

## CONTENTS

Preface .....	vii	A perspective on present and future alloy development efforts on austenitic stainless steels for fusion application	
<b>Section 1. Opening Address</b>		P.J. Maziasz .....	134
Opening Address		Ferritic/martensitic dual phase steel as fusion reactor material	
R.R. Hasiguti .....	3	N. Igata .....	141
<b>Section 2. Invited Papers</b>		Irradiation effects in ferritic steels	
Present status of JT-60		T. Lechtenberg .....	149
M. Yoshikawa .....	7	* Vanadium base alloys for fusion reactor applications	
Status of the Tokamak Fusion Test Reactor (TFTR)		D.L. Smith, B.A. Loomis and D.R. Diercks	
T.C. Reuther, Jr. ....	10	Special purpose materials for fusion application	
Present status of JET		J.L. Scott, F.W. Clinard, Jr. and F.W. Wiffen .....	156
J.G. Cordey .....	14	<b>Section 3. Breeding Materials</b>	
Experiences of wall interactions in JET		Hydrogen solubility in liquid $\text{Li}_{17}\text{Pb}_{83}$	
W.M. Lomer .....	18	H. Katsuta, H. Iwamoto and H. Ohno .....	167
Materials research and development for NET		The TRIO experiment	
D.R. Harries, J.-M. Dupouy and C.H. Wu .....	25	R.G. Clemmer, P.A. Finn, B. Misra, M.C. Billone, A.K. Fischer, S.W. Tam, C.E. Johnson and A.E. Scandora .....	171
Materials engineering for TFCX		Selection, characterization and testing of ceramic breeder materials	
F.W. Wiffen .....	32	K.R. Kummerer and W. Dienst .....	176
Materials considerations for high heat flux components		Correlation behavior of lithium and tritium in some solid breeder materials	
J.B. Whitley .....	39	H. Ohno, S. Konishi, T. Nagasaki, T. Kurasawa, H. Katsuta and H. Watanabe .....	181
Lithium-lead eutectic as breeding material in fusion reactors		Thermodynamics of $\text{Li}_2\text{O}$ and other breeders for fusion reactors	
V. Coen .....	46	A.K. Fischer and C.E. Johnson .....	186
Differences between neutron damage in inertial and magnetic confinement fusion materials test facilities		Kinetics and mechanism of tritium release from neutron-irradiated $\text{Li}_2\text{O}$	
G.L. Kulcinski and M.E. Sawan .....	52	H. Kudo and K. Okuno .....	192
Simulation by medium energy proton irradiation		In-situ tritium recovery experiment from lithium oxide under high neutron fluence	
W.V. Green, M.P. Victoria and S.L. Green .....	58	T. Kurasawa, H. Yoshida, H. Takeshita, H. Watanabe, T. Miyauchi, T. Matui, H. Umei and Y. Naruse .....	196
Statistical theory of microstructural evolution under cascade damage		Spectroscopic analysis of lithium hydroxide and carbonate in solid state lithium oxide	
K. Kitajima .....	64	S. Oohira, M. Kakihana, Y. Fujii, T. Nagumo and M. Okamoto .....	201
Recoil effects in radiation damage		Irradiation damages in lithium oxide	
C.A. English .....	71	K. Noda, Y. Ishii, H. Matsui and H. Watanabe .....	205
Damage analysis and irradiation correlation		Microstructural examination of fast-neutron-irradiated $\text{Li}_2\text{O}$	
S. Ishino and T. Muroga .....	78	Y.Y. Liu, R.F. Mattas, D.L. Smith and D.L. Porter .....	209
Defect structure evolution from radiation damage with D-T fusion neutrons		Creep of $\text{Li}_2\text{O}$	
M. Kiritani .....	85	G.W. Hollenberg, Y.Y. Liu and B. Arthur .....	216
The effects of helium generation and pulsing on damage processes in reactor materials		Improved methods for fabrication of lithium silicates	
R. Bullough and S.M. Murphy .....	92	D. Vollath, H. Wedemeyer and E. Günther .....	221
Helium in fusion materials: high temperature embrittlement		Preparation of high sinterable lithium metasilicate	
H. Ullmaier .....	100	A.J. Flipot, P. Diels and R. Lecocq .....	226
Modeling of helium effects in metals: high temperature embrittlement		Irradiation damage in lithium ceramics	
H. Trinkaus .....	105	M.H. Auvray-Gély, A. Dunlop and L.W. Hobbs .....	230
Application of high fluence fast reactor data to fusion-relevant materials problems		Saturation phenomena and percolative transitions in the high-temperature thermal conductivity of $\gamma\text{-LiAlO}_2$	
F.A. Garner .....	113	S.W. Tam, L. Leibowitz, Y.Y. Liu, R. Blomquist and C.E. Johnson .....	234
Deformation behaviour of austenitic stainless steels after and during neutron irradiation			
K. Ehrlich .....	119		
Modeling microstructural evolution in fusion reactor environments			
G.R. Odette .....	127		

\* Papers not included in these Proceedings

Irradiation of lithium aluminate and tritium extraction E. Roth, J.J. Abassin, F. Botter, M. Briec, P. Chenebault, M. Masson, R. Rasneur and N. Roux . . .	238	<b>Section 5. Mechanical Properties</b>	
The effect of irradiation on four solid breeder materials G.W. Hollenberg and D.L. Baldwin . . . . .	242	Small specimen fracture toughness tests of HT-9 steel irradiated with protons T. Misawa, H. Sugawara, R. Miura and Y. Hamaguchi . . . . .	313
EXOTIC, an experimental programme on the development of ceramic tritium breeding materials H. Kwast, R. Conrad and J.D. Elen . . . . .	246	Instrumented Charpy impact tests of austenitic and ferritic steels H. Yoshida, K. Miyata, Y. Hayashi, M. Narui and H. Kayano . . . . .	317
<b>Section 4. Plasma Surface Interactions</b>		Correlation among a variety of miniaturized mechanical tests and their application to D-T neutron-irradiated metals A. Okada, T. Yoshiie, S. Kojima, K. Abe and M. Kiritani . . . . .	321
Performance of the TFTR moveable limiter tiles M. Ulrickson, J.L. Cecchi, B.L. Doyle, H.F. Dylla, S.S. Medley, D.K. Owens and P. Trester . . . . .	253	Shear punch and ball microhardness measurements of 14 MeV neutron irradiation hardening in five metals K. Shinohara, G.E. Lucas and G.R. Odette . . . . .	326
Studies on properties of low-Z ceramics as limiter materials – Electron beam and TEXTOR-limiter tests Y. Gotoh, H. Hoven, K. Koizlik, J. Linke, U. Samm, B. Thiele and E. Wallura . . . . .	257	Mechanical properties of molybdenum single crystals produced by means of secondary recrystallization Y. Hiraoka, T. Fujii, T. Kainuma, M. Okada and R. Watanabe . . . . .	332
Surface compositional changes of TiC, B <sub>4</sub> C and SiC at high temperatures S. Adachi, S. Fukuda, M. Mohri and T. Yamashina . . . . .	263	Change in microstructure and toughness of ferritic-martensitic stainless steels during long-term aging Y. Hosoi, N. Wade, T. Urita, M. Tanino and H. Komatsu . . . . .	337
Thermal desorption of deuterium and helium from ion irradiated graphite H. Atsumi, S. Yamanaka, P. Son and M. Miyake . . . . .	268	The effect of a strong magnetic field on age-hardening of iron–chromium alloys E. Faillace and I-Wei Chen . . . . .	343
Deuterium trapping of titanium carbide coatings on molybdenum M. Kitajima, H. Shinno, T. Noda, M. Fukutomi and M. Okada . . . . .	272	Fatigue strength of Inconel 625 plate and weldments used in the DIII-D configuration vacuum vessel P.W. Trester, J.L. Kaae and R. Gallix . . . . .	347
Helium trapping in aluminium near the critical dose on blister formation T. Fukahori, Y. Kanda, K. Mori and H. Tobimatsu . . . . .	277	* Application of miniature sample testing methods for ferritic stainless steels K. Komamura, A. Kohyama, K. Asakura and N. Igata . . . . .	
Surface reaction and bulk diffusion of tritium in SUS-316 stainless steel M. Sugisaki, H. Furuya, H. Ueki and S. Ejima . . . . .	280	* Microstructural and mechanical property studies of the mechanisms of cleavage fracture in tempered martensitic stainless steels R. Odette, G. Lucas, R. Maiti and W. Sheckherd . . . . .	
Dual ion beam study on deuterium permeation K. Fukushima, K. Ebisawa, S. Nakahigashi, M. Iimura and M. Terasawa . . . . .	284	* Effects of metallurgical factors on DBTT of ferritic steels for fusion reactor first wall applications S. Ohta, M. Fujiwara and H. Uchida . . . . .	
Hydrogen permeation through Type 316 stainless steels and ferritic steel for a fusion reactor E. Hashimoto and T. Kino . . . . .	289	* Impact strength studies of ferritic steels using small test pieces H. Kayano, M. Narui, Y. Sasaki, Y. Suzuki, S. Ohta and S. Morozumi . . . . .	
Hydrogen permeation of vanadium and an in-situ surface analysis M. Yamawaki, T. Namba, T. Kiyoshi, T. Yoneoka and M. Kanno . . . . .	292	* Application of shear punch tests to irradiated metals G.E. Lucas, G.R. Odette and J.W. Sheckherd . . . . .	
Sputtering characteristics of redeposited material R. Bastasz . . . . .	297	* In-situ fatigue test under irradiation by low energy ions S. Okada, T. Fujita and H. Shibuki . . . . .	
Sputtering of titanium and zirconium by fusion plasma impurity ions E. Hechtel and J. Bohdansky . . . . .	301	<b>Section 6. Radiation Damage: Defects and Damage Production</b>	
Effects of residual species in vacuo on plasma-induced surface phenomena observed on first-wall materials K. Kiuchi and T. Kondo . . . . .	305	A Monte Carlo study of cascade fluctuations Cui Fu-Zhai and Li Heng-De . . . . .	353
* Studies of arcing erosion of bulks and films pre-irradiated with helium and self-ions M. Nunogaki, A. Yoshida, Y. Fujisawa, S. Ohi, K. Miyazaki and M. Miyake . . . . .		Defect production and recovery in fcc metals irradiated at 4.2 K M.W. Guinan, J.H. Kinney and R.A. Van Konynenburg . . . . .	357
* Ar ion irradiation sputtering of A316 stainless steel and molybdenum stressed tensily and compressively T. Yamane, N. Hiramatsu and K. Hirao . . . . .			
* Papers not included in these Proceedings			

Fine structure of Wigner energy release spectrum in neutron irradiated graphite T. Iwata . . . . .	361	K. Kitagawa, K. Yamakawa, H. Fukushima, T. Yoshiie, Y. Hayashi, H. Yoshida, Y. Shimomura and M. Kiritani . . . . .	395
Defect production by energetic heavy ions in aluminum and copper A. Iwase, S. Sasaki, T. Iwata and T. Nihira . . . . .	365	Effects of ion species on the evolution of structural damage in ion irradiated high-purity aluminium S. Furuno, K. Izui, K. Ono and T. Kino . . . . .	400
Measurement of mean projected ranges for carbon-ions irradiated into stainless steel S. Hamada, T. Sawai and K. Shiraishi . . . . .	370	Formation of secondary defects in copper by 14 MeV neutron irradiation and their effects on microstructure evolution N. Yoshida, Y. Akashi, K. Kitajima and M. Kiritani . . . . .	405
Effects of primary recoil energy on the production rate of mobile defects during elevated temperature irradiation P.R. Okamoto, R.E. Rehn and R.S. Averback . . . . .	373	Development of defect structures from displacement cascade damages in D-T neutron irradiated gold M. Kiritani, Y. Shimomura, N. Yoshida, K. Kitagawa and T. Yoshiie . . . . .	410
The effect of recoil energy spectrum on cascade structures and defect production efficiencies T. Muroga, K. Kitajima and S. Ishino . . . . .	378	Low temperature D-T neutron irradiation and cryo-transfer observation of cascade defects of metals Y. Shimomura, M.W. Guinan and M. Kiritani . . . . .	415
* Metastable defects in D-T neutron irradiated germanium M. Kiritani and M. Hirata		Irradiation induced self- and solute diffusion in Ni and Fe-20Cr-20Ni M.-P. Macht, V. Naundorf, R.V. Patil and H. Wollenberger . . . . .	420
* Roles of free interstitials, temperature dependence of cascade stability and post-irradiation effects in D-T neutron irradiated nickel M. Kiritani, N. Yoshida and Y. Shimomura		Microstructural changes in dilute Ni-Be alloys during HVEM sub-threshold irradiations P.G. Régnier and N.Q. Lam . . . . .	423
* Cascade defects in very low dose D-T neutron irradiated metals Y. Shimomura, M. Guinan, M. Kiritani, D. Heikinen and C. Logan		Sputter-induced compositional modifications in a Ni-Au alloy N.Q. Lam, H.A. Hoff and P.G. Régnier . . . . .	427
* Comparison of subcascade structures in ion irradiated gold by TEM observations and computer simulations T. Muroga, K. Kitajima and S. Ishino		Local phase transformations in alloys during charged-particle irradiation N.Q. Lam and P.R. Okamoto . . . . .	430
* The effect of cascades with high PKA energies on the microstructural evolution of irradiated metals K. Kitajima, T. Muroga and N. Yoshida		Irradiation growth due to magnetodiffusion I-Wei Chen . . . . .	435
* Depth-dependent damage profile in stainless steels irradiated with Ar- and N-ions K. Shiraishi, K. Fukai, E. Yagi, T. Sawai and S. Hamada		Inhomogeneous microstructural growth by irradiation K. Krishnan, B.N. Singh and T. Leffers . . . . .	439
* Mössbauer (CEMS) study of coated steels irradiated by heavy ions I. Sakamoto, N. Hayashi, B. Furubayashi, T. Kanayama and H. Tanoue		The magnitude and distribution of the excess interstitial fraction during heavy ion irradiation D.L. Plumton and G.L. Kulcinski . . . . .	444
* Interstitial migration energies in transition metals H. Maeta and F. Ono		* D-T neutron irradiation of JPCA and its model alloys N. Yoshida, K. Kitajima, E. Kuramoto, H. Kawanishi, S. Ishino and M. Kiritani	
* Magnetic and band energies of interstitials in bcc iron F. Ono and H. Maeta		* Sink strengths of interface dislocation between $\beta$ Nb and $\beta$ Zr phases in Nb-40 wt% Zr alloy K. Nakai, C. Kinoshita and S. Kitajima	
		* Sink density problems in heavy ion irradiated materials M.-P. Macht, V. Naundorf, R.P. Wahi and H. Wollenberger	
		* Theoretical investigation of irradiation-induced phase transformation in the Fe-Cr and Fe-Cr-Ni alloys A.O.O. Mekhrabov, R. Yamamoto and M. Doyama	
<b>Section 7. Radiation Damage: Damage Structure Evolution</b>			
Electron microscopic studies of damage evolution in fission neutron irradiated metals Y. Shimomura, H. Yoshida, M. Kiritani, K. Kitagawa and K. Yamakawa . . . . .	385		
A study of point defect processes in candidate and model alloys for fusion reactor first wall by HVEM T. Yoshiie, S. Kojima, Y. Sato, N. Yoshida and M. Kiritani . . . . .	390	<b>Section 8. Radiation Effects: Helium and Hydrogen</b>	
Ion-irradiation experiment for the fundamental studies of damage evolution of fusion materials		Bubble nucleation in grain interior and its influence on helium accumulation at grain boundaries A.J.E. Foreman and B.N. Singh . . . . .	451
		Effect of hydrogen on void production in nickel D.B. Bullen, G.L. Kulcinski and R.A. Dodd . . . . .	455
		Effect of injected hydrogen on defect cluster formation in electron irradiated austenitic stainless steel S. Ohnuki, H. Takahashi, T. Takeyama and F. Wan . . . . .	459
		A study of agglomeration and release processes of helium	
* Papers not included in these Proceedings			

implanted in nickel by a variable energy positron beam S. Tanigawa, Y. Iwase, A. Uedono and H. Sakairi . . . . .	463	Effects of dose rate on void formation and precipitation in proton irradiated austenitic stainless steels T. Kimoto, H. Shiraishi and A. Hishinuma . . . . .	540
Diffusion of He in austenitic stainless steels studied in TDPAC H. Sekiguchi, H. Watanabe, I. Sakamoto, Y. Nishihara, E. Tanaka, S. Hayashibe and M. Fujioka . . . . .	468	Heterogeneous void formation in 14 MeV nickel-ion-irradiated 316 SS R.L. Sindelar, G.L. Kulcinski and R.A. Dodd . . . . .	544
Continuous TEM observation of cavities in nickel under helium irradiation H. Kusanagi, H. Kimura, M. Tokiwai and T. Suzuki . . . . .	473	Damage recovery in electron-irradiated Fe-Ni-Cr alloys A.O.O. Mekhrabov, E. Sato, M. Shimotomai, M. Doyama, T. Iwata and T. Kawanishi . . . . .	549
Formation, coalescence and stability of helium bubbles in high purity aluminum and some dilute alloys K. Ono, M. Inoue, T. Kino, S. Furuno and K. Izui . . . . .	477	Effect of cold work on void swelling in aluminium at high neutron fluences W. van Witzenburg and A. Mastenbroek . . . . .	553
Influence of helium-generated interstitials in dual ion irradiations A.S. Kumar . . . . .	482	<b>Section 11. Radiation Effects: Austenitic Stainless Steels</b>	
The effects of helium on the evolution of voids under cascade damage K. Kitajima, Y. Akashi and E. Kuramoto . . . . .	486	Positron annihilation lifetime measurement of irradiated stainless steels E. Kuramoto, N. Tsukuda, Y. Aono, M. Takenaka, Y. Takano, H. Yoshida and K. Shiraishi . . . . .	561
* Electronic structure of condensed He cluster K. Fukushima, H. Adachi and S. Imoto . . . . .		Damage structural behavior by electron irradiation of Mn-Cr austenitic stainless steels H. Takahashi, T. Takeyama, K. Tanikawa and R. Miura . . . . .	566
* Growth and reduction of gas bubbles T. Kirihaara . . . . .		Study of cavity formation in 316 stainless steels by means of HVEM/ion-accelerator dual irradiation T. Takeyama, S. Ohnuki and H. Takahashi . . . . .	571
<b>Section 9. Radiation Effects: Mechanical Properties</b>		Grain boundary migration during electron irradiation in austenitic stainless steels K. Nakata, Y. Katano, I. Masaoka and K. Shiraishi . . . . .	575
Effects of TiC distribution on the creep properties of helium injected JPCA N. Yamamoto, H. Shiraishi, H. Kamitsubo, I. Kohno, T. Shikata and A. Hishinuma . . . . .	493	Influence of temperature and applied stress on void nucleation in 304 stainless steel N. Igata, T. Fujihira and H. Tsunakawa . . . . .	580
Irradiation creep simulation at low proton flux J. Nagakawa, H. Shiraishi, M. Okada, H. Kamitsubo, I. Kohno and T. Shikata . . . . .	497	Effect of carbon on microstructure in Ti-modified Type 316 stainless steels irradiated with helium ions K. Suzuki, Y. Katano, T. Aruga, S. Hamada and K. Shiraishi . . . . .	585
Radiation effects on the mechanical properties of stainless steels Y. Aono, H. Abe, E. Kuramoto, N. Tsukuda, M. Takenaka, T. Kinoshita and H. Yoshida . . . . .	501	The influence of silicon on void nucleation in irradiated alloys B. Esmailzadeh, A. Kumar and F.A. Garner . . . . .	590
The effects of grain and specimen sizes on the mechanical properties of Type 316 austenitic stainless steel K. Miyahara, C. Tada, T. Uda and N. Igata . . . . .	506	The influence of composition on microstructural evolution and mechanical properties of irradiated Fe-Ni-Cr ternaries H.R. Brager, F.A. Garner and M.I. Hamilton . . . . .	594
The role of phosphorus in the swelling and creep of irradiated austenitic alloys F.A. Garner and H.R. Brager . . . . .	511	Irradiation-altered precipitation in Fe-Ni-C alloys S.E. Best and K.C. Russell . . . . .	599
<b>Section 10. Radiation Effects: Swelling and Microstructure</b>		Dislocation development and void formation during electron irradiation in Inconel X-750 with $\gamma'$ precipitates T. Kato, K. Nakata, H. Takahashi, S. Ohnuki, I. Masaoka and T. Takeyama . . . . .	604
Void swelling and microstructure evolution of a dual phase (ferritic and austenitic) stainless steel D. Blasl, H. Tsunakawa, K. Miyahara and N. Igata . . . . .	517	Recalibration of void swelling model E. Diana and A. Scotti . . . . .	609
The swelling behavior of manganese-bearing AISI 216 steel D.S. Gelles and F.A. Garner . . . . .	521	<b>Section 12. Radiation Effects: Ferritic Steels</b>	
Microchemical evolution in PCA under dual ion irradiation N. Sekimura, H. Kawanishi and S. Ishino . . . . .	525	Irradiation hardening of iron and vanadium by fission and fusion neutrons H. Matsui, K. Abe, S. Hirano, O. Yoshinari and M. Koiwa . . . . .	615
Effects of titanium and zirconium on void swelling in electron-irradiated austenitic stainless steel Y. Katano, K. Nakata, S. Jitsukawa, T. Aruga and K. Shiraishi . . . . .	530	Microstructural evolution under helium implantation and self-ion irradiation in a ferritic steel and a model alloy P. Dauben, R.P. Wahi and H. Wollenberger . . . . .	619
Swelling behavior of titanium-modified alloys in EBR-II F.A. Garner, H.R. Brager and R.J. Puigh . . . . .	535		
* Papers not included in these Proceedings			

Microstructure in ion-irradiated 9Cr–2Mo steel (JFMS) H. Kawanishi, N. Sekimura, M. Shibata and S. Ishino	623	<b>Section 14. Ceramic Materials</b>	
Low fluence neutron irradiation response of ferritic stainless steels A. Kohyama, K. Asakura, Y. Kohno, K. Komamura, K. Suzuki, M. Kiritani, T. Fujita and N. Igata	628	The effect of elevated-temperature neutron irradiation on fracture toughness of ceramics F.W. Clinard, Jr., G.F. Hurley, R.A. Youngman and L.W. Hobbs	701
Cavity growth in dual-ion and electron irradiated HT-9 ferritic stainless steels K. Suzuki, A. Kohyama, G. Ayrault and N. Igata	632	Effects of neutron irradiation on SiC fiber K. Okamura, T. Matsuzawa, M. Sato, Y. Higashiguchi and S. Morozumi	705
Effects of proton irradiation on the hardening behavior of HT-9 steel Y. Hamaguchi, H. Kuwano, H. Kamide, R. Miura and T. Yamada	636	Structural changes induced by helium ion irradiation in silicon carbide crystals K. Hojou and K. Izui	709
Calculated strength of irradiated ferritics E.P. Simonen	640	Deuterium retention in TiC crystals prepared by zone melting method K. Sato, S. Yamaguchi and M. Hirabayashi	714
The behavior of low C–9Cr–2Mo steel in a fast breeder reactor irradiation environment T. Yukitoshi, K. Yoshikawa, H. Teranishi, T. Lauritzen, W.L. Bell and S. Vaidyanathan	644	Fusion neutron irradiation of TiC H. Matsui, M.W. Guinan, T. Iida and M. Iseki	718
Irradiation embrittlement of neutron-irradiated ferritic steel H. Kayano, M. Narui, S. Ohta and S. Morozumi	649	Surface erosion of substoichiometric titanium carbide under high energy $^4\text{He}^+$ ion bombardment M. Iseki and Z. Kabeya	722
<b>Section 13. Radiation Effects: Refractory Metals and High Conductivity Metals</b>		Irradiation response and tritium release behavior of boron carbide T. Maruyama and T. Iseki	727
Microhardness testing of molybdenum irradiated by He ions A. Hasegawa, K. Abe and S. Morozumi	657	Ion irradiation and annealing studies NbC thin films N. Kobayashi, R. Kaufmann and G. Linker	732
Microstructure and mechanical properties of neutron irradiated V–20Ti alloy Y. Higashiguchi, H. Kayano and S. Morozumi	662	Characterization of $\text{Ar}^+$ ion irradiated alumina coatings N. Iwamoto, Y. Makino, S. Endo, N. Itoh and N. Matsunami	736
Damage analysis of vanadium irradiated with 14 MeV-neutrons T. Aruga, Y. Katano, K. Suzuki, Y. Ikeda, T. Nakamura and K. Shiraishi	667	Damage structures in fast neutron irradiated magnesium aluminate and electron irradiated aluminum oxynitride spinels C.A. Parker, L.W. Hobbs, K.C. Russell and F.W. Clinard, Jr.	741
Strength and microstructure in vanadium irradiated with T(d, n) neutrons at 300 to 675 K E.R. Bradley and R.H. Jones	671	Optical properties of MgO irradiated by fast neutrons M. Okada, T. Seiyama, C. Ichihara and M. Nakagawa	745
Effects of neutron irradiation at 450°C and 16 dpa on the properties of various commercial copper alloys H.R. Brager, H.L. Heinisch and F.A. Garner	676	In-situ coating of low-Z materials by reactive vacuum arc deposition with a stabilized arc cathode H. Shinno, M. Fukutomi, M. Fujitsuka and M. Okada	749
Ion irradiation of high-strength, high-conductivity copper alloys at fusion-relevant temperatures S.J. Zinkle, R.A. Dodd and G.L. Kulcinski	680	Development of TiC coated wall materials for JT-60 T. Abe, Y. Murakami, K. Obara, S. Hiroki, K. Nakamura, T. Mizoguchi, A. Doi and K. Inagawa	754
Correlation of the yield strength and microhardness of high-strength, high-conductivity copper alloys S.J. Zinkle, D.H. Plantz, A.E. Bair, R.A. Dodd and G.L. Kulcinski	685	Properties of TiC–TiN double layer coatings prepared by reactive RF sputtering O. Kawamoto, Y. Hirohata, M. Mohri and T. Yamashina	760
14 MeV-neutron irradiation effects on the yield stress of highly perfect copper single crystals K. Shinohara and S. Kitajima	690	Properties of titanium carbide and vanadium carbide mixtures as first wall coatings T. Shikama, Y. Sakai, M. Fukutomi and M. Okada	765
Nucleation and growth mechanism of homogeneous radiation-induced precipitates in Cu–0.18 wt% Be alloy K. Nakai, C. Kinoshita, S. Kitajima and T.E. Mitchell	694	The development and thermal testing of graphite/metal bonds for fusion reactor applications M. Fukutomi, M. Fujitsuka and M. Okada	769
* 14 MeV neutron irradiation hardening in refractory metals K. Abe, H. Matsui and F. Nagase		Solid-state bonding of oxide ceramic to steel K. Suganuma, T. Okamoto, M. Koizumi and M. Shimada	773
		* Temperature dependencies of Young's modulus in molybdenum coated with titanium carbide K. Matsushita and T. Okamoto	
		* Tensile properties of TiC coating on stainless steel A. Ohkawa and R.R. Hasiguti	

\* Papers not included in these Proceedings

**Section 15. Superconducting Magnet Materials**

Fast neutron irradiation effects on polymers – polyethylene, ethylene propylene rubber and tetrafluoroethylene propylene copolymer Y. Tabata and Y. Katsumura . . . . .	781
Pulse radiolysis studies in radiation resistance of epoxy resin S. Tagawa, M. Washio, N. Hayashi and Y. Tabata . . . . .	785
Radiation effects on organic insulator films at low temperature H. Yamaoka and K. Miyata . . . . .	788
Activation problems of superconducting magnet materials used in fusion reactors T. Okada, S. Nishijima, C. Ichihara and H. Yamaoka . . . . .	791
Neutron and $\gamma$ -ray irradiation effects in composite organic insulators S. Egusa, M.A. Kirk, R.C. Birtcher and M. Hagiwara . . . . .	795
Length change of organic insulators after reactor irradiation at 5 K M. Watanabe and H. Maeta . . . . .	800
Properties of polymers after cryogenic neutron irradiation D.S. Tucker, F.W. Clinard, Jr., G.F. Hurley and J.D. Fowler . . . . .	805
Degradation behavior of fiber reinforced composites under irradiation by 3 MeV electrons M. Hagiwara, A. Udagawa, S. Kawanishi, S. Egusa and N. Takeda . . . . .	810
Superconducting properties of $V_2$ (Hf, Zr) Laves phase multifilamentary wires K. Inoue, T. Kuroda and K. Tachikawa . . . . .	815
Neutron irradiation effects on critical temperatures of A15-type superconducting composites H. Kodaka, K. Miyata, H. Yoshida, H. Yamaoka, M. Fukumoto and T. Okada . . . . .	819
Radiation induced changes in critical superconducting properties of $V_3Si$ H. Scheurer, R. Meier-Hirmer and H. K�pfer . . . . .	823
Strain effects in irradiated “in situ” $Nb_3Sn$ superconductors M. Fukumoto, T. Okada, S. Nishijima, H. Yoshida, H. Kodaka, K. Yasohama, M. Nagata and T. Horiuchi . . . . .	826
Improved multifilamentary $Nb_3Sn$ conductors produced by the titanium-bronze process K. Tachikawa, K. Itoh, K. Kamata, H. Moriai and N. Tada . . . . .	830
Investigation of cryogenic constructional materials for a fusion reactor Li Yiyi, Chai Shoushen, Qian Bainian, Xu Yikui and Zhao Xuejun . . . . .	834
* Electrical resistivity change in Cu and Al stabilizers of superconducting magnet after low-temperature neutron irradiation K. Nakata, S. Takamura, N. Tada and I. Masaoka . . . . .	
* Radiation effects limits on superconducting magnets: The data base for copper stabilizers M.W. Guinan and R.A. Van Konynenburg . . . . .	

\* Papers not included in these Proceedings

* 14-MeV neutron irradiation damage of Kapton polyimide film K. Abe, K. Saneyoshi, C.M. Logan and F.W. Clinard . . . . .	
* Activation analysis of fillers used in composite materials H. Yamaoka, R. Matsushita, K. Miyata and Y. Nakayama . . . . .	
<b>Section 16. Materials Data Base and Others</b>	
Development of a materials data base for modeling S. Iwata, N. Minato, A. Nogami and S. Ishino . . . . .	841
Development of a lifetime evaluation code for a fusion reactor first wall H. Oomura, K. Miya and M. Akiyama . . . . .	845
The effects of strength and geometry on cleavage fracture stress and strain limits of martensitic stainless steels G.R. Odette, G.E. Lucas, R. Maiti and J.W. Shekherd . . . . .	849
The endurance limit of JPCA alloy at 703 K in vacuum K. Furuya, H. Shiraishi and M. Tanaka . . . . .	853
Neutronics calculations of the INTOR blanket with austenitic steel as structural material and low-Z coating R.D. Santos, E.M. Azevedo and R.C.O. Silva . . . . .	858
Corrosion of ferrous alloys in a flowing lithium environment O.K. Chopra and D.L. Smith . . . . .	861
* Conceptual design of cassette compact toroid reactor M. Nishikawa, K. Ikegami, M. Iwamoto, S. Iwata, A. Nakamoto, T. Narikawa, M. Onishi, E. Tachibana, A. Takahashi, S. Toda, S. Yamanaka and K. Watanabe . . . . .	
* Corrosion of austenitic and ferritic steels in a flowing Pb-17Li environment O.K. Chopra and D.L. Smith . . . . .	
<b>Section 17. Experimental Facilities, Techniques and Analysis</b>	
FMIT – Status update R.J. Burke and J.J. Holmes . . . . .	869
Application of a high energy tandem accelerator to the study of radiation damage effects on stainless steels N. Tsukuda, E. Kuramoto, Y. Aono, K. Kitajima, H. Abe, N. Yoshida, Y. Akashi, M. Takenaka, S. Mitarai and A. Isoya . . . . .	873
The High-energy dual-beam technique D. Kaletta . . . . .	878
Measurement and calculation of fast neutron spectra in water, graphite and lithium fluoride assemblies with a D-T neutron source H. Sekimoto, D. Lee, K. Hojo, T. Hojo, K. Oishi, T. Noura, M. Ohtsuka and N. Yamamuro . . . . .	882
Material testing capability of Fusion Engineering Facility, FEF H. Ida, H. Nakashima, Y. Kanda and M. Ohta . . . . .	887
Reduced activation guidelines in perspective D.G. Doran, H.L. Heinisch and F.M. Mann . . . . .	892
Development of low-activation Al alloys for D-T burning fusion device: II. Fabrication and characterization of a large plate K. Kamada, H. Kayano, Y. Baba, T. Uno, H. Yoshida and Y. Shoji . . . . .	897

14.8 MeV neutron induced activation in some metals and practical alloys K. Saneyoshi and K. Abe . . . . .	902	* Development of dual ion beam system with a single accelerator for materials studies K. Suzuki, E. Nishimura and T. Hashimoto	
Development of reduced activation alloys for fusion service H.R. Brager, F.A. Garner, D.S. Gelles and M.L. Hamilton . . . . .	907	* New dual-ion irradiation station of HIT facility at the University of Tokyo N. Igata, A. Koyama, K. Hasegawa, S. Tagawa, N. Kouchi, S. Ishino and K. Asano	
Activation product release from fusion structural materials in helium I. Maya, F. Montgomery, P. Trester, R. Burnette, W. Johnson and K. Schultz . . . . .	912	* Preparation of ferritic steel TEM specimens for HFIR irradiation K. Suzuki, T. Kanero, Y. Katano and K. Shiraishi	
		Author index . . . . .	917
		Subject index . . . . .	927
