List of contributors *page* ix

Preface xi

List of symbols, notation, fundamental equations and numerical values xiii

List of books by Culham Summer School lecturers xviii

Introduction by R. O. Dendy 1

1 Plasma particle dynamics *R. J. Hastie* 5

2 Plasma kinetic theory *J. A. Elliott* 29

3 Waves in plasmas *J. P. Dougherty* 55

4 Magnetohydrodynamics *K. I. Hopcraft* 77

5 Turbulence in fluids and fusion plasmas *F. A. Haas* 103

6 Nonlinear phenomena and chaos in fluid flows *T. J. Mullin* 129

7 Computational plasma physics *J. W. Eastwood* 167

8 Tokamak experiments *M. R. O'Brien and D. C. Robinson* 189

9 Space plasma physics
Part I. Basic processes in the solar system *D. A. Bryant* 209
Part II. Microprocesses *R. Bingham* 233

10 Solar plasmas *A. W. Hood* 267

11 Gravitational plasmas *J. J. Binney* 291

12 Laser-produced plasmas *A. R. Bell* 319

13 Industrial plasmas *P. C. Johnson* 339

14 Transport in magnetically confined plasmas *T. E. Stringer* 369

15 Radio-frequency plasma heating *R. A. Cairns* 391

16 Boundary plasmas *G. McCracken* 411

17 How to build a tokamak *T. N. Todd* 443

18 Survey of fusion plasma physics *R. S. Pease* 475
