

Contents

I. Quantities, Constants, Units	1
Table A. Quantities and Units Presented.	2
References for Table A.	4
Table B. Constant Quantities of Ordinary Water	4
Table C. Conversion of Units.	5
C 1. Pressure.	5
C 2. Temperature.	5
C 3. Energy, Work, Quantity of Heat.	6
C 4. Specific Heat Capacity, Specific Entropy, Specific Gas Constant	6
C 5. Thermal Conductivity	6
C 6. Viscosity	6
C 7. Thermal Diffusivity, Kinematic Viscosity, Diffusion Coeffi- cient	7
C 8. Surface Tension	7
 II. Tables of the Properties of Ordinary Water Substance.	 9
Table 1. Thermodynamic and Transport Properties of Liquid Water and Superheated Steam inclusive the Saturation Values (Pressure Table)	9
Table 2. Thermodynamic and Transport Properties of Saturated Water and Steam (Temperature Table).	75
Table 3. Properties of Water at 0.1 MPa from -20°C to the Saturation Temperature.	81
 III. Diagrams	 83
Fig. 1. Dynamic Viscosity η in $\mu\text{Pa s}$ in the p, T -Plane	84
Fig. 2. Thermal Conductivity λ in mW/K m in the p, T -Plane.	85
Fig. 3. Prandtl-Number $Pr = \eta c_p / \lambda$ in the p, T -Plane	86
Fig. 4. Pressure-Enthalpy ($\log_{10} p, h$)-Diagram	87
Fig. 5. T, s, p -Surface of Water Substance	} foldout tables
Fig. 6. T, s -Diagram	
Fig. 7. p, v, T -Surface of Water Substance	
Fig. 8. Mollier h, s -Diagram
