Part I Electromagnetic Properties of a Plasma in Thermodynamic Equilibrium	
1. Basic Concepts of Plasma Physics	3
1.1 Definition of a Plasma	3
1.1.1 Plasmas in Nature	4
1.2 Plasma Parameters	4
1.2.1 Plasmas in Thermodynamic Equilibrium and Quasi-equilibrium. The Maxwell and Fermi Distribution Functions	5
1.2.2 Characteristic Values of Plasma Parameters	7
1.3 Quasi-Neutrality, Plasma Frequency and Debye Length	7
1.4 Gas Approximation and Plasma Parameter	9
1.5 Exercises	10
2. Principles of Eletrodynamics of Media with Dispersion in Space and Time	15
2.1 Equations of the Electromagnetic Field in the Medium and Boundary Conditions	15
2.1.1 Material Equations of Linear Electrodynamics	17
2.1.2 Derivation of Boundary Conditions	17
2.2 Tensor of Complex Conductivity and Dielectric Permittivity	18
2.2.1 Dispersion in Time and Space	19
2.2.2 The Case of the Isotropic Medium	20
2.2.3 The Kramers-Kronig Formulas	21
2.3 Energy of the Electromagnetic Field in the Medium	22
2.3.1 The Dispersion of the Dielectric Permittivity Tensor	24
2.3.2 Average Force Affecting the Plasma in the Inhomogeneous High-Frequency Field	26
2.4 Electromagnetic Waves in the Medium	27
2.4.1 The Case of the Isotropic Medium	28
2.4.2 Longitudinal Waves in an Anisotropic Medium	28

VIII	Contents	
2.5	Initial Value Problem	30
2.6	Boundary Value Problem	32
2.6.1	The Phase and Group Velocities of Waves	33
2.6.2	Correlation Between the Initial and Boundary Value Problems	33
2.7	Electro- and Magnetostatics	35
2.8	Exercises	37
3.	Equations of Plasma Dynamics	46
3.1	Simplest Plasma Models	46
3.1.1	The Model of Independent Particles	46
3.1.2	The Hydrodynamic Model	47
3.2	Kinetic Equation with a Self-Consistent Field	49
3.3	Boltzmann Kinetic Equation	50
3.3.1	The Fokker-Planck Equation	53
3.4	Collision Integral of Charged Particles	54
3.4.1	The Case of the Degenerate Plasma	56
3.5	Model Integral for Elastic Particle Collisions	57
3.5.1	The Case of the Degenerate Plasma	59
3.6	Discussion of the Simplest Plasma Models	60
3.6.1	Two-Fluid Hydrodynamics of a Cold Collisionless Plasma	61
3.6.2	One-Fluid Hydrodynamics of the Nonisothermal Plasma	62
3.6.3	The Hydrodynamic Description of a Degenerate Plasma	65
3.7	Exercises	66
4.	Dielectric Permittivity and Oscillation Spectra of Unmagnetized Plasmas	75
4.1	Dielectric Permittivity of a Collisionless Homogeneous Isotropic Plasma	75
4.1.1	Cherenkov Absorption and Radiation Emission of Waves	77
4.1.2	The Longitudinal and Transverse Dielectric Permittivities of an Isotropic Plasma	79
4.1.3	The Dielectric Permittivity of a Degenerate Plasma	80
4.2	Longitudinal Oscillations of a Collisionless Nondegenerate Plasma	81
4.2.1	High-Frequency Plasma Waves	81
4.2.2	Landau Damping	82
4.2.3	Ion-Acoustic Waves in a Nonisothermal Plasma	83
4.2.4	The Low-Frequency Range, Debye Screening	85
4.3	Longitudinal Oscillations in the Collisionless Degenerate Plasma	83
4.3.1	High-Frequency Plasma Waves and Zero-Point Sound	85
4.3.2	Ion-Acoustic Waves in Degenerate Plasma	87
4.3.3	Debye Screening in Degenerate Plasma	87
4.4	Transverse Waves in Collisionless Isotropic Plasmas	88
4.4.1	Transverse Electromagnetic Waves	88
4.4.2	The Anomalous Skin-Effect	89
4.5	Dielectric Permittivity and Oscillation Spectra of Weakly Ionized Plasmas with Account of Particle Collisions	90
4.5.1	Collisional Damping of Longitudinal Waves	92
4.5.2	Damping of Transverse Waves	94
4.5.3	Degenerate Plasma	94
4.6	Dielectric Permittivity and Oscillation Spectra of Fully Ionized Plasmas Taking Account of Particle Collisions	95
4.6.1	Damping of Longitudinal High-Frequency Waves	97
4.6.2	Collisional Damping of Ion-Acoustic Waves	98
4.6.3	Damping of Transverse Waves	98
4.6.4	Degenerate Plasma	98
4.7	Exercises	99
5.	Dielectric Permittivity and Oscillation Spectra of Homogeneous Magneto-Active Plasmas	110
5.1	Dielectric Tensor of the Homogeneous Collisionless Magneto-Active Plasma	110
5.1.1	Dielectric Tensor of the Quasi-Equilibrium Maxwellian Plasma	113
5.1.2	Dielectric Tensor of the Degenerate Plasma	114
5.2	Dielectric Permittivity and Oscillation Spectra of the Cold Collisionless Magneto-Active Plasma	115
5.2.1	Wave Propagation Along the Magnetic Field	116
5.2.2	Wave Propagation Across the Magnetic Field	118
5.2.3	An Arbitrary Direction of Wave Propagation	120
5.2.4	Longitudinal Oscillations of the Magneto-Active Plasma	120
5.3	Oscillations in Collisionless Magneto-Active Plasmas Taking Account of Thermal Effects	122
5.3.1	Collisionless Damping of Waves in the Magneto-Active Plasma	123
5.3.2	Spectra of Low-Frequency Slow Waves	125
5.3.3	Degenerate Plasma	127
5.4	Cyclotron Waves	128
5.4.1	Cyclotron Waves in the Nondegenerate Plasma	129
5.4.2	Cyclotron Waves in the Degenerate Plasma	130
5.5	Dielectric Tensor of Weakly Ionized Magneto-Active Plasmas Taking Account of Particle Collisions	131

5.5.1	Dielectric Tensor of the Quasi-Equilibrium Maxwellian Plasma	132
5.5.2	Degenerate Plasma	133
5.6	Dielectric Tensor of Completely Ionized Magneto-Active Plasmas Taking Account of Particle Collisions	135
5.6.1	The High-Frequency Range	135
5.6.2	The Range of Slow Waves	137
5.6.3	Degenerate Plasma	137
5.7	Electromagnetic Waves in Magneto-Active Plasmas Taking Account of Particle Collisions	138
5.7.1	Damping of Waves in the Cold Magneto-Active Plasma	138
5.7.2	Collisional Damping of Low-Frequency Waves in the Hot Magneto-Active Plasma	140
5.8	Exercises	141

Part II Electromagnetic Properties of Nonequilibrium Plasmas

6.	Interaction of Charged Beams with the Plasma	155
6.1	Dielectric Tensor of the Homogeneous Anisotropic Nonequilibrium Plasma	155
6.1.1	The Lorentz Transform of the Dielectric Tensor	158
6.2	Instability of the Plasma with Anisotropic Temperature of the Particle Components	160
6.2.1	Plasma Instability with Anisotropic Temperature in the Absence of Magnetic Field	162
6.2.2	Instability of the Magneto-Active Plasma with Anisotropic Temperature	165
6.3	Interaction of a Straight Electron Beam with the Plasma. The Cherenkov Instability	167
6.3.1	Interaction of a Straight Electron Beam with Cold Isotropic Plasma	168
6.3.2	Cherenkov Instability of the Electron Beam in the Cold Magneto-Active Plasma	170
6.3.3	The Resonance Cherenkov Amplification of Waves	172
6.3.4	The Effect of Thermal Motion on the Cherenkov Instability of the Electron Beam	173
6.4	Interaction of a Rotating Electron Beam (Beam of Oscillators) with the Plasma. Cyclotron Instability	175
6.4.1	Conditions for Resonance Cyclotron Interaction of a Rotating Beam with Electromagnetic Waves in the Plasma	177

6.4.2	Convective and Absolute Cyclotron Instabilities	180
6.4.3	Screening of the Cyclotron Radiation in the Plasma	181
6.5	Exercises	181
7.	Plasmas in an External Homogeneous Electric Field	195
7.1	The Distribution Function of the Charged Particles in an External Electric Field	195
7.1.1	Plasmas in a Strong Constant Electric Field	195
7.1.2	Runaway Electrons	196
7.1.3	The Stationary Distribution Function of Electrons in a Weak Constant Electric Field	197
7.1.4	Plasma in a High-Frequency Electric Field	199
7.2	Stability of the Nonmagnetized Plasma in an External Constant Electric Field	200
7.2.1	Buneman Instability of Nonmagnetized Plasma in Strong Electric Field	201
7.2.2	Ion-Acoustic Instability of Plasma with a Current	202
7.2.3	The Critical Velocity	203
7.2.4	The Effect of Collisions on the Development of Instabilities	204
7.2.5	The Case of the Degenerate Plasma	205
7.3	Stability of the Magnetized Plasma in an External Constant Electric Field	206
7.3.1	The Buneman Instability of the Magneto-Active Plasma	206
7.3.2	The Ion-Acoustic Instability of Plasma with a Current in a Magnetic Field	207
7.3.3	Effect of Collisions on the Development of Instabilities	209
7.3.4	The Case of Degenerate Plasma	209
7.4	The Plasma in a Superhigh-Frequency Electric Field	210
7.4.1	The Dispersion Equation for Oscillations in the Plasma in a SHF Field	213
7.4.2	High-Frequency Electro-Acoustic Oscillations	214
7.4.3	Ion Acoustic Oscillations of the Plasma in a SHF Field	215
7.4.4	Spectra of Oscillations of the Magneto-Active Plasma in a SHF Field	216
7.4.5	Oscillations of the Degenerate Plasma in a SHF Field	217
7.5	Paramagnetic Interaction of SHF Electric Fields with a Plasma	218
7.5.1	Resonant Parametric Excitation of the High-Frequency Longitudinal Oscillations of the Plasma by SHF Fields	219

7.5.2	The Effect of a Magnetic Field on the Development of the Parametric Instability of the Plasma in a SHF Field	221
7.5.3	The Ion-Acoustic Parametric Instability of the Nonisothermal Plasma	224
7.5.4	The Effect of the Magnetic Field on the Development of the Low-Frequency Parametric Instabilities	225
7.5.5	The Case of the Degenerate Plasma	225
7.6	Plasma Parametric Instability with Respect to Nonpotential Perturbations	226
7.7	Exercises	228
8.	Electromagnetic Properties of Inhomogeneous Plasmas	243
8.1	Inhomogeneous Media Without Spatial Dispersion. Approximation of Geometrical Optics	243
8.1.1	Field Equations for an Inhomogeneous Medium Without Spatial Dispersion	244
8.1.2	The Method of Geometrical Optics and the WKB Method	245
8.1.3	The Bohr-Sommerfeld Quasiclassical Quantization Rules	249
8.2	Approximation of Geometrical Optics for Inhomogeneous Media with Spatial Dispersion	251
8.2.1	Eikonal Equation for an Inhomogeneous Medium with Spatial Dispersion	252
8.2.2	Quantization Rules	253
8.3	Dielectric Tensor of Weakly Inhomogeneous Plasmas in the Approximation of Geometrical Optics	254
8.3.1	Distribution Function for the Equilibrium Inhomogeneous Plasma	254
8.3.2	Magnetic Confinement of the Inhomogeneous Plasma	256
8.3.3	The Dielectric Tensor of Weakly Inhomogeneous Plasma	257
8.3.4	The Larmor Drift Frequency	259
8.3.5	The Case of the Degenerate Plasma	260
8.4	Spectra of HF-Oscillations in Weakly Inhomogeneous Plasma	261
8.4.1	Transverse Oscillations of Weakly Inhomogeneous Isotropic Plasma	261
8.4.2	The Langmuir Oscillations. The Tonks-Dattner Resonances	263
8.4.3	Ion-Acoustic Oscillations of the Inhomogeneous Isotropic Plasma	264
8.4.4	The Case of the Degenerate Isotropic Plasma	265

8.4.5	Oscillations of the Weakly Inhomogeneous Magneto-Active Plasma	266
8.5	Drift Oscillations of a Weakly Inhomogeneous Collisionless Plasma	268
8.5.1	Larmor Drift in the Inhomogeneous Plasma	269
8.5.2	The Dispersion Equation for Drift Oscillations	271
8.5.3	Spectra of the Fast Long-Wavelength Drift Oscillations	272
8.5.4	Universal Instability of the Inhomogeneous Plasma	273
8.5.5	Spectra of the Slow Long-Wavelength Drift Oscillations	273
8.5.6	The Drift-Dissipative and Drift-Temperature Instabilities	274
8.6	Influence of Charged Particle Collisions on the Spectra of Drift Oscillations in Weakly Inhomogeneous Plasmas	275
8.6.1	Weakly Ionized Plasma	275
8.6.2	Completely Ionized Plasma	278
8.6.3	Spectra of the Hydrodynamic Drift-Dissipative Oscillations	281
8.6.4	The Effect of Ion Collisions on the Development of Drift Oscillations	283
8.7	Convective Instabilities of the Inhomogeneous Plasma	285
8.7.1	Inhomogeneous Plasma in a Curvilinear Magnetic Field	286
8.7.2	The Gravitational Drift of Plasma Particles	287
8.7.3	Dielectric Permittivity of the Inhomogeneous Plasma in a Curvilinear Magnetic Field	288
8.7.4	The Flute (Interchange) Instability	289
8.7.5	The Current-Convective Instability	290
8.7.6	The Effect of Particle Collisions on Convective Instabilities of the Plasma	291
8.8	Exercises	292
9.	Linear Electromagnetic Phenomena in Bounded Plasmas	302
9.1	Surface Electromagnetic Waves in Semi-Bounded Plasmas	302
9.1.1	Solution of the Vlasov Equation for the Semi-Bounded Isotropic Plasma	303
9.1.2	Solution of Field Equations	305
9.1.3	Surface Impedance	308
9.1.4	Dispersion Equation for Surface Waves	308
9.1.5	Surface Waves in Cold Semi-Bounded Plasma	309
9.1.6	Cherenkov Damping of Surface Waves	310
9.1.7	Surface Ion-Acoustic Waves	311
9.2	Instability of the Boundary of Magnetically Confined Plasma	313
