|-----------------------------------------------------------------------------|------|
| <i>Editorial preface</i> .....                                              | vii  |
| <i>Preface to volumes 1 and 2 on Basic Plasma Physics</i> .....             | viii |
| <i>Contents</i> .....                                                       | ix   |
| <i>Introduction</i> .....                                                   | xi   |
| <br>                                                                        |      |
| <i>Part 1. Plasma Description, Elementary and Radiative Processes</i> ..... | 1    |
| 1.1. Charged particle motion in electromagnetic fields .....                | 3    |
| <i>M.S. Rabinovich</i>                                                      |      |
| 1.2. Elementary nonradiative processes .....                                | 49   |
| <i>A.V. Eletsky and B.M. Smirnov</i>                                        |      |
| 1.3. Radiation processes in plasmas .....                                   | 73   |
| <i>H.R. Griem</i>                                                           |      |
| 1.4. MHD description of plasma .....                                        | 115  |
| <i>R.M. Kuksrud</i>                                                         |      |
| 1.5. Collisional transport in plasma .....                                  | 147  |
| <i>F.L. Hinton</i>                                                          |      |
| <br>                                                                        |      |
| <i>Part 2. Oscillations and Waves</i> .....                                 | 199  |
| 2.1. Linear wave propagation in ideal magnetohydrodynamics .....            | 201  |
| <i>H. Weitzner</i>                                                          |      |
| 2.2. Kinetic theory of waves .....                                          | 243  |
| <i>V.N. Oraevsky</i>                                                        |      |
| 2.3. Theory of fluctuations in plasma .....                                 | 279  |
| <i>C.R. Oberman and E.A. Williams</i>                                       |      |
| 2.4. Propagation and mode-conversion for waves in nonuniform plasmas ..     | 335  |
| <i>T.H. Stix and D.G. Swanson</i>                                           |      |
| 2.5. Geometric optics in space and time varying plasmas .....               | 367  |
| <i>I.B. Bernstein and L. Friedland</i>                                      |      |

|                                                                                          |         |
|------------------------------------------------------------------------------------------|---------|
| <i>Part 3. Instabilities</i> .....                                                       | 419     |
| 3.1. The variational principle for problems of ideal magnetohydrodynamic stability ..... | 421     |
| <i>I. B. Bernstein</i>                                                                   |         |
| 3.2. Space-time evolution of plasma instabilities—absolute and convective .....          | 451     |
| <i>A. Bers</i>                                                                           |         |
| 3.3. Kinetic waves and instabilities in a uniform plasma .....                           | 519     |
| <i>R. C. Davidson</i>                                                                    |         |
| 3.4. Instabilities in inhomogeneous plasma .....                                         | 587     |
| <i>A. B. Mikhailovsky</i>                                                                |         |
| 3.5. Resistive instabilities and field line reconnection .....                           | 611     |
| <i>R. B. White</i>                                                                       |         |
| <br><i>Part 4. Theory of Weakly Turbulent Plasma</i> .....                               | <br>677 |
| Introduction. Weak plasma turbulence approximation .....                                 | 679     |
| <i>A. A. Galeev and R. Z. Sagdeev</i>                                                    |         |
| 4.1. Wave-particle interaction .....                                                     | 683     |
| <i>A. A. Galeev and R. Z. Sagdeev</i>                                                    |         |
| 4.2. Wave-wave interaction .....                                                         | 699     |
| <i>A. A. Galeev and R. Z. Sagdeev</i>                                                    |         |
| 4.3. Wave-particle-wave interaction .....                                                | 713     |
| <i>A. A. Galeev and R. Z. Sagdeev</i>                                                    |         |
| <br>Author index .....                                                                   | <br>733 |
| Subject index .....                                                                      | 743     |
