

## CONTENTS

Finite Element Analysis of Electromagnetoelastic Buckling of Superconducting Magnet in Magnetic Fusion Reactor <i>K. Miya and T. Takagi</i> .....	1
Analysis Techniques for Evaluating the Structural Response of the Large Coil Test Facility <i>S. D. Moses and N. E. Johnson</i> .....	25
Effects of Residual Stresses on the Response of TF Coils in a Tokamak Reactor <i>W. E. Stillman</i> .....	45
Analysis of Diamond-Turned Reflective Optics <i>J. E. Stoneking, H. L. Gerth, and W. J. Dorris</i> .....	57
A Finite Element Model for Elastic and Slip Responses of Fusion Magnets <i>T. Y. Chang, H. Suzuki, and M. Reich</i> .....	67
Bending Free Toroidal Shells for Tokamak Fusion Reactors with Nonideal Magnetic Field Distributions <i>W. H. Gray</i> .....	86
Generation of Singular Elements for the Analysis of Cracked Bodies <i>I. -W. Yu and W. K. Wilson</i> .....	99
Subject Index .....	115
