

CONTENTS OF VOLUME 2

MAGNETIC CONFINEMENT THEORY AND MODELLING (Session D)

Nonlinear kinetic analysis of fluctuations and turbulent transport due to tokamak microinstabilities (IAEA-CN-53/D-I-1)	3
<i>T.S. Hahm et al.</i>	
Developments in the theory of trapped particle pressure gradient driven turbulence in tokamaks and stellarators (IAEA-CN-53/D-I-2)	9
<i>P.H. Diamond et al.</i>	
Discussion	29
Comparison of simulations and theory of low-frequency plasma turbulence (IAEA-CN-53/D-I-3)	31
<i>L.L. LoDestro et al.</i>	
Self-consistent magnetic chaos induced by electron temperature gradient (IAEA-CN-53/D-I-4)	45
<i>M. Hugon and P.H. Rebut</i>	
Discussion	56
Energy confinement and the coupling of transport processes with MHD modes (IAEA-CN-53/D-I-5)	59
<i>Cheng Zhang et al.</i>	
Enhanced particle and heat transport due to helicity transport (IAEA-CN-53/D-I-6)	69
<i>Z. Yoshida and A. Hasegawa</i>	
Discussion	77
Sawtooth reconnection (IAEA-CN-53/D-I-7)	79
<i>J.A. Wesson</i>	
Discussion	85
Ideal MHD stability of very high beta tokamaks (IAEA-CN-53/D-II-1)	87
<i>M.S. Chance et al.</i>	
Discussion	99
Influence of triangularity and pressure profiles on ideal-MHD beta limits (IAEA-CN-53/D-II-2)	101
<i>G. Schultz et al.</i>	
Discussion	106
Tearing and resistive ballooning modes in tokamaks (IAEA-CN-53/D-II-3) ..	107
<i>J.W. Connor et al.</i>	
Discussion	112

2/1 tearing mode stabilization with local current drive (IAEA-CN-53/D-II-4)	113	The effect of neutral particles on the dissipative drift instability in the edge plasma of tokamaks (IAEA-CN-53/D-IV-3)	239
<i>L.E. Zakharov et al.</i>		<i>D.Kh. Morozov et al.</i>	
3-D MHD studies of sawtooth oscillations and pressure driven resistive modes in tokamaks (IAEA-CN-53/D-II-5)	121	MARFES, radiative condensation and ballooning instabilities in tokamaks (IAEA-CN-53/D-IV-4)	247
<i>W. Park et al.</i>		<i>A. Agarwal et al.</i>	
Discussion	131	Theoretical interpretation of edge fluctuation experiments in Alcator (IAEA-CN-53/D-IV-5)	257
MHD modes in rotating tokamak plasmas (IAEA-CN-53/D-II-6)	133	<i>Xiaoming Qiu and Shuanghui Hu</i>	
<i>H.J. De Blank et al.</i>		Predictive modelling of tokamak plasmas (IAEA-CN-53/D-IV-6)	265
Discussion	142	<i>C.E. Singer et al.</i>	
Equilibrium beta limit and anomalous transport studies of helical systems (IAEA-CN-53/D-III-1)	143	Tokamak ignition projections from dimensionally similar discharges (IAEA-CN-53/D-IV-7)	273
<i>T. Hayashi et al.</i>		<i>R.E. Waltz et al.</i>	
Discussion	150	Three-dimensional particle simulation study on stabilization of the FRC tilting instability (IAEA-CN-53/D-IV-8)	283
Hollow density and temperature profiles in stellarators and analysis of their stability, and transition particle diffusion in stellarators (IAEA-CN-53/D-III-2)	151	<i>R. Horiuchi et al.</i>	
<i>L.M. Kovrizhnykh et al.</i>		Instability effects caused by conducting end walls in a plasma on open field lines (IAEA-CN-53/D-IV-9)	289
Discussion	167	<i>H.L. Berk et al.</i>	
Advances in reversed field pinch theory and computation (IAEA-CN-53/D-III-3)	169	Problems of global plasma column equilibrium in stellarators (IAEA-CN-53/D-IV-10)	301
<i>P.W. Terry et al.</i>		<i>V.D. Pustovitov</i>	
Discussion	180	Spontaneous poloidal spin-up of tokamaks and the transition to H-mode (IAEA-CN-53/D-IV-11)	311
Simulation study of the non-linear dynamics in a reversed field pinch configuration (IAEA-CN-53/D-III-4)	181	<i>A.B. Hassam et al.</i>	
<i>K. Kusano et al.</i>		Modelling of improved confinement — Peaked profile modes and H-mode (IAEA-CN-53/D-IV-12)	321
Discussion	190	<i>S.I. Itoh and K. Itoh</i>	
Influence of sheared E×B rotation on edge turbulence dynamics and access to enhanced confinement regimes (IAEA-CN-53/D-III-5)	191	Tokamak fluidlike equations, with applications to turbulence and transport in H-mode discharges (IAEA-CN-53/D-IV-13)	327
<i>H. Biglari et al.</i>		<i>Y.-B. Kim et al.</i>	
Discussion	207	Current density transport, confinement and fusion burn conditions (IAEA-CN-53/D-IV-14)	337
Alpha particle effects on global MHD modes, and alpha particle transport in ignited tokamaks (IAEA-CN-53/D-III-6)	209	<i>B. Coppi et al.</i>	
<i>C.Z. Cheng et al.</i>		Effect of low energy ions and neutrals on tokamak transport (IAEA-CN-53/D-IV-15)	351
Discussion	217	<i>A.A. Ware et al.</i>	
MHD stability limits of tokamak plasmas obeying neoclassical Ohm's law, and radiative thermal instabilities in tokamaks (IAEA-CN-53/D-IV-1)	219	Novel computational techniques to predict transport in confinement devices, and applications to ion temperature gradient driven turbulence (IAEA-CN-53/D-IV-16)	361
<i>S. Tokuda et al.</i>		<i>M. Kotschenreuther et al.</i>	
Mechanisms underlying sawtooth precursors, relaxations and ramp phases (IAEA-CN-53/D-IV-2)	231		
<i>A. Rogister et al.</i>			

Models of energy transport based on microinstability theory (IAEA-CN-53/D-IV-17)	367
<i>E. Barbato et al.</i>	
Control of alpha particle transport by ICRH in a tokamak (IAEA-CN-53/D-IV-18)	377
<i>C.S. Chang et al.</i>	
Suppression and control of magnetic islands in toroidal plasmas (IAEA-CN-53/D-IV-19)	383
<i>C.C. Hegna et al.</i>	
Investigation of transport processes near the density limit (IAEA-CN-53/D-IV-20)	393
<i>Yu.N. Dnestrovskij et al.</i>	
Anomalous electron thermal diffusivity, anomalous particle pinch and isotope effect due to skin size electromagnetic drift mode (IAEA-CN-53/D-IV-21)	403
<i>A. Hirose et al.</i>	
The isotopic effect on plasma confinement (IAEA-CN-53/D-IV-22)	413
<i>B. Coppi</i>	
 NON-TOKAMAK CONFINEMENT SYSTEMS (Session C)	
Confinement improvement in ECH and NBI heated Heliotron E plasmas (IAEA-CN-53/C-I-1)	425
<i>T. Obiki et al.</i>	
Discussion	438
Confinement properties of the 'Advanced Stellarator' Wendelstein W VII-AS (IAEA-CN-53/C-I-2)	439
<i>H. Renner et al.</i>	
Discussion	453
Energy confinement and bootstrap current studies in the Advanced Toroidal Facility (IAEA-CN-53/C-I-3)	455
<i>M. Murakami et al.</i>	
Discussion	470
Confinement characteristics of high power heated plasma in CHS (IAEA-CN-53/C-I-4)	473
<i>O. Kaneko et al.</i>	
First experimental results on the Uragan-3M torsatron (IAEA-CN-53/C-I-5)	483
<i>S.P. Bondarenko et al.</i>	
Plasma relaxation heating and transport in reversed field pinches (IAEA-CN-53/C-II-1-1)	493
<i>V. Antoni et al.</i>	

Stability and ion dynamics in a reversed field pinch plasma (IAEA-CN-53/C-II-1-2)	503
<i>P.G. Carolan et al.</i>	
Confinement studies in the ZT-40M reversed field pinch (IAEA-CN-53/C-II-2-1)	509
<i>P.G. Weber et al.</i>	
Discussion	517
Confinement and fluctuations in the MST reversed field pinch (IAEA-CN-53/C-II-2-2)	519
<i>J.C. Sprott et al.</i>	
Anomaly of ion temperature in the reversed field pinch and ultralow Q plasmas of REPUTE-1 and 1Q (IAEA-CN-53/C-II-3-1)	525
<i>K. Miyamoto et al.</i>	
ULQ operation and transition to RFP in Extrap T1 with a resistive shell (IAEA-CN-53/C-II-3-2)	533
<i>P. Brunsell et al.</i>	
Development of tandem mirror experiments in GAMMA 10 (IAEA-CN-53/C-II-4)	539
<i>S. Miyoshi et al.</i>	
Discussion	546
Studies of plasma heating by relativistic electron beams in long solenoids (IAEA-CN-53/C-II-5)	547
<i>A.V. Arzhannikov et al.</i>	
Electron cyclotron current drive and wave absorption experiments in the W VII-AS stellarator (IAEA-CN-53/C-III-1)	555
<i>V. Erckmann et al.</i>	
Discussion	565
Stabilization of the interchange modes by a magnetic axis shift and a toroidal field in Heliotron E, and a new low-n mode stability analysis (IAEA-CN-53/C-III-2)	567
<i>M. Wakatani et al.</i>	
Comparison of toroidal/poloidal rotation in CHS heliotron/torsatron and JIPPT-IIU tokamak (IAEA-CN-53/C-III-3)	577
<i>K. Ida et al.</i>	
Discussion	587
Comparative studies of edge turbulence in the TEXT tokamak and the ATF stellarator (IAEA-CN-53/C-III-4)	589
<i>C.P. Ritz et al.</i>	
Discussion	602
Optimization, MHD mode and alpha particle confinement behaviour of Helias equilibria (IAEA-CN-53/C-III-5)	603
<i>W. Lotz et al.</i>	

Ideal stability studies for three and four period flexible heliacs (IAEA-CN-53/C-IV-1)	613
<i>C. Alejaldre et al.</i>	
Equilibrium properties and approach to high magnetic field in a spheromak (IAEA-CN-53/C-IV-2-1)	621
<i>T. Uyama et al.</i>	
Experimental investigation of the effects of helicity on magnetic reconnection (IAEA-CN-53/C-IV-2-2)	631
<i>M. Yamada et al.</i>	
Experiments on the MM-4U, MM-2 and HER mirrors (IAEA-CN-53/C-IV-3)	639
<i>Biao Gu et al.</i>	
Tilt stability and compression heating studies of field-reversed configurations (IAEA-CN-53/C-IV-4)	647
<i>D.J. Rej et al.</i>	
Experimental MHD stability limit in the gas dynamic trap (IAEA-CN-53/C-IV-5)	655
<i>P.A. Bagryanskij et al.</i>	
Physics studies for the URAGAN-2M torsatron (IAEA-CN-53/C-IV-6)	663
<i>C.D. Beidler et al.</i>	
Fluctuations and stability in the ATF torsatron (IAEA-CN-53/C-IV-7)	677
<i>J.H. Harris et al.</i>	
Impurity effects and impurity transport in ATF (IAEA-CN-53/C-IV-8)	685
<i>R.C. Isler et al.</i>	
Current free plasma heating in the L-2 stellarator at the second harmonic of the electron cyclotron frequency (IAEA-CN-53/C-IV-9)	693
<i>D.K. Akulina et al.</i>	
Two-dimensional density structures and the effects of external biasing on potential and density fluctuations in the interchangeable module stellarator (IAEA-CN-53/C-IV-10)	703
<i>B.J. Peterson et al.</i>	
Physics studies on helical confinement configurations with $\ell = 2$ continuous coil systems (IAEA-CN-53/C-IV-11)	709
<i>K. Yamazaki et al.</i>	
MHD and kinetic dynamo activities and confinement in the reversed field pinch experiment on TPE-1RM15 (IAEA-CN-53/C-IV-12)	717
<i>Y. Hirano et al.</i>	
Heating, potential formation and barrier pumping using mode controlled ICRF in the HIEI tandem mirror (IAEA-CN-53/C-IV-13)	725
<i>Y. Yasaka et al.</i>	
Suppression of rotational instability in FRC by an axial current (IAEA-CN-53/C-IV-14)	731
<i>T. Ishimura et al.</i>	
Some physical consequences of magnetic insulation in a Compact Torus (IAEA-CN-53/C-IV-15)	739
<i>B.B. Bogdanov et al.</i>	
OGRA-4K experimental results (IAEA-CN-53/C-IV-16)	747
<i>M.I. Belavin et al.</i>	
Interpretation of experiments with Z pinches (IAEA-CN-53/C-IV-17)	757
<i>K.L. Kulyabin and V.V. Yan'kov</i>	
Production and identification of the ion temperature gradient instability (IAEA-CN-53/C-IV-18)	763
<i>A.K. Sen et al.</i>	
The fusion related dense Z-pinch programme at Imperial College (IAEA-CN-53/C-IV-19)	769
<i>M.G. Haines et al.</i>	
Free boundary ideal magnetohydrodynamic stability of three-dimensional stellarators (IAEA-CN-53/C-IV-20)	793
<i>W.A. Cooper et al.</i>	
Chairmen of Sessions and Secretariat of the Conference	809
