Contents

1 Fusion	1	3.7 Vacuum magnetic field	72
1.1 Fusion and tokamaks	2	3.8 Particle orbits	74
1.2 Fusion reactions	4	3.9 Particle trapping	76
1.3 Thermonuclear fusion	6	3.10 Trapped particle orbits	78
1.4 Lawson criterion	8	3.11 Current drive	80
1.5 Ignition	10		
1.6 Tokamaks	12	4 Confinement	83
1.7 Tokamak reactor	14	4.1 Tokamak confinement	84
1.8 Fuel resources	16	4.2 Neoclassical transport	86
1.9 Reactor economics	18	4.3 Pfirsch–Schlüter transport	88
1.10 Tokamak research	20	4.4 Banana regime transport	90
		4.5 Plateau transport	92
2 Plasma physics	23	4.6 Ware pinch effect, bootstrap current, and neoclassical conductivity	94
2.1 Tokamak plasma	24	4.7 Ripple transport	96
2.2 Larmor orbits	26	4.8 Impurity transport	98
2.3 Particle drifts	28	4.9 Radiation losses	100
2.4 Collisions	30	4.10 Impurity radiation	102
2.5 Kinetic equations	32	4.11 Experimental observations	104
2.6 Fokker–Planck equation	34	4.12 Turbulent convection	106
2.7 Gyro-averaged kinetic equations	36	4.13 Turbulent magnetic fields	108
2.8 Relaxation processes	38		
2.9 Collision times	40	5 Heating	113
2.10 Resistivity	42	5.1 Heating	114
2.11 Electromagnetism	44	5.2 Ohmic heating	116
2.12 Fluid equations	46	5.3 Neutral beam injection	118
2.13 Magnetohydrodynamics	48	5.4 Neutral beam heating	120
2.14 Braginskii equations	50	5.5 Neutral beam production	122
2.15 Waves	52	5.6 Radio frequency heating	124
2.16 Landau damping	54	5.7 Physics of radio frequency heating	126
		5.8 Ion cyclotron resonance heating	128
3 Equilibrium	59	5.9 Lower hybrid heating	130
3.1 Tokamak equilibrium	60	5.10 Electron cyclotron resonance heating	132
3.2 Flux functions	62		
3.3 Grad–Shafranov equation	64	6 Mhd stability	137
3.4 Safety factor, q	66	6.1 Mhd stability	138
3.5 Beta	68	6.2 Energy principle	140
3.6 Large aspect-ratio	70		

Contents

6.3	Kink instability	142	9.7	Sputtering models	214
6.4	Internal kink	144	9.8	Arcing	216
6.5	Tearing modes	146	9.9	Limiters	218
6.6	Resistive layer	148	9.10	Divertors	220
6.7	Tearing stability	150	9.11	Heat flux, evaporation, and heat transfer	222
6.8	Mercier criterion	152	9.12	Tritium inventory	224
6.9	Ballooning modes	154	9.13	Edge diagnostics	226
6.10	Ballooning stability	156			
6.11	Axisymmetric modes	158			
6.12	β -limit	160			
7	Instabilities	165	10	Diagnostics	231
