Table of content

1. Introduction  
(F. Engelmann and J.P. Rager)
2. Overall Summary and Conclusions  
(F. Engelmann and J.P. Rager)
3. Topical Introductions and Summaries,  
and Short Contributions from Laboratories
  - 3.1 Confinement and Stability limits - Disruptions
    - 3.1.1 Topical introduction (J. Hugill)
    - 3.1.2 Contributions from the Laboratories
    - 3.1.3 Conclusions
  - 3.2 The Physics of RF Heating
    - 3.2.1 Topical introduction (J. Jacquinot)
    - 3.2.2 Introduction to different RF methods
    - 3.2.3 Contributions from the Laboratories
    - 3.2.4 Conclusions
  - 3.3 Edge Physics
    - 3.3.1 Topical summary (K. Lackner)
    - 3.3.2 Contributions from the Laboratories
4. The Status of JET and NET
  - 4.1 The Status of JET  
(by the JET team, presented by L. De Kock)
  - 4.2 Planning a time schedule for NET : Physics Considerations  
(F. Engelmann)
5. Programme
  - 5.1 Agenda
  - 5.2 Organization of the Parallel Sessions
  - 5.3 Programme for the RF heating Session
  - 5.4 Programme for the parallel session on Edge Physics
6. List of Participants
