

## CONTENTS

### I. Optical spectra

INDREK MARTINSON, Recent developments in beam-foil spectroscopy ( <i>invited talk</i> ) . . . . .	1
JAN BROMANDER, Beam-foil spectra from highly ionized emitters ( <i>invited talk</i> ) . . . . .	11
J. P. BUCHET, M. C. BUCHET-POULIZAC, G. DO CAO and J. DESEQUELLES, Spectroscopy and lifetime measurements in the extreme ultraviolet at an energy of 1.15 MeV/nucleon . . . . .	19
ARMAND D. MAIO and WILLIAM S. BICKEL, Beam-foil spectra of phosphorus (1.5 to 6 MeV) . . . . .	27
L. BARRETTE, E. J. KNYSTAUTAS and R. DROUIN, Beam-foil studies of neon below 150 Å . . . . .	29
T. ANDERSEN, Beam-foil spectroscopy with low-energy accelerators ( <i>invited talk</i> ) . . . . .	35
H. G. BERRY, J. DESEQUELLES and M. DUFAY, Doubly-excited states in light atoms . . . . .	43
S. HONTZEAS, I. MARTINSON, P. ERMAN and R. BUCHTA, Beam-foil studies of energy levels and radiative lifetimes in Be I and Be II . . . . .	51
E. H. PINNINGTON, H. O. LUTZ and G. W. CARRIVEAU, Beam-foil spectroscopy of the transition elements chromium, cobalt and manganese . . . . .	55
L. M. BEYER, WM. E. MADDOX, L. B. BRIDWELL, D. D. DUNCAN, L. L. BINGHAM and J. C. ASBELL, The beam-gas spectra of silicon, sulfur and oxygen . . . . .	61
WILLIAM S. BICKEL, M. DUFAY, J. DESEQUELLES and H. G. BERRY, Beam-foil-gas spectroscopy. . . . .	69
J. N. BRADBURY, T. E. SHARP, B. MASS and R. N. VARNEY, Electron impact excitation and ionization of N <sup>4+</sup> . . . . .	75

### II. Measurement of lifetimes and transition probabilities

M. DUFAY, A survey of the cascade-induced alignment effects in beam-foil experiments ( <i>invited talk</i> ) . . . . .	79
H. H. BUKOW, H. V. BUTTLAR, D. HAAS, P. H. HECKMANN, M. HOLL, W. SCHLAGHECK, D. SCHÜRMAN, R. TIELERT and R. WOODRUFF, Lifetimes and initial populations of foil-excited hydrogen and lithium states . . . . .	89
E. J. KNYSTAUTAS and R. DROUIN, Lifetime measurements of doubly-excited states of helium . . . . .	95
W. AYTCH ROBERTS and CHARLES E. HEAD, Radiative lifetimes for singly and doubly ionized boron. . . . .	99
D. J. G. IRWIN, A. E. LIVINGSTON and J. A. KERNAHAN, Recent lifetime measurements for oxygen, fluorine and neon in the vacuum ultraviolet . . . . .	105
D. J. G. IRWIN, A. E. LIVINGSTON and J. A. KERNAHAN, Beam-foil lifetimes in the third period elements silicon, sulfur and argon in the vacuum ultraviolet . . . . .	111
J. R. ROBERTS, T. ANDERSEN and G. SØRENSEN, Determination of atomic lifetimes and absolute oscillator strengths for neutral and ionized titanium . . . . .	119
J. H. BRAND, C. L. COCKE and BASIL CURNUTTE, Beam-foil lifetimes of neutral nickel . . . . .	127
W. N. LENNARD and C. L. COCKE, Absolute beam-foil excitation probabilities of hydrogen-like states in iron . . . . .	137
T. ANDERSEN, A. KIRKEGÅRD NIELSEN and G. SØRENSEN, Oscillator-strength systematics for low-lying transitions in multiply charged ions . . . . .	143
D. A. CHURCH and C. H. LIU, Cascade-effect suppression in beam-foil mean-life measurements . . . . .	147
A. CORNEY, Measurement of transition probabilities of forbidden lines of neutral atoms and molecules ( <i>invited talk</i> ) . . . . .	151
RICHARD ANDERSON, DAVID WILCOX and ROBERT SUTHERLAND, Radiative properties of CH and CH <sup>+</sup> molecular states . . . . .	167

### III. Theory

ROBERT D. COWAN, The theory of rare earth energy levels and spectra ( <i>invited talk</i> ) . . . . .	173
A. DALGARNO, The Z-dependence of oscillator strengths ( <i>invited talk</i> ) . . . . .	183
G. A. VICTOR and C. LAUGHLIN, Model potential calculations of Be I and Mg I oscillator strengths . . . . .	189
OKTAY SINANOĞLU, Beam-foil spectroscopy and new atomic structure theory with a survey of results since 1970 ( <i>invited talk</i> ) . . . . .	193
M. AYMAR, Cancellation effects in computed lifetimes of $3s3p^n$ levels for third-row atoms and ions . . . . .	211
M. W. SMITH, G. A. MARTIN and W. L. WIESE, Systematic trends and atomic oscillator strengths . . . . .	219
C. P. BHALLA, Relativistic HFS oscillator strengths for indium and gallium . . . . .	227
CLEANTHIS A. NICOLAIDES, Theory of "non-stationary" states in many-electron atoms . . . . .	231
P. VOGEL, Dipole polarizabilities from the $nf$ term values . . . . .	241
J. D. GARCIA, Particle-foil interactions ( <i>invited talk</i> ) . . . . .	245
JUNE DAVIDSON and WILLIAM S. BICKEL, The beam-foil interaction process . . . . .	253

### IV. Hanle effect

ALFRED KASTLER, The Hanle effect and its use for the measurements of very small magnetic fields ( <i>invited talk</i> ) . . . . .	259
D. A. CHURCH and C. H. LIU, Beam-foil $g$ -factor measurements ( <i>invited talk</i> ) . . . . .	267
M. GAILLARD, M. CARRE, H. G. BERRY and M. LOMBARDI, Larmor precessions in the $2^3P$ and $4^3P$ terms of beam-foil excited $^6\text{Li II}$ and $^7\text{Li II}$ . . . . .	273
C. G. CARRINGTON, Hanle effect measurement of neon $2p^5 3p$ level lifetimes . . . . .	285
M. DRUETTA and A. DENIS, Measurement of $g$ -factors and polarization for levels in neon ( <i>read by title</i> ) . . . . .	291
M. CARRE, M. GAILLARD and J. DESEQUELLES, Hanle experiments with accelerated ion beam in gaseous targets . . . . .	295

### V. Quantum beats; Stark effect; fine structure

H. J. ANDRÄ, P. DOBBERSTEIN, A. GAUPP and W. WITTMANN, Fine structure measurements at the $n = 2$ state of hydrogen with the quantum beat method . . . . .	301
W. WITTMANN, K. TILLMANN and H. J. ANDRÄ, Hyperfine structure measurements by zero-field quantum beats after beam-foil excitation . . . . .	305
M. J. ALGUARD and C. W. DRAKE, Stark beats in Lyman-beta emission . . . . .	311
E. H. PINNINGTON, H. G. BERRY, J. DESEQUELLES and J. L. SUBTIL, Stark effect modulations in He II and Li III . . . . .	315
H. G. BERRY and J. L. SUBTIL, Fine and hyperfine structure measurements in light atoms . . . . .	321

### VI. Informal discussion of the beam-foil interaction . . . . .

### VII. High-Z systems of one and two electrons; Lamb shift

RICHARD MARRUS, Forbidden decay modes of one- and two-electron ions ( <i>invited talk</i> ) . . . . .	333
M. LEVENTHAL, Lamb shift measurements in heavy ions ( <i>invited talk</i> ) . . . . .	343
S. R. LUNDEEN, Y. L. YUNG and F. M. PIPKIN, Separated oscillatory field measurements on fast hydrogen . . . . .	355

### VIII. Astrophysics

KENNETH G. WIDING, Coronal identification below $400\text{Å}$ ( <i>invited talk</i> ) . . . . .	361
CAROLE JORDAN, Forbidden lines in spectra of the solar chromosphere and corona ( <i>invited talk</i> ) . . . . .	373
J. BAHCALL, The solar neutrino problem ( <i>invited talk</i> ) . . . . .	381
W. N. LENNARD, W. WHALING, R. M. SILLS and W. A. ZAJC, Absolute transition probabilities in Ni I . . . . .	385
L. J. CURTIS, I. MARTINSON and R. BUCHTA, Meanlife measurements in manganese I and II and thulium II . . . . .	391
PETER L. SMITH, Oscillator strengths of astrophysical interest from lifetime data . . . . .	395
GEORGE W. PRESTON, The chemically peculiar stars of the upper main sequence ( <i>invited talk</i> ) . . . . .	405
E. P. KRIDER, Lightning spectroscopy . . . . .	411
D. G. HUMMER, Informal remarks on a problem in astrophysics . . . . .	421

### IX. Experimental techniques

J. A. LEAVITT, J. W. ROBSON and J. O. STONER, JR., Line shapes and charge identification ( <i>invited talk</i> ) . . . . .	423
L. KAY, B. LIGHTFOOT and G. HARDING, Lineshapes and time-windows; Theory and experiment . . . . .	435
KEITH D. MASTERSON and JOHN O. STONER, JR., A method for measuring cascade-free mean lives . . . . .	441
T. HADEISHI, M. C. MICHEL, J. YELLIN and E. GENEUX, Improved resolution methods for beam-foil spectroscopy ( <i>invited talk</i> ) . . . . .	445
H. J. ANDRÄ, A. GAUPP, K. TILLMANN and W. WITTMANN, Doppler-tuned beam-laser spectroscopy . . . . .	453
ROBERT W. SCHMIEDER and RICHARD MARRUS, Doppler-tuned beam-foil X-ray spectrometer . . . . .	459
F. L. ROESLER and JOHN O. STONER, JR., High-resolution fast-beam spectroscopy using an off-axis Fabry-Perot interferometer . . . . .	465
W. CHOW, A. D. MAIO and M. O. SCULLY, On the possibility of high precision beam-foil spectroscopy using a modified Lamb-dip technique . . . . .	469
P. ERMAN, J. BRZOWSKI and B. SIGFRIDSSON, Gas excitations using high frequency deflected electron beams; A convenient method for determinations of atomic and molecular lifetimes . . . . .	471

### X. Electron spectroscopy; X-rays

I. A. SELLIN, Metastable autoionizing states ( <i>invited talk</i> ) . . . . .	477
D. J. PEGG, P. M. GRIFFIN, I. A. SELLIN and WINTHROP W. SMITH, Electron spectroscopy of foil excited chlorine beams . . . . .	489
C. L. COCKE, B. CURNUTTE and J. R. MACDONALD, Lifetimes of metastable X-ray emitters in helium- and lithium-like chlorine . . . . .	493
H. OONA and W. S. BICKEL, X-ray spectral studies in beam-foil spectra . . . . .	497

### XI. Other papers

R. A. BARAGIOLA and E. R. SALVATELLI, Electron capture and loss in collisions of $\text{H}^+$ and H with Pb vapors . . . . .	503
R. A. BARAGIOLA, E. R. SALVATELLI and E. ALONSO, Charge-state distributions in collisions of H and He with magnesium . . . . .	507

R. A. BARAGIOLA and I. B. NEMIROVSKY, Cross sections for single and double electron capture from He <sup>++</sup> on hydrogen, neon and argon . . . . .	511
J. O. STONER, JR. and L. J. RADZIEMSKI, JR., Erratum: Spectral linewidth limitations set by ion-foil interactions . . . . .	515
J. LINDSKOG, R. HALLIN, A. MARELIUS, J. BROMANDER, J. PIHL and R. SJÖDIN, Beam-foil spectra from highly ionized chlorine and oxygen atoms ( <i>abstract only – read by title</i> ) .	517
<b>Author index</b> . . . . .	<b>519</b>
