In Memoriam <i>Academician Jumber G. Lominadze</i>	11
---	----

Preface <i>Professor Tetsuya Sato</i>	13
--	----

## KEYNOTE LECTURES

*Chairman: J. Fujita (NIFS)*

Driven reconnection and self-organisation <i>T. Sato, National Institute for Fusion Science, Nagoya, Japan, &amp;al</i>	17
--	----

Turbulisation of free shear flows – 3-D perturbations <i>G.D. Chagelishvili &amp;al, Abastumani Astrophysical Observatory, Georgia</i>	23
---	----

## REVIEW OF FUSION PLASMAS

*Chairman: B. Coppi (MIT)*

MHD instabilities of fusion-oriented plasmas <i>M. Wakatani, Kyoto University, Japan</i>	35
---	----

Physics of transport phenomena in magnetic confinement plasmas <i>K. Itoh, National Institute for Fusion Science, Japan, &amp;al</i>	41
---	----

Plasma heating in toroidal systems <i>M. Okamoto, National Institute for Fusion Science, Japan</i>	47
---	----

## REVIEW OF ASTROPHYSICAL PLASMAS

*Chairman: J. Lominadze (Abastumani Observatory)*

Results from ROSAT <i>J. Trümper, MPI für Extraterrestrische Physik, Garching, Germany</i>	55
---	----

Jets associated with active galactic nuclei <i>A. Ferrari, Osservatorio Astronomica di Torino, Italy</i>	67
---	----

## SOLAR PLASMA

*Chairman: Y. Uchida (University of Tokyo)*

Highlights of Yohkoh results <i>S. Tsuneta, University of Tokyo, Japan</i>	75
---	----

Preliminary results of observations of solar flares with Nobeyama radioheliograph <i>H. Nakajima, Nobeyama Radio Observatory, Japan</i>	85
--	----

Radiation from solar flares <i>D.B. Melrose, University of Sydney, Australia</i>	91
---	----

### PLANETARY MAGNETOSPHERE

*Chairman: J. Sakai (Toyama University)*

- Nonthermal planetary radio emissions: Theories and observations 101  
*A. C.-L. Chian, University of Cambridge, UK*
- Consequences of chaotic particle motion for the stability of space plasma current sheets 105  
*J. Büchner, MPI, Berlin, Germany, & A. Otto, Univ. of Alaska, USA*

### DENSE PLASMAS

*Chairman: A. Ferrari (University of Turin)*

- Physical properties of dense astrophysical plasmas 113  
*H.M. Van Horn, University of Rochester, NY, USA*
- Neutrino emission processes in dense high-temperature plasmas 119  
*N. Itoh, Sophia Univesity, Tokyo, Japan*

### X-RAY SOURCES

*Chairman: J. Trümper (MPI)*

- Accretion disks in bright X-ray binaries 125  
*H. Inoue, Institute of Space & Astronautical Science, Kanagawa, Japan*
- Thermal properties and radiation processes in astrophysical plasmas 131  
*K. Masai, National Institute for Fusion Science, Japan*
- Pair plasmas in the central engine of active galactic nuclei 137  
*S. Tsuruta & B.G. Tritz, Montana State University, USA*

### GAMMA-RAY SOURCES

*Chairman: F. Takahara (Tokyo Metropolitan University)*

- Compton Gamma Ray Observatory highlights of the sky survey 145  
*H. Steinle, MPI für Extraterrestrische Physik, Garching, Germany*
- Dark matter – neutron star halo and the nature of gamma-bursts 151  
*A.V. Gurevich & al, P.N. Lebedev Physical Institute, Russia*

### RELATIVISTIC PLASMAS

*Chairman: A. Tomimatsu (Nagoya University)*

- General relativistic winds in a black hole magnetosphere 157  
*A. Tomimatsu, Nagoya University, Japan*
- Vertical structure of accretion disks 161  
*T. Shimura & F. Takahara, Metropolitan University, Tokyo, Japan*
- Relativistically expanding pair plasmas as bursting sources of cosmic gamma-rays 165  
*P. Mészáros, Penn. State University, USA, & M.J. Rees, Inst. of Astronomy, Cambridge, UK*

### Poster Session – LABORATORY AND SPACE PLASMAS

Laboratory relations between the solar wind dynamic pressure and the magnetospheric structures of the Earth and comets <i>S. Minami, Osaka City University, Japan, &amp;al</i>	171
Laboratory structure of the heliopause <i>S. Minami, Osaka City University, Japan</i>	177
Theory of leaked auroral kilometric radiation <i>M.V. Alves, INPE, Brazil, &amp;al</i>	181
Compressible MHD turbulence in the interplanetary medium <i>M. Velli &amp; R. Grappin, Observatoire de Paris-Meudon, France</i>	185
Tangential stress due to Kelvin-Helmholtz instability at the magnetospheric boundary <i>A. Miura, University of Tokyo, Japan</i>	189
Energy release at Alfvénic fronts in solar flares <i>J. Nicholls, University of Sydney, Australia</i>	195
Non-equilibrium ionization in an M class solar flare <i>T. Kato, National Institute for Fusion Science, Nagoya, Japan, &amp;al</i>	199
Numerical simulation of magnetic reconnection associated with emerging flux in the solar atmosphere <i>T. Yokoyama, Graduate University for Advanced Studies, &amp; K. Shibata, National Astronomical Observatory, Japan</i>	203
X-ray jets in the solar corona: observations with Yohkoh soft X-ray telescope <i>K. Shibata &amp; SXT team, National Astronomical Observatory, Tokyo, Japan</i>	207
Yohkoh gamma-ray spectral observations – YGSO <i>M. Yoshimori, Rikkyo University, Japan</i>	211
Large-scale structure of the solar plasma corona – An analysis of Yohkoh SXT images <i>T. Saito, Tohoku University, Japan, &amp;al</i>	215
MHD relaxation in magnetic loops <i>Y. Suzuki, Hiroshima University, &amp;al, Japan</i>	219
Particle acceleration in a filamentary current sheet model <i>B. Kliem, Astrophysical Institute, Potsdam, Germany</i>	223
Current loop coalescence studied by 3-D electromagnetic particle code <i>K.-I. Nishikawa, The University of Iowa, USA, &amp;al</i>	229
Prompt high-energy particle acceleration during two current loops collision <i>J. Zhao, Toyama University, &amp;al, Japan</i>	233
Formation of fast magnetosonic shock waves during two current loops collision in solar flare <i>S. Koide &amp; J.-I. Sakai, Toyama University, Japan</i>	237
Dynamics of physical state during two current loops collision <i>B. Chargeishvili, Toyama University, Japan, &amp;al</i>	241
Plasma structure in a plasma flow along a magnetic mirror field <i>S. Ishiguro, Y. Kishi &amp; N. Sato, Tohoku University, Japan</i>	245

Dynamo driven by weak plasma turbulence: the effect of differential rotation <i>Yi Tong, Beijing Normal University, China, &amp;al</i>	249
Double diffusion convection in a rotating spherical shell <i>K. Kusano, Hiroshima University, &amp;al, Japan</i>	253
Non-linear thermal instability of optical thin molecular structures <i>A. Parravano &amp; M.H. Ibañez, Universidad de Los Andes, Mérida, Venezuela</i>	255
On the non-linear instability of thermal structures <i>M.H. Ibáñez &amp; A. Parravano, Universidad de Los Andes, Mérida, Venezuela</i>	259
Consequences of plasma-maser in plasma astrophysics <i>M. Nambu, Kyushu University, Japan</i>	265
Mean elemental composition and <sup>3</sup> He-enrichments in solar energetic particles <i>M. Toida, T.X. Zhang &amp; Y. Ohsawa, Nagoya University, Japan</i>	269
Enhanced absorption of p-modes in sunspot and plage regions <i>B.J. LaBonte, University of Hawaii, USA, &amp; M. Ryutova, Institute of Nuclear Physics, Novosibirsk, Russia</i>	275
Acceleration of solar flare particles as viewed from their chemical composition <i>K. Sakurai, Kanagawa University, Japan</i>	279
The onset and spectra of a magnetised Langmuir turbulence <i>L.R. Hadzievski &amp; M.M. Skoric, Vinca Institute of Nuclear Sciences, Belgrade, Yugoslavia</i>	281
Solar wind-magnetosphere interaction as simulated by a 3D, EM particle code <i>O. Buneman, Stanford University, &amp;al, USA</i>	285
<b>Poster Session – ASTROPHYSICAL PLASMAS</b>	
Gamma-ray burst as a result of explosive instability in the magnetosphere of old neutron star <i>Ya.N. Istomin &amp; D.V. Mosyagin, P.N. Lebedev Physical Institute, Moscow, Russia</i>	291
Properties of X-ray emission from X-ray novae <i>S. Kitamoto, Osaka University, Japan</i>	297
Electron acceleration in, and radio emission from SN 1987A <i>L. Ball, University of Sydney, Australia, &amp; J.G. Kirk, MPI für Kernphysik, Germany</i>	301
Langmuir microstructures and pulsar radio emission <i>E. Asseo, Centre de Physique Théorique, Ecole Polytechnique, Palaiseau, France</i>	305
Structure of accretion plasmas of X-ray binary pulsars in MHD turbulence <i>M. Hoshino &amp; T. Takeshima, RIKEN, Saitama, Japan</i>	309
VHE gamma-ray generation by radio pulsars <i>S. Bogovalov &amp; Yu.D. Kotov, Moscow Engineering Physics Institutè, Russia</i>	313
Particle acceleration on the Alfvén surface of a plasma ejecting axisymmetric rotator <i>S.V. Bogovalov, Institute of Physical and Chemical Research, Saitama, Japan</i>	317
Asymptotic structure of magnetically driven MHD wind <i>S. Nitta, Nagoya University, Japan</i>	321

Hydrodynamical winds from an accretion disk <i>R. Okada &amp; F. Takahara, Tokyo Metropolitan University, Japan</i>	325
MHD flows from compact objects: effects on magnetic field configurations <i>M. Takahashi, Aichi University of Education, Aichi, Japan</i>	329
3-D simulations of cosmic jets employing the smoothed particle hydrodynamics technique <i>E.M. de Gouveia, Univ. of Sao Paulo, Brazil, &amp; W. Benz, Univ. of Arizona, USA</i>	333
Helical kink instability of jets from young stellar objects <i>Y. Todo, National Institute for Fusion Science, Nagoya, Japan</i>	337
Fragmentation of magnetised filamentary interstellar clouds <i>T. Hanawa, Nagoya University, &amp;al, Japan</i>	341
Gravitational instability of magnetised filamentary clouds: I. Helical magnetic fields <i>F. Nakamura, Nagoya University, &amp;al, Japan</i>	345
Gravitational instability of magnetised filamentary clouds: II. Rotation <i>T. Matsumoto &amp;al, Nagoya University, Japan</i>	349
Time variations of X-rays from black hole candidates. Canonical time variations in high and low intensity states <i>S. Miyamoto &amp;al, Osaka University, Japan</i>	353
Pair plasmas in the galactic center region and in nova muscae <i>Ph. Durouchoux &amp; P. Wallyn, Service d'Astrophysique, C.E. Saclay, France</i>	359
Time variation of MHD accretion onto a black hole <i>K. Hirofani, Nagoya University, &amp;al, Japan</i>	363
Accretion of hot plasma onto the central black hole: Fokker-Planck formulation <i>F. Yabuki &amp; F. Takahara, Tokyo Metropolitan University, Japan</i>	367
Magnetic superbubbles in the galactic disk and halo <i>S. Mineshige, Kyoto University, Japan, &amp;al</i>	371
Generation and maintenance of bisymmetric spiral magnetic fields in disk galaxies in differential rotation <i>T. Sawa, Aichi Univ. of Education, Kariya, &amp; M. Fujimoto, Nagoya Univ., Japan</i>	375
The relaxed state and entropy production due to the electric resistivity and viscosity of plasma <i>T. Kato &amp; H. Nagamori, Waseda University, Tokyo, Japan</i>	379
Magnetic fields in spiral galaxies <i>S. Spencer &amp; L. Cram, University of Sydney, Australia</i>	383
Spiral Alfvén instability in accretion disks <i>M. Tagger, Service d'Astrophysique, C.E. Saclay, France, &amp;al</i>	387
Shock formation in magnetohydrodynamical accretion onto a black hole <i>M. Yokosawa, Ibaraki University, Japan</i>	391
Magnetic reconnection in emission nebulae in clusters of galaxies <i>L.C. Jafelice, UFRN, &amp; A.C.S. Friaça, USP, Brazil</i>	395
<b>LATE PAPER</b>	
Magnetohydrodynamic phenomena in star-forming processes and their environment <i>Y. Uchida, University of Tokyo, Japan</i>	401
LIST OF PARTICIPANTS	411
