

# CONTENTS

SYMBOLS, xi

## CHAPTER 1 INTRODUCTION, 1

- 1.1 Ionized Gases and Plasmas, 1
- 1.2 Quasi-neutrality of Plasmas, 3
- 1.3 Characteristics of Charged Particle Motion in Plasmas, 7
- 1.4 Plasma Parameters, 10

## CHAPTER 2 COLLISIONS IN PLASMAS, 16

- 2.1 Application of Conservation Laws to Particle Collisions, 16
- 2.2 Methods for Description of Collisions, 23
- 2.3 Integral Characteristics of Collisions, 32
- 2.4 Elastic Collisions between Charged Particles, 37
- 2.5 Elastic Collisions of Electrons with Atoms, 43
- 2.6 Elastic Collisions of Ions with Atoms, 50

- 2.7 Inelastic Collisions of Electrons with Atoms, 54
- 2.8 Ionization on Collisions of Electrons with Atoms, 59
- 2.9 Inelastic Collisions of Ions with Atoms, 63
- 2.10 Electron–Ion Collisional Recombination, 66
- 2.11 Interaction of Charged Particles with Solid Surfaces, 71

**CHAPTER 3 KINETIC EQUATIONS FOR CHARGED PARTICLES, 77**

- 3.1 Distribution Functions, 77
- 3.2 Kinetic Equations, 81
- 3.3 Collision Term of Kinetic Equations, 85

**CHAPTER 4 EQUILIBRIUM PLASMAS, 93**

- 4.1 Distribution Function in Equilibrium Plasmas, 93
- 4.2 Finding Equilibrium Distribution Function, 97
- 4.3 Ionization Equilibrium, 99
- 4.4 Partial Equilibrium in Plasmas, 105

**CHAPTER 5 DISTRIBUTION FUNCTION OF CHARGED PARTICLES  
IN ELECTRIC FIELD, 108**

- 5.1 Effect of Electric Field on Charged Particle Velocity Distribution, 108
- 5.2 Method for Solving Kinetic Equation, 110
- 5.3 Collision Integrals for Electrons, 115
- 5.4 Distribution Function of Electrons in Electric Field with Determining Effect of Elastic Electron–Atom Collisions, 122
- 5.5 Effect of Inelastic Collisions on Electron Distribution Function, 127
- 5.6 Effect of Electron–Electron Collisions on Electron Distribution Function, 135
- 5.7 Effect of Magnetic Field on Electron Distribution Function, 140
- 5.8 Electron Distribution Function in Alternating Electric Field, 146
- 5.9 Ion Distribution Function in Electric Field, 150

**CHAPTER 6 DISTRIBUTION FUNCTION MOMENTS EQUATIONS, 155**

- 6.1 Distribution Function Moments, 155**
- 6.2 Derivation of Moments Equations, 159**
- 6.3 Equations of Motion and Particle Balance of Plasma Components, 165**
- 6.4 Energy Balance and Heat Flux Equations, 173**

**CHAPTER 7 TRANSPORT PROCESSES IN PLASMA WITHOUT MAGNETIC FIELD, 181**

- 7.1 Charged Particle Directed Motion and Energy Transport in Weakly Ionized Plasma, 181**
- 7.2 Electron Mobility, Diffusion, Thermal Conductivity Coefficients, 188**
- 7.3 Mechanism of Transfer Processes, 192**
- 7.4 Ambipolar Diffusion, 197**
- 7.5 Charged Particle and Energy Balance Equations for Weakly Ionized Plasmas, 202**
- 7.6 Charged Particle and Energy Balance in Stationary Gas Discharge Plasmas, 208**
- 7.7 Ionization Instability, 215**
- 7.8 Plasma Decay, 222**
- 7.9 Directed Motion in Highly Ionized Plasmas, 226**
- 7.10 Energy Transfer in Highly Ionized Plasmas, 231**
- 7.11 Electron "Runaway", 234**

**CHAPTER 8 MOTION OF CHARGED PLASMA PARTICLES IN MAGNETIC FIELD, 241**

- 8.1 Some Data on Static Magnetic Fields, 241**
- 8.2 Charged Particle Motion in Homogeneous Magnetic Field, 249**
- 8.3 Charged Particle Drift in Homogeneous Magnetic Field, 252**
- 8.4 Charged Particle Motion in Slowly Varying Magnetic Field, 257**
- 8.5 Confinement of Charged Particles by Some Magnetic Configurations, 262**
- 8.6 Diamagnetic Effect in Plasmas, 269**

- 8.7 Plasma Polarization in Electric Field Perpendicular to Magnetic Field, 274
- 8.8 Plasma Motion Across Magnetic Field, 276

CHAPTER 9 TRANSPORT PROCESSES IN MAGNETIC FIELD, 280

- 9.1 Directed Velocity and Heat Flux of Charged Particles of Weakly Ionized Plasmas in Magnetic Field, 280
- 9.2 Transverse Coefficients of Electron Mobility, Diffusion, and Thermal Conductivity, 287
- 9.3 Mechanism of Transport of Charged Particles and Their Energy Across Strong Magnetic Field, 291
- 9.4 Ambipolar Diffusion and Balance of Charged Particles in Weakly Ionized Plasmas in Magnetic Field, 301
- 9.5 Directed Motion of Charged Particles of Highly Ionized Plasmas Across Magnetic Field, 308
- 9.6 Transverse Energy Transport in Highly Ionized Plasmas, 322
- 9.7 Transport in Toroidal Magnetic Configurations, 327
- 9.8 Drift Instabilities and Anomalous Diffusion of Charged Plasma Particles in Magnetic Field, 336

CHAPTER 10 PLASMA CONFINEMENT BY MAGNETIC FIELD, 346

- 10.1 Magnetohydrodynamic Equations, 346
- 10.2 Plasma Equilibrium in Magnetic Field, 352
- 10.3 Stability of Plasma Confinement by Magnetic Field, 358
- 10.4 Stability of Plasma Boundary in Magnetic Field, 362
- 10.5 Equilibrium and Stability of Current-Carrying Plasma Column, 374
- 10.6 Equilibrium and Stability of Toroidal Plasma Column, 385

BIBLIOGRAPHY, 397
