxiliary Heating in Breakeven Tokamaks J. SHEFFIELD	511
The Impact of Servicing Requirements on Tokamak Fusion Reactor Design J.T.D. MITCHELL	559

STRATEGY

Fusion Power by Magnetic Confinement - Program Plan S.O. DEAN	577
Possible Options and Strategy of the European Tokamak Programme G. GRIEGER	611
Status on Potential of Advanced Fission Reactors C.P. L-ZALESKI	617

LIST OF PARTICIPANTS	641
----------------------	-----

SUBJECT INDEX	643
