

Table of contents

CHAPTER I:	A FREE BOUNDARY PROBLEM: THE AXISYMMETRIC EQUILIBRIUM OF THE PLASMA IN A TOKAMAK	1
I.1:	Thermonuclear Fusion and the Tokamak Device	1
I.2:	Mathematical Modelling of Axisymmetric Equilibrium for the Plasma in a Tokamak	4
I.3:	Linearization of the Problem	23
I.4:	Numerical Methods of Solution	30
I.5:	Numerical Results. Applications to TFR, JET, TORE Supra and INTOR	41
I.6:	Some Comments on the Numerical Methods of I.4, Motivated by the Test Cases of I.5	69
CHAPTER II:	STATIC CONTROL OF THE PLASMA BOUNDARY BY EXTERNAL CURRENTS	73
II.1:	Formulation of the Various Control Problems	74
II.2:	Introduction of the Lagrangian and Optimality System	80
II.3:	Numerical Methods of Solution	89
II.4:	Numerical Results: Control of the Radial Position, Elongation and Shape of the Plasma	96
CHAPTER III:	EXISTENCE AND CONTROL OF A SOLUTION TO THE EQUILIBRIUM PROBLEM IN A SIMPLE CASE	113
III.1:	The Equations for the Simplified Model	113
III.2:	An Ancillary Problem	118
III.3:	Existence of Solutions to the Problem with Limiter	131
III.4:	Control of the Plasma Shape	134
CHAPTER IV:	STUDY OF EQUILIBRIUM SOLUTION BRANCHES AND APPLICATION TO THE STABILITY OF HORIZONTAL DISPLACEMENTS /	151
IV.1:	Determination of Equilibrium Solution Branches by a Continuation Method: The Problem (P_{Λ})	152
IV.2:	Application of the Method of Control of Radial Position to the Study of Equilibrium Solution Branches	165
IV.3:	Stability of Horizontal Displacements of the Plasma	171

CONTENTS

CHAPTER V:	IDENTIFICATION OF THE PLASMA BOUNDARY AND PLASMA CURRENT DENSITY FROM MAGNETIC MEASUREMENTS	185
VI.1:	Rapid Identification of the Plasma Boundary by Solving the Cauchy Problem in a Vacuum	187
VI.2:	Parametric Identification of the Plasma Current Density from Magnetic Measurements	201
VI.3:	Applications to TORE Supra and JET	214
CHAPTER VI:	EVOLUTION OF THE EQUILIBRIUM AT THE DIFFUSION TIME SCALE	239
VI.1:	The Equations of Equilibrium and Transport	240
VI.2:	Numerical Methods	266
VI.3:	Application to the Tokamak TORE Supra	277
CHAPTER VII:	EVOLUTION OF THE EQUILIBRIUM OF A HIGH ASPECT-RATIO CIRCULAR PLASMA; STABILITY AND CONTROL OF THE HORIZONTAL DISPLACEMENT OF THE PLASMA	291
VII.1:	The Shafranov Theory of Equilibrium	292
VII.2:	Modelling Ensemble of the Plasma and External Circuits Configuration in TFR	310
VII.3:	Stability and Control of Horizontal Displacements of the Plasma	333
