

CONTENTS

Plasma Focus and z-pinch <i>H. Schmidt</i>	1
Review of Mirror Fusion Research <i>R. S. Post et al.</i>	31
Progress in Studies of X-Ray and Ion-Beam Emission from Plasma Focus Facilities <i>M. Sadowski</i>	52
Cylindrical Ion-Implosion Facilities, Physical Principles and Applications <i>M. Sadowski</i>	81
Mode Conversion and the Absorption and Emission of Electromagnetic Waves <i>C. N. Lashmore-Davies</i>	109
A Survey of Radio Frequency Heating in Tokamaks <i>C. N. Lashmore-Davies</i>	127
Dispersion Relation of a Bounded, Magnetized and Warm Plasma <i>A. K. T. de Assis and P. H. Sakanaka</i>	158
Parameters of the Plasma of H. F. Contrated Discharge Between Two Electrodes for Pressures in the Order of the Atmospheric Pressure <i>Gustavo A. Zambrano R</i>	185
Electrical Conductivity Increment in a Quantum Plasma <i>R. Krikorian V. and S. M. Daveloza K.</i>	194
Quasi-Fractional Approximation to the Bessel Functions <i>P. M. L. Guerrero</i>	205
Experiments on the Influence of the Space Charge Effects in the Characteristic Curves of a Velocity Analyzer <i>G. Donoso and P. Martín</i>	214

Waves and Instabilities of Isothermal Plasma Atmospheres <i>J. Gratton and A. G. González</i>	220
The Magnetohydrodynamic Rayleigh-Taylor Instability in Stratified Plasmas <i>J. Gratton, A. G. González and F. T. Gratton</i>	245
Approximate Evaluation of Viscous Effects in the Rayleigh-Taylor Instability <i>J. Gratton</i>	264
On the Use of Simple Diagnostic Techniques for Studying the Structure of Plasma Current Sheaths <i>L. Bilbao, H. Bruzzone, H. Kelly and G. Giudice</i>	289
MHD Models for Current Sheaths <i>L. Bilbao, H. Bruzzone, H. Kelly and G. García</i>	302
Experimental Study of the Breakdown Phase in Coaxial Plasma Guns <i>H. Bruzzone</i>	313
Evolution of the Plasma Boundary in an Ion Source <i>J. A. T. Ortiz P., M. Hernández and A. M. Castro</i>	322
Range and Backscattering of Hydrogen Ions Below 2 KeV <i>R. Becerra-Acevedo and B. Terreault</i>	327
Radiation Hydrodynamics in Astrophysics <i>M. H. Ibáñez</i>	368
