FOREWORD	ix
CHAPTER I. SPECTRA OF EIGEN OSCILLATIONS OF A FREE PLASMA	1
1. Kinetic Equations	1
1. Self-consistent Fields	1
2. Binary Collisions	2
2. Electron Oscillations	4
1. Development of Initial Perturbation	4
2. Frequency and Damping of Langmuir Oscillations	14
3. Dielectric Permittivity Tensor of a Plasma	17
1. Dispersion Equations for Longitudinal and Transverse Oscillations	17
2. Low-Frequency Longitudinal Oscillations of a Non- Isothermal Plasma	22
CHAPTER II. SPECTRA OF PLASMA OSCILLATIONS IN A MAGNETIC FIELD	26
4. Dielectric Permittivity Tensor of a Plasma in a Magnetic Field	26
1. Components of Dielectric Permittivity Tensor	26
2. Dielectric Permittivity Tensor of a Cold Plasma	32
5. Longitudinal Oscillations of a Plasma in a Magnetic Field	35
1. Frequencies of Plasma Resonances	35
2. Effect of Thermal Motion of Electrons on High- Frequency Resonances	38
3. Effect of Thermal Motion of Particles on Low-Frequency Resonances	41
	v

Contents

6. Cyclotron and Cherenkov Damping of Electron Oscillations	43
1. Cyclotron Damping at Electron Gyro-Resonance	43
2. Cyclotron Damping at Multiple Electron Gyro-Resonance	46
3. Cyclotron Damping at Double Resonance	48
4. Cherenkov Damping of Low-Frequency Electron Oscillations	49
7. Ion-Cyclotron and Magnetohydrodynamic Waves	50
1. Low-Frequency Oscillations of a Plasma at Low Pressure	50
2. Cherenkov Damping of Low-Frequency Oscillations	53
3. Cyclotron Damping of Low-Frequency Oscillations	56
4. Cyclotron Damping at Multiple Ion Gyro-Resonance	57
8. Low-Frequency Oscillations of a Non-Isothermal Plasma in a Magnetic Field	58
1. Longitudinal Oscillations of a Non-Isothermal Plasma at Low Pressure	58
2. Magnetosonic Waves in a Non-Isothermal Plasma	61
9. Excitation of Oscillations in a Plasma by External Currents	63
1. Excitation Intensity	63
2. Excitation of Oscillations by Modulated Azimuthal Currents	64
3. Excitation of Oscillations by Modulated Axial Currents	64
CHAPTER III. STABLE AND UNSTABLE PARTICLE DISTRIBUTIONS IN A PLASMA	68
10. Interaction of a Flux of Charged Particles with Oscillations of a Free Plasma	68
1. Dispersion Equations for a Plasma-Beam System	68
2. Growing Langmuir and Low-Frequency Oscillations	71
3. Excitation of Longitudinal Oscillations by a Cold Beam	74
4. Instability of a Plasma whose Electrons are Moving Relative to the Ions	76
11. Interaction of a Flux of Charged Particles with Oscillations of a Plasma in a Magnetic Field	78
1. Excitation of Longitudinal Oscillations of a Plasma in a Magnetic Field by a Beam of Electrons	78
2. Excitation of Low-Frequency Electron Oscillations in a Plasma by a Beam of Electrons	82

Contents

3. Cyclotron Excitation of Ion-Cyclotron and Magnetohydrodynamic Waves in a Cold Plasma by a Beam of Particles	83
4. Cherenkov Excitation of Magnetosonic Waves in a Hot Plasma by a Beam of Particles	85
12. General Stability and Instability Conditions for Particle Distributions in a Plasma	86
1. Stability and Instability Criteria for Particle Distributions in a Free Plasma	86
2. Two-Beam Instability	91
3. Stability and Instability Criteria for Electron Distributions of a Plasma in a Magnetic Field	93
13. Absolute and Convective Instabilities; Amplification and Blocking of Oscillations	96
1. Criteria of Absolute and Convective Instabilities	96
2. Criteria for Amplification and Suppression of Oscillations	102
3. Non-Invariant Nature of Concepts of Absolute and Convective Instabilities	107
4. Nature of Beam Instability	107
CHAPTER IV. FLUCTUATIONS IN A PLASMA	110
14. Electromagnetic Fluctuations in an Equilibrium Plasma	110
1. Fluctuations in a Free Equilibrium Plasma	110
2. Fluctuations in an Equilibrium Plasma Located in a Magnetic Field	117
15. Fluctuations in a Two-Temperature Plasma	118
1. "Random Forces" Method	118
2. Spectral Distribution of Fluctuations	122
3. Fluctuations in a Two-Temperature Plasma Located in a Magnetic Field	125
16. Fluctuations in a Non-Equilibrium Plasma	127
1. Fluctuations in a Plasma with Stable Distribution Functions	127
2. Critical Fluctuations near the Onset of a Plasma Instability	131
3. Fluctuations in a Plasma-Beam System	133

Contents

CHAPTER V. WAVE SCATTERING AND TRANSFORMATION AND SCATTERING OF CHARGED PARTICLES IN A PLASMA	136
17. Scattering of Electromagnetic Waves in a Free Plasma	136
1. Current Causing Scattered Waves	136
2. Scattering Cross Section	144
3. Spectral Distribution of Scattered Radiation	147
4. Critical Opalescence	150
5. Scattering of Electromagnetic Waves in a Plasma-Beam System	152
18. Transformation of Transverse and Longitudinal Waves in a Plasma	153
1. Transformation of a Transverse Wave into a Longitudinal One	153
2. Transformation and Scattering of Longitudinal Waves	154
19. Incoherent Reflexion of Electromagnetic Waves from a Plasma	155
1. Coefficient of Reflexion	155
2. Spectral Distribution of Reflected Radiation	158
20. Scattering of Electromagnetic Waves in a Plasma in a Magnetic Field	161
1. Current Causing Scattered Waves	161
2. Spectral Distribution of Scattered Radiation	164
3. Scattering of Electromagnetic Waves on Alfvén Oscillations	168
21. Passage of Charged Particles through a Free Plasma	169
1. Probability of Scattering	169
2. Energy Losses of a Particle	172
22. Passage of Charged Particles through a Plasma in a Mag- netic Field	174
1. Probability of Scattering	174
2. Energy Losses of a Particle	176
3. Allowance for "Spiralling"	179
