

· CONTENTS OF VOLUME 3

INERTIAL CONFINEMENT FUSION (Session B)

Inertial confinement fusion with light ion beams (IAEA-CN-53/B-I-1)	3
<i>J.P. Vandevender et al.</i>	
Discussion	13
ICF and laser programme at CEL-V (IAEA-CN-53/B-I-2)	15
<i>M. André et al.</i>	
Discussion	26
Six hundred times solid density compression of directly driven hollow shell pellets (IAEA-CN-53/B-I-3)	29
<i>S. Nakai et al.</i>	
Discussion	39
Direct-drive implosion experiments at the Laboratory for Laser Energetics (IAEA-CN-53/B-I-4)	41
<i>R.L. McCrory et al.</i>	
Discussion	51
Linear and non-linear stages of Rayleigh-Taylor instability in laser driven implosion (IAEA-CN-53/B-I-5)	53
<i>H. Takabe et al.</i>	
Discussion	63
Inertial confinement fusion research at the SERC Central Laser Facility, United Kingdom (IAEA-CN-53/B-I-6)	65
<i>O. Willi et al.</i>	
Discussion	80
Heat wave and radiation confinement in laser heated cavities (IAEA-CN-53/B-II-1)	81
<i>R. Sigel et al.</i>	
Discussion	87
Cannonball target implosion experiments with blue GEKKO-XII laser (IAEA-CN-53/B-II-2)	89
<i>Y. Kato et al.</i>	
Discussion	97
The LLNL ICF programme: Progress toward ignition in the laboratory (IAEA-CN-53/B-II-3)	99
<i>E. Storm et al.</i>	
Discussion	111
Progress in inertial confinement fusion target physics and computational simulation at DENIM, Spain (IAEA-CN-53/B-II-4)	113
<i>G. Velarde et al.</i>	

Development of the high power KrF laser Ashura and target shooting experiments (IAEA-CN-53/B-II-5)	119
<i>K. Koyama et al.</i>	
Discussion	124
Recent studies in the Los Alamos KrF laser fusion program (IAEA-CN-53/B-II-6)	125
<i>D.C. Cartwright et al.</i>	
Discussion	133
Light ion beam fusion research at ILE, Osaka University (IAEA-CN-53/B-III-1)	135
<i>S. Miyamoto et al.</i>	
Two-dimensional electron flow in pulsed power transmission lines and plasma opening switches (IAEA-CN-53/B-III-2)	143
<i>B.W. Church et al.</i>	
NIKE KrF laser development for direct drive laser fusion (IAEA-CN-53/B-III-3)	153
<i>S. Obenschain et al.</i>	
A current prediction of the ICF gain curve, its uncertainties, and implications for ICF strategy (IAEA-CN-53/B-III-4)	159
<i>W.C. Mead et al.</i>	
Pellet and reactor chamber designs for high gain laser fusion (IAEA-CN-53/B-III-5)	165
<i>K. Mima et al.</i>	
Limitations of the pellet fusion conditions for clean fuel (IAEA-CN-53/B-III-7)	177
<i>G.H. Miley et al.</i>	
Dynamics of alpha particles in magnetically insulated, inertially confined plasmas (IAEA-CN-53/B-III-8)	189
<i>T. Kamash, D.L. Galbraith</i>	

INTERNATIONAL THERMONUCLEAR EXPERIMENTAL REACTOR (ITER) (Session F)

ITER ad astra (IAEA-CN-53/F-I-0)	197
<i>J.F. Clarke</i>	
ITER: Conceptual design (IAEA-CN-53/F-I-1)	217
<i>K. Tomabechi</i>	
Discussion	222
ITER: Design overview (IAEA-CN-53/F-I-2)	225
<i>R. Toschi</i>	
Discussion	236

ITER: Physics basis (IAEA-CN-53/F-I-3)	239
<i>D.E. Post</i>	
Discussion	253
ITER: Engineering basis (IAEA-CN-53/F-I-4)	257
<i>E. Salpietro</i>	
Discussion	269
ITER: Operation scenario (IAEA-CN-53/F-II-1)	271
<i>Y. Shimomura</i>	
Discussion	279
ITER: Nuclear engineering (IAEA-CN-53/F-II-2)	281
<i>C. Baker</i>	
Discussion	286
ITER: Test programme (IAEA-CN-53/F-II-3)	287
<i>M. Abdou</i>	
ITER: Safety aspects (IAEA-CN-53/F-II-4)	293
<i>H. Iida</i>	
Discussion	298
ITER Scientific and Technical Advisory Committee (ISTAC):	
Review of ITER related R&D plans (IAEA-CN-53/F-II-5)	301
<i>B.B. Kadomtsev</i>	
Discussion	305
Energy and particle confinement in ITER (IAEA-CN-53/F-III-1)	307
<i>N.A. Uckan et al.</i>	
Operational limits and disruptions in ITER (IAEA-CN-53/F-III-2)	315
<i>T. Tsunematsu et al.</i>	
Power and particle control for ITER (IAEA-CN-53/F-III-3)	321
<i>S.A. Cohen et al.</i>	
ITER current drive and heating physics (IAEA-CN-53/F-III-4)	331
<i>W.M. Nevins et al.</i>	
ITER current drive and heating systems (IAEA-CN-53/F-III-5)	337
<i>W. Lindquist et al.</i>	
Plasma operation control in ITER (IAEA-CN-53/F-III-6)	343
<i>K. Borrass et al.</i>	
ITER: Superconducting magnet systems (IAEA-CN-53/F-III-7)	351
<i>J.R. Miller et al.</i>	
ITER: Basic machine layout (IAEA-CN-53/F-III-8)	359
<i>F. Casci</i>	
ITER: Remote maintenance (IAEA-CN-53/F-III-9)	365
<i>T. Honda et al.</i>	
ITER: Transient electromagnetics (IAEA-CN-53/F-III-10)	371
<i>L. Bottura et al.</i>	
ITER: Tritium breeding blanket (IAEA-CN-53/F-III-11)	379
<i>D. Smith et al.</i>	

Plasma facing components in ITER (IAEA-CN-53/F-III-12)	387
<i>G. Vieider et al.</i>	
ITER fuel cycle design (IAEA-CN-53/F-III-13)	397
<i>P.J. Dinner</i>	
ITER: Plant systems and site requirements (IAEA-CN-53/F-III-14)	405
<i>C.A. Flanagan</i>	
ITER: System studies and design space analysis (IAEA-CN-53/F-III-15)	413
<i>L.J. Perkins et al.</i>	
The ITER poloidal field system (IAEA-CN-53/F-III-16)	421
<i>J. Wesley et al.</i>	
ITER operation and diagnostics (IAEA-CN-53/F-III-17)	427
<i>V.S. Mukhovatov et al.</i>	
ITER: Physics R and D programme (IAEA-CN-53/F-III-18)	435
<i>F. Engelmann et al.</i>	
ITER: Preliminary analysis of energy confinement H-mode database (IAEA-CN-53/F-III-19)	443
<i>J.G. Cordey et al.</i>	

TECHNOLOGY AND REACTOR CONCEPTS (Session G)

Physics objectives and design of CIT (IAEA-CN-53/G-I-1)	455
<i>D.J. Sigmar et al.</i>	
Discussion	470
The Steady State Tokamak Reactor (IAEA-CN-53/G-I-2)	473
<i>Y. Seki et al.</i>	
Discussion	483
Divertor-plasma studies on DIII-D (IAEA-CN-53/G-I-3)	487
<i>D.N. Hill et al.</i>	
Discussion	500
Negative ion source and accelerator systems for neutral beam injection in large tokamaks (IAEA-CN-53/G-I-4)	503
<i>O.A. Anderson et al.</i>	
Discussion	512
Engineering design study of superconducting Large Helical Device (IAEA-CN-53/G-I-5)	513
<i>O. Motojima et al.</i>	
Physics and engineering studies for WENDELSTEIN 7-X (IAEA-CN-53/G-I-6)	525
<i>G. Grieger et al.</i>	
Discussion	532

Investigation of fusion alpha particle ripple losses by means of a kinetic code — Alpha particle ripple losses in ITER (IAEA-CN-53/G-II-1)	533
<i>G. Kamelander et al.</i>	
Conceptual design study of the Fusion Experimental Reactor (FER) (IAEA-CN-53/G-II-2)	547
<i>S. Matsuda et al.</i>	
D- ³ He in field reversed configurations — RUBY: An international reactor study (IAEA-CN-53/G-II-3)	555
<i>W. Kernbichler et al.</i>	
Description of the fusion experiment IGNITEX (IAEA-CN-53/G-II-4)	567
<i>R. Carrera et al.</i>	
A steady state tokamak reactor with a neoclassical current of electrons and alpha particles (IAEA-CN-53/G-II-5)	575
<i>Ya.I. Kolesnichenko et al.</i>	
Conceptual design of a tokamak commercial breeder (IAEA-CN-53/G-II-6)	583
<i>J. Huang et al.</i>	
Dynamic response of stationary burning plasma (IAEA-CN-53/G-II-7)	589
<i>A. Fukuyama et al.</i>	
Helium removal and transport studies in TEXTOR (IAEA-CN-53/G-II-8)	597
<i>D.L. Hillis et al.</i>	
Fusion reactivity enhancement and alpha and other fast particle effects in the ICRF heating of reactor grade tokamaks (IAEA-CN-53/G-II-9)	605
<i>R. Koch et al.</i>	
Tokamak current drive and fuelling by compact toroid injection, and acceleration of compact toroids for other fusion applications (IAEA-CN-53/G-II-10)	611
<i>M.R. Brown et al.</i>	
A muon catalysed fusion reactor and direct conversion of the catalysed energy (IAEA-CN-53/G-II-11)	617
<i>S. Eliezer et al.</i>	

ECONOMIC, SAFETY AND ENVIRONMENTAL ASPECTS OF FUSION (Session H)

A comparison of the environmental impact of fusion with some other electricity generating methods (IAEA-CN-53/H-I-1)	625
<i>R.A. Forrest et al.</i>	
Discussion	631

Environmental, safety related and economic potential of fusion power (IAEA-CN-53/H-I-2)	633
<i>J. Darvas et al.</i>	
Discussion	644
Safety considerations in next step fusion design and beyond (IAEA-CN-53/H-I-3)	647
<i>D.F. Holland</i>	
Discussion	657
ARIES-I, a steady-state, first-stability tokamak reactor with enhanced safety and environmental features (IAEA-CN-53/H-I-4)	659
<i>R.W. Conn et al.</i>	
Discussion	670

SUMMARIES (Session J)

Summary on tokamak experiments (IAEA-CN-53/J-I-1)	675
<i>V.E. Golant</i>	
Summary on alternative magnetic systems (IAEA-CN-53/J-I-2)	693
<i>H. Wobig</i>	
Summary on magnetic confinement theory (IAEA-CN-53/J-I-3)	707
<i>M.N. Rosenbluth</i>	
Summary on inertial confinement fusion (IAEA-CN-53/J-I-4)	713
<i>S. Nakai</i>	
Summary on technology and reactor concepts and economic, safety and environmental aspects of fusion (IAEA-CN-53/J-I-5)	723
<i>F. Najmabadi, R.W. Conn</i>	
Chairmen of Sessions	735
Secretariat of the Conference	736
List of Participants	737
Author Index	785
