

## CONTENTS OF VOLUME 3

### INERTIAL CONFINEMENT FUSION (Session B)

Present status and future prospects of laser fusion research at ILE, Osaka (IAEA-CN-60/B-1) .....	3
<i>S. Nakai et al.</i>	
Discussion .....	12
Prospects for inertial fusion energy — A 1994 perspective (IAEA-CN-60/B-2) .....	13
<i>M.M. Sluyter, D.H. Crandall</i>	
Discussion .....	18
Recent results and prospects of the inertial confinement programme at CEL-V (IAEA-CN-60/B-3) .....	19
<i>CEL-V Laser Team</i>	
Discussion .....	25
Inertial confinement fusion research using the Vulcan high power laser system (IAEA-CN-60/B-4) .....	27
<i>O. Willi et al.</i>	
Discussion .....	31
Direct-drive laser fusion experimental program at the University of Rochester's Laboratory for Laser Energetics (IAEA-CN-60/B-5) .....	33
<i>R.L. McCrory et al.</i>	
Progress in the light ion driven inertial confinement fusion program (IAEA-CN-60/B-6) .....	39
<i>J.P. Quintenz et al.</i>	
Discussion .....	43
Indirect drive implosion of cannonball targets with blue Gekko XII laser (IAEA-CN-60/B-7) .....	45
<i>Y. Kato et al.</i>	
Discussion .....	50
Hohlraum drive and implosion experiments on Nova (IAEA-CN-60/B-8) .....	51
<i>J.D.ilkenny et al.</i>	
Discussion .....	56
Resolving a central ICF issue for ignition: Implosion symmetry (IAEA-CN-60/B-9) .....	59
<i>M. Cray et al.</i>	
Discussion .....	64
Target implosion using a deuterium cryogenic system (IAEA-CN-60/B-10) .....	65
<i>T. Yamanaka et al.</i>	
Discussion .....	69

### EDITORIAL NOTE

*The Proceedings have been edited by the editorial staff of the IAEA to the extent considered necessary for the reader's assistance. The views expressed remain, however, the responsibility of the named authors or participants. In addition, the views are not necessarily those of the governments of the nominating Member States or of the nominating organizations.*

*Although great care has been taken to maintain the accuracy of information contained in this publication, neither the IAEA nor its Member States assume any responsibility for consequences which may arise from its use.*

*The use of particular designations of countries or territories does not imply any judgement by the publisher, the IAEA, as to the legal status of such countries or territories, of their authorities and institutions or of the delimitation of their boundaries.*

*The mention of names of specific companies or products (whether or not indicated as registered) does not imply any intention to infringe proprietary rights, nor should it be construed as an endorsement or recommendation on the part of the IAEA.*

*The authors are responsible for having obtained the necessary permission for the IAEA to reproduce, translate or use material from sources already protected by copyrights.*

*Material prepared by authors who are in contractual relation with governments is copyrighted by the IAEA, as publisher, only to the extent permitted by the appropriate national regulations.*

Uniform target illumination and high gain direct drive target performance using KrF lasers (IAEA-CN-60/B-11) .....	71
<i>S.E. Bodner et al.</i>	
Discussion .....	77
Progress in inertial fusion physics and technology at DENIM, Spain (IAEA-CN-60/B-12) .....	79
<i>G. Velarde et al.</i>	
Discussion .....	84
Characteristics of rarefaction shocks in laser produced high temperature fusion plasmas and studies on the hydrodynamics of laser driven, non-uniform thin foil targets (IAEA-CN-60/B-P1) .....	85
<i>L.J. Dhareshwar et al.</i>	
ICF fast ignitor with high hydroefficient non-linear force drive (IAEA-CN-60/B-P2) .....	93
<i>H. Hora et al.</i>	
Experimental studies for laser fusion of directly and indirectly driven DT filled targets at the China Academy of Engineering Physics (IAEA-CN-60/B-P3) .....	101
<i>Xiaofeng Chen et al.</i>	
ICF target physics: Rayleigh-Taylor instabilities and heavy-ion driven targets (IAEA-CN-60/B-P4) .....	107
<i>S. Azeni et al.</i>	
Radiative heating of matter by laser generated X rays (IAEA-CN-60/B-P5) .....	115
<i>K. Eidmann et al.</i>	
Super-ASHURA KrF laser development (IAEA-CN-60/B-P7) .....	121
<i>Y. Owadano et al.</i>	
Symmetry observation and temperature mapping of laser driven fusion plasma with novel X ray imaging techniques (IAEA-CN-60/B-P8) .....	129
<i>H. Nishimura et al.</i>	
Numerical studies on stability and mixing in laser driven implosion (IAEA-CN-60/B-P9) .....	135
<i>H. Takabe et al.</i>	
Fusion energy research by light ion beams in Japan (IAEA-CN-60/B-P10) .....	143
<i>S. Miyamoto et al.</i>	
Improvement of irradiation uniformity of direct drive laser fusion target (IAEA-CN-60/B-P11) .....	153
<i>N. Miyanaga et al.</i>	
Experimental studies on ion diodes and theoretical studies on ion beam focusing by magnetic lens (IAEA-CN-60/B-P12) .....	159
<i>J.B. Greenly et al.</i>	

Radiation driven targets for heavy ion fusion (IAEA-CN-60/B-P13) .....	167
<i>D.D.-M. Ho et al.</i>	
Progress in ion beam target design and experiments (IAEA-CN-60/B-P14) .....	175
<i>M.K. Matzen et al.</i>	
Utility of the US National Ignition Facility for development of inertial fusion energy (IAEA-CN-60/B-P15) .....	181
<i>B.G. Logan et al.</i>	
Study of parametric instabilities in NIF scale plasmas on Nova (IAEA-CN-60/B-P16) .....	189
<i>B.J. MacGowan et al.</i>	
Confinement of plasma in a magnetic bottle induced by circularly polarized laser light (IAEA-CN-60/B-P17) .....	195
<i>S. Eliezer et al.</i>	
Studies on radiation hydrodynamics and inertial fusion (IAEA-CN-60/B-P18) .....	203
<i>J. Meyer-ter-Vehn et al.</i>	

#### MAGNETIC CONFINEMENT THEORY (Session D)

Stability of the $m = 1$ mode with energetic particles, sawtooth relaxation and locked modes in tokamaks (IAEA-CN-60/D-1) .....	211
<i>J.W. Connor et al.</i>	
Discussion .....	218
Analysis of linear and non-linear gap mode dynamics using a hybrid code (IAEA-CN-60/D-2) .....	219
<i>S. Briguglio et al.</i>	
Discussion .....	229
Stabilization of ballooning modes with sheared toroidal rotation (IAEA-CN-60/D-3) .....	231
<i>R.L. Miller et al.</i>	
Discussion .....	238
Wall stabilization of ideal modes in tokamaks (IAEA-CN-60/D-4) .....	239
<i>D.J. Ward, A. Bondeson</i>	
Stabilisation of external kink modes in advanced tokamaks (IAEA-CN-60/D-5) .....	245
<i>R. Fitzpatrick</i>	
MHD regimes and feedback stabilization in advanced tokamaks (IAEA-CN-60/D-6) .....	251
<i>N. Pomphrey et al.</i>	
Discussion .....	259

Dynamics of the sawtooth collapse in tokamak plasmas (IAEA-CN-60/D-7) .....	261	Analytical and numerical studies of sawtooth stabilization with on-axis ICRH on Tore Supra (IAEA-CN-60/D-18) .....	399
<i>D. Biskamp, J.F. Drake</i>		<i>M. Zabięgo et al.</i>	
Discussion .....	272	Discussion .....	404
Advances in simulating tokamak turbulent transport (IAEA-CN-60/D-8) .....	273	Onset and stabilization of sawtooth oscillations in tokamaks (IAEA-CN-60/D-19) .....	407
<i>G.W. Hammett et al.</i>		<i>L.E. Zakharov et al.</i>	
Discussion .....	286	Non-linear collisionless magnetic reconnection and fast relaxations (IAEA-CN-60/D-20) .....	417
Physics of SOL/edge turbulence phenomena in tokamaks (IAEA-CN-60/D-9) .....	289	<i>M. Ottaviani, F. Porcelli</i>	
<i>N. Chakrabarti et al.</i>		Scrape-off layer plasma modelling for the DIII-D tokamak (IAEA-CN-60/D-P1) .....	423
Discussion .....	298	<i>G.D. Porter et al.</i>	
Self-organized critical gradient transport and shear flow effects for the ion temperature gradient mode in toroidal plasmas (IAEA-CN-60/D-10) .....	299	Modelling of impurity and plasma transport for a radiative divertor (IAEA-CN-60/D-P2) .....	431
<i>Y. Kishimoto et al.</i>		<i>K. Shimizu et al.</i>	
Discussion .....	307	Transition to detachment in the axisymmetric divertor (IAEA-CN-60/D-P3) .....	441
Behavior of magnetic islands in 3D MHD equilibria of helical devices (IAEA-CN-60/D-11) .....	309	<i>P. Ghendrih, H. Capes</i>	
<i>T. Hayashi et al.</i>		Recent results on local and global computation of self-consistent transport scenarios (IAEA-CN-60/D-P4) .....	447
Discussion .....	313	<i>B. Scott</i>	
Self-consistent simulation of L and H modes in a tokamak (IAEA-CN-60/D-12) .....	315	Gyrokinetic and global fluid simulations of tokamak microturbulence and transport (IAEA-CN-60/D-P5) .....	457
<i>V.M. Leonov, A.R. Polevoj</i>		<i>A.M. Dimits et al.</i>	
Discussion .....	322	Comparisons of nonlinear toroidal turbulence simulations with experiment (IAEA-CN-60/D-P6) .....	463
Dynamics of L→H transition, VH-mode evolution, edge localized modes and RF driven confinement control in tokamaks (IAEA-CN-60/D-13) .....	323	<i>W. Dorland et al.</i>	
<i>P.H. Diamond et al.</i>		Essentials in improved confinement in tokamaks (IAEA-CN-60/D-P7) .....	475
Discussion .....	352	<i>A. Fukuyama et al.</i>	
On divertor detachment in current tokamaks and ITER, and kinetic and fluid descriptions of edge plasmas (IAEA-CN-60/D-14) .....	355	The L-H trigger: A transition from resistive ballooning to toroidal drift wave transport (IAEA-CN-60/D-P8) .....	483
<i>S.I. Krasheninnikov et al.</i>		<i>J.F. Drake et al.</i>	
Discussion .....	361	Self-organization and transport in the electrostatic turbulence of a tokamak scrape-off layer (IAEA-CN-60/D-P9) .....	493
Modeling of Alcator C-Mod divertor plasmas in high recycling and detached regimes (IAEA-CN-60/D-15) .....	363	<i>S. Benkadda et al.</i>	
<i>D.P. Stotler et al.</i>		Effects of sheared poloidal flow and lower hybrid wave driven H mode in tokamak plasmas (IAEA-CN-60/D-P10) .....	505
Energetic/alpha particle effects on MHD modes and transport (IAEA-CN-60/D-16) .....	373	<i>Qingdi Gao et al.</i>	
<i>C.Z. Cheng et al.</i>		Dynamical model of pressure-gradient-driven turbulence and shear flow generation in the L-H transition (IAEA-CN-60/D-P11) .....	513
Discussion .....	388	<i>H. Sugama, W. Horton</i>	
Anomalous transport theory for toroidal helical plasmas (IAEA-CN-60/D-17) .....	391		
<i>K. Itoh et al.</i>			
Discussion .....	397		

Dithering transitions in resistive pressure gradient driven turbulence (IAEA-CN-60/D-P12) .....	523
<i>L. Garcia et al.</i>	
Monte Carlo simulation for ICRF heating in heliotron/torsatrons (IAEA-CN-60/D-P13) .....	531
<i>S. Murakami et al.</i>	
Enhanced current drive with lower hybrid and ion Bernstein waves (IAEA-CN-60/D-P14) .....	539
<i>A.K. Ram et al.</i>	
Alfvén wave interaction with energetic alpha particles (IAEA-CN-60/D-P15) .....	547
<i>H.L. Berk et al.</i>	
Finite orbit width effects on fast ion distributions and stability of TAEs in tokamaks (IAEA-CN-60/D-P16) .....	559
<i>Ya.I. Kolesnichenko et al.</i>	
Energetic particle destabilization of shear Alfvén waves in stellarators and tokamaks (IAEA-CN-60/D-P17) .....	567
<i>D.A. Spong et al.</i>	
Alfvén eigenmodes and alpha particle losses in JET (IAEA-CN-60/D-P18) .....	575
<i>W. Kerner et al.</i>	
Simulations of rf current drive and interaction of alpha particles with waves in tokamaks (IAEA-CN-60/D-P19) .....	581
<i>M.J. Alava et al.</i>	
Non-linear dynamics of externally driven magnetic islands in a tokamak plasma (IAEA-CN-60/D-P20) .....	589
<i>E. Lazzaro et al.</i>	
Studies on non-linear growth of the tearing mode (IAEA-CN-60/D-P21) .....	597
<i>Qingquan Yu et al.</i>	
Transport simulation of negative magnetic shear discharges (IAEA-CN-60/D-P22) .....	603
<i>H. St. John et al.</i>	
Kinetic processes in the reversed field pinch turbulence (IAEA-CN-60/D-P23) .....	615
<i>Z. Yoshida et al.</i>	
Stellarator equilibrium studies with the PIES code (IAEA-CN-60/D-P24) .....	621
<i>P. Merkel et al.</i>	
Improved stellarator systems (IAEA-CN-60/D-P25) .....	631
<i>M.Yu. Isaev et al.</i>	
Plasma transport barrier: Underlying processes (IAEA-CN-60/D-P26) .....	643
<i>B. Coppi</i>	

Chairmen of Sessions .....	651
Secretariat of the Conference .....	652
List of Participants .....	653
Author Index .....	701
