

CONTENTS TO PARTS A & B

CONTENTS TO PART A

Preface	vii
Section 1. Plenary session and program overviews	
1.1. <i>Ferritic steel for use in nuclear energy – A report of the Snowbird conference</i> , J.W. Davis	3
1.2. <i>Summary of the Rigi–Kaltbad workshop on graphite</i> , W.V. Green, D.L. Smith and B.T. Kelly	14
1.3. <i>Low activation materials for fusion applications</i> , E.E. Bloom, R.W. Conn, J.W. Davis, R.E. Gold, R. Little, K.R. Schultz, D.L. Smith and F.W. Wiffen	17
Section 2. Engineering materials and design	
2.1. <i>Materials engineering for tandem mirror reactors</i> , G.L. Kulcinski	29
2.2. <i>Materials needs for compact fusion reactors</i> , R.A. Krakowski	37
2.3. <i>Evaluation of candidate blanket materials for fusion reactor blanket applications</i> , D.L. Smith	51
2.4. <i>Materials for impurity control</i> , R.F. Mattas, D.L. Smith and M.A. Abdou	66
2.5. <i>Materials requirements for high heat flux components</i> , W.B. Gauster, J.A. Koski and R.D. Watson	80
2.6. <i>Constitutive design equations for thermal creep deformation of HT-9</i> , R.J. Amodeo and N.M. Ghoniem	91
2.7. <i>Analysis of forces on ferromagnetic components used in magnetic fusion reactors</i> , H. Attaya, G.L. Kulcinski and W.G. Wolfer	96
2.8. <i>The influence of irradiation and thermal creep on stress redistribution in fusion blankets</i> , J.P. Blanchard and N.M. Ghoniem	101
2.9. <i>Correlation of fracture toughness with tensile properties for irradiated 20% cold-worked 316 stainless steel</i> , M.L. Hamilton, F.A. Garner and W.G. Wolfer	106
2.10. <i>The weldability of candidate vanadium alloys for fusion applications</i> , R.E. Gold and R. Bajaj	111
2.11. <i>Materials data base for fusion reactors-II</i> , S. Iwata, A. Nogami and S. Ishino	117
2.12. <i>Radiation damage of graphite in fission and fusion reactor systems</i> , G.B. Engle and B.T. Kelly	122
2.13. <i>Influence of TiC precipitation in austenitic stainless steel on strength, ductility and helium embrittlement</i> , W. Kesternich, M.K. Matta and J. Rothaut	130
2.14. <i>The effect of preheat on the microstructure, hardness and toughness of HT-9 weldments</i> , T.A. Lechtenberg and J.R. Foulds	134
2.15. <i>Magnetically-induced forces on a ferromagnetic HT-9 first wall / blanket module</i> , T.A. Lechtenberg, C.F. Dahms and H. Attaya	140
2.16. <i>Miniaturized disk bend tests of neutron irradiated path A type alloys</i> , M. Lee, D.-S. Sohn, N.J. Grant and O.K. Harling	146
2.17. <i>The effects of material properties and of operating conditions variations on the first wall lifetime of INTOR and DEMO fusion reactors</i> , R. Matera, S. Botti and G. Cerrai	152
2.18. <i>Effect of neutron irradiation on fatigue and creep-fatigue crack propagation in alloy 718 at 427°C</i> , D.J. Michel and H.H. Smith	153
2.19. <i>Thermal cycling test of titanium in deuterium atmosphere</i> , M. Miyake, S. Yamanaka, M. Nagae, P. Son and Y. Higashiguchi	159
2.20. <i>Surface characterization of aluminum alloy 2017 as a vacuum vessel for nuclear fusion devices</i> , M. Mohri, H. Odagiri, T. Satake, T. Yamashina, H. Oikawa and Kanedo	164
2.21. <i>An analytical approach for projecting material property uncertainties</i> , R.J. Puigh, E.K. Opperman, R.E. Nygren and G.L. Wire	169
2.22. <i>Methodology for predicting critical flaw sizes for the first wall of a fusion reactor</i> , W.G. Reuter, B.J. Merrill and T.E. Rahl	174
Section 3. Ferrous structural materials	
3.1. <i>The response of austenitic steels to radiation damage</i> , A.F. Rowcliffe and M.L. Grossbeck	181
3.2. <i>Double peak of voidage depth profile in carbon or nitrogen ion irradiated 316 stainless steel</i> , T. Aruga, Y. Katano and K. Shiraishi	191
3.3. <i>Radiation induced phosphorus segregation in austenitic and ferritic alloys</i> , J.L. Brimhall, D.R. Baer and R.H. Jones	196
3.4. <i>Factors which determine the swelling behavior of austenitic stainless steels</i> , F.A. Garner and W.G. Wolfer	201
3.5. <i>Swelling in several commercial alloys irradiated to very high neutron fluence</i> , D.S. Gelles	207

Contents to Parts A&B

3.6.	<i>In-situ observation of cavity growth process in HVEM irradiated 316 stainless steel</i> , N. Igata, A. Kohyama, Y. Kohno, K. Suzuki and G. Ayrault	214
3.7.	<i>Effects of nitrogen and carbon on void swelling in austenitic stainless steels</i> , N. Igata, Y. Kohno, N. Tanabe, F. Rotman and H. Tsunakawa	219
3.8.	<i>Microstructural evolution in dual-ion irradiated 316SS under various helium injection schedules</i> , A. Kohyama, G. Ayrault and N. Igata	224
3.9.	<i>The impact of swelling on fusion reactor first wall lifetime</i> , R.F. Mattas, F.A. Garner, M.L. Grossbeck, P.J. Maziasz, G.R. Odette and R.E. Stoller	230
3.10	<i>Comparison of swelling and cavity microstructural development for type 316 stainless steel irradiated in EBR-II and HFIR</i> , P.J. Maziasz	236
3.11.	<i>Thermal creep and stress-affected precipitation of 20% cold-worked 316 stainless steel</i> , R.J. Puigh, A.J. Lovell and F.A. Garner	242
3.12	<i>Depth dependent microstructure in ion-irradiated 316 type steels</i> , R.L. Sindelar, G.L. Kulcinski and R.A. Dodd	246
3.13	<i>Deuterium and helium trapping at TiC particles in ferritic steel</i> , J.A. Spitznagel, S.S. Brenner, M.K. Miller and W.J. Choyke	252
3.14	<i>Microstructure of 9Cr-1MoVNb steel irradiated to 36 dpa at elevated temperatures in HFIR</i> , J.M. Vitek and R.L. Klueh	254
3.15.	<i>Effects of pulsed and/or dual ion irradiation on microstructural evolution in a Ti and Si modified austenitic alloy</i> , A. Hishinuma, N.H. Packan, E.H. Lee and L.K. Mansur	260
3.16	<i>Irradiation response in titanium modified austenitic stainless steels prepared by rapid solidification processing. Part I: Microstructural response to neutron irradiation</i> , D. Imeson, M. Lee, J.B. Vander Sande, N.J. Grant and O.K. Harling	266
3.17.	<i>Irradiation response in titanium modified austenitic stainless steels prepared by rapid solidification processing. Part II: Dual ion irradiations</i> , C.H. Tong, D. Imeson, J. Megusar, J.B. Vander Sande, N.J. Grant and O.K. Harling	272
3.18.	<i>Irradiation response in titanium modified austenitic stainless steels prepared by rapid solidification processing. Part III: A model for the effect of titanium addition</i> , D. Imeson, C.H. Tong, C.A. Parker, J.B. Vander Sande, N.J. Grant and O.K. Harling	278
3.19.	<i>Effects of C and Nb additions to Fe-16Ni-15Cr alloy on void swelling</i> , H. Kawanishi, M. Nodaka, N. Sekimura and S. Ishino	284
3.20.	<i>Pre-irradiation aging effects on void swelling in Ti-modified Fe-25Ni-15Cr-0.02C alloys</i> , T. Kimoto, H. Shiraishi and I. Uchiyama	289
3.21.	<i>A comparison of the irradiated tensile properties of a high-manganese austenitic steel and type 316 stainless steel</i> , R.L. Klueh and M.L. Grossbeck	294
3.22.	<i>The effect of phosphorus on the swelling and precipitation behavior of austenitic stainless steels during irradiation</i> , E.H. Lee, L.K. Mansur and A.F. Rowcliffe	299
3.23.	<i>Microstructural design of PCA austenitic stainless steel for improved resistance to helium embrittlement under HFIR irradiation</i> , P.J. Maziasz and D.N. Braski	305
3.24.	<i>Improved swelling resistance for PCA austenitic stainless steel under HFIR irradiation through microstructural control</i> , P.J. Maziasz and D.N. Braski	311
3.25.	<i>Void and precipitate structure in ion- and electron-irradiated ferritic alloys</i> , S. Ohnuki, H. Takahashi and T. Takeyama	317
3.26	<i>The effect of helium on the microstructural evolution in PCA as studied by dual beam irradiation</i> , N. Sekimura, H. Kawanishi, M. Nodaka and S. Ishino	322
3.27.	<i>Effect of minor alloying elements and their segregation on void suppression in modified 316 stainless steels</i> , H. Takahashi, S. Ohnuki, H. Osanai, T. Takeyama and K. Shiraishi	327
3.28.	<i>The dependence on displacement rate of radiation-induced changes in microstructure and tensile properties of AISI 304 and 316</i> , H.R. Brager, L.D. Blackburn and D.L. Greenslade	332
3.29.	<i>Tensile properties of unirradiated PCA from room temperature to 700°C</i> , D.N. Braski and P.J. Maziasz	338
3.30	<i>Effect of specimen size and nickel content on the impact properties of 12Cr-1MoVW ferritic steel</i> , W.R. Corwin, R.L. Klueh and J.M. Vitek	343
3.31	<i>Reduction of the ductile-brittle transition temperature of ferritic-martensitic alloy HT-9</i> , R.C. Wilcox and B.A. Chin	349
3.32.	<i>Proton irradiation creep of thin foil specimens of type 304 austenitic stainless steel and the thickness effects on their mechanical properties</i> , N. Igata, K. Miyahara, K. Ohno and T. Uda	354
3.33.	<i>Ion bombardment effects on the fatigue life of stainless steel under simulated fusion first wall conditions</i> , G. Kohse and O.K. Harling	359
Section 4. Radiation effects		
4.1.	<i>Advances in void swelling and helium bubble physics</i> , W.G. Wolfer	367
4.2.	<i>Modeling crack growth processes in fusion reactor materials</i> , R.H. Jones and W.G. Wolfer	379

Contents to Parts A&B

4.3.	<i>Pulsed flux effects on radiation damage</i> , E.P. Simonen, N.M. Ghoniem and N.H. Packan	391
4.4.	<i>Radiation hardening of oxygen-doped niobium by 14 MeV neutrons</i> , E.R. Bradley and R.H. Jones	402
4.5.	<i>Effects of tensile test temperature on the fracture modes of neutron and helium irradiated austenitic stainless steel</i> , R.D. Gerke, T. Hanamura and W.A. Jesser	407
4.6.	<i>Dislocation/obstacle interactions during low dose irradiation creep of nickel</i> , C.H. Henager, Jr., E.P. Simonen, E.R. Bradley and R.G. Stang	413
4.7.	<i>14-MeV neutron irradiation of vanadium</i> , D. Kaletta and W. Schneider	418
4.8.	<i>Interaction between an edge dislocation and an interstitial atom under stress – Fundamental process in SIPA-creep</i> , E. Kuramoto	422
4.9.	<i>Dislocation sweeping of defects in neutron- and electron-irradiated niobium</i> , B.A. Loomis and M.P. Otero	427
4.10.	<i>Shear punch tests for mechanical property measurements in TEM disc-sized specimens</i> , G.E. Lucas, J.W. Scheckherd, G.R. Odette and S. Panchanadeeswaran	429
4.11.	<i>A model for in-reactor stress rupture of austenitic stainless steels</i> , G.R. Odette	435
4.12.	<i>The micromechanical mechanisms of cleavage fracture in martensitic stainless steels</i> , G.R. Odette, G.E. Lucas, R. Maiti and J.W. Scheckherd	442
4.13.	<i>Recent results on mechanical property changes obtained by light ion simulation</i> , H. Ullmaier, H. Schroeder and P. Jung	448
4.14.	<i>14-MeV neutron irradiation of copper alloys</i> , S.J. Zinkle and G.L. Kulcinski	449
 Section 5. Austenitic stainless steels as fusion reactor structural materials – A panel discussion		
5.1.	<i>Summary of panel discussion on austenitic stainless steels as fusion reactor structural materials</i> , G.L. Kulcinski	457
5.2.	<i>Recent insights on the swelling and creep of irradiated austenitic alloys</i> , F.A. Garner	459
5.3.	<i>Swelling and swelling resistance possibilities for austenitic stainless steels in fusion reactors</i> , P.J. Maziasz	472
 Section 6. Radiation effects – Helium		
6.1.	<i>The effects of gas and precipitates on the microstructural evolution of irradiated materials</i> , R. Bullough, S.M. Murphy and M.H. Wood	489
6.2.	<i>Critical radius and critical number of gas atoms for cavities containing a Van Der Waals gas</i> , W.A. Goghlan and L.K. Mansur	495
6.3.	<i>Experimental HDS and TEM studies of the nucleation and growth of helium cavities in molybdenum at 300 K</i> , A. van Veen and J.H. Evans	502
6.4.	<i>Comparison of mechanisms for cavity growth by athermal and thermal processes</i> , B.B. Glasgow and W.G. Wolfer	503
6.5.	<i>Helium bubbles at grain boundaries in an austenitic alloy</i> , P.L. Lane and P.J. Goodhew	509
6.6.	<i>A theoretical assessment of the effect of microchemical, microstructural, and environmental mechanisms on swelling incubation in austenitic stainless steels</i> , G.R. Odette and R.E. Stoller	514
6.7.	<i>The effect of the immobilization of helium bubbles generated during irradiation on their growth by coalescence</i> , D. Preininger and D. Kaletta	520
6.8.	<i>Microstructural contributions to bubble growth in helium ion irradiated nickel</i> , M.L. Sattler and W.A. Jesser	523
6.9.	<i>Stability of helium-vacancy clusters during irradiation</i> , S. Sharafat and N.M. Ghoniem	531
6.10.	<i>Relative role of gas generation and displacement rates in cavity nucleation and growth</i> , B.N. Singh and A.J.E. Foreman	537
6.11.	<i>Cavity formation in aluminium irradiated with a pulsating beam of 225 MeV electrons</i> , B.N. Singh, J.B. Bilde-Sørensen, T. Leffers, L.S. Ozhigov and V.V. Gann	542
6.12.	<i>Effect of pre-implanted helium on cavity formation in modified 316 stainless steels during electron irradiation</i> , T. Takeyama, S. Ohnuki, H. Takahashi and M. Uchiyama	547
6.13.	<i>Conditions for dislocation loop punching by helium bubbles</i> , H. Trinkaus and W.G. Wolfer	552
6.14.	<i>Helium bubble growth during 1 MeV electron irradiation at 300 K in 5 keV He⁺-pre-implanted nickel</i> , H. Van Swygenhoven and L.M. Stals	558
6.14.	<i>A free volume relaxation model for bubble growth in amorphous alloys during inert gas implantation</i> , H. Van Swygenhoven, L.M. Stals and G. Knuyt	559
6.16.	<i>Nucleation of helium precipitates in nickel observed by HDS</i> , A. van Veen, J.H. Evans, L.M. Caspers and J.Th.M. de Hosson	560
6.17.	<i>Helium equation of state for small cavities: recent developments</i> , W.G. Wolfer, B.B. Glasgow, M.F. Wehner and H. Trinkaus	565
6.18.	<i>An electron microscopy study of tritium decay in vanadium</i> , T. Schober, R. Lässer, W. Jäger and G.J. Thomas	571

Contents to Parts A&B

Section 7. Radiation effects – Microstructure

7.1.	<i>Pulsed ion irradiated microstructures in molybdenum</i> , J.L. Brimhall, E.P. Simonen and L.A. Charlot	579
7.2.	<i>The effect of interstitial gas atoms on microstructural evolution in self-ion irradiated nickel</i> , D.B. Bullen, G.L. Kulcinski and R.A. Dodd	584
7.3.	<i>The onset temperature for void formation in extremely pure iron</i> , L. De Schepper, G. Knuyt, L.M. Stals and P. Moser	590
7.4.	<i>Application of constrained equilibrium thermodynamics to irradiated alloy systems</i> , J.P. Holloway and J.F. Stubbins	591
7.5.	<i>Ins-situ microstructural observation of radiation damage in nickel produced by energetic heavy particles</i> , S. Ishino, K. Fukuya, T. Muroga, N. Sekimura and H. Kawanishi	597
7.6.	<i>The Japanese experimental program on RTNS-II of DT-neutron irradiation of materials</i> , M. Kiritani, N. Yoshida and S. Ishino	602
7.7.	<i>Nucleation of voids and precipitates under cascade damage</i> , K. Kitajima	608
7.8.	<i>Anomalous void growth and swelling in materials at low temperatures for cyclic irradiation and background temperature</i> , L.N. Kmetyk	613
7.9.	<i>Micro-computer system for quantitative image analysis of damage microstructure</i> , A. Koyama, Y. Kohno, K. Satoh and N. Igata	619
7.10.	<i>The effect of pulsed irradiation on void swelling of a pure austenitic alloy</i> , K. Miyahara, N.H. Packan and N. Igata	624
7.11.	<i>Role of grain boundary diffusion on ion-induced composition change in alloys at elevated temperatures</i> , K. Morita, M. Hayashibara, H. Ohno and N. Itoh	629
7.12.	<i>TEM-investigation of solute redistribution under irradiation</i> , T. Muroga, S. Ishino, P.R. Okamoto and H. Wiedersich	634
7.13.	<i>Effects of nitrogen and carbon on void swelling in electron-irradiated austenitic stainless steel</i> , K. Nakata, Y. Katano, I. Masaoka and K. Shiraishi	639
7.14.	<i>Temperature aspects of pulsed ion bombardment in an austenitic alloy</i> , N.H. Packan	644
7.15.	<i>Conditions for the suppression of void formation during ion-bombardment</i> , D.L. Plumton, H. Attaya and W.G. Wolfer	650
7.16.	<i>Theory of depleted zone annealing during pulsed irradiation</i> , E.P. Simonen	654
7.17.	<i>The lithium shell effect and its impact on microscopy determinations of swelling behavior</i> , W.J.S. Yang, F.A. Garner and A. Kumar	659
7.18.	<i>Evolution of damage structures under 14 MeV neutron, 4 MeV Ni ion and 1.25 MeV electron irradiation</i> , N. Yoshida, K. Kitajima and E. Kuramoto	664

Section 8. Advanced materials

8.1.	<i>The influence of heat treatment and irradiation temperature on neutron-irradiation embrittlement of molybdenum and TZM alloy</i> , K. Abe, M. Kikuchi, K. Tate and S. Morozumi	671
8.2.	<i>Microstructure and bend ductility of a (Fe, Ni)₃V ordered alloy irradiated in HFIR</i> , D.N. Braski	676
8.3.	<i>Fatigue performance of HFIR-irradiated nimonon PE-16 at 430°C</i> , M.L. Grossbeck and K.C. Liu	682
8.4.	<i>The temperature dependence of the damage microstructures in neutron-irradiated vanadium</i> , L.L. Horton and K. Farrell	687
8.5.	<i>Corrosion and oxidation of vanadium-base alloys</i> , B.A. Loomis and G. Wiggins	693
8.6.	<i>Investigation of chemical redistribution in dilute Cu-alloys under simulation irradiation</i> , M.-P. Macht, V. Naundorf, R.P. Wahi and H. Wollenberger	698
8.7.	<i>Grain boundary related effects in aluminium during 600 MeV proton irradiation at different temperatures</i> , B.N. Singh, T. Leffers, W.V. Green and M. Victoria	703
8.8.	<i>The effect of implanted helium on the microstructure and creep properties of ordered (Fe_{0.49}Ni_{0.51})₃V alloys</i> , P.S. Sklad and H. Schroeder	709
8.9.	<i>High voltage electron and helium irradiation of molybdenum</i> , J.F. Stubbins	715
8.10.	<i>The irradiation-induced microstructural development and the role of γ' on void formation in Ni-based alloys</i> , T. Kato, K. Nakata, I. Masaoka, H. Takahashi, T. Takeyama, S. Ohnuki and H. Osanai	721
8.11.	<i>Void formation and mechanical property of high temperature neutron-irradiated molybdenum</i> , T. Takeyama, H. Kayano, H. Takahashi, S. Ohnuki and M. Narui	727
8.12.	<i>Helium and argon ion damage in metallic glasses</i> , A.K. Tyagi, R.V. Nandedkar and K. Krishan	732
8.13.	<i>The temperature dependence of void and bubble formation and growth in aluminium during 600 MeV proton irradiation</i> , M. Victoria, W.V. Green, B.N. Singh and T. Leffers	737
8.14.	<i>Radiation damage in Fe₈₀B₂₀ amorphous alloy irradiated with helium ions</i> , Y. Watanabe, S. Nanao and A. Koyama	743
8.15.	<i>The ductility and microstructure of precipitation-strengthened alloys irradiated in HFIR</i> , W.J.S. Yang and M.L. Hamilton	748
8.16.	<i>Effects of alloying and heat treatment on the endurance limit of molybdenum in high cycle fatigue tests</i> , K. Furuya and T. Kainuma	754
8.17.	<i>Mechanical properties of candidate vanadium alloys for fusion applications</i> , R.E. Gold and R. Bajaj	759

Contents to Parts A&B

8.18.	<i>Mechanical properties of electron beam welded molybdenum alloys</i> , A. Kohyama and N. Igata	767
8.19.	<i>Electron beam welding of titanium and Ti-6Al-4V thick plates</i> , A. Kohyama, Y. Arata, M. Tomie and N. Igata	772
8.20.	<i>An assessment of martensitic steels for low activation status</i> , T. Lechtenberg	777
8.21.	<i>Low-cycle fatigue behavior of oxygen-free high-conductivity copper at 300 °C in high vacuum</i> , K.C. Liu and C.M. Loring, Jr.	783
8.22.	<i>Structures and properties of rapidly solidified 9Cr-1Mo steel</i> , J. Megusar, E. Lavernia, P. Domalavage, O.K. Harling and N.J. Grant	789
8.23.	<i>Phase instability of thermally aged Cr-Mn austenitic steels</i> , E. Ruedl and T. Sasaki	794
8.24.	<i>Copper and copper alloys for fusion reactor applications: summary report of a DOE-OFE workshop</i> , F.W. Wiffen, T.C. Reuther and R.E. Gold	799
8.25.	<i>Comparison of compression properties and swelling of beryllium irradiated at various temperatures</i> , J.M. Beeston, L.G. Miller, E.L. Wood, Jr. and R.W. Moir	802
8.26.	<i>The effect of strain rate on the properties of (Fe, Ni)₃V long range ordered alloys</i> , B.A. Chin and R.C. Wilcox	810
8.27.	<i>Strength and fatigue analysis of fibrous silicon carbide for ICF reactor applications</i> , R.L. Engelstad, E.G. Lovell and S.J. Covey	816
8.28.	<i>Health risk implications of using beryllium in fusion reactors</i> , A.G. Harmsen, M.D. Hoover and F.A. Seiler	821
8.29.	<i>Characterization of potential aerosols from fusion energy systems</i> , M.D. Hoover, F.A. Seiler, G.J. Newton and S.J. Rothenberg	827
8.30.	<i>Microstructure of neutron irradiation-induced defects in sintered and siliconized SiC</i> , S.D. Harrison and J.C. Corelli	833
8.31.	<i>The determination of flow distribution by analysis of indentation geometry</i> , M. Jayakumar and G.E. Lucas	840
8.32.	<i>Development of low activation Al alloys for D-T burning fusion device</i> , K. Kamada, Y. Baba, T. Uno, H. Yoshida and Y. Shoji	845
8.33.	<i>Tensile and low-cycle fatigue measurements on cross-rolled tungsten at 1505 K</i> , R.E. Schmunk, G.E. Korth and M. Ulrickson	850
8.34.	<i>An evaluation of beryllium for magnetic fusion components</i> , M.F. Smith and A.W. Mullendore	855
8.35.	<i>Thermionic diode materials selection and performance for fusion reactor power applications</i> , J.F. Stubbins and J.P. Holloway	858
8.36.	<i>Application of vanadium and vanadium alloys to a fusion reactor blanket</i> , J. Bethin and A. Tobin	864
