

Table of Contents

Preface	3
1 General Properties of a Plasma	7
<i>Conditions for Plasma Existence, 8</i>	
<i>Occurrence of Plasma, 13</i>	
<i>The Particles in a Plasma, 15</i>	
<i>Particle Interactions, 22</i>	
<i>Particle Distributions, 26</i>	
2 Plasma as a Conducting Fluid and Wave-Propagating Medium	30
<i>Magnetic Field Effects, 31</i>	
<i>Instabilities, 38</i>	
<i>Plasma Waves, 47</i>	
3 Laboratory Plasmas	58
<i>Ionization and Breakdown, 59</i>	
<i>High Temperature Plasmas, 69</i>	
<i>Some Plasma Diagnostic Techniques, 76</i>	
<i>Some Laboratory Experiments, 84</i>	
<i>Controlled Thermonuclear Fusion Experiments, 96</i>	
4 Naturally Occurring Plasmas	103
<i>The Sun, 104</i>	
<i>The Solar Wind, 117</i>	
<i>Perturbations of the Steady Wind, 125</i>	
<i>The Ionosphere, 134</i>	
<i>Plasma Beyond the Solar System, 137</i>	
Bibliography	151
Index	153
